# The Penn State

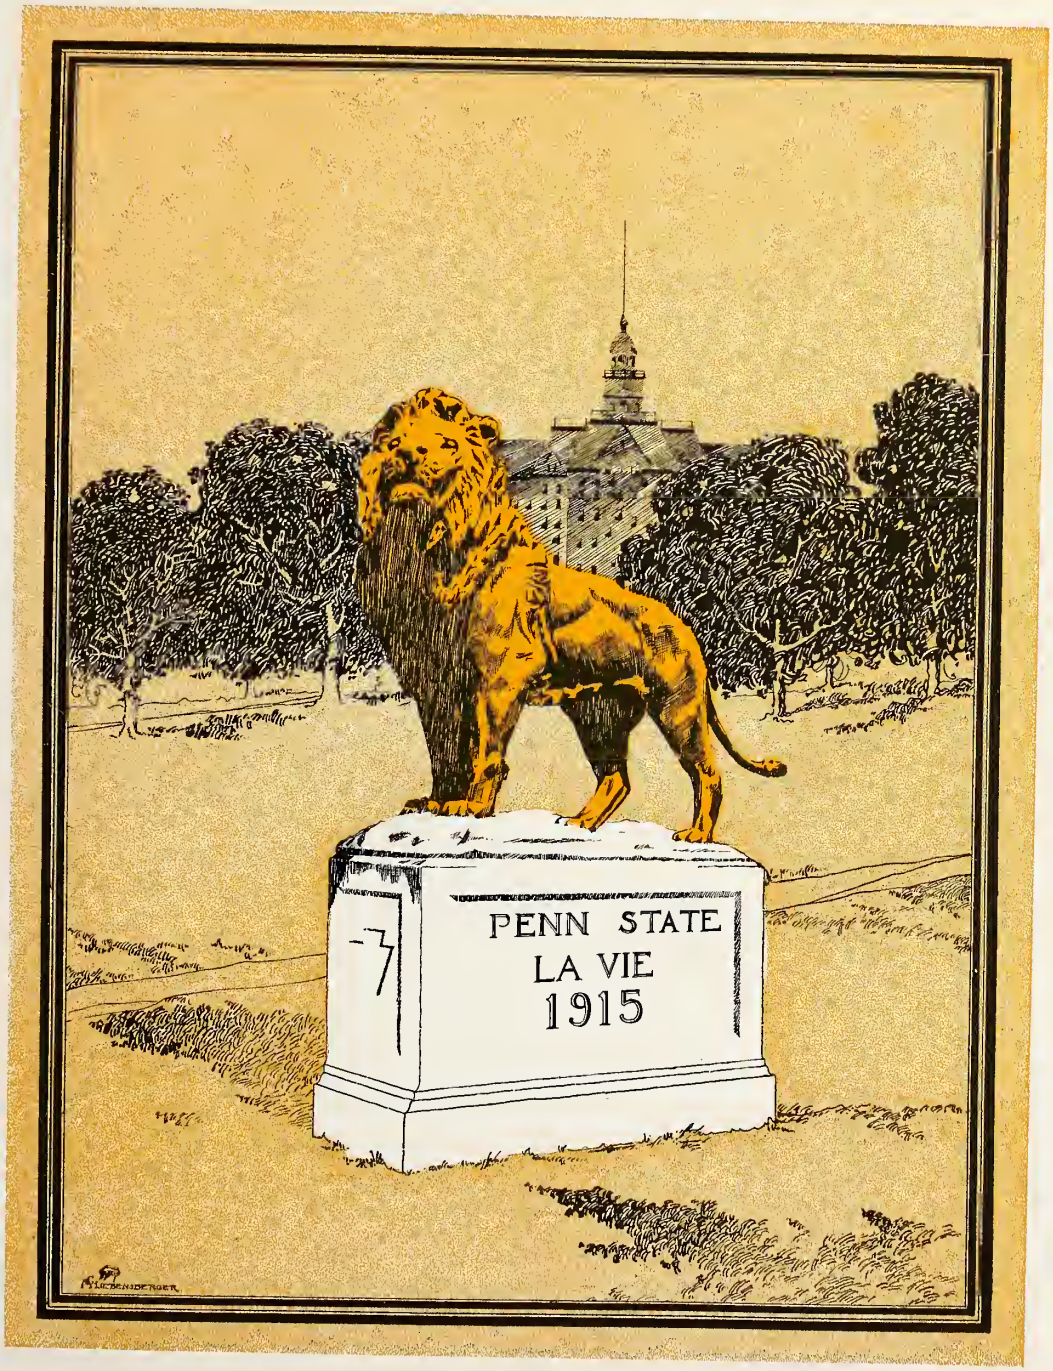

# La Vie

## Class of Nineteen-fifteen

### Courage

*Be not dismayed when conquered in the fight;*
*Arise and yet arise and face the field;*
*Fight on though in the dust; think not of flight;*
*The laurel comes to him who will not yield.*

*—Fred Lewis Pattee*

PENN STATE
LA VIE
1915

# Foreword

To the alumnus who remembers it, to the student who lives it, to the youth who looks forward to it, and to all who are interested in it, we offer this brief epitome of Penn State Life. If it awake one cherished memory, enable one brother to attune himself a little more closely with us, or paint one new and glowing color in youth's bright vision, it will have more than accomplished its mission.

To

# Joseph Moody Villard

our wise counsellor
and Christian friend this book is

J. M. Willard

# Joseph M. Willard, B.A., M.S.

A Biographical Sketch by Fred Lewis Pattee

JOSEPH MOODY WILLARD is of the ninth generation in America of the descendants of Major Simon Willard who left Kent County, England, some time before 1634 to settle at Cambridge in the New Colony of Massachusetts Bay. This early pioneer was a man of commanding power, a man remarkable even in that iron first generation in New England. He was the leading spirit in the company that bought from the Indians the now celebrated township of Concord, Massachusetts, and in 1635, with the Reverend Peter Bulkeley and others he made the first settlement there. He was the earliest, and for many years the only, representative of the town in the General Court, and so distinguished became his services in this body that in 1672 he was granted by the government an estate in Groton township as a partial compensation.

From this sturdy Puritan leader and his wife, Mary Dunster, a sister of the Reverend Henry Dunster, the first President of Harvard College, has descended one of the strong families of New England. Samuel Willard, the second son of the pioneer, was President of Harvard from 1701 to 1707, and all of the other descendants during the two centuries have been men of force and character.

The New Hampshire branch of the family began with Stedman Willard of the seventh generation, who went to Orford on the Connecticut in the early part of the nineteenth century and entered the store of John B. Wheeler as clerk. Later he purchased the business and for many years was the leading man of the region, giving of his time and means unsparingly for the furtherance of the religious and civic welfare of his community. He married Mary Wheeler, daughter of the well known benefactor of Dartmouth College. His fifth son, Isaac Willard, born in 1832, continued his father's business and the ancestral tradition of sturdy honesty and active efficiency. For many years he was the leading merchant and man of affairs of a wide region.

Joseph Moody Willard, the son of Isaac Willard and Mary Serle Willard, was born in Orford, New Hampshire, February 1, 1865. His boyhood was a happy one. He attended the sturdy New England type of school which flourished in his day, and he supplemented this schooling with that most practical of training for boys, general work in the country store and the post office of his father. In his sixteenth year he entered the Academy at St. Johnsbury, Vermont. Two years later, in 1883, he was graduated with honors, fitted in Greek, Latin, Mathematics, and the other branches required at that time to enter any of the colleges of New England. Naturally, he chose Dartmouth. The family history had been closely connected with the college in its early days and St. Johnsbury was famous for its well-fitted men, almost all of whom went to Dartmouth; and, furthermore, no New Hampshire man of the earlier days but believed that the college had in it something of the personality and the granite strength of the old Mountain State.

Professor Willard's college course was a distinguished one. He joined the Delta Kappa Epsilon fraternity, at that time the leader in the college in matters of scholarship and culture; he took from the first high scholastic rank in a class conspicuous for its brilliant scholarship; and he was graduated in June, 1887, with final honors in Mathematics, **cum laude,** and with Phi Beta Kappa standing. He was a leading spirit in the Y. M. C. A. and was a delegate at Northfield during that famous session when the student volunteer movement was inaugurated.

During the summers of 1886 and 1887 he was a member of the United States Coast and Geodetic Survey corps that located the boundary line between New Hampshire and Massachusetts. In the September following he left this work to become instructor in Mathematics in Pinkerton Academy, Derry, New Hampshire. After three years of successful work here, he resigned to enter Johns Hopkins University, where for the next three years—1890-93—he was scholar, fellow, and fellow-by-courtesy, with Mathematics as his major subject.

He came to the Pennsylvania State College as Assistant Professor of Mathematics in the autumn of 1893. It was in the foundation-laying period of the college. The students in the four regular classes numbered less than 200. There were twenty-three seniors. But one student in the institution was enrolled in the agricultural course. Penn State as it exists today was a dream that not even President Atherton had dreamed. As we look back today we see that the period was an enormously significant one. It offered opportunities to the men who had faith enough in the future of the college to remain with it and give themselves unselfishly to its upbuilding "to satisfy," in the words of President Atherton, "the highest ideals of any man as an educator."

On the death of the lamented Professor Josiah Jackson in October, 1893, Professor Willard was made head of the Department of Mathematics, a position which he has filled with conspicuous ability during the twenty-one years that have followed. The Department as it exists today is largely his creation. He has seen his instructional force grow from two to twelve; he has established a course in pure Mathematics and has seen his graduates holding strong positions in other institutions; and he has built firm foundations for all the important applied mathematics of the technical courses. He has excelled as a teacher. His scholarly standards are broad and sane. He is an authority on branches of his subject. *American Men of Science* rates him as an authority on "differential equations of mechanics, Laplace's equation, and electrical phenomena." He is a member of the American Mathematical Society.

The work of Professor Willard, however, has been by no means confined to his own department. His activities have always been as broad as the college itself. He caught early the vision of President Atherton, and with it his unselfish zeal for the building up in Pennsylvania of a commanding college for the people. He had faith enough in the college to remain with it and give his best years to it, even though at times the outlook seemed uncertain. As a member and as Secretary of the Council of Administration from its beginnings he has been closely connected with all the vital measures of the period of transition. He has been ever a conservative, constructive force, standing always uncompromisingly for sound scholarship, for regularity and order, and for progress toward all that is best in education and character.

He is a charter member of the Phi Kappa Phi fraternity; he has been the only secretary the local organization has ever had; and he has at least once been the representative at the general conclave of all the chapters. For many years he has been the Corresponding Secretary of the Y. M. C. A. organization of the college, a position which has connected with it much of labor and anxiety. Much of the burden of raising finances during that period when the opportunities and responsibilities of the society grew so much faster than its visible means of support, fell upon him. He is a man of deep religious convictions and of sane and simple Christian life. His influence on the student body has been a deep one; and his life in the community has been uplifting and helpful. He is a deacon in the Presbyterian Church, as his father and grandfather before him had been deacons in the Congregational Society.

He was married in June, 1897, to Miss Henrietta Norris Mann of Baltimore. Two children have been born into their home: Mary Louisa and Edward Lawrence.

No better summary may be given of the life of the man than that pronounced by President Nichols of Dartmouth, when in June, 1913, he admitted him to the degree of Master of Science: "Joseph Moody Willard, student of pure and applied Mathematics, gifted teacher, wise counselor."

# The Present College Year

THE year was most happily inaugurated by the receipt of the largest appropriation the institution ever received from the state—the largest by fifty per cent. In this connection two names are worthy of remembrance: the one, Governor James A. Beaver, who signed the first regular appropriation bill, June 3, 1887, and the other, Governor John K. Tener, who signed the latest and largest appropriation bill, July 25, 1913. Between these two dates, there have been regular and systematic appropriations made at every session of the Legislature.

The recent appropriation carried an item providing for such buildings within a given limit as would meet with the approval of the Governor. He has approved of the completion of the Horticultural Building, the erection of a Stock Pavilion, Dairy Barn, Mining Building, Chemistry Building, Engineering Unit, Woman's Dormitory, and a wing of the Liberal Arts Group. Never in the history of the college have so many additions been made to the plant in one year. These buildings are so badly needed that their capacity will be exhausted as soon as they are occupied. That is a sad feature of unusual growth. Another history-making event of the legislative year was the Extension bill. For the first time, the Legislature passed a separate bill for the support of the Extension work of the college, especially along Agricultural and Home Economic lines.

The property under control of the college has been increased during the year by the Musser and Thompson farms lying to the east of the campus. This means not only ground for experimental work of all kinds, but the absolute control of the Thompson Spring and the right to develop its water power. Some day the field about the Spring will be a park containing a lake and with a water power plant below the old furnace.

A few years since the college was soliciting students; this year the Registrar, by order of the Board of Trustees, limited the incoming Freshmen to six hundred. Over two hundred men who were prepared to enter were barred by this limitation, and the basis of restriction was scholarship—those being admitted who showed by certificate or examination the best preparation. This action has raised the standard of the college and has given us a Freshman class of six hundred, of whom not ten have entrance conditions. It is doubtful whether this standing of Freshmen is duplicated in any college.

The year has been marked by many additions to the Faculty, of whom eight have the doctorate degree. This is some indication of a better preparation of teachers and a higher standard of instruction. The attitude of faculty to students and *vice versa* continues on a mutually friendly footing and is greatly aided by the system of student government. As long as the faculty occupied the relations of police and judge, there was antagonism and the matching of wits against each other, where mutual helpfulness should exist. Absolute self-government by the student body is of necessity impossible; but in few colleges is the system so fully developed as at Penn State.

Prior years have seen changes in college customs largely contributing to the betterment of the reputation of the college among the people; but none can be compared in its effect with the abolition of indiscriminate hazing. College work in the opening days is no longer hampered by horseplay; magnified accounts of injuries and cruelty no longer find an excuse in the newspapers; and parents no longer hesitate to patronize the college as being a place where rioting and barbarity prevail. Penn State has joined the larger institutions in this movement which will free the colleges from a taint of long standing.

At this writing, there is renewed talk of two additional changes, one of which will place the college among the leading institutions, and the other in advance of most institutions. The requirement of a year's residence before participation in intercollegiate athletics is now generally in force at the best institutions; the honor system in examinations, tests and chapel attendance is rapidly being adopted in the best colleges and universities.

In my opinion, the distinctive mark of the year is the steady growth in student sentiment for a higher standard of daily life, for cleaner living, for public service, and for the things that are really worth while in life. There is an increasing desire on the part of technical students to acquire more of the cultural element, to develop a taste for music, literature, art and science as making up the all-around educated man. A state college, without denominational ties, must prove that it takes care of the spiritual nature of its students, and that it develops character while training minds. A large share of credit for the unusual increase in attendance at this college, as well as the growth of the college in the favor of the people of the Commonwealth, I unhesitatingly attribute to the religious activity and spiritual concern manifest among the student body.

After an experience of five years in The Pennsylvania State College, I venture to formulate a policy for the future. It should be the aim of the institution:

1. Not to aspire to the much-abused title of "university," since the country location prohibits professional and graduate schools; but to aspire to be the most thorough and, perhaps, largest college in the United States.

2. To cultivate the family feeling of unity among students and faculty so readily fostered by the isolated location; to make mutual helpfulness the keynote of college spirit.

3. To take advantage of the isolation to work out the relation of mind-making to character-making; to devise further means of developing fixed habits for life during a four years' association and while pursuing a course of study for material purposes.

4. To modify and adjust the courses of study to the shifting demands of public life and occupation; at the same time not to lose sight of the cultural and the higher ideals of life.

5. To hold fast to fixed courses of study for undergraduate courses with set tasks for preparation, daily recitation and regular habits of work.

6. To search for every channel of usefulness to the people of Pennsylvania; to benefit in some way every taxpayer of the state; and to make the college the vital center of radiation for the information and resulting progress of the Commonwealth.

7. To bind together all persons who have at any time attended the college into a brotherhood of devotion to the institution, a jealous zeal for her good name and a realization that her reputation is simply a reflection of theirs.

8. To use every effort to foster state pride in the college and not to be content until a permanent means of income is provided by the state.

10. To continue the policy of uniform support for all schools and departments of the college, taking into consideration the number of students and consequent needs.

This summary of the past and prophecy for the future represents simply the personal view of an employee of the college; the students are the real owners of the institution and they alone can make or mar its progress.

EDWIN E. SPARKS.

# BLUE·AN

Where the vale of old Mt. Nittany
Meets the eastern sky,
Proudly stands our Alma Mater,
On her hill-top high.

When the evening twilight deepens,
And the shadows fall,
Lingers long the golden sunbeam
On the western wall.

# D·WHITE

When the shades of life shall gather,
Dark thy heart may be;
Still the rays of youth and love
Shall linger long o'er thee.

Flag we love, Blue and White!
Float for aye, Old Penn State o'er thee!
May thy sons be leal and loyal
To thy memory.

GENERAL BEAVER

# In Memoriam

## James Addams Beaver

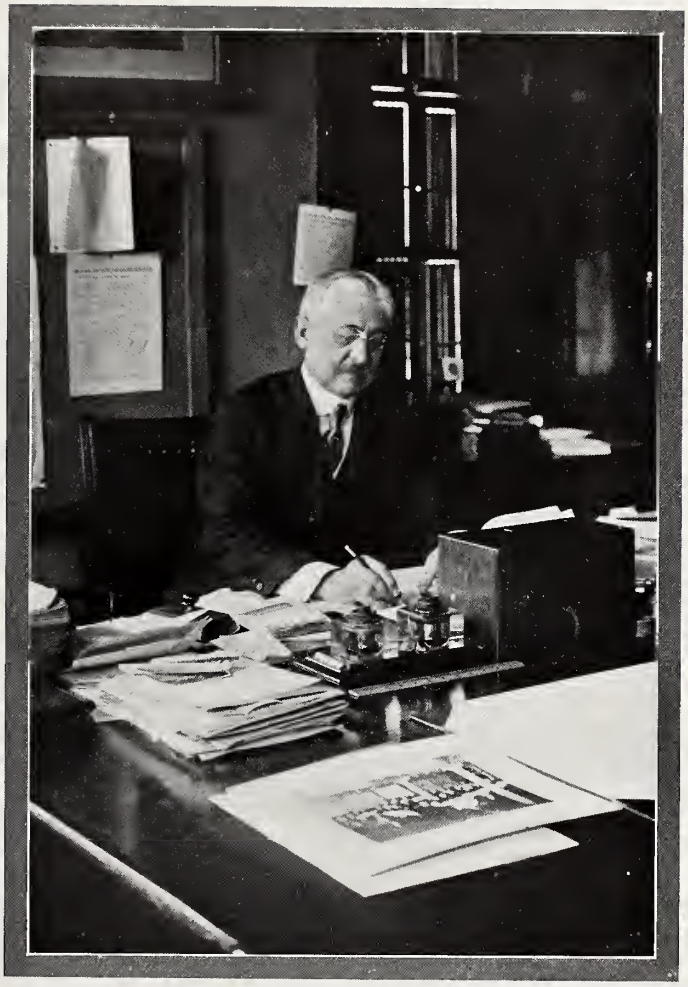

**for forty years a member and for sixteen years President of the Board of Trustees of The Pennsylvania State College**

A man of vision, intimately associated with the early struggles of a new type of educational institution, he gave to its development untiring energy, wise counsel, the influence of a forceful personality, an abounding optimism and an unfaltering faith in its mission and its future. As lawyer, soldier, governor and judge, he rendered distinguished service to his State and to the Nation, but his pre-eminent contribution to the public welfare was made in promoting the establishment on enduring foundations of a public institution for the training of youth to render service in their turn as citizens of an industrial democracy.

His devotion to the College was of the heart even more than of the head. He served it because he loved it. He was the students' friend. To every student and alumnus of Penn State, the remembrance of his Christian character and of his life of unselfish devotion to high ideals will be a continuing inspiration to more loyal service of the College, of the State and of mankind.

ENTRANCE TO COLLEGE

PRESIDENT EDWIN ERLE SPARKS

# General Faculty

## Dr. Arthur Holmes, Dean

Born Cincinnati, Ohio, 1872. B.A., Hiram College, Ohio, 1899; Pastor of Sixth Christian Church, Philadelphia, 1899-1903; Graduate student in Semitics, Hebrew Antiquities, Ethics, Philosophy and Psychology at University of Pennsylvania, 1899-1904; Fellow in Philosophy, University of Pennsylvania, 1904-05; Pastor Memorial Christian Church, Ann Arbor, Michigan, 1904-10; Assistant Instructor, and Auditor in Philosophy, University of Michigan, 1904-05; Director of Religious and Educational Work, P. R. R. Y. M. C. A., 1905-09; Ph.D., University of Pennsylvania, 1908; Instructor in Psychology, University of Pennsylvania, 1908-1911; Assistant Director of Psychological Clinic, University of Pennsylvania, 1908-12; Assistant Professor of Psychology, University of Pennsylvania, 1911-1912; Dean of the Faculties, Penn State College, 1912-14. Author of "The Decay of Rationalism," "The Conservation of the Child," "The Principles of Character-Making."

MAIN BUILDING

# School of Agriculture

## Ralph L. Watts, Dean

Born 1869. B.S. Penn State, 1890; M. S. Penn State; Horticulturist, Tennessee Experiment Station, 1890-99; Secretary Tennessee Experiment Station and head of Farmers' Institute Work, 1895-99; Commercial Horticulturist at Johnstown, Pa., 1899-1908; Ex-President of Vegetable Growers' Association of America; Head of the Department of Horticulture, Penn State College, 1908-12; Acting Dean, February, 1912, to February, 1913; Dean, 1913. Author "Vegetable Gardening," and "Vegetable Forcing."

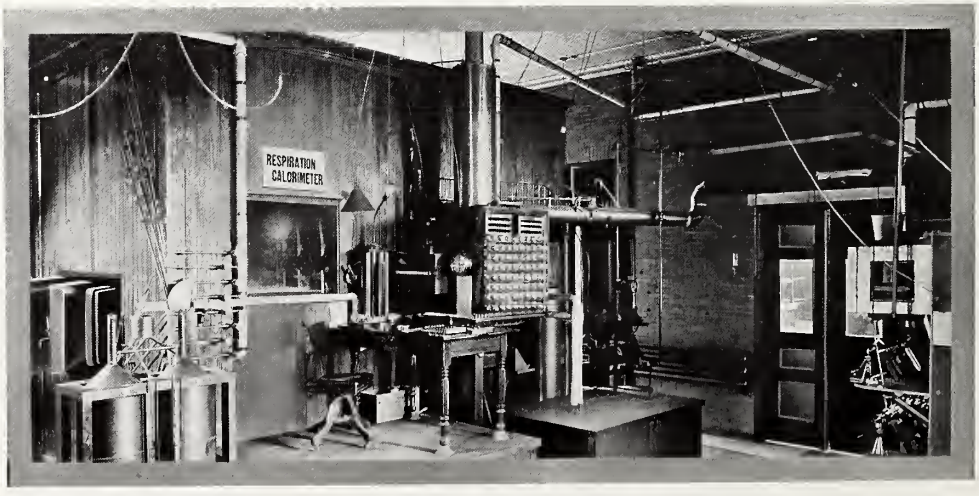

AGRICULTURAL BUILDINGS

# Institute of Animal Nutrition

## Henry Prentiss Armsby, Director

Born Northbridge, Mass., 1853. B.S., Worcester Polytechnic Institute, 1871; Ph.B., Yale, 1874; Ph.D., Yale, 1879; LL.D., 1904; Assistant in Chemistry, Rutgers College, 1876-77; Chemist, Connecticut Agricultural Experiment Station, 1877-81; Vice Principal Connecticut Agricultural College, 1881-83; Professor of Agricultural Chemistry, University of Wisconsin, 1883-87; Director, The Penn State College Experiment Station, 1887-1907; Dean, School of Agriculture, 1890-1902; Expert in Animal Nutrition, U. S. Department of Agriculture since 1898; Director, Institute of Animal Nutrition, 1907.

INTERIOR OF CALORIMETER

# School of the Liberal Arts

## Samuel E. Weber, Dean

Born 1875. Ph.B., Lafayette, 1901; Ph.D., Pennsylvania, 1905; Fellow in Pedagogy, University of Pennsylvania, 1903-05; Training School Superintendent and Professor of Psychology and Education, Cortland State Normal School, 1905-08; State High School Inspector of Louisiana and Professor of Education in Louisiana State University Summer Sessions, 1908-10; Dean of Liberal Arts, Professor of Education, Director of Summer Sessions, Penn State College, 1910-14.

LIBRARY

# School of Natural Science

## Gilbert G. Pond, Dean

Born Holliston, Massachusetts, 1861. B.A., Amherst, 1881; University of Gottingen, 1881-82 and 1885; Instructor in Chemistry at Amherst, 1883-88; M.A., Amherst, 1884; Professor in Chemistry at Penn State College, 1888—. Ph.D., Amherst, 1889; Dean of School of Natural Science at Penn State College, 1896—. 1893-94 and 1912-13, granted leave of absence to pursue advanced studies in German Universities.

CHEMISTRY AND PHYSICS BUILDINGS

# School of Engineering

## Elton D. Walker, Dean

Born Taunton, Mass., 1869. B.S., Massachusetts Institute of Technology, 1890; Civil Engineer, Q. M. D., U. S. Army, 1891; Firm of Walker and Gallagher, Chicago, 1892; Instructor in Engineering, Union College, N. Y., 1894-96; Assistant Professor of Civil Engineering, Union College, 1896-1900; Resident Hydrographer, U. S. Geological Survey, 1898-1900; Assistant Professor of Civil Engineering, Penn State College, 1900-02; Professor of Hydraulic and Sanitary Engineering, ibid., 1902—; Head of Department of Civil Engineering, ibid., 1907—; Acting Dean of School of Engineering, ibid., 1913-14. Author of "Notes on Mechanics," "Sewage Disposal on the Farm," "Uses of Concrete on the Farm," etc.

ENGINEERING BUILDING

# School of Mines

## Walter R. Crane, Dean

Born at Grafton, Mass., 1870. A.B., University of Kansas, 1895; Assistant in Chemistry, University of Kansas, 1896; M.A., University of Kansas, 1896; Ph.D., Columbia University, 1901; Assistant Geologist of the University Geological Survey of Kansas, 1893-1905; Assistant Professor of Mining, University of Kansas, 1900-1905; Gas Expert for the University Geological Survey of Kansas and U. S. Geological Survey, 1903-1905; Member of Faculty of School of Mines, Columbia University, 1905-08; Penn State College, 1908-14. Author of "Treatise on Gold and Silver," prepared for the Carnegie Institute, Washington, D. C.; An Index to Mining Engineering Literature, and over one hundred papers on Mining Engineering Subjects.

## Assistants in Instruction

(Alphabetically arranged)

JOHN REIFF BECHTEL, B.A., Φ K Φ, A Γ P, *Assistant in Horticulture.*

GORDON ALCOTT BEEBE, B.S., *Assistant in Civil Engineering*

ROBERT HARRY BELL, B.S., A Z, Φ K Φ, *Assistant in Experimental Pomology.*

IRWIN JOHN BIBBY, M.S., *Assistant in Dairy Husbandry.*

ALLAN TODD BROWN, B.S., *Assistant in Mechanical Engineering.*

FRANKLIN HAMILTON BRYERE, B.E., *Assistant in Surveying.*

DONALD CAMERON COCHRANE, B.S., Φ K Φ, *Assistant in Animal Nutrition.*

HENRY SHELLEY COCKLIN, Δ T Δ, H K N, *Assistant in Drawing.*

FREDERICK NORTH CRAWFORD, B.S., Φ N Θ, *Assistant Chemist.*

HORACE PHELPS CURTISS, B.S., Σ X, *Assistant in Forestry.*

HERBERT PERRY DAVIS, B.S., A Z, *Assistant in Experimental Dairy Husbandry.*

SAMUEL MARABLE DEAN, B.S., *Assistant in Mechanical Engineering.*

ARTHUR DEERING, Φ Γ Δ, *Assistant in Public Speaking.*

ERNEST DE TURK, B.S., Σ Ξ, *Assistant in Agricultural Chemistry.*

HARRY D. EDMISTON, *Laboratory Assistant.*

EDWARD S. ERB, M.S., *Assistant Chemist.*

FRANK EDWIN FIELD, B.S., *Teaching Fellow in Engineering.*

WILLIAM TIMMEY FOULTZ, *Assistant in Shop Construction.*

PAUL GERLAUGH, B.S., A Z, *Assistant in Animal Husbandry.*

ALBERT RICHARD HAAS, Φ K Φ, *Assistant in Botany.*

DENNIS EDWARD HALEY, B.S., *Assistant in Agricultural Chemistry.*

ERNEST JACKSON HALL, B.A., Δ T Δ, Δ Σ P, Φ B K, *Teaching Fellow in English.*

ALBERT AUGUST HANSEN, B.S., Φ Δ Θ, A Z, *Assistant in Botany.*

JAMES DAVIS HARLAN, B.S., *Assistant in Experimental Agriculture.*

RICHARD CRESSON HARLOW, M.S., Φ Σ K, Γ Σ Δ, Φ K Φ, *Teaching Fellow in Zoology.*

MERVYN PAINTER HELMAN, B.S., *Assistant in Mechanical Engineering.*

EDWARD KRAATZ HIBSHMAN, B.S., A Z, Φ K Φ, *Expert in Farm Management.*

CUTHBERT WRIGHT HICKMAN, B.S., *Assistant in Animal Husbandry.*

FRED JACOB HOLBEN, B.S., B Θ Π, A X Σ, *Assistant Chemist.*

EUGENE HENNIGH JENKS, B.S., *Assistant in Civil Engineering.*

KENNETH KARL JONES, M.S., *Assistant in Animal Nutrition.*

DAVID HARTMAN KAUFFMAN, B.S., *Assistant in Animal Nutrition.*

FRANK P. KNOLL, *Assistant in Butter Making.*

Henry Reist Kraybill, B.S., A Z, Φ K Φ, *Assistant in Experimental Agricultural Chemistry.*

Chauncey Ruthven McAnlis, B.S., Σ N, *Assistant in Engineering Drawing.*

Robert Edward Minshall, B.S., *Assistant in Civil Engineering.*

Earl Lindsay Moffitt, B.S., Δ T Δ, Γ Σ Δ, Φ K Φ, *Assistant in Agronomy.*

James William Park, B.S., *Assistant in Animal Nutrition.*

Jesse Steele Ritchey, B.S., Φ K Φ, *Assistant in Civil Engineering.*

Harold Stanley Rogers, B.S., Φ Σ K, *Assistant in Civil Engineering.*

Charles Ross Schroyer, B.S., *Teaching Fellow in Mining.*

Karl John Seulke, B.S., *Teaching Fellow in Agriculture.*

Henry Scull Sharp, C.E., *Assistant in Civil Engineering.*

William Hinman Tabor, *Instructor in Machine Shop.*

Charles Randolph Thomas, B.S., K Σ, *Assistant in Highway Engineering.*

Walter Thomas, B.S., *Assistant Chemist.*

Lawrence C. Tompkins, *Assistant in Agricultural Extension.*

Ralph Schellinger Townsend, B.S., Δ T Δ, *Assistant in Civil Engineering.*

Robert Gay Trumbull, B.S., *Assistant in Engineering Drawing.*

David Edmond Warner, B.S., Θ X, *Assistant in Poultry Husbandry.*

Isthmus of Panama—President, B. A. Smith, '07; Secretary-Treasurer, W. E. Hoffman, '09.

Altoona—President, J. L. Minick, '99; Vice President, I. B. Crilly, '09; Secretary-Treasurer, J. F. Mattern, '10.

Cleveland—President, F. W. Jessop, '96; Secretary-Treasurer, L. C. Shank, '07.

Buffalo—President, P. F. Sellers, '97; Vice President, J. L. Shed, '06; Secretary, R. R. Dry, '08.

Detroit—President-Secretary, W. E. Heibel, '11.

Baltimore—President, W. F. Strouse, '87; Vice President, W. P. Beyerle, '99; Secretary-Treasurer, R. B. Clapp, '11.

# The Alumni Association

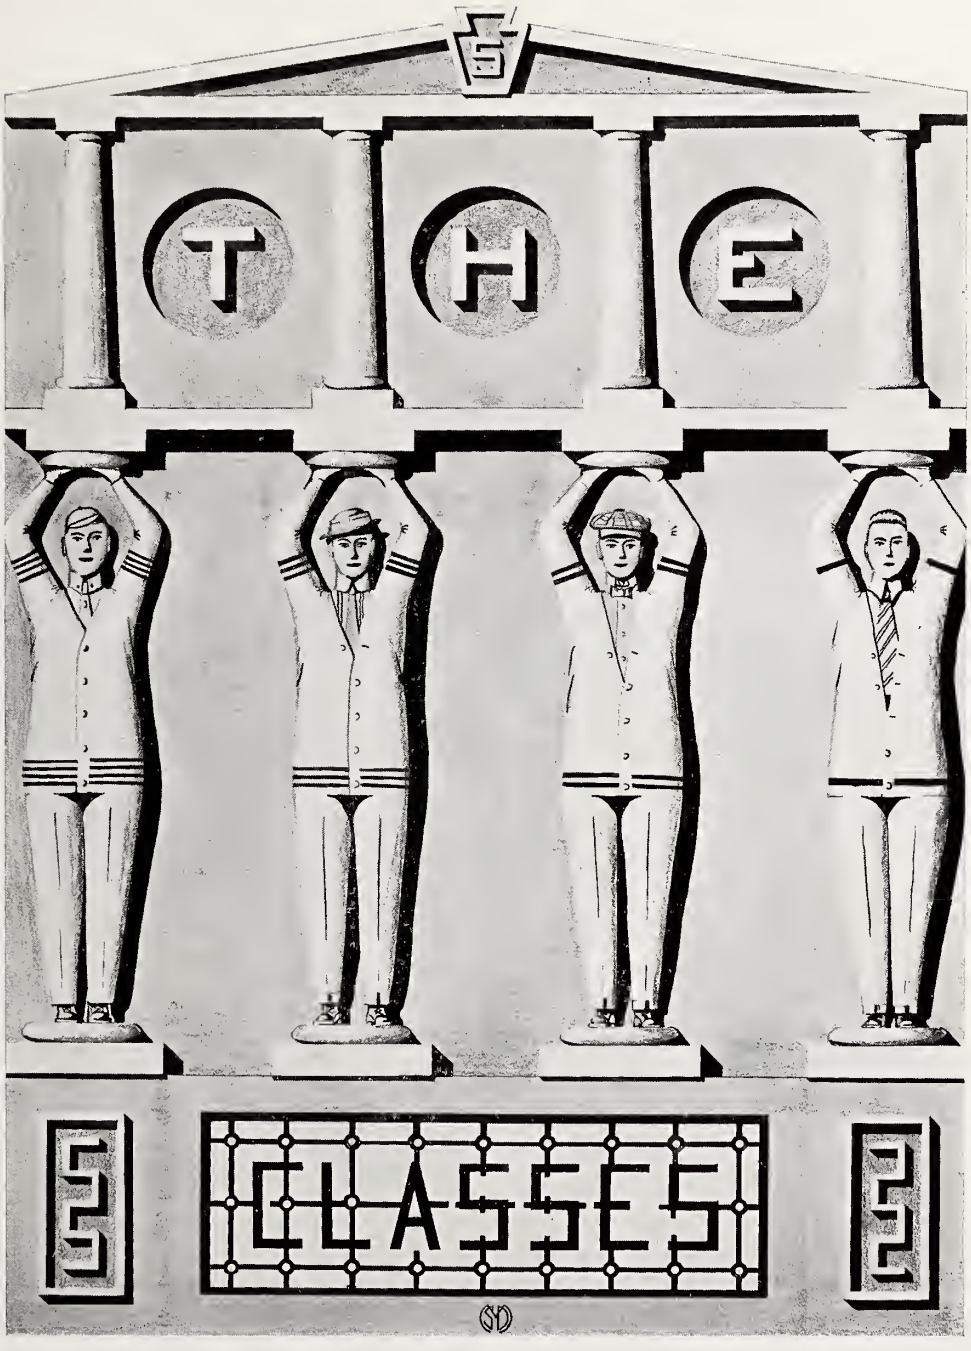

R. W. WILLIAMSON, PRES.

THE college year 1913-14 marks the beginning of a new era of Alumni service. The adoption and inauguration by the General Alumni Association of plans for a widespread "Penn State Booster Campaign" is destined to bring big dividends to Penn State—not only dividends in those material forms that will go to provide the necessities of future life for the college, but in that substantial Alumni loyalty and interest which is not only a measure of the worth of the educational institution but which is so vital to its permanence.

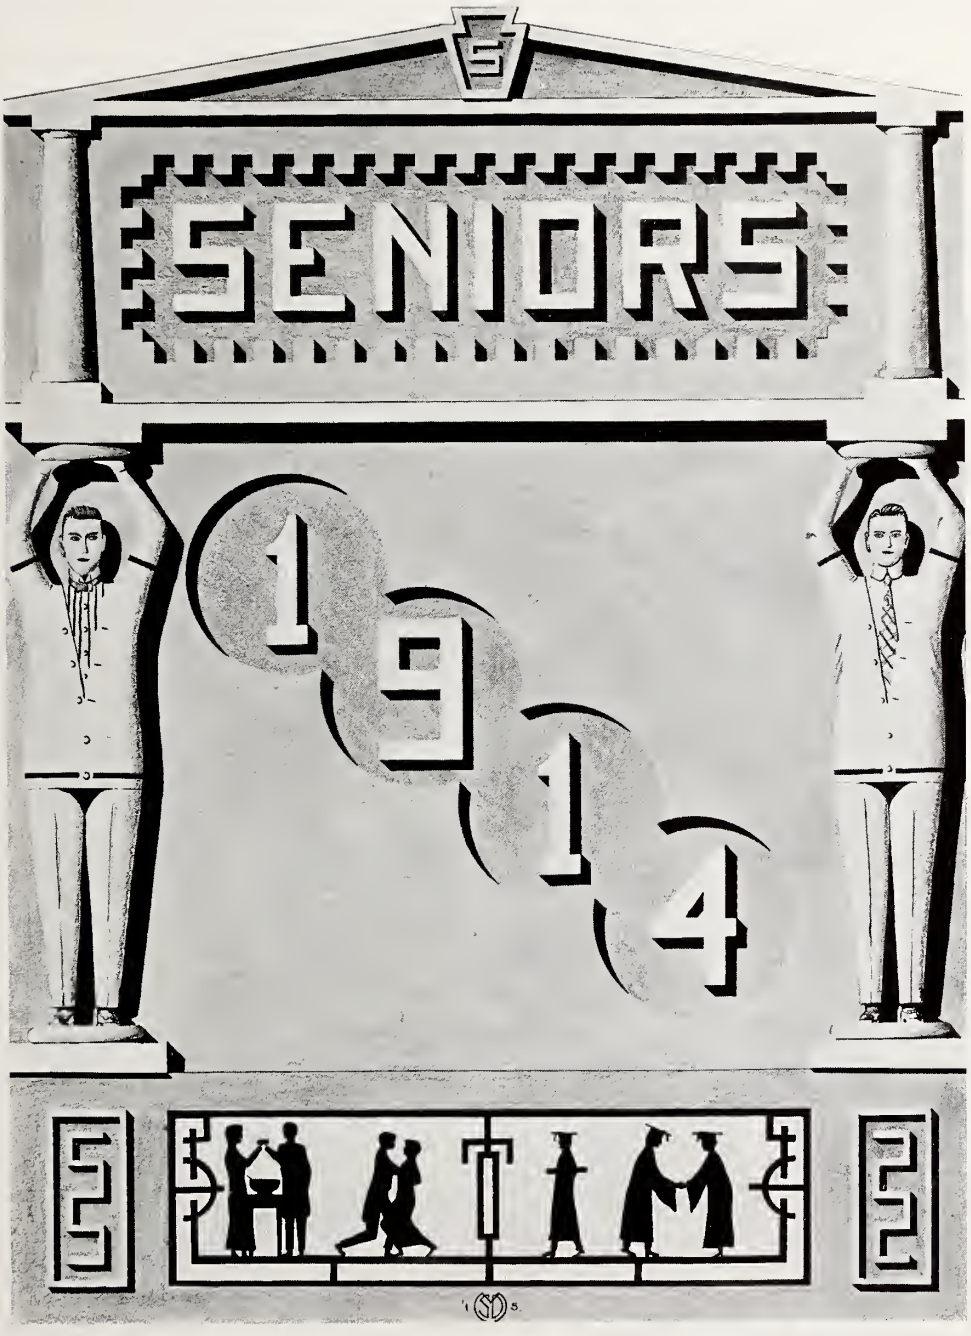

The Booster Campaign aims to enlighten the people of Pennsylvania on Penn State's intrinsic worth. The resultant appreciation of her value to the Commonwealth, its interests and its people, can only result in a widespread demand for the permanent relief of Penn State's one unstable condition—Legislative action providing a permanent annual income commensurate with present and future educational demands.

A significant development of the new Campaign is the increased realization among the under-graduates that the Alumni Association has an intimate contact with their every day life—that it is not something to be left for the time of leaving college in order to give thought to its aims and projects. This development of the Alumni spirit during under-graduate days is a guarantee of the future effectiveness of the Alumni organization.

# 1914 Class History

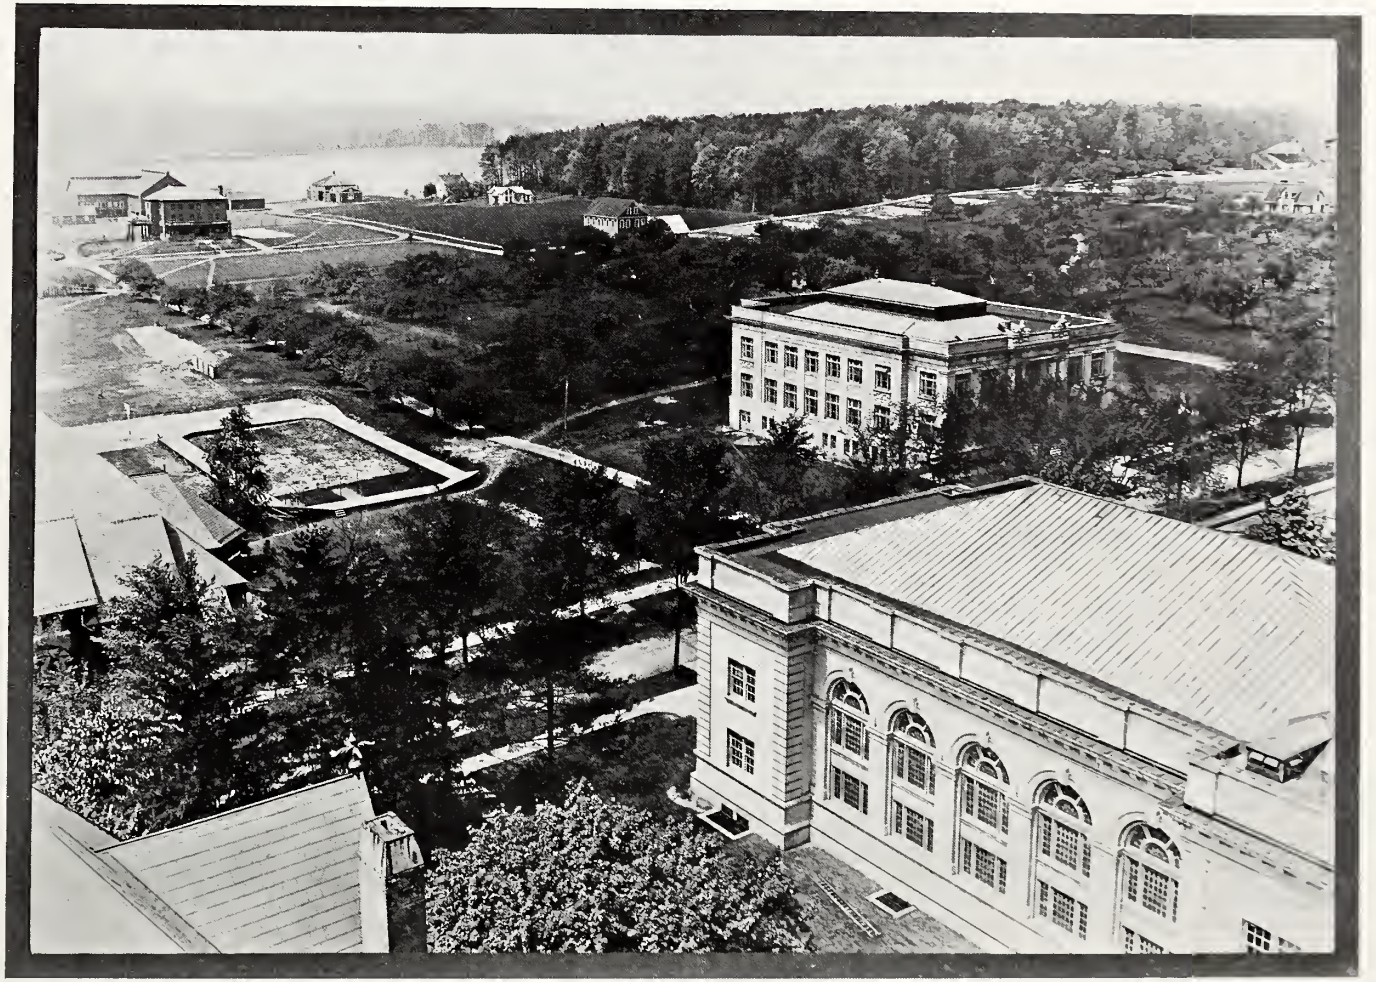

A CHRONOLOGICAL list of the achievements of the class of nineteen fourteen during the four years of its existence at State, is not possible in the short space allotted, nor would it be fitting for us to sing our own praises. Far rather would we leave it to you to judge our excuse for existence, or the right we claim in boasting our relationship to Old Penn State.

From the beginning Nineteen Fourteen has realized that to surpass, or even equal the records of the many great classes gone before her, was an enormous task, but with that undaunted spirit of all true sons of our dear Alma Mater, she proceeded to inaugurate new ideals, or carry out those set before her.

However great or small may have been our achievements, however diligently we may have toiled to leave that indelible impression for good on our beloved Alma Mater, yet, we find that the quiet, persistent influence of those ideals set up before us in our under-graduate days, have left us eternally indebted to that beloved Alma Mater. Indeed, we were shapeless in the hands of Fate, and we are thankful to thee, Dear Old State, that thou didst not shirk thy duty.

As nearer and nearer approaches the day of our graduation, so more and more we are reminded of the fact that soon we will be forced to break the many strong ties of friendship which have been woven during the four years we have been together. Many of us have lived together, played together, and fought together, and until that time of departure comes, we will not realize how strong have been these influences in sealing the ties of friendship. And like the child, who, with unfearing confidence, runs to its mother for protection, so, we likewise, pleading come to thee,

Alma Mater, Dear Old State,
When we pass thy portal gate,
Preserve our friendships ever great,
Alma Mater, Dear Old State.

HORNER, TREAS.

HILL, PRES.

HODGES, SEC.

WEAVER, HIST.

# Junior History

AFTER gazing longingly for a period of two years and at the same time striving and pushing ahead with a certain determination of earnestness, we finally reached the lower strata, as it were, of upper-classmanship. Realizing our dignity we learned to look upon others in a different light. We readily saw that we were not a faction striving for self gain, but instead, formed only a part of a larger machine. We were no longer under-classmen; we no longer partook in class scraps, and the rivalry, which before was so keen and so evident, now welded itself into a bond of unison. Instead of using our surplus energy for class distinction and class glory, we began to turn this material over to our Alma Mater.

Upon completing the custom of setting the incoming Freshmen firmly upon their feet and getting them organized and established, we started right in, in assuming our share of duties and responsibilities about the campus. Our three assistant football managers strove earnestly for the good of the team and the college. We contributed our share of material to the varsity eleven and more than one '15 man fought night after night, striving among the scrubs to put the team on a higher plane.

Basketball and track occupied the attention of more, and the men who two years ago formed the squad on the bench, the second string men, now took the place of the regulars who were lost by graduation.

In wrestling, baseball and other activities we are well represented. The success of these teams lies primarily with the members of our class, and in this way we are striving not only to place Penn State among the foremost of colleges in the athletic world, but in debating, publications, music and various other intercollegiate activities.

However, the work of the institution is so great and covers such a large field, that it is impossible for one class to make more than the most minute imprint in the wheels of progression which are bearing the college on with rapid impetus. Considering the fact, what little we have done in contributing our share for the glory of old State, we have done with the spirit of loyal 1915 men, standing not only for class alone but for our college, our Alma Mater, and our community.

## ROBERT ROTHERMEL ADAMS

**"Bob"**

**AGRONOMY** **LEESPORT**

"Bob" is the sensation of State College with his little misplaced eyebrow. He does not believe in idling away his time in the study room since "Gorgo" got his new Davenport. He has never missed roll call at "Babe's," but quite frequently has missed roll call at classes. "Bob" is great on that "love stuff," he buys one of those $1.50 tickets about once a week. However, he wants no one to tell lest someone in Reading might find it out. "Bob" takes A.H. He claims it is the best course in college, barring none. He is a good scout, has many friends, and is "Gorgo's" best advertisement.

## CLARENCE GILGER ALBRECHT

**"Tobe," "Ickey"**

**ANIMAL HUSBANDRY** **PHILADELPHIA**

One of the seven muses! "Our young men shall dream dreams. "Tobe" delights in taking a nap while he walks, but always succeeds at being awake in the night time. His slogan is: "Haste makes waste; slow and steady wins the race." We've got to hand it to him on his scholastic success and recognize his ability with the books. If perseverance and geniality bring success, "Tobe" will be a successful stockman.

## WILLIAM GEORGE ALCORN

**"Dick"**

**ELECTRICAL ENGINEERING** **PHILADELPHIA**

**Electrical Engineering Society; N. E. Club.**

Alcorn is one of those quiet Electricals who wander to and from their classes in an extremely dignified manner. He is seen more than heard, but when knowledge is a thing of necessity "Bill" is there to supply the goods. Judging from the reports of those who know him well no man associating with this lad will ever be in need of a friend. He is a track man of merit as he dodged drill in his early days here, but for some mysterious reason never pursued this sport after the Sophomore year.

## WILLIAM MONTEITH ALLEN

**"Bill," "Deacon," "General"**

**PRE-LEGAL** **LANSDOWNE**

Varsity Track (1); Class Track (1); Inter-Class Debate (2); Liberal Arts Society; Penn State Civic Club; Liberal Arts Play; Inter-Class Wrestling.

This handsome Irishman hails from Lansdowne, but during vacations has his headquarters around Fifty-second street, Philadelphia. Since coming to college he has lived in every part of town. At present he seeks refuge on the fifth floor of Main. Having had lots of experience in running during his Freshman year, "Bill" took to Track, but later gave it up to seek military honors in the awkward squad, where his prowess gained for him the title of "General." A good stude, but one who does not believe in working when there is anything else to do.

## GROSS RUNKLE ALLISON

**"Doc," "Geraldine"**

**CIVIL ENGINEERING** **CENTRE HALL**

The "Doctor" came here from Bellefonte Academy. His home is in one of the seven large cities of the world, namely Centre Hall, but as this metropolis has no High School, he was forced to go to Bellefonte for his early training. "Geraldine" is taking Sanitary, but here he made a mistake; he should have taken Chemistry so that he might better learn to find "affinities." "Doc" is a good natured, good hearted fellow, but Connie Mack would turn him down as a catcher.

## LEON EDGAR ANDREWS

**"Andy"**

**CIVIL ENGINEERING** **HAMMONTON, N. J.**

Civil Engineering Society.

"Andy" hails from a place where mosq itoes grow as big as cows. Is "Andy" a fusser? I should say yes. He loves them all, big and little, between the ages of twelve and thirty-five, widows included. The boys all like to drop into "Andy's" room and hear him tell of his marvelous escapes from alligators and mosquitoes, while cruising around in his canoe, "Thelma." A funny name for a canoe, "Andy." "Leon Edgar" is a good stude but never has been caught grinding.

## CLIFF ERRETT AUBEL

"Dutch"

AGRONOMY — NEW CASTLE

When "Dutch" first entered college he was a model boy, but under the influences of living in "Little New Castle" for three years it is now rumored that he is well acquainted about town, and that even on the darkest nights will venture forth with a "Flash." "Dutch" is an "Ag" and a staunch defender of his course. Cliff has many visions of a beautiful home in the midst of alfalfa fields. Success to you, "Dutch," may your fondest hopes be realized.

## ANDREW A. BAKER

HORTICULTURE — JENKINTOWN

Crab Apple Club; Rifle Club; Montgomery County Club.

"Andy" came to college a quiet, well mannered and industrious youth, but the life of "Old Main" has wrought havoc with these qualities. "Bake" had visions of a cozy little home nestling among the hills in the midst of an orchard of luscious fruits, so he came to State to absorb some knowledge and make his vision a reality. "Bake" is full of the old "pep" and lets it out in a general rough house. Overlooking these minor faults, he is a mighty good scout and a true friend.

## PAUL SWARR BAKER, A Z

AGRONOMY — LANDISVILLE

Assistant Manager 1915 LA VIE; Associate Editor Penn State Farmer (2, 3); Agricultural Society; Civic Club; Lancaster County Club.

When you see a small Dutchman coming along with a big broad smile over his dimpled face, you know it's Spike "Baker." He is easily recognized as one of the cutest men of our class, and this property often proves detrimental to those who are so unfortunate and short-sighted as to introduce him to their girls. This, however, is his only shortcoming, for he has true German blood in his veins, which fact instinctively makes him a busy man, both in studies and college activities.

## CHARLES DODSON BALL, Φ K Σ

**"Dodson"**

**AGRICULTURAL CHEMISTRY** **HOLMESBURG**

**Manager Tennis Team (3); Leibig Chemical Society.**

Commonly known as the "Big Red-Headed Chief of the Other Side." "Dodson" hails from Holmesburg, and will some day bring to that ancient suburb great honor as a philosopher and scientist. He is full of strange utterings and arguments and has many strange dreams, but with it all he is always ready for a good rough house, and as a student he has no peer. "I find in him a man who lives principle, not policy."

## STANLEY DEXTER BARCLAY

**"Stan," "Barc"**

**MECHANICAL ENGINEERING** **LAQUIN**

**Mechanical Engineering Society.**

"Stan" is one of the few lucky men at Penn State who gets a letter every day from his "Queen" at home, and he answers as regularly. To see "Stan" come swinging up the walk, one would think that the cares of the nation rest upon his shoulders, but that is only his pose. "Stan" is a quiet, unassuming young man who takes life seriously and who is determined to get the best he can out of his course here.

## WALTER HENRY BARRHO

**"Walt"**

**INDUSTRIAL CHEMISTRY** **PORT ALLEGANY**

**McKean County Club.**

Here is a friend of ours who started his college life at Ursinus. However, the attractions of "Swamp" and "Charlie" were too strong to be resisted. Hence we found him in our midst at the beginning of our sophomore year. It has been hard to tell whether this industrious young chemist belonged more to '14 or to '15, but here he is with us at the semi-final roll call. We can safely venture to predict that successful will be his future career.

## ALBERT M. BARRON, Σ N, A Γ P

**ANIMAL HUSBANDRY** **PHILADELPHIA**

**Parmi Nous; Friars; President 1914 Class (1); Varsity Football; Varsity Track; Central Manual Club.**

"Bert" is one of the best natured and conscientious fellows who ever landed here. Always plugging for the good of the college, he has made good. He is always on hand when the girls arrive and is a speed king in the city. He is a lover of "Math," and is worth consulting on "A.H." topics. A great man for fireside stories with that "Down at Manual" stuff. Just ask him where the girl works and then pedal away with much speed. When she stays at the "Marlborough-Blenheim," she's real.

## CLEMUEL PAUL BATES

**"Batesy"**

**MECHANICAL ENGINEERING** **BERWICK**

**Cadet Second Lieutenant; Civic Club; Mechanical Engineering Society; Columbia County Club.**

Paul hails from Berwick and is proud of it. He spends his summers heaving housings in "Dad's foundry" and always returns to college ready to show his muscle. Although yet young, Paul is an admirer of the fair sex. "Phew! She's a queen." But "Batesy" is a good fellow, quiet, slow in forming acquaintances, but a sincere friend to those who know him. He stands well in his class and bids fair to become a successful engineer.

## SIMON LEON BEAR

**"Rabbit"**

**ELECTRO-CHEMICAL ENGINEERING** **PITTSBURGH**

"Rabbit," one of the most conscientious students that inhabit the Nittany Inn, has finally decided to graduate from Penn State after trying Lehigh and the Colorado School of Mines. He preped at Kiski and glories in telling of the good old days, their rank in football, etc. He is well versed in all political problems and delights in challenging all comers on political arguments. His largest interest outside of college is "Oil." Whenever seen, his words are, "Give me a match."

## JAMES LAUGHEAD BEATTY, Σ Π

**"Jim"**

**INDUSTRIAL CHEMISTRY** **UNIONTOWN**

**Sphinx; College Football (1); Class Football (2); Assistant Football Manager (3); Chairman Stunt Committee (1); Chairman Flag Scrap Committee (2); Class Vice President (2); Chairman Banquet Committee (3); Student Council (3); Student Board (3); Deutscher Verein; Fayette County Club; Associate Editor 1915 LA VIE (3).**

This good looking and happy product of the soft coal regions came here in the fall of 1911 and immediately began to tackle college activities and football players. He is a distinct success at the former, but at the latter has been known to tackle the wrong man. As "Jim" was chosen from the entire student body by the girls to manage their page in the Froth he is, as might be expected, their ideal. Among the fellows "Jim" is universally regarded as one of the best we have. With a heart and brain big enough for two men success must be his.

## GEORGE HAROLD BEDELL, Δ Z

**"G. H.," "Harold"**

**ANIMAL HUSBANDRY** **COTWAN, VA.**

"G. H." is another two year man, who saw the error of his ways, and decided to become a member of our class. Here is a freshman who wears no green, but ranks as a member of the Junior class. He has wonderful luck with the "widow" in Five Hundred, and although we wish him no hard luck, we wish all would treat him as well. "Harold" is a genial friend, always ready to go out of his way to help others. A good student, and true friend we have no doubt but that "G. H." will graduate with us, and make a loyal "State" man of the class of 1915.

## JAY THOMPSON BELL

**PRE-LEGAL** **BUENA VISTA**

Before us we have the handsomest Bell in State. He is to be wondered at for his ability, activity, and tact for which all the Profs fall. His pet name, especially when the lesson is intensely interesting, is, "Oh! That miserable Bell" (with all due apologies to Icabod.) But leave it to him. He also possesses that chemical affinity to attract other "belles," as has been proved often on his Sunday afternoon strolls. He also once held the record of wearing the largest sized military cap in the army, but sad to relate he lost his record this year. His skill and tact used in arguing law compares favorably with Socrates. Well, the "Bell" has rung. All out.

## ROBERT NORMAN BERRYMAN, Σ X

**"Punk"**

**CIVIL ENGINEERING** **PHILADELPHIA**

**Parmi Nous; Friars; Varsity Football (1, 2, 3); North East Manual Club; Philadelphia Club; Civil Engineering Society.**

Right Formation: 88-96-2. Around the end goes a "streak of lightning" for a good gain. That's "Punk." Berryman came to us from North East Manual Training School of Philadelphia, and has developed into one of the fastest halfbacks that ever wore the coveted "S." When not playing football "Punk" takes his place among the "Roughneck Civils" and drinks deeply of the "Fountain of Knowledge."

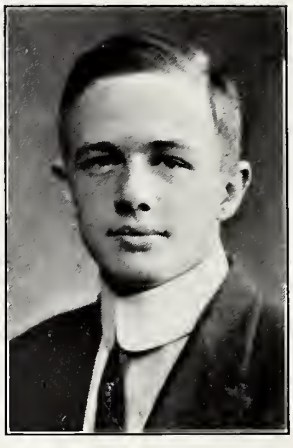

## FRANCIS DAVID BEYER, I X Δ

**"Frank"**

**ARCHITECTURAL ENGINEERING** **TYRONE**

**Architectural Society; Rifle Club; Blair County Club.**

"Frank" is a very quiet little boy; very quiet, indeed. But that doesn't indicate anything, for he has been known to slide around and study and fuss and do lots of things of which no one would ever accuse him on suspicion. At Blair County Club meetings and feeds he is always a faithful attendant and performer, and generally looks out for the Glory of Old State when he can. The frequency of his trips home make us fear—. Watch 'em, Francis; they're a tricky proposition. We hope for some improvements in the Tyrone skyline when this studious young architect gets out.

## JOHN FRANKLIN BEYERLE

**"Dutch"**

**HORTICULTURE** **BERNVILLE**

**Class Baseball (2); Rifle Club; Perkiomen Club; Berks County Club; Crab Apple Club.**

This good-natured Dutchman hails from a village called Bernville. "Dutch" acquired his early scholastic training at Perkiomen Seminary. His convictions are so pronounced that he will stay up half the night to convince you that his views are correct. At some time in his childhood days he decided to become a Horticulturist, and as a result of this longing, he entered State with the "Horts" of 1915. "J. F." is not what you would call a "goodie-goodie" boy, although he does refrain from the use of the "weed," and cannot roll a cigarette. "Dutch" is no grind, but a good "stude." That he will make good is assured by his "don't walk so fast" spirit.

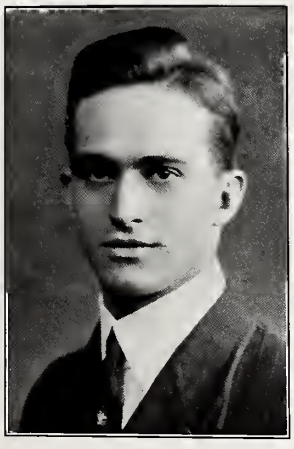

## ROBERT BISHOP

**"Bob," "Runt," "Atom"**

**ELECTRO-CHEMICAL ENGINEERING** **BRYN MAWR**

**Varsity Soccer (2); Assistant Soccer Manager (3); E. E. Society; Electro-Chemical Society.**

"Bob" is not very large, in a crowd is invisible, but in the "scraps" is always on top. When but a child he came to Uncle Sam from the Isle of Man and brought with him a stock of English jokes. Nuf sed. Robert stoutly maintains that no great men have middle names and modesty claims that he proves the rule. He is an excellent stude, a good sportsman, and all that the name of his birthplace implies.

## LEROY VERNON BLACK

**"Blackie," "Roy," "Lee"**

**ELECTRICAL ENGINEERING** **POTTSTOWN**

**Class Soccer (2, 3); Class Track; Electrical Engineering Society.**

Here is our friend from the Ladies' Cottage. No person would think that this quiet looking youth was the worst rough houser ever produced in Old Main. In fact, he got too much for Main and they had to send him to McAllister. "Blackie" spends his summers at Asbury Park ringing up fares. The remainder of the year he spends at State College playing soccer, making furniture, and studying E. E. LeRoy is a good stude and even the Profs like him.

## MATTHEW WILSON BLACK, Σ T

**"Matt"**

**LIBERAL ARTS** **ALTOONA**

**Associate Editor LA VIE (3); Liberal Arts Society; Mandolin Club (1, 2, 3); Blair County Club.**

"Matt" comes from Altoona, where he spends his summers as General Supt. of the P. R. R. Station. He originally had great ambitions as a wrestler, but found more excitement wrestling with Greek. He is a musician of some note, and takes his recreation in torturing "Babe's" piano, or singing nutty songs on the co-op corner. He has more ability than any man in college in rigging out something that looks like a full-dress suit. "Matt" is a hustler, a bit of a grind, but a good fellow when you get to know him. We hope some day to see him wearing a Ph.D.

## JAMES WHITE BLAIR, K Σ

**"Jimmy," "Jim"**

**HORTICULTURE** **IRWIN**

To look at "Jimmie," one would never guess that he comes from the sooty regions of Westmoreland County. He does, however, and he is proud of it. "Jimmie" had great difficulty in convincing certain members of the faculty that his knowledge of solid geometry was sufficient to enable him to pass. He also possesses the distinction of being the only member of our class who had a conflict in his re-exams. The "Profs" up on the "Hill," though, have more faith in "Jimmie" than do those in the "Math." department, and he will be with us when our trials are over.

## WILLIAM ALBERT BLUME

**"Bill," "Lengthy," "Curly," "Blumy"**

**MECHANICAL ENGINEERING** **CONWAY**

**Class Baseball (1, 2); Class Banquet Committee (3); Mechanical Engineering Society; Beaver County Club.**

"If you haven't got permission to go in the laboratory, get out the building!" and "Bill" got. Thus "Swamp" initiated "Blumy" in our freshman year. "Bill" is one of those fellows who can dress, eat breakfast, and make Chapel in five minutes; showing how well he likes sleep. Here we have one of those fellows who never believes in doing to-day what he can put off until to-morrow, especially in the study line and yet "Bill" is a good Mechanical. "Lengthy" has guarded first base on our class baseball team for two years and he did it well. A good fellow and true friend, who takes the respect of his classmates with him.

## RALPH DEPUY BOLE, Σ N

**MECHANICAL ENGINEERING** **AVALON**

It is easier to knock than to boost, but the only fault that we can find with Ralph D(ear) is that he hails from "out Pittsburgh way." The boys call him "Rusty," but the name is one of those "hand-me-downs." He is a very earnest student, but far from a grind; a deep thinker, but not too deep; and a trifle serious, but not too much so. We might say that he is a good piano player but, alas, not too good. Ralph is beloved and respected by all who know him and would that there were many more like him. He could be a great favorite among the girls, but talk is cheap and we have a deep rooted suspicion that he indulges in more luxurious pleasures. But, why speak of love?

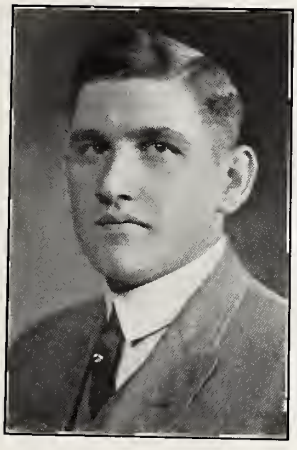

## WALTER HENRY BOYCE

**"Wallie"**

**FORESTRY** **NEW YORK CITY**

"Wallie," friends, comes from New York; that is to say, New York City proper, and he usually follows it up by stating that he lives in the central part of the city. His enunciation of "goil" and "noive" confirms the above statement. "Wallie" is an ardent Forester, a firm believer in Forest Conservation, and an advocate of all that will further the fame of Old Penn State and the town from which he hails.

## HAROLD JEFFREY BRENNECKE

**"Bren," "Mother," "Unser"**

**CHEMISTRY** **ALTOONA**

"Gimme them ribbons." Behold "Bren," a man of kind and loving nature, from which quality he has gotten the name "Mother." "Bren" came to us out of a life of various occupations. He has been a fireman, farmer, hostler, barber, quack doctor, steam fitter, and furnace mender, but now thinks that he has hit upon the one profession for which he is really fitted. Of all his former professions, "Bren" wishes to be remembered only as a hostler and a fireman. He will leave the well thumbed pages of his "slop-lab" manual and tell for hours of his daring handling of horses, and his readiness to be up at the first tap of the "joker." His present room-mate claims that this last accomplishment is among the missing, for "Big Ben" now fails to disturb his slumbers in the least.

## HARRY EDWARD BRILLINGER, Σ Π

**"Heb"**

**INDUSTRIAL CHEMISTRY** **EMIGSVILLE**

**Deutscher Verein; York County Club.**

In his youthful days Harry's conception of a soldier's popularity among the ladies led him to spend a year at Staunton Military Academy. But the appeal of Penn State and its Industrious Chemists was not to be resisted. Accordingly, the "midget" dropped quietly into our midst, but astounded the neighborhood by trying to drown one of his newly-made friends on his first night in college. Harry passed safely through his Freshman year and has settled down as a stude and a good one at that. The circle of his friends not only here but in that suburb of York, called Emigsville, bears witness to Harry's ability to win and to hold friendships.

## GEORGE KENDRICK BRINGHURST

"Bones"

ARCHITECTURAL ENGINEERING — PHILADELPHIA

Froth Artist (3); Varsity Baseball Squad (3); Class Basketball Squad (2, 3); Central Manual Club; Architectural Society; G. T. H. Club; Philadelphia Club.

"Bones" originated in Quaker City and started off with a rush in his college career. His first honor came as corporal; soon he showed that he had baseball, basketball, and track abilities, hence forsook the army to engage in the more strenuous sports. Next he turned to things artistic and landed on the Froth Board. In studies his strong point is French. Taking all things into consideration, he is a good type of a college man.

## DAVID BERNARD BRODSTEIN

"Dave," "Brodie"

AGRICULTURAL-CHEMISTRY — READING

Our band received quite an asset when "Brodie" came to college. He started at the University of Pennsylvania, but decided to come to State in our Sophomore year. He is noted for his star recitations in geology and nearly got an exemption. Not another of our classmates is as quiet as "Dave," and the only time he blows is when he plays the cornet. He believes that nobody cares what you do as long as you keep it to yourself. If modesty will make an agricultural chemist, "Dave" will make a good one.

## JACOB ROTHENBERGER BROSSMAN, Σ N

"Red," "Jake," "Bross"

INDUSTRIAL CHEMISTRY — READING

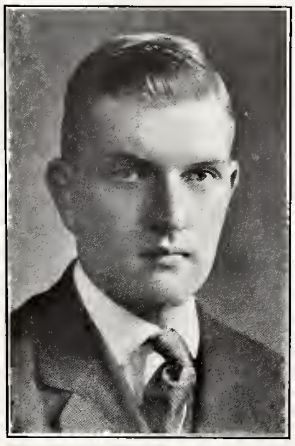

When those of the number that belong to "Swampy's" angelic crew first assembled in "Unser's" office, they found this carrot head in their section. While his work would seem to indicate that he will be with us at the finish, yet the fact that he was the first Industrial Chemist to forsake single blessedness for matrimonial bliss leaves some doubt as to his future. "Jake's" ability on the piano soon gained for him recognition in the musical world, and along this line he is surpassed by few. No, it is not worry that causes his hair to come out.

## CHARLES GIBSON BROWN, JR.

**"Locomotive," "Major"**

**MECHANICAL ENGINEERING** **HUNTINGTON**

**Cadet First Lieutenant; Officers Club; Motive Power Club; Huntingdon County Club; Mechanical Engineering Club.**

Brown entered Penn State as a Sophomore, coming here from Rensselaer. He has become a man of much importance in the Railway Mechanical Department and has successfully superintended many tests on the Dynamometer Car. "Major" always found it necessary to take frequent trips home whenever events of a special interest to the underclassmen were taking place. Brown is bound to become famous through his vast fund of valuable information concerning railroads.

## WALTER ATLAND BRUNHOUSE

**"Brunnie"**

**AGRONOMY** **YORK**

This young man with the dignified air is bound to be an Agronomist of note some day. He is proficient in plane-table work and on soil types, but often allows rabbits to interfere with the amount of work done. "This is undecidedly a black silt loam," said Walter to the "Prof." "Walt" once made a hit—and run as a campus guarder. Ask him about it. "Brunnie's" good nature makes friends of all of those who know him.

## LOUIS ANDREW BUCHANAN

**"Buck"**

**DAIRY HUSBANDRY** **BRADFORD**

**McKean County Club.**

"Buck" hails from the land of "oil and athletes." We don't know to which class he belongs, but he at least has the form of an oil geyser. He has Edison stopped in Bradford society, and claims that the little Irish schoolmarms are mighty fine educators. His tempestuous wooing has caused many a feminine heart to "twitter-twatter" in agonized yet blissful rapture. The epistolary outbursts of this Scotch hay-tosser compare favorably with the edicts of his famous namesake, Louis XIV, in that they cover twelve or fourteen sheets of Old McAllister Bond. They all go to the one little town of "Sanitary Hill, Pa." "Buck" is a keen sportsman, knowing all the games and records back as far as '88. As a facial contortionist, he has even the missing link stopped, but his heart is in the right place.

## THEODORE ADOLPH BULIFANT

**"Balie," "Teddy," "Pete"**

**INDUSTRIAL CHEMISTRY** **PHILADELPHIA**

**Central Manual Club; Philadelphia Club.**

This somewhat German personage with a onetime French name has additional qualities. "Pete" has the following beliefs:

1. That the largest city is Philadelphia.
2. The greatest baseball team—The Athletics.
3. The only real store—Wanamaker's.
4. The one good high school—Central Manual.
5. The best course—Industrial Chemistry.

Taken all in all, "Pete" is a mighty good friend to have. He schedules additional credits and never gets through his exams with "E's" or "ease." Last of all, he believes in the "Movies," "Sweets," and "sleep;" and the greatest of all is sleep.

## CONRAD AUGUST BURCH

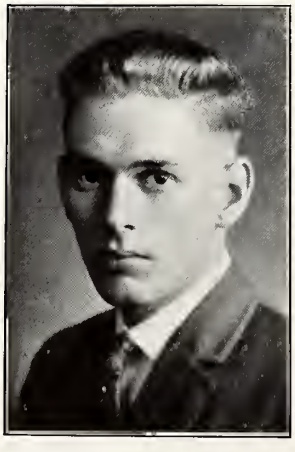

**"Con," "Bobby"**

**CIVIL ENGINEERING** **JAMESTOWN, N. Y.**

**Student Council (3); Class Wrestling (3); Civil Engineering Society; Carnegie Scholarship (2).**

"Con" is a boy in whom wonderful changes have been taking place since the day he first hit "State." From a quiet sedate lad in his freshman days he has developed into a regular roughneck. Nevertheless "Bobby" is some stude along mathematical lines, being the only man who ever proved to the "Math" Department that two feet make a yard. He can produce some exquisite agony when he tickles his music box, but he really enjoys it himself. When all is said and done "Con" will still remain one of the best we have.

## FRANKLIN NEWTON BUTZ

**"Butzy"**

**CIVIL ENGINEERING** **LANSDOWNE**

**Froth Board; Civil Engineering Society.**

Franklin Newton can trace his ancestors back to the two famous men after whom he was named. This youth came here from "God's Country," as he calls it, to join the 1915 Civils. His first desire was for a chance to study and he is still pursuing that ambition. Franklin keeps a safe distance from Penn State society but may attend the Senior dances if he can get an introduction to her.

## RALPH JONES CAHALL, Δ Υ

**"Alky," "Alcohol"**

**COMMERCE AND FINANCE** **PHILADELPHIA**

**Class Basketball (3); Assistant Varsity Basketball Manager (3).**

Ralph started his college career at "Penn," but early learned that "Penn State" was the better place, and entered in time for that famous class rush with 1916. "Alky" entered as a "Mechanical" but succeeded in selling an automobile tire for Dad, so decided to enter business; hence we find him in the Commerce and Finance Course. "Alcohol" loves the open and is an authority upon the rabbit and arbutus—"Say, fellows, who's she?" However, Ralph is a good stude and bound to succeed.

## KENNETH NATHAN CALKIN

**"Deacon," "Brother"**

**ELECTRO-CHEMICAL ENGINEERING** **SCRANTON**

**Electro-Chemical Society; Lackawanna County Club; Prohibition League.**

"Scranton is the best city in the United States and the home of the I. C. S." "Deacon" has a fiendish delight for argument and other things serious. He is noted for his busy air and forever seems to find something to occupy his valuable time. Furthermore, he spends a lot of his time working for the good of others and is a firm believer in Social Service. Now that he has given up the occasional rough house adventures he indulged in when he was still a Sophomore and has assumed the dignity of a Junior we do not hesitate in saying that "Deacon" will be a credit to us.

## LUTHER CLYDE CAMPBELL, Α Δ Σ

**"Pop," "Deacon," "Reverend"**

**MINING ENGINEERING** **RENOVO**

**College Football (1, 2); Perkiomen Club; Mining Society.**

"Deacon" Campbell came to State to take mining, but it is the general opinion that he missed his calling, he should have been a minister. He is an earnest, sincere fellow and is a philosopher of the highest calibre. Unlike most fellows, he is exceptionally fond of his books and even studies on Saturdays. Clyde frequently hears from one of the Belles of the 'fonte, but his affections seem to be centered in Sunbury. We hope that she will prove a good pardner to our reverend miner.

## JOHN ELMER CARROL, Φ K

**"Em," "Rosy," "Jack," "Y. E."**

**MECHANICAL ENGINEERING** **ALTOONA**

"Em" is a stude, a musician and a playwright. He promises to become a star recruit in the music department of the "Movies" and we expect him to compose an opera some day. "Jack" is said to be an athlete, especially with the gloves, but his fame is still confined to a favored few. He startles us once in a while by pulling an exemption and by his immunity from below-grades. Although Elmer makes brakes once in a while, we must admit that he possesses that stability of character that make him worth while knowing. With the talent of a Wagner, and the mechanical genius of a Westinghouse, "Em" is sure to become famous.

## RUSSELL DAVID CASSELBERRY

**"Rus," "Cass"**

**HORTICULTURE** **WILLIAMSPORT**

**Glee Club; Crab Apple Club; Agricultural Club; Williamsport Club.**

What a commotion must have been caused in "Billport" when this energetic man was born; this commotion continued until 1911 when "Rus" left for Penn State and the town resumed its natural condition. "Got the makings, Bill?" He is small but—. "A short witty story is always preferable to a long dry one." Nevertheless "Cass" is a conscientious student and a mighty congenial fellow, and we hope that he will some day succeed in his desire to grow apples as big as pumpkins.

## CLARKE WESCOE CLEMMER, A Z

**"Clem"**

**HORTICULTURE** **PHILADELPHIA**

**Class Secretary (1); Varsity Track (1, 2); Class Track (1, 2); Philadelphia Club; Northeast Manual Club; Agricultural Society; Crab Apple Club.**

In the fall of 1911 "Clem" landed here fresh from Northeast Manual. He brought with him a very complete stock of original ideas and theories and, Ye Gods! how we have suffered. "Clem" enjoys quite a reputation as a pedestrian, and on one occasion he is said to have left forty miles behind him in a single day, after which he took a sound night's sleep in a bath-tub. Clarke is a broad jumper, which accomplishment will aid him in jumping clods in years to come, as he chases the plow. If he makes the marks in the world that he makes on the Hill, "Clarke, gay bibble."

## ANNA JEANETTE CLOSSER

**"Andy"**

**HOME ECONOMICS** **WAYNESBURG**

**Deutscher Verein; Glee Club; Y. M. C. A. Play (1).**

Who said Waynesburg? That is where "Andy" Closser comes from, and it is where they make that delicious cream gravy and fried chicken that we hear so much about. Unless you are in a hurry you cannot expect to keep up to "Andy" for she certainly "goes a pace," and not only gets there herself but is always willing to help her neighbors. "Andy" is very well versed in farm lore, and can tell you anything about the farm. She is a hard worker and here's wishing her everything that will bring her success.

## ROBERT CHARLES COCKLIN

**"Wop," "Bob"**

**HORTICULTURE** **MECHANICSBURG**

**Agricultural Society; Crab Apple Club; Cumberland County Club.**

"Bob," during his Freshman year was a firm believer in the sovereignty of the Sophomores, yet in spite of this they often troubled his dreams. During his Sophomore year, however, he got revenge and many a 1916 man owes his true college spirit to "Bob's" tutorage. Robert is a wonderful correspondent, for the mailman rarely misses him and consequently her also. Coming here with a vast knowledge of practical Horticulture, "Bob" expected to slide through on rollers, but as they did not teach Rhetoric or "Trig" on the farm, he received a shock. However, since then he has recovered and bids fair to reap the fruits of his labors.

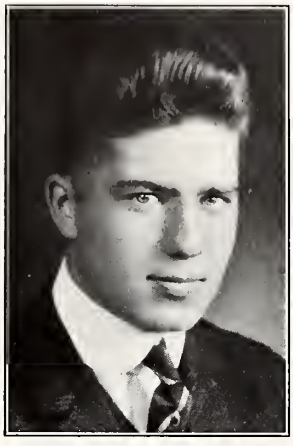

## ANNA COHEN

**HORTICULTURE** **PITTSBURGH**

**Y. W. C. A. Cabinet**

The call of "Mother Nature" led Anna away from the heart of the Smoky City, "back to the farm." We find here in our farmerine the first spark of the country genius. Rural problems are her hobby, and social service her aim. She is also a really truly trained nurse and presides over the house medicine chest with professional skill, though she doesn't approve of handing out drugs promiscuously. As assistant Prof. in Zoology 20, she puts her hospital training into practical use. "All things are possible to diligence and skill," so here's the best of luck to go with Anna's pluck.

## HUTCHINSON SMITH COMLY, B Θ Π

**"Hutch"**

**LIBERAL ARTS** **EDGE HILL**

**LA VIE Board; Y. M. C. A. Show (1); Liberal Arts Society.**

"Hutch" began his college career as a farmer, but very judiciously changed during his second year to the school of Liberal Arts. "Hutch" shines as an entertainer, and is fond of telling how he was chloroformed while guarding campus in his Sophomore year. Sh! ! We believe that the chloroform was witch hazel. Except for these few attacks of over-vivid imagination (which he will outgrow) we have nothing but praise for this cheerful, good-natured classmate, and we know that all his acquaintances are his friends.

## CHARLES FREDRICK CONN

**"Charlie"**

**CIVIL ENGINEERING** **DUNMORE**

**Civil Engineering Society; Lackawanna County Club.**

Since Charles has been here he has made Dunmore famous by telling of the horses that fall into the cave-ins of the streets. "Charlie" entered Penn State with the intention of becoming a C. E., but we think he will make strong bids on a B.S. degree also. Conn, the genial, may be recognized by his confidential "That's so," and "You don't say so." He takes special delight in telling of things as they were when he worked in the mines. "Charlie" is a true friend and can be relied on when the pull comes. "Who's little Fatima are you?" he was once heard to inquire.

## FANNIE COOPER

**HOME ECONOMICS** **LYKENS**

"Our little Fannie" came to Penn State to pursue her favorite study, Domestic Science. She has a vast amount of practical knowledge as a basis for her scientific requirements, and should make an ideal domestic scientist. Fannie is usually of a quiet disposition, but woe to one, if her ire is aroused. She is fast learning to keep the corners of her mouth turned up, and to join in a hearty laugh. She has a particular fondness for "Sweet Williams." Fannie hopes some day to represent the class of 1915 as a foreign missionary in China.

## HENRY NORTON COPE

**"Nort," "Copey"**

**FORESTRY** **POTTSTOWN**

**Class Baseball (1, 2); Forestry Society.**

Henry Norton Cope comes from Pottstown, the land of Dutchmen, and is proud of it. As a hard worker and a mighty good fellow we take off our hats to "Copey." In summer camp he was "King of the Woodpile," due to the frequency and the skill with which he used his heavy double-bitted axe. "Copey" also successfully led the noble Foresters into conflict with the Wood Hicks of Endeavor on their own home diamond. When the Foresters' judgment day comes, "Copey" will be "there" and we are sure that he will make a success of his work. Here's looking at you, Norton.

## ABRAM RUNKLE COX, Φ Δ Θ

**"Abe"**

**HORTICULTURE** **CYNWYD**

**Mandolin Club; Crab Apple Club.**

"Abe" is a quiet, unassuming person and decided to immigrate to State College from Pennsylvania to learn the modest art of farming. His ability as real student is quite evident from the determined expression of his face and the wrinkles on his brow. Part of his time he devotes to making it necessary to build a larger Post Office in State College, and in patronizing "Babe's" movies. He is said to have originated a new style of hair cut which he advertises on himself. In Summer he spends his time playing tennis and going on camping trips, but has the ability to stick to what he undertakes.

## HENRY VIGOR CRANSTON, Φ Κ Σ

**"Vig," "Pep"**

**INDUSTRIAL ENGINEERING** **HARRISBURG**

**Skull and Bones; Friars; Varsity Debating Team (1, 3); Student Council; Debating Council (3); McAllister Prize (1); Class Banquet Speaker (2); Class Soccer (1, 2); Harrisburg Club; Treasurer Y. M. C. A.; Industrial Engineering Society; Mechanical Engineering Society.**

"Vigor" upon entering college immediately strove to make life more pleasant for the future generations, and at the end of the Freshman year, largely by his efforts, indiscriminate hazing was abolished. His continued interest in college activities, staunch character, and congeniality have won for him many friends. However, he has weaknesses; weaknesses which have often led him into the land of romance and poetry. Some even fear that the hearth and fireside will inveigle him from us. Be that as it may, "holes in the wall" and "turkeys" will never be forgotten.

## VIRGIL LUTHER CRAWFORD, Φ K Σ

**"Virgil," "Doc"**

**AGRICULTURE** **TYRONE**

**Skull and Bones; Varsity Baseball (1, 2); Captain Class Basketball (1); Blair County Club; Agricultural Society.**

This young man with the classical name started for State College with the vision of some day rivaling "Swamp" as a chemist. One year of this course, however, showed him that his talents did not lie in that direction. Hence his change to Agriculture. As a baseball and basketball player "Doc" has shone as a star of the first magnitude. "Good luck to Doc," is our parting word.

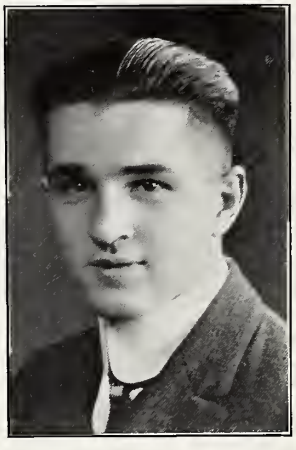

## THOMAS JOHN CROCKER, A Δ Σ

**"Tink"**

**MECHANICAL ENGINEERING** **JOHNSTOWN**

**Johnstown Club; Mechanical Engineering Society.**

"Tink" wears an ever-lasting grin on his face, and although it can not be termed an intelligent expression, still it seems to get him through everything with an A. By profession he is a heart-breaker, but we fear that this trait is leaving him since he arrived at State. "Tink" acquires things with a remarkable ease all his own; never known to study; never known to flunk anything and it is a safe bet that he will make good. "Check."

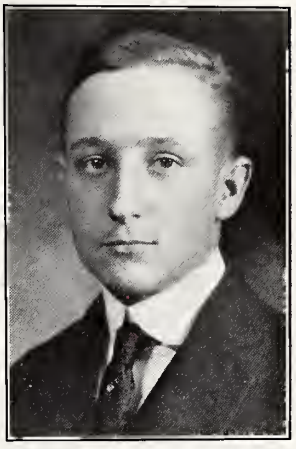

## GILLMAN KIMBALL CROCKETT, Λ X A

**"Davie," "Kinkie"**

**FORESTRY** **BEDFORD**

**College Wrestling (2, 3); Deutscher Verein; Forestry Society.**

This bashful and hesitating youth drifted into our class as a Sophomore, having taken his Freshman year in the Sunny South. He looks quiet—but? He would rather rough house than eat, and is an entertainer with the banjo. One of his aims is to train down to 115 pounds wrestling weight, but his chief ambition is to own a ranch. "Davie" is a true friend and if he shows the stuff wrestling with the world that he does on the mat, he will win.

## RANDAL HOWARD CROUSE

**"Crousie"**

**AGRONOMY** **YORK**

Randal absolutely excludes two words from his vocabulary, work and worry. However, he has shown a vital interest in fertilizers and has framed up the following definition. A complete fertilizer is an Ella Wheeler Wilcox to neutralize the acidity, a Nell Brinkley to add organic matter as a rouge, and a Dorothy Dix to supply the plant food elements in an available form. A further proof of his zeal in science, is that he tried to work out a correlation table between the use of peroxides and the occurrence of blondes. Who knows what more he may accomplish, for Randal has the makings.

## RALPH THOMAS CROWELL

**HORTICULTURE** **PHILADELPHIA**

Ralph is a steady-going conscientious fellow who firmly believes in Scientific Agriculture. He is an evolutionary product of the Two Year Course, taking the turn for better during our Sophomore year. Ralph has an aesthetic taste and likes a girl who can paint. Since joining our class, he has demonstrated to our satisfaction two things, (1) that there are good men taking the short course and, (2) that a man can come from Philadelphia and still be at home in the Ag. Course. Good luck to you, Ralph, and may your Delaware farm make you famous.

## BELFORD MYRTETUS CRUSE

**"Bell," "Caruso"**

**AGRICULTURAL CHEMISTRY** **DORCHESTER, N. J.**

**Leibig Chemical Society.**

Cruse has a wonderful voice and an angelic appearance. The combination of these two naturally makes him a heart-breaker and it was, therefore, the fault of Fate and not his, that the Sophs gave him a hair cut when a Freshman. "Caruso" met all the maids in the Centre County mountains while on "hikes"—then changed his course to Agricultural Chemistry. Why? Belford expects a thousand dollar job with the Milton Bottle Works when he graduates. He will try, at least.

## PAUL JULIUS CUENOT, Φ K

**"Cupid," "Dutch"**

**AGRICULTURAL CHEMISTRY** **HARRISBURG**

**Harrisburg Club; Leibig Chemical Society.**

Harrisburg Tech was but a means to an end in bringing "Cupid" to us. His nickname is appropriate as is evidenced by his cherubic countenance, and his failing toward the mixing of fact and fancy. He has attained some fame as an orator, especially in the use of gestures; for every little movement has a meaning all its own. When it comes to "eats," we hesitate to talk of his ability. Another failing is his occasional visits to Charter Oaks. Cuenot has the making of a famous Agricultural Chemist.

## JOHN EDWARD CUMMINS, Σ T

**"Ed," "Cum"**

**ELECTRICAL ENGINEERING** **KENNETT SQUARE**

**Electrical Engineering Society; Perkiomen Club; Chester County Club.**

This modest youth hails from the region of mushrooms and carnations. He entered college a confirmed woman hater, but as his brain became more fully developed, he discovered that he was "one in a million—not." Here's another stude who found it easier to change his religion than to drill in the "Hep's" army, so under the pseudonym of John Edward we find him in the Quaker ranks. With all his timidness and shyness, we expect "Ed" to become a rival of Edison in his chosen profession.

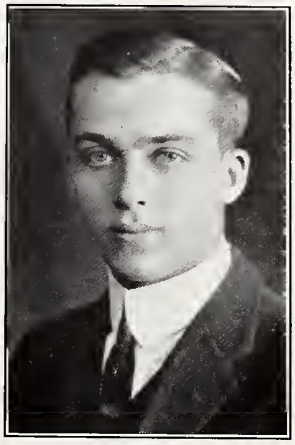

## JOHN BROWN CUNO

**"Jack"**

**FORESTRY** **BROOKLYN, N. Y.**

**Varsity Soccer (1, 2, 3); Varsity Lacrosse (2); Assistant Manager Lacrosse (2); Assistant Manager Soccer (2); Forestry Society; New York Club; Anvil Club.**

Cuno made a hit with the Sophs on his arrival here and gave to each a lock of his hair for a remembrance. Since then he has made a hit with us. He is one of the squarest men in our class and one of the most active in our class in things pertaining to our college welfare. John has one great fault, that of asking questions; he usually has the instructor pumped dry long before the alloted time. The "Interrogation Point's" future should hold good things in store.

## CALVIN C. DAETWYLER, Pioneer Club

**"Daets"**

**HORTICULTURE** **CAMDEN, N. J.**

**College Band (1, 2, 3); College Orchestra (1, 2, 3); Class Soccer (1, 2).**

Buzz-buzz-buzz! Who let you in? No, it's not a bee. It's only "Daets" bothering someone or trying to make believe he is studying. He comes from Camden, but claims to be as good as anyone from Philadelphia. He is always in a hurry, but seems to have no particular destination. Nevertheless, if everyone did as much good and made as much music as this happy combination, what a happy world this would be.

## HIRAM CLAYTON DAVIS

**"Dutch," "Dave"**

**HORTICULTURE** **PENFIELD, N. Y.**

"Dave" is a good-natured, generous fellow from York State. He used to live in Pennsylvania, but now has sundered all but two Pennsylvanian ties, namely Penn State and the source of the daily letters from Wilkinsburg. "Dutch" has pronounced musical ability and shines as a bell-ringer. He is a good worker and will undoubtedly make a rapid climb up the "Hort" tree of fame.

## MILDRED WEEKS DAVIS

**"Jack"**

**HOME ECONOMICS** **PHILADELPHIA**

**President Le Cercle Francais (3); Y. M. C. A. Play (1); Froth Board (3).**

The next issue of "Who's Who in State" will doubtless mention some of "Jack's" favorite pastimes, having feeds, losing her voice, overlooking meals, or entertaining the boys. She is never at a loss for something to do, for if a class be dull, it is a simple matter to compose a few stories or plan several pages for "Froth" while assiduously taking notes. "There's more in this than meets the eye," might well be applied to "Jack." She is not "strong" for business, for she would give away everything she possessed and her generous heart and kindly disposition have won for her many friends.

## MAYNARD SMITH DAWSON, Acacia

**"Daws," "Lengthy"**

**MECHANICAL ENGINEER** **WOOSTER, OHIO**

**LA VIE Board; Mechanical Engineering Society; Rifle Club; Motive Power Club.**

"Aw kids." Did you ever hear a tall, lanky individual make this remark; if so, you surely saw "Daws." He attended Wooster University for one year, but following in the footsteps of those who had gone before, he came to Penn State. "Daws" has a violent love for Ohio State and believes that Cleveland is really on the map. To handle his correspondence the P. O. puts on a special carrier, especially after vacations. However, he is a good mechanical and a loyal Penn State man even if he is from Ohio.

## THOMAS CHARLES DAWSON, Α Δ Σ, Η Κ Ν

**"Juke"**

**ELECTRICAL ENGINEERING** **ATLANTIC CITY, N. J.**

**Associate Editor LA VIE; College Baseball (2); Class Baseball (1, 2); Captain Class Baseball (2); Atlantic City Club; Electrical Engineering Society; Cercle Francais.**

"Juke" is the original exponent of the tango and past-master in the social stuff, the man with the pretty eyebrows and dreamy eyes. He has a carefree look and a happy smile, for he has never pulled less than a "C" in any exam. This precocious youngster hails from Atlantic City and his tales of the beach and Steel Pier are hair raisers. He is truly a man of the sea for he has a girl in every port from Atlantic City to State College via York. A good scout he is. Always ready to lend a helping hand.

## GEORGE STEPHENSON DENITHORNE, Φ Κ Σ

**"Deni"**

**CIVIL ENGINEERING** **HUNTINGDON**

**Friars; Student Tribunal (2); Y. M. C. A. Cabinet; Assistant Manager Track; Civil Engineering Society; Mercersburg Club; Huntingdon County Club.**

"Deni" brushed the hay seed from under his green "dip" shortly after arriving at State. He has always taken an interest in class affairs and is a source of information on all things mathematical. George always has been a good mixer and is a clean cut, aggressive chap, which fact has given him prestige in the hard coal regions. From his past experience he gives evidence of becoming a noted "Borough Engineer."

## NATHANIEL DEVLIN, Pioneer Club

"Nat"

**INDUSTRIAL CHEMISTRY** **SHARON**

Tri-County Club.

Our old college "Nat" was a rough freshman. Not only was he known to clean up any or all of the Sophomores he could lay hands on, but he also vented his talents for rough housing on his room-mates, to the disgust of the landladies. This is explained by a glance at the town he comes from. See it? Nuf sed. "Nat" has been known to indulge in a little friendly "P.A." (same not always standing for Prince Albert.) It is also reported that he studies; it may be true, we don't know, but we believe the hustling boy from Sharon will make a man of himself some day.

## IRA CHRISTIAN DIEFENDERFER

"Dieffy"

**ELECTRICAL ENGINEERING** **WISCONISCO**

Electrical Engineering Society; Mercersburg Club.

He still has this fond desire for God's pure air, and consequently devours the Wisconisco Sunbeams which are published weekly. "Dieffy's" Dutch name does not help him in Unser's German and his greatest trouble in college has been in discriminating between Pennsylvania Dutch and German. Push on "Dieffy," and may your mark in life measure up in height to your physical dimensions.

## MILTON ADAM DIEHL, Π K A

**DAIRY HUSBANDRY** **CARRICK**

Assistant Manager Penn State Farmer; Cross Country (1); Rifle Club; Deutscher Verein; Dairy Club; Agricultural Society.

This blooming youth from the wilds of Carrick has two great ambitions in life; first, to become chief of the "white wings" of Pittsburgh and second, to own a ranch in the foothills of Colorado. From political reports, he is practically assured of the first aim, but whether he can forsake his haunts in the Ohio Valley for Western conquest is a question. "Mick" is a conscientious stude. We are sure his life will be a prosperous one and will be "dog-goned, if it don't."

## CLAUDE DAVID DEITRICH, Viking Club

**"Steve," "Red"**

**AGRONOMY** **READING**

**Berks County Club; Deutscher Verein.**

"Steve" comes from the land of pretzels and beer, but eats his pretzels dry. He is blue-eyed, red-headed, and wears a night cap. Among his other good points, is the ability to get in solid with the Prof and his landlady. A certain Dr. Pond might be cited as an exception to the above. "Red" is loyal to the soil and dreams of a farm built for two.

## JAMES EDGAR DIMELOW

**"Dim," "Ed"**

**MINING ENGINEERING** **YORK**

"Ed" comes from York, which city according to his new version is ninety-eight miles from Baltimore, twenty-eight miles from Lancaster and twelve miles from the Susquehanna River. "Dim" made a great hit in his Freshman year with his musical voice and he is now the leader of the "Fifth Floor Agony Quartet." Edgar is a good stude and rarely pulls a **single** flunk ticket. He is of a pensive turn of mind occasionally, and wanders the halls, taking it out on the studes with his mandolin.

## BEATTY HENDERSON DIMIT

**"Dimmie"**

**AGRONOMY** **SLIPPERY ROCK**

**Louise Carnegie Scholarship (2); Civic Club; Forum; Agricultural Society; Tri-County Club.**

"Dimmie" came to State from Slippery Rock State Normal, where he made quite a reputation for himself as a student. This reputation he has retained thus far during his college course. At present he is studying Agronomy, but we believe that he is very much enamored of the life led by a For(r)ester. He may change his course, but we are inclined to doubt it, for these two studies do not conflict to any marked degree. "Dimmie" is a good, conscientious fellow, and deserves the success that is in store for him.

## RICHARD DONCASTER

**AGRONOMY** **WILKINSBURG**

**Cadet Lieutenant; Officers Club; Civic Club; Agricultural Society; Forum.**

Richard is never seen without his adopted twin brother with whom he shares his sorrows, joys, and successes. Although he has never been seen in the act, it must be admitted that he has a liking for the girls. That his sympathy is not unappreciated, is shown by the following comment, "We think he is so cute for he is always saying 'credits'." He steadily plods his way among the fields of agricultural learning and if he tries for that Civil Service job we expect him to be chief of the Bureau of Soils some day.

## LOUIS MORRIS DORFMAN

**PSYCHOLOGY AND EDUCATION** **PHILADELPHIA**

**Class Track (1); Civic Club; Liberal Arts Society.**

Dorfman came to State from the City of Brotherly Love, bent upon making a name for himself as an Electrical Engineer. Due to some influence, however, he came back in his Junior year determined to enter the larger field of social service. To this end, he has been pursuing with great diligence much of Dr. Runkle's Philosophy. "Dorf" is a good student and a man with high ideals.

## COLE BEARD DOWD, Σ A E

**"Pat"**

**COMMERCE AND FINANCE** **READING**

**Druids; Assistant Manager Thespians (3).**

There is a mysterious air about "Pat." Nobody seems to know where he is, what he is doing, or any thing whatsoever about him. However, he is frank about the place of his origin when he candidly admits that Reading is the city of his fathers. "Pat" happened to be looking through the dictionary one day and saw the word Mechanical Engineer. Consequently he decided to take that course, but later sacrificed himself to Industrial Engineering and finally to Commerce and Finance. We expect him to eclipse J. P. Morgan.

## WILLIAM JAMES DOWNING

**ELECTRICAL ENGINEERING** **TIDIOUTE**

**Electrical Engineering Society; Warren County Club.**

Here we have one of our quiet little boys. He slides through his classes at full speed and does not need chains or emergency brakes. Becomes quite flustered when asked to explain the whereabouts of his native town, but from all accounts it is somewhere north of State College. A closed mouth catches no flies, claims William.

## JOHN EDWARD DUBOIS DUNBAR, Α Δ Σ

**"Dunny," "Jun"**

**MINING ENGINEERING** **JERSEY SHORE**

**College Football (1, 2); Class Football (2); Mining Society; Williamsport Club.**

"Dunny" came to us from Jersey Shore and ere long his charming voice and pleasant smile easily won for him the heart of a Bellefonte "Miss." "Jun" at once became an earnest subscriber to the Bellefonte Daily News, and also received two and three letters daily for a while. Since then, however, he has sought out for himself a clear field with the exception of "Doc" Stecker's math in which subject John, as a tutor, flunked, and his pupils all passed. "Dunny" was a star end on his class football team for two years and with a little more weight would have made good on the varsity, perhaps.

## STEPHEN EDGAR DUNLAP

**AGRICULTURAL CHEMISTRY** **LANCASTER**

**Lancaster County Club; Leibig Chemical Society.**

Hey! Stand around! Behold the pride of Lancaster. This innocent youth dreams of becoming a farmer chemist, or at least, of having "a 'lab,' of my own to fool around in, you know, and nothing else to do." Although he writes numerous letters to the dames and takes time out at least twice a day to wallop his freshman, he finds time to absorb sufficient knowledge to pull exemption grades. In spite of his love for sleep, it is certain he will make Lancaster proud of him yet.

## FRANCIS WINKLEY DUNMORE

**"Doc," "Dummy," "Wireless"**

**PHYSICS** **PROVIDENCE, R. I.**

It's a cinch that no one has done more for Wireless at Penn State than Dunmore. He fears the more deadly of the species and trembles before them. His system feels more at home in his harem of physical apparatus in the Physics Building. "Doc" seldom speaks, but when he does the "Profs" marvel and sometimes reconsider. He has always been a shark in all his studies and will some day become a credit to Penn State.

## CLARENCE WILLIAM DUPPSTADT

**"Duppy," "Pap"**

**DAIRY HUSBANDRY** **SOMERSET**

**Cadet Second Lieutenant; Officers Club; Rifle Club; Forum; Agricultural Society; Debating Team; Hazing Committee (2); Somerset County Club.**

"Duppy's" arrival at college was somewhat delayed by a sojourn into the Philippines. But on his appearance at State he became active, starting with poster night, and later became a modern Demosthenes in all class meetings. "Duppy" is a star in affairs pertaining to the army as well as being a fighter of the naughty Sophs. His highest ambitions are to get through German and to find a wife. Some day "Pap" will be a farmer and promote Uncle Sam's agricultural interests in our island possessions.

## WILLIAM PHILLIPS DUTEMPLE

**"Bill"**

**FORESTRY** **BROOKLYN, N. Y.**

**Varsity Soccer (1, 2, 3); Class Soccer (1, 2, 3); Captain (2); Varsity Swimming; Glee Club (2); Cercle Francais; Forestry Society; Anvil Club.**

"Bill" came to State to study Forestry, teach soccer, and expound his views along matrimonial lines to his long suffering class-mates. He is a quiet stude, minds his own business and expects the same of others. A conscientious worker, mentally and physically, and a man that has never been known to lie down on the job. His host of friends will attest to his popularity.

## ERWIN ELDON EBY, Σ T

**"Ebe," "Stiff"**

**HORTICULTURE** **LOS ANGELES, CAL.**

"Hey, fellows, let's get up a little matching bee." "No?" "Twenty-five billiards, then." "Stiff" is willing to take a chance on anything. Sometimes he loses—and repeated French and Carbons. He came clear in from Los Angeles to become a Landscape Gardener, but bids fair to be a Y. M. C. A. leader, yet. Here's hoping he wins all the sundaes for which he matches, and makes good on the side. "No." "Git out!"

## JOHN RAYMOND ECKLEY, K Σ

**"Ray"**

**MECHANICAL ENGINEERING** **NEW KENSINGTON**

**College Orchestra (1, 2, 3); Mechanical Engineering Society.**

Ladies and gentlemen, here's the band. Before you is a man who can play any instrument that is placed before him, from a trombone to wishbone. His marvelous abilities end not here. He often carries on a learned conversation with himself and never disagrees. He also converses with others, preferably the opposite sex, and at the cottage is a man much in demand. In spite of these attainments and detractions from electricity, John generally lands the grades that count and will be a worthy disciple of Westinghouse.

## WILLIAM MERLE EDMONDS, Σ Π

**"Swede," "Bruin"**

**ELECTRICAL ENGINEERING** **KANE**

**Electrical Engineering Society; McKean County Club.**

"The "terrible Swede" early made himself known to Penn State as a rough houser, and has spent much time in living up to his reputation. "If you want to get out of here in one piece start now, by yimminy." He abhors tobacco smoke and claims to be no "fusser." Merle is an all around good scout and will always lend a hand to a fellow who's down, so here's good luck to the future Electrical Engineer.

## THOMAS CARL EICHELBERGER

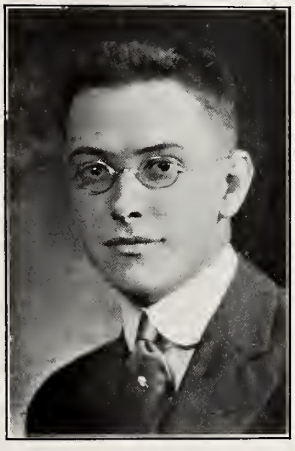

**"Eich," "Enich"**

**ELECTRICAL ENGINEERING** **EVERETT**

College Orchestra (2, 3); College Band (1, 2, 3); Electrical Engineering Society; Franklin and Marshall Academy Club; Bedford County Club.

"Eich" has three important thoughts in life; Everett, women and music. The first two are closely associated and with the second is a fad for the collection of bracelets but SHE doesn't know it. As for the last, he will sing bass to the accompaniment of anything from a grind-organ to a jews-harp. But in spite of all that, and the fact that he never has a match, he is an all around "good scout," and some day in the not far distant future, he will be holding down a place with the best of them.

## JOHN REYNOLDS EICHENBERG

**"Ike"**

**CIVIC ENGINEERING** **WALTON, N. Y.**

Civil Engineering Society; Deutscher Verein.

The life of the man with the transit and tape had a strong call for "Ike" and consequently he bounced into our midst full of the good old "pep." "Ike" spends his spare time in writing songs which are never published and in writing plays for the "movies." As to that girl of his—well, ask "Ike," and if he has nothing to say, judge for yourself from the expression that his countenance reveals.

## GEORGE FREDERICK ELLIOTT, Δ T Δ

**"Dad," "Freddie"**

**MECHANICAL ENGINEERING** **PITTSBURGH**

Varsity Track (1, 2); Class Track (1, 2); Class Basketball (3); Mechanical Engineering Society.

Old "Dad" Elliott, the fifty-third. You see him to-day just as he will be to-morrow and as he is always. He first showed his athletic ability in track and immediately took to jumping. Since that time, way back in his Freshman year, he has been on the jump both in track and in his studies. Studies never seemed to worry George, but every once in a while the grades are slightly deficient. We trust that he will report for duty next fall and continue with his class to the end.

## GEORGE DANIEL ENTERLINE, Σ N

**"Dan"**

**AGRONOMY** **SHAMOKIN**

**Sphinx; Sophomore Tribunal (2); Assistant Varsity Baseball Manager (3); Northumberland County Club.**

A mighty man was lost to Shamokin when Daniel added fame to our number. Unlike many of us, he came here with a purpose, primarily to learn about the various and sundry methods of agriculture, et cetera. "Dan" became prominent as a juryman, and many a freshman owes his locks to "Dan's" mercy. "Yea, verily, a Daniel come to judge us." His over-ripe pipe and his "Slip me a smoke, can you?", will serve to keep him fresh in our memory.

## GEORGE KRAUSE ERB, Σ A E

**"Tub," "Puss"**

**MINING ENGINEERING** **LEBANON**

**Varsity Track (2); Class Track (1, 2); Lebanon County Club.**

A look at his expansive countenance and a knowledge of his birthplace leave little doubt as to his nationality. George is certainly some social whale among the women, and if you doubt it you need only look up his record in Mt. Gretna, or Deckers Point. Although built for comfort, Erb is a stellar man on the cinders and on more than one occasion has been point winner for the Blue and White.

## ALEXANDER JOHN ERICHSON, Φ K

**"Von," "Swede," "Erich"**

**AGRICULTURAL CHEMISTRY** **ATLANTIC CITY, N. J.**

**Leibig Chemical Society.**

Here we have a man of noble birth as indicated by his name. He further tries to substantiate his claim to nobility with a microscopic hirsute growth under his nose. The "Swede" isn't very talkative, but under stress of great excitement his tongue loosens. "Erich" has a free and easy manner with the Profs, for example, in speaking to Dr. ——— of one of our departments,—"Hey man! look out, you'll get a shock." Chemically speaking, "Von" is the real precipitation of a student, in fact, he shines in all the branches of studies that he pursues. "Erich" with the right sort of luck will some day be mayor of Atlantic City.

## GERALD JACOB CHARLES ESHELMAN

**"Dutch"**

**ELECTRICAL ENGINEERING** **PARRYVILLE**

**Electrical Engineering Society; College Orchestra (3); Deutscher Verein; Mercersburg Club.**

It takes but a single glance at Gerald's good-natured countenance to penetrate to his nationality. Like all of his race, "Dutch" is naturally persevering. His performances with his cornet give proof of this statement, for after many years of endeavor he is said at last to have wrested a tune from it. "Dutch's" chief hobby is wireless and he sits for hours with the receivers strapped to his ears, listening to the voices of the night. In his Freshman and Sophomore days, he gave great promise of becoming a great success in the military department, and frequently received the full attention of his superior officers, but for some unfathomable reason he has since dropped from the ranks. Equipped with his characteristic sticktuitiveness, "Dutch's" success in the world should be certain.

## GEORGE WILBERT EVERHART

**"Cupid," "Cutie"**

**ELECTRICAL ENGINEERING** **MANCHESTER**

Behold! We have another Dutchman from York County. George is a quiet, unassuming, rosy-cheeked lad whose motto is: "Be seen and not heard." He came to State while still a mere child, weighing less than a hundred pounds, but instead of pining away, he has grown with amazing rapidity. It must have done him good to get away from the Acme Water Works. He is a good scout and we wish him success as an Electrical Engineer.

## KATHRYN L. ETTERS

**"Kate," "Kaethe"**

**HOME ECONOMICS** **STATE COLLEGE**

**Deutscher Verein; Deutscher Verein Play (1).**

"Kate" is a girl who is hard to understand and to appreciate, but take my word, here's a friend. She is quick, impulsive and generous. What "Kaethe" wouldn't do for a friend isn't worth mentioning. Yes, she likes to keep up with Dame Fashion and that old lady leads her a merry chase. Of course, she is a student and a good one, but we think her good fortune lies in other directions.

## CHARLES FADDIS

**"Duke," "Trapper"**

**HORTICULTURE** **WAYNESBURG**

The "Duke" strayed from the Sunny Southern Hills. During the three years since, he has made many acquaintances and friends; besides passing off a few subjects when time grew heavy on his hands. Anyone who tramps the mountains or whips the rippling trout streams cannot help but recognize this gentleman. He has a great fault of dragging into his room old meteors, bear traps, and rank corn-cob pipes. While not a Y. M. C. A. shark, he did attend chapel once. Like many '15 men "Duke" was an educator of the Freshmen. Faddis is always original, sociable and distinctly individual. His interest in his work makes him an excellent student.

## PAUL BENJAMIN FEHL, Viking Club

**"Fat"**

**INDUSTRIAL CHEMISTRY** **READING**

**Deutscher Verein; Berks County Club.**

Paul, commonly known as "Fat," is another resident of the beer belt, as his waist measure would indicate. But judge him not too seriously, brother class-mates, as he has given us his word that the worst he has ever indulged in is some diluted cider at free feeds. He is also a "fusser" of some note, as his many conquests in the local vicinity would indicate (?). This is nothing unusual, for as one of "Swamps" men he should be a good mixer. Taken as a whole he is a good, hard worker, and we all look to him to succeed in life or else blow himself to bits in some dangerous chemical work. Good luck, Paul.

## JOSEPH LINCOLN FIEBERGER, K Σ

**"Phock," "Caruso"**

**INDUSTRIAL ENGINEERING** **AKRON, OHIO**

**Industrial Engineering Society.**

Anyone who hasn't heard this young Caruso sing has missed a rare treat, for this is the rarest of his many accomplishments. So great is his pride in his native town that he has been known to give "Akron, Ohio" as a substitute for his own mispronounced cognomen. As a student, "Joe" has proved his ability, and we are sure that his knowledge of scientific management will materially aid in the uplifting of the "Ancient Order of Antiquated Foundrymen." His portly figure and ebony mustache, combined with his winning personality, have gained for him a wide circle of friends.

## FRED REID FIELDING

**"Freddy"**

**MECHANICAL ENGINEERING** **DONORA**

**Mechanical Engineering Society; Washington County Club.**

"You dog-gone sea-cookin' son-of-a-gun." Fielding hails from Donora. In that great place of industry, he developed a strong inclination for things mechanical; this resulted in his coming to "State" for the mechanical course. He also cares a great deal for basketball. He never allows his studies to interfere with the Post. He has a beautiful tenor voice, and in our Freshman year, when homesick, would console himself and his hearers (?) by singing, "Come, come, I love you only." Fritz is a good honest fellow, who will undoubtedly be successful along both the mechanical and matrimonial lines.

## WILLIAM HENRY FINKELDY

**"Bill," "Fink"**

**MINING ENGINEERING** **CAMDEN, N. J.**

**Mining Engineering Society; Philadelphia Club.**

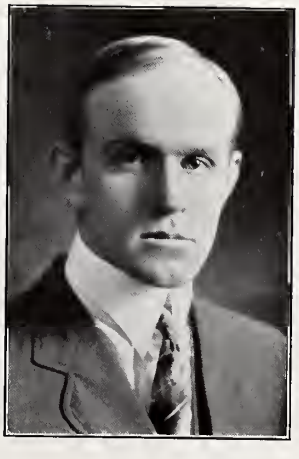

"Fink" hails from the graveyard of East Camden. He is noted for three things, (1) his ability to make the air sulphurous, (2) to take more medicine than is usually good for two people, and lastly his love for his studies. "Bill" is classed with the grinds. One of this youth's peculiarities is not to let anyone know to whom he writes in Camden, as on several occasions he was known to wait until arriving at the Post Office, before addressing her letter. Perhaps "Bill" writes his letters according to a certain form and was considering to which "her" he would send it. Anyway, he is far from lazy, which fact overbalances his above mentioned weaknesses.

## ERNEST ELLSWORTH FISH

**"Baldy," "Scales"**

**ANIMAL HUSBANDRY** **WYALUSING**

**College Baseball (2).**

Well "By Chowder," boys, here we have a noble son of Wyoming County. This unassuming young man is a southpaw of some fame, and in a few years we expect to see him lead Wyalusing to a World's Championship, if the girl back home doesn't get him first. Such is "E. E.'s" love for national pastime, that we fear it is going to his head—at least it is getting bald. "Baldy" is not a grind, but is well up with the best. He made a hit in "spouts" by delivering an oration entitled, "Fish" of all kinds.

## ALBERT EARL FISHER

**"Water," "Judy"**

**HORTICULTURE** **HARRISBURG**

McAllister Scholarship (1); Penn State Farmer Board (2, 3); College Track (1, 2, 3); Class Track (1, 2); Cross Country Squad (1, 2, 3); German Play (2); Deutscher Verein; Agricultural Society; Crab Apple Club; Civic Club; Press Club; Harrisburg Club.

Before us is the magazine man of the college. You might as well subscribe now, for "Judy" will get you sooner or later. As a business man, he has no equal in the college. He once incurred the wrath of the Juniors during his sophomore year, but he does not hold that against them any longer. "Water" is inclined towards athletics, and if ever constant plugging put a man on an athletic pedestal, "Judy" will some day rest there. According to him, he has an enviable drag around the Capitol. Some day, one of us may be enrolled as governor of our state.

## GEORGE NELSON FISHER, Φ K Ψ

**"Cupid"**

**AGRICULTURAL CHEMISTRY** **ERIE**

Varsity Football Squad (1, 2); Glee Club (1, 3); Pharsonians (1); Erie City Club; College Choir (2, 3); Leibig Chemistry Society.

"Cupid" does everything from playing football to singing and quoting Shakespeare. Not content with Penn State, he made a visit to Wilson, where he was renamed "Kewpie." George is never in a hurry, and if the bell has stopped ringing, he never runs. He has great business ability, for he has had considerable experience as a floor walker in one of Erie's large department stores. George is as good-natured as he looks, and even the battering of the varsity line failed to provoke his ire.

## LOUIS VICTOR FLICK, Φ K

**"Lou," "Joe," "Varsity"**

**MECHANICAL ENGINEERING** **ALTOONA**

Ladies, behold! You gaze upon the ladies' man of the Junior Mechanicals. "Gee, boy, she's KEEN!" "Lou" is a nut on gas engines, and intends going into the automobile business with the "Heim Children." He has lately been interested in a certain form of "Geer" wheel, but his room-mate insists that one "Jean" can be counted as a "factor of safety." Studious, industrious, serious, "Vic" is a man who works Mechanics by common sense. He is some basketball player, and would have been a success in the musical world, had it not been for the Railroad Rag. Success to you, "Varsity," we are sure that you will make good.

## LEWIS WARREN FOGG, Δ Χ Σ

**"Foggie," "Louie"**

**METALLURGY** **UNIONTOWN**

**Mining Society; Fayete County Club.**

"Foggie" had great ambitions in his earlier days of becoming a great general, and actually took the examinations for West Point. He may still be trying to land a government position as he makes frequent trips to Washington, D. C. Although far from a grind he might be classed with the "sharks." His success as a metallurgist is assured, due largely to his ability to do things different from all other people. "Oh, I'm a whale at that stuff."

## CAROLINE FORESMAN

**"Freezeman," "Frizzie"**

**HOME ECONOMICS** **MARKLE**

**Y. M. C. A. Play (1); Y. W. C. A. Cabinet (2); Girls Glee Club (3); Y. W. C. A. Treasurer (3).**

If you examine her picture with care it will be hard to find anything that betrays that "Freezman" is one of those proverbial "minister's sons." Yet she belongs to that category known as the Preachers and is proud of it. She is a demure little maid, but when excited has been known to go as far as to say, "Oh, my stars!" She is mighty proud of her big athletic brother, and takes a natural interest in other college athletes. As treasurer of the Y. W. C. A. she has put through several fine business deals, especially in the line of chocolate. Caroline's steady workmanship and sweet smile must win her way through life as they have already won it through college.

## WILLIAM TIMNEY FOULTZ

**"Bill," "Willie," "Billie"**

**ELECTRICAL ENGINEERING** **COLUMBIA**

**Freshman Stunt Committee; Lancaster County Club.**

This darling little Billiken hails from Columbia, and like the laughing god of the heathen, is always grinning. "Laugh and the world laughs with you," is "Billie's" motto. "Bill" is a famous man with the ladies and numbers among his conquests fair ones from such noted places as Lock Haven, Bellefonte and State College, not to mention the summer school teachers. But in spite of this trait we like him as he is a mighty good fellow, and not afraid of work.

## GUY VERNON FOULTZ

**"Frau"**

**INDUSTRIAL CHEMISTRY** **WAYNESBORO**

"Frau" is a very religious sort of a fellow. He never says a bad word even if he does have to make a drawing the third time before it is approved. He is forever admiring the lassies, but as yet he has never been alone with a single molecule of the fickle sex. "Frau" as a chemist is hard to beat, although he is very extravagant with the glassware. Nevertheless he is always able to give a correct answer when suddenly startled by "Wot have ye got in your test-tube?"

## PHILIP WALDORF FRALEIGH, ΦΓΔ

**"Frazenline," "Phil," "Ichabod"**

**CIVIL ENGINEERING** **ROSSELLE PARK, N. J.**

"Phil" started in as an "Ag" student, but the call of Mother Earth was not strong enough to hold him and he became a "Civil." After many arduous months of uncomplaining toil, "Phil" managed to raise a mustache. One night his efforts were nipped in the bud by some naughty Freshmen, who shaved off one-half of his precious hirsute adornment. "Phil" is a good fellow, a true friend, and ever loyal to his Alma Mater and the "Hep's Army."

## GEORGE ADAM FRANK

**"George"**

**DAIRY HUSBANDRY** **PHILADELPHIA**

"George" is one of the new recruits who believes that a city man can make a success on the farm. Although quiet and unassuming he possesses the qualities that are needed in his chosen field. "George" already has designs on a well situated dairy farm just outside of Philadelphia and when he gets started let the Abbot and Supplee dairies beware. If "George's" husbandry in the household is up to his standard in the Dairy Building, we will back him on any matrimonial venture.

## KARL AUGUSTUS FRANTZ, Σ Π

**"Pretty," "Gus," "Karl"**

**INDUSTRIAL CHEMISTRY** **WILKES-BARRE**

It's best not to judge the hardness of "Karl's" disposition by the expression on his face. He came to State originally with the intention of acquiring a knowledge of Industrial Chemistry. Feeling that he could overcome more difficulties than that course offered him, he took up wrestling, and later, photography. In the latter pursuit, he has even been known to lose a whole night's sleep printing pictures—something that his studies never caused him to do. "Pretty" is a great man for affinities. If you want a friend, or an expert with the clippers, call on "Karl."

## CLARENCE DONALDSON FRAZIER

**"Clare," "Seedy," "C. D."**

**HORTICULTURE** **BEAVER FALLS**

**Deutscher Verein; Agricultural Society; Crab Apple Club; Beaver County Club.**

To look at him, one would not think that this modest, unassuming young man passed off Freshman Chemistry by taking only the final "exam," but "Charlie" was very good to him. Formerly, he was a king among the "two year Ags," but aspiring to higher things, he joined us on the third lap. Perhaps his action may have been further influenced by a desire to prolong his career as a "regular" at the cottage. He is an authority on local geography, particularly in the vicinity of the country school-houses. "Clare" is a good student, and we expect great things of him when he starts his greenhouse near Beaver Falls.

## FRANKLIN EUGENE FREDETTE

**"Frank," "Freddy"**

**AGRONOMY** **WILKINSBURG**

**Associate Editor Penn State Farmer; College Track (2); Civic Club; Agricultural Society; Forum; Wilkinsburg Club.**

Franklin "Erstwhile" Fredette, hero in the thousand "third story" battles of his Freshman year, has allowed time and work to mold himself into an earnest-eyed student. "'Frank,' come down to your room at once, I have not had a wink of sleep for a week," was once wont to summon this Brom Bones from below. No longer so, the landlady's complaint has changed to a wail, for the juice used as "Frank" pursues his way along Learning's rugged road. He is the type that gets there, and we predict that he and Dick will make a winning team together.

## JOHN SAMUEL GARDNER

**"Jack"**

**HORTICULTURE** **QUAKERTOWN**

"Oh, my goodness, I'm exempt from the final exam." This unassuming little lad departed from Muhlenberg to study Horticulture, his favorite pursuit, at Penn State. His face, as well as his class grades, indicates a "shark," and if he shows the unceasing devotion to his future work that he has shown to his studies during the short time that we have known him, he will surely make his mark in the horticultural world.

## WARREN DeWITT GARMAN

**"Tommy," "Runt," "Dutch"**

**MECHANICAL ENGINEERING** **HARRISBURG**

**Mechanical Engineering Society; Harrisburg Club.**

"Fellows, that reminds me of an experience I had." Thus beginneth and endeth "Tommy," and away he goes for "Old King Koal" and his little pipe. "Runt" has promised not to fall in love until his Senior year, but we fear—. You see, fellows, it is this way: "Tommy" started to shine as a German student in his Freshman year and now he has decided to remodel the language to suit any occasion. He is a shark for, "a'that," and always finds time to give the boys a few points on the practical side of engineering. "Tommy" is an adherent to the doctrines of Horace Greeley, and no doubt will make his mark. "All right, 'Dutch' shoot."

## MASOM CONRAD GILPIN

**"Hike"**

**ANIMAL HUSBANDRY** **ARIEL**

**Froth Board; Wayne County Club.**

"Hike's" quietness is exceeded only by his humor, and as "Froth" prints some of his "dope" we must admit that his sense of humor is very keen. He outdoes these efforts by far, however, in the poetry he writes for a certain weekly paper with a restricted circulation. He delights in reading books of philosophy, and is one of Dean Holme's disciples. He fills in the space between Fichte and Kant (whoever they may be), by studying, and in his quiet way keeps pace with the leaders.

## OLIVER BENJAMIN GIPPLE, Θ Ξ

**"Ben," "Gip"**

**FORESTRY** **HARRISBURG**

Sphinx; Sophomore Hazing Committee; Class Track (1, 2); Class Soccer (1, 2); Drum Major Cadet Band (2, 3); Forestry Society; Harrisburg Club.

Harrisburg has loaned "Ben" to Penn State until he becomes educated in Forestry, after which time she again demands him on Capitol Hill. He is gradually rounding into a man fitted for his profession and on the side line shows marked developments along athletic, martial and social lines. Shorn like a lamb in his Freshman year, "Ben's" word became law to the Fresh the following year. As a diligent, earnest student "Ben" is without a peer, and his fondness for band music has resulted in his wearing the drum major's uniform in which he excites the envy of the gods.

## GEORGE HOMER GLEASON, Pioneer Club

**"Gleas," "Beautiful"**

**INDUSTRIAL CHEMISTRY** **SCRANTON**

Sphinx; LA VIE Board; College Wrestling (1, 2, 3); Class President (2); Louise Carnegie Scholarship (2); Student Board (2); Student Council (2); Toastmaster Class Banquet (2); Class Wrestling (1, 2); Manager Class Wrestling (1); Assistant Manager Varsity Wrestling (3); Chairman Junior Prom. Committee (3); Student Tribunal (3); Lackawanna County Club.

As hard as Scranton coal was George when he first landed here. Society since has worked a wonderful change. George no longer rouses sleepy Freshmen from peaceful dreams to spur them into realistic activity. All that is over and he adorns the campus as one of our changed men. "Gleas" has a strong personality and he has also qualities of leadership that will bring results when he bids "State" the last farewell.

## ALVIN CHARLES GOETZ, Λ X Σ

**CHEMISTRY** **AMSTERDAM, N. Y.**

Cadet First Lieutenant; Deutscher Verein.

Up in OLD YORK STATE "Red" left some vacuum when he packed his carpet bag for Nittany Valley. Determined to become a chemist, "Red" plunged into the work with his whole soul, and it is claimed that "Swamp" has had to resort to physical force to keep this enthusiast from taking up a permanent abode in the laboratory. In military life he has distinguished himself, for he is one of the "Hep's" trustees and is as loyal to the army as the "Sarg" himself.

## JOHN DEHUFF GOLD

**"Jack," "Johnnie"**

**INDUSTRIAL ENGINEERING** **WOODLAWN**

Thespians (3); College Football (1, 2, 3); Class Football (1, 2); Class Treasurer (1); Pharsonians (1); Beaver Valley Club; Industrial Engineering Society; Mechanical Engineering Society.

John says that middle name of his has a long history. As a Freshman he had great ambitions for class offices, etc., and he finally landed one. He also had athletic ambitions and was successful enough to make his class football team. These sufficed him till his second year, but since then he has lost all "pep," except to make the Main Building Team. His latent desires are to become a musician, and, as a result, he keeps his fellow studes awake, evenings, nights and mornings—even during the day with his melodious (?) voice and that guitar accompaniment. Nine-tenths of the remainder of his time he spends in receiving letters from or writing to that normal school girl, and the rest of his time he studies.

## WALTER COOK GOODWIN, Δ X A

**"Goodie," "Shark," "Walt"**

**ELECTRICAL ENGINEERING** **PITTSBURGH**

Electrical Engineering Society; Pittsburgh Club.

"Walt" is a true "comeback" He started here in 1907, dropped out for a few years and came back to us a mature man. "Goodie" is a shark in his studies and has the ability to combine his class work with other things that are worth while without any detriment to either. He takes a few side trips each year, and his whereabouts are a mystery. No doubt this will have a bearing on his future life.

## ROBERT LEE GOURLEY

**"Mike," "Girly"**

**ELECTRICAL ENGINEERING** **FRANKLIN**

Electrical Engineering Society; Venango County Club.

If you happen to hear an alarm clock go off every fifteen minutes from five o'clock A. M. until seven A. M., you can believe that "Mike" is preparing for one more day of "quizzes." "Girly" really does believe in study, but not when it interferes with sleep. "Ho John, it is now nine o'clock, wake me up before you go to class." "Mike" is an earnest student, but frequently falls asleep over his books, however, his ingenuity and good character will no doubt enable him to win a responsible place in his life's work.

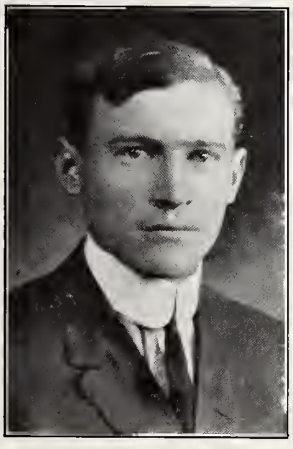

## GUSTAV HAROLD GRABE, Φ Σ Κ

**"Gus," "Chubby," "Fat"**

**ANIMAL HUSBANDRY** **COUDERSPORT**

Grabe is the model of a dignified Junior, and believes that silence is golden. It would be very nearly enough to say that he comes from Potter County and is taking the A. H. course, but for the benefit of a certain few who are not in college, we add that he is unusually good looking, and is a shark without knowing it. Little is known of his early history other than as a child he showed a great love for the animal kingdom, which love grew and eventually shaped his career. No, reader, you will learn nothing of his love affairs, as it will all appear in book form soon.

## JOHN LYON GRAFFIUS

**"Jack," "Graffius"**

**ELECTRICAL ENGINEERING** **STATE COLLEGE**

If you are looking for "John," you will find him at the "Co-op" corner or the "Movies" any time from 7.00 to 10.00 P. M. "John" passed off all his elementary work in State College High School, and is now taking nothing but advanced (?) work. He gave good proof of his originality when he proved to "Doc" Stecker that the impossible is possible. "John" is one of the never-flunk Electricals, and we expect him to make good.

## JOHN ELLIS GRAHAM, Θ Ξ

**"Jack"**

**CIVIL ENGINEERING** **JEANNETTE**

**Druids; Glee Club (1, 2, 3); Assistant Manager Glee Club (3); Pharsonians (1); Thespians (2); Cadet Band (2).**

How "Jack" ever kept his fresh complexion in the sooty atmosphere of Jeannette is a mystery to us, but a look at him demonstrates his success beyond a doubt. He cast his lot among the Civils, but if his social activities in the past may be taken as an indication "Jack" will never be found for any length of time beyond the sound of feminine voices. Both as a singer and as a student he has made a name for himself and no doubt we will yet hear of him when the view of Old Mt. Nittany is but a memory to us.

## LYMAN DAVIS GRAHAM

**"L. D.," "Shark," "Prof"**

**CIVIL ENGINEERING** **BEAVER FALLS**

**Civil Engineering Society.**

From the time that Graham entered State he has been a shark of some note. He took great pains to pass off drill and succeeded admirably. He is not a grind, as he always has time for a rough house, or for chasing mice about the room. At different times after his Freshman year he allowed the smoke of the large western cities to settle on his upper lip. Altogether, "L. D." is quite a valuable man to the class.

## SAMUEL A. GRASS

**"Sam"**

**ELECTRICAL ENGINEERING** **PHILADELPHIA**

**Electrical Engineering Society; Central Manual Club; Menorah Society; Nehemiah Club.**

This short soprano climbed into our class by the Sophomore route after spending his Freshman year with the class of Nineteen Thirteen. He has been working hard ever since, and now has the habit. He is a man who is as regular as clock work, and has certain specified hours for study, certain ones for fun, and so on. He emerges from the thicket with the aid of a safety razor at five bells every morning, and, like the Bellefonte Central, leaves for classes at the striking of the hour. We behold an earnest, steady worker, a good student, a jolly square fellow.

## SAMUEL HUTCHINSON GRAY, Σ X

**"Sammy," "Lady Jane"**

**LIBERAL ARTS** **BELLEFONTE**

Samuel was accorded the historical designation of "Lady Jane" by some of his admiring friends among our "college women," who saw in him a worthy resemblance to that illustrious personage. However, we must explain that "Sammy" is essentially masculine, as his physique will indicate. His great weakness is his inborn aversion toward attending daily chapel, especially when it is cold. We believe that "Sam" can overcome this fault by virtue of his superior ability to stun his opponents, by an irresistible line of hot air; and this should surely help to carry him to the top.

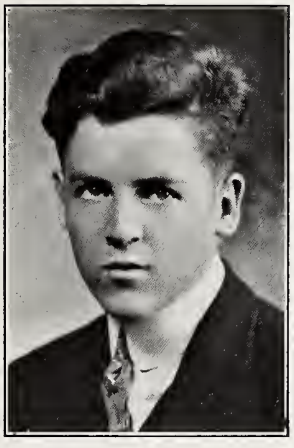

## GEORGE WASHINGTON GREENAWALT

"Scotty"

**MINING ENGINEERING** **STEELTON**

College Football (1); Class Football (1, 2); Harrisburg Club; Mining Society.

Our class football got a big boost when "Scotty" came out for the team, and the varsity generally found the stockily built class-mate a substantial brick in the Scrub defence. If you desire to learn about his early history, get him started on that, "When I worked in the Steelton Laboratories" stuff. George has a voice that often permits singing, and his serene visage is no uncommon sight in our choir. For a loyal Miner, we will hand it to "Scottie."

## WILLIAM REESE GREGG, Δ T Δ

"Bill," "Lasses"

**PRE-MEDICAL** **MONESSEN**

Varsity Soccer (2); Varsity Soccer Manager (3); Class Soccer (1, 2); Captain Class Soccer (2); Y. M. C. A. Bible Study Committee; Y. M. C. A. New Student Committee; Civic Club; Pre-Medical Society; Washington County Club.

"The Welsh were never conquered." Here we have illustrious, industrious, religious, ever ready for conversation, "Bill." His chief hobbies are soccer and Y. M. C. A. activities. His record in soccer speaks for itself and he is gradually winning distinction in the latter by his untiring endeavors to round Freshmen into a Bible class. William was never known to study on Sunday, even for a quiz, but prefers getting up in the wee hours of Monday morning. His ability, in his Sophomore year, to collect bug specimens and to dissect cats, is proof enough that he is on the road to success as a physician.

## JOSEPH GRYCZKA

"Joe"

**CHEMISTRY** **BLOSSBURG**

College Football (1, 2, 3); Class Football (1, 2); Garvey Club; Tioga County Club.

"Bill" Hollenbach calls him "Gryczarski," but we call him "Joe." He has won the respect of the coaches and the squad by his extraordinary sticktuitiveness. "Joe" likes to argue, especially when he can convince you that CaO is soluble in water. His tenacity of purpose is further shown by his regular attendance at the "movies." If the show is bum, he does not kick to you about it, but lets you find out for yourself. "Joe" is as square as his shoulders, and will be a pillar in upholding the prestige of the Blue and White.

## SYLVESTER GUTELIUS

"Bus"

AGRICULTURE — GLENMORE, N. J.

This bashful youth has at last decided that Penn State is pretty decent after all. He spent a year at Rutgers, discovered his horrible mistake and brought his belongings to Penn State. Even then he was undecided as to whether he really desired to stay and, accordingly joined the Two-Year Ags. But after breathing State College air for a few months, he concluded this was good enough for him and accordingly he is now one of our classmates. Although he has not been known to fuss while here at college, we would not advise anyone to look into his past history. Go to it, "Bus," you'll make a good farmer yet.

## ARTHUR JOHN DANIEL HAINES, Δ X A

"Art"

ELECTRICAL ENGINEERING — ALLENTOWN

Electrical Engineering Society; Allentown Prep. Club; Lehigh and Northampton County Club.

"Art" is another resident of the rapid city, meaning Allentown. This heavy Dutchman is noted for his wit and vivacity. This is to be expected, as he is some "fusser." He is also some musician, being able to claw the ivories a bit and keep the rest of the fellows awake singing "The Rosary." He is a member of the Electricals, his strongest point being "math." Good luck to you, "Art," for we feel as confident of your success as the editors of your town papers do.

## EARL GORMAN HALL, Π K A

"Hallie," "Isaiah"

ELECTRICAL ENGINEERING — ST. LOUIS, MO.

Class Football Squad (1, 2); Glee Club; College Choir; Electrical Engineering Society; Deutscher Verein; Pittsburg Club.

"Say, 'Hallie,' where do you live? Don't know they've moved again." Although he claims the Smoky City as his home he lives in St. Louis. Hall is the real comedy among the boys and claims that he is soon to charge admission to his cheap vaudeville. He never lets study interfere with his education and generally gets through without buying books. Every time this youth leaves college a new correspondent is added to his list. "Oh, you blondy with the dreamy eyes." Hall is also a musician of some note, but we won't talk about that.

## WILLIAM GAW HANCOCK

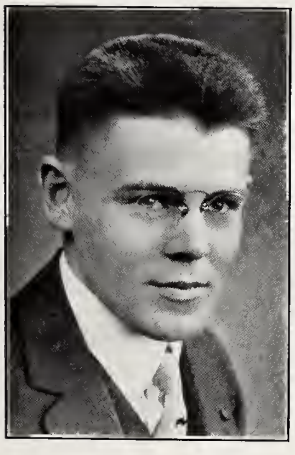

"Bill"

CIVIL ENGINEERING — OCEAN CITY, N. J.

Class Track (1, 2); Manager Class Track (1); Civil Engineering Society.

As the gentle summer breeze mingles with the green verdure, even so, among the emerald green lids in the fall of nineteen-eleven, there shuffled in fat William Hancock. "Bill" developed a big interest in the affairs of the class of 1915 immediately and has kept it up ever since. This young man was once found guilty of slipping off to the mountains to teach Sunday School. We wonder why. "Bill's" one hundred and eighty pounds seem especially hard on chairs and bed-frames. He has been a good student, a successful manager, and is a true son of the Blue and White.

## JOSHUA EYRE HANNUM, JR.

"Josh"

INDUSTRIAL ENGINEERING — BRANDYWINE SUMMIT

From first appearance one might think that "Josh" takes "Ag," but he is a loyal member of "Hugo's" gang of "Industrials." "Josh" became pretty well known in his Freshman year by his arguments in Rhetoric and by his ability to do good wood work. Not satisfied with being merely an engineer, "Josh" decided to develop his artistic side and he entertains very cleverly on his mandolin and violin. At present he is not very strong for the girls, but we feel sure that he will make good in that line, too, when he gives the matter some attention. "Josh's" ability to work will no doubt be a big help to him in making good when he gets out in the world.

## CARL LOUIS HANSEN

"Carl," "Fats," "Barber"

SANITARY ENGINEERING — OXFORD

Inter-Class Wrestling (2); College Wrestling (2, 3); Chester County Club; Civil Engineering Society.

This young man with the cherubic countenance received his early training with the "roughnecks" of Main Building, but has finally decided to live among the wonders of McAllister Hall. "Carl" boasts that, as a Freshman, he walked straight across the front campus with a pie in each chubby fist for the mighty Sophomores. "Carl's" editorial efforts to his home paper used to be frequently on display at the Co-op. For a quiet, unassuming lad with the ability to assert himself at the right time we hand it to "Carl."

## HERBERT MOORE HARBACH

**"Reds"**

METALLURGICAL ENGINEERING — LEBANON

LA VIE Board; Class Banquet Speaker (3); Mining Society; Lebanon County Club.

"I loaned a dollar off him." Does that sound like Lebanon? "Reds" takes pictures; he also takes a prize at arguing, and in the midst of a heated argument his voice gets as loud as his hair. Herbert is a great student, that is before exams, and most of his time during the semester is spent in telling of his many business ventures and experiences at Mt. Gretna. In short, they built Gretna around "Reds." His chief ambition is to locate a silver mine valued at $294 per ton.

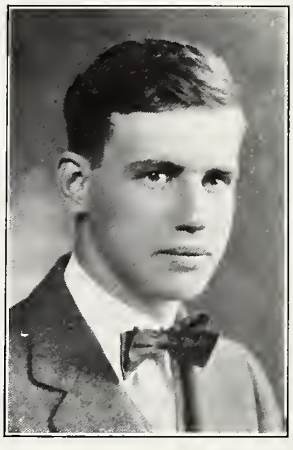

## HENRY GARNER HARPER, Σ Η

**"H. G.," "Ivory," "Harp"**

CIVIL ENGINEERING — ASHLAND

Hazing Committee; Manager Class Baseball; Cadet Lieutenant; Officers Club; Civil Engineering Society; Schuylkill County Club.

"Say, fellows." "Harp," although having somewhat of a penchant for "Violets," takes delight in displaying his medal, a trophy he won (?) as chairman of the hazing committee, in which capacity he meted out justice (?) to many a Freshman law-breaker. Although not a "Czar," there were no appeals from his decisions. "Ivory's" idle moments are chiefly occupied in blowing rings of good old "P. A." smoke to the awe and admiration of the members of the fair sex. However, he is one of those rare combinations—a student and a fusser. "Harry" has the ability to make good and success will be his.

## DANIEL BURT HARRIS, Α Γ Ρ

**"Burt," "Dan"**

AGRICULTURAL CHEMISTRY — PHILADELPHIA

Leibig Chemical Society; Forestry Society.

Faintly in the bustle and hum of the large city, "Burt" heard the beseeching voice of Nature calling to him to save our forests. Reluctantly he left his fair ones, especially the one that writes so many letters, and came over the mountains to State. Later he decided that a ranger's life differed too much from Chestnut street so he cast his lot with the Ag. Chemists and as such he will graduate. He is of the quiet, earnest type and fond of telling jokes that need dissection and a man well liked by the boys—and girls.

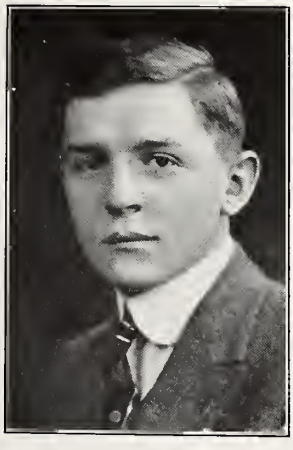

## NORMAN EARL HARTMAN, Λ X A

**MECHANICAL ENGINEERING** **MIDDLETON**

Class Basketball (1, 2); College Basketball (3); Class Baseball (2); Class Track (2); Cadet Lieutenant; Mechanical Engineering Society; Harrisburg Club.

This will introduce you to "Hart" or "Peaches" (?), whose chief offense against society is fussing. He never lets his studies interfere with this important subject. He shines on the basketball floor. We had high hopes of seeing him on the varsity. He is somewhat of a runner, often getting to classes before the half hour. After having received a letter he is heard to murmur: "Why did they put Baltimore 'way down in Maryland?" With all his faults we love him still. He is popular with his fellow-studes and has never been known to "crab."

## HORACE JACKSON HARTRANFT

**"Hardy"**

**MILLING ENGINEERING** **BELLEFONTE**

A miller, but he did not flunk into the course. You are not far wrong in calling him a "grind," but it is a known fact that a large part of his grinding comes from letter writing practicum—said letters addressed to Milesburg, Pa. "Where is that?" Although usually very unobtrusive he likes to "blow" a good deal at drill time. In fact he has a wonderful knowledge of tactics and we feel confident that he could show the "Hep" a few. The "Bellefonte Kid" is all right and will surely finish on top.

## GEORGE LEE HASSERT

**"Slats"**

**CHEMISTRY** **BLOOMSBURG**

Glee Club (1, 2, 3); Choir (1, 2, 3); German Play (2, 3); Deutscher Verein; Berzelius Chemische Gesellschaft; Columbia County Club.

"Slats" comes from Bloomsburg, the home of many good studes. He goes home each summer with the firm determination not to come back, but he is always here with the first ones in September. George not only loves to hear the H-CL bubble in "Swamp's test-tubes, but also devotes part of his life to music. His base voice mingled with the moans of a tortured piano, affords much entertainment to his neighbors. Except for a slight tendency to get sick on Glee Club trips "Slats" is a gentleman and a scholar.

## MARTHA ANNA HAUSER

**"Annhauser," "Ann"**

**HOME ECONOMICS** **YORK**

**Glee Club.**

If we could print a laugh, that would be all that is necessary to describe her, and we would say with one accord "Annhauser." Her special hobby is the "second vegetable," and she considers it wonderful when carrots appear on the table. She has a peculiar habit of preferring work to meals and often misses one to "study just a little more." This explains why she will graduate this June instead of with the class of 1915. Merry, independent, with a general supply of what they call "horse sense," a staunch friend, an enemy to no one, a living question mark, that's "Ann."

## RICHARD CARMAN HAY, Φ Δ Θ

**MINING GEOLOGY** **WASHINGTON, D. C.**

**Associate Editor Penn State Mining Quarterly (3); Varsity Basketball (2, 3); Class Football (1, 2); College Football (2); Class Basketball (1); Varsity Tennis (1, 2); Captain Varsity Tennis (3); Assistant Manager Varsity Tennis (2); Mining Society; Southern Club.**

"Dick" is one of the last of the "Preps." Probably no man in the class is as well acquainted with State College and all that it holds as little Richard. He began many years ago as a kiddy to play around among the celebrities, while his daddy held down the main seat in the "Hep's" office. And so little "hep" to-day keeps up the custom of never going to or returning from a vacation without writing to all the notables and powers that be, telling them he is going or that he has safely arrived. A glance at his course and at what he has done assures you of his success.

## CLARENCE MARTIN HAYS

**"King Oscar," "Scottie"**

**MINING ENGINEERING** **SCOTTDALE**

Clarence, "Scottie," or "King Oscar," so-called because of his resemblance to the King of Sweden, is without doubt the finest Miner that ever took the course. His chief delight is a big chew of his favorite Mail Pouch and a big cuspidor or an open window, as the accuracy of his expectoration is rather questionable. Clarence has a strong determination that will send him up the shaft of fame in the end. His indifference to close intimacy with work is no indication of his ability for he is a student who gets there, be it work or play.

## GEORGE FRANKLIN HEDRICK, Φ K Ψ

**"Hun," "Het"**

**ELECTRICAL ENGINEERING** **YORK**

George has become famous by his variety of original expressions such as "What the hun" and "Ain't it the truth?" His imagination has been worked overtime in his tales and experiences. As a stude "Het" has always ranked with the sharks and exemptions drop his way without his seeking them. He has a tendency towards blushing and always retires behind one when confused. His modesty is only exceeded by his good looks.

## THOMAS WOODS HEMPERLY

**"Tom," "Hemp"**

**HORTICULTURE** **HARRISBURG**

"Hemp" has the distinction of being the greatest imaginary pedestrian in college. One week before each vacation he plans to walk home and at the end of the week he walks to Lemont. "Hemp" is rapidly becoming a skilled Hort, as his ability to climb a ripe apple tree testifies. Although not a Hibernian he has a weakness for green ink, and insists on using it on every possible occasion. His love for his work insures for him a "Dip" at the final roll call.

## HARRY ORAIN HENDERSON

**"Harry"**

**DAIRY HUSBANDRY** **AVONMORE**

**Agricultural Society; Dairy Club; Prohibition League; Indiana County Club.**

This quiet unassuming Ag. is one of the type that helps uphold the scholastic records on the Hill. He was a student of sociology at one time. but gave it up in despair when he found that water was used as moistener for the shredded wheat at the boarding house. This was not in State College, either. "Harry" is a good companion and is especially sought when the section scores the kine.

## STANLEY RAYMOND HENNING, Λ Z

"Stan"

**HORTICULTURE** — **NORTH MEHOOPANY**

Assistant Manager Penn State Farmer (3); Class Cross Country (1, 2, 3); Class Track (1, 2, 3); College Track (1, 2, 3); Agricultural Society; Crab Apple Club; Civic Club; Cercle Francais; Wyoming County Club.

"Stan" quietly blew into Penn State and due to his ability as a plodder he has made his presence felt here. As a cross country runner he shows further evidences of his stick-to-it-iveness, and always finishes amongst the leaders. Some of us wonder why he has never learned to play the piano for it is said that he has had many opportunities to do so. He is a quiet, earnest student and a good friend. A man who will plug until he brings honor to his Alma Mater.

## MARGARET MAY HENRY

"March." "Marge"

**HOME ECONOMICS** — **SWARTHMORE**

Girls' Play (1); Y. W. C. A. Conference Delegate (2).

Three years ago, "March" imparted to the unknowing members of her class, the fact that "Swarthmore is just twelve miles from Philadelphia." "I hardly dare tell" how much she has learned since then, but she can tell you how to deliver a lunch by "wireless," and is a specialist (?) in Household Finance. "Marge's" "Greetings" and "J-z-z-zactly" are famous among her friends. She is fond of out-door life and enjoys nothing better than a long walk. She's a girl to be depended upon, a good companion and a better friend.

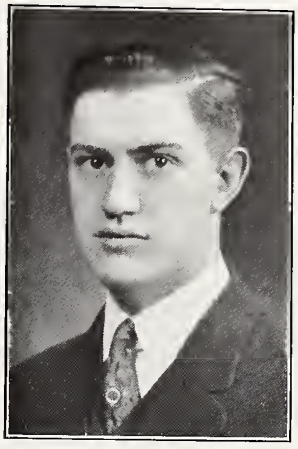

## GORDON JOSEPH FRED HERON, Φ K Σ

"Fuzzy," "Bill"

**INDUSTRIAL ENGINEERING** — **PHILADELPHIA**

Y. M. C. A. Show (1); Cadet First Lieutenant; Industrial Engineering Society; Scabbard and Blade.

The personification of spontaneous combustion. He is always bubbling over with good nature; an admirer of the fair sex although "heart whole and fancy free," and an eternal question box. "FUZ" may never be such a howling success as an engineer, but he is sure wherever he goes of a great success among the ladies and his genial nature is bound to prevail.

## CLARENCE JOHN HERRLY, Φ K

**"Red," "Buck"**

**CHEMISTRY** **PITTSBURGH**

**Berzelius Chemische Gesellschaft.**

Did you ever look squarely at the mid-day sun? It's a cinch! Do something hard—look at Herrly's head. "Red" is a proof of the theory that judgment by appearance is entirely unreliable. His face stamps him as a first cousin of St. Patrick, but his ancestry dates back to Der Vaterland. In spite of his handicaps "Red" is a track man (railroad), a musician, a rough-houser and a fine example of a "good scout."

## LEWIS EDWARDS HERSH, Σ X

**"Brownie"**

**CHEMISTRY** **ALLENTOWN**

**Lehigh Northampton County Club.**

After spending a year at Lehigh, Lewis came to State and with much courage started to battle with Chemistry. Due to his summer activities the boys call him "Brownie" and often supplement this with "Governmental" because of his keen interest in Governmental operations. It is not trouble or worriment that is causing him to become bald for he is usually smiling and is gaining in avoirdupois every day. This excess weight has compelled him to give up his track activities. "Brownie" will never miss anything in the future, especially eats.

## RALPH WALDO HERZOG

**"Duke"**

**MECHANICAL ENGINEERING** **SMETHPORT**

**Mechanical Engineering Society; McKean County Club.**

"Duke," a former member of the "1912" class dropped into our ranks in our Junior year and has proved to be one of the sharks of our class. Like Ralph Waldo Emerson he is fond of good literature. For that reason he was bitterly disappointed when he could not schedule "Rhet. 8." However, this will not put an end to the many little verses that he composes to his ladies' eyebrow. During his vacation he spends his time burning perfectly good gasoline in his efforts to acquaint his friends with the beauties of the wilderness.

## ASABEL BRITTIAN HESS

**"Aby," "Hazel"**

**FORESTRY** **BENTON**

One of our good looking Foresters, who, although with great possibilities, never has been known to "fuss." He says he "ain't never had no nicknames," but above are two appropriate and common ones. He claims justly to be an officer in the State College Army. "Hazel" is generally tramping the woods with a gun on his shoulder, or a long home-made fishing pole in his hand, and because of his intimate knowledge of the woods and its be-feathered and be-furred population in general, will undoubtedly be a success as a Forester.

## WILLIAM HENRY HETZNECKER, Φ K

**"Bill," "Willie," "Hetz"**

**ELECTRICAL ENGINEERING** **KANE**

**Electrical Engineering Society; Cadet First Lieutenant; Officers Club; McKean County Club.**

In this cage, ladies and gentlemen, we have the second "Big Bill" to bring renown to Penn State. "Hetz" hails from Kane, Pa., where parks and pasture lots are synonymous terms. Every time "Bill" closes one eye he is mistaken for a needle. "Bill" has a jovial disposition, and loves to "rough-house"—behind a locked door. He is a good upright fellow,—one whom it is a pleasure to know.

## HARVEY THOMAS HILL

**"Harv"**

**HIGHWAY ENGINEERING** **SANDY LAKE**

**Sphinx; Skull and Bones; Class President (3); College Wrestling (1, 2); Varsity Wrestling (3); Class Wrestling (2, 3); Student Council (2, 3); Student Board (3); Class Banquet Speaker (2); Assistant Manager Wrestling (3); Assistant Cheer Leader; Flag Scrap Committee (1, 2); Civil Engineering Society.**

Harvey is one of the busy men of our class. Did you ever notice a stude at the Y. M. C. A. shows wearing a Quaker Oats smile and talking incessantly to the young lady by his side? That was Hill in society. Did you ever notice a young man earnestly exhorting studes to buy Lecture Course tickets, distributing circulars, and chalking the walks? That's Hill in religious activities. On the other hand, did you ever run across a strange looking individual wearing a slouch hat, corduroy trousers, a red necktie, and an everlasting grin? That's our Harvey as a stude. Harvey is a good scout, a fusser, a wrestler, and our Junior class president.

## MARGARET HILLER

**"Peggie"**

**HOME ECONOMICS** **HONESDALE**

**Vice President Y. W. C. A. (3); Delegate to Kansas City Student Volunteer Conference (3); Eagles Mere Conference Delegate; Deutscher Verein Play (3); Y. M. C. A. Play (1, 3); Glee Club; Penn State Farmer Board.**

"Peggie" Hiller, the one and only of her kind ever seen in State College. To be sure, she belongs to the genus "Preacher," but is a species all her own. We take "Peg" too much for granted, but when we come to think about her we find she is very essential to all of us. She comforts the homesick Freshmen and jollies up the despondent Senior—in fact, fits in everywhere. Margaret is an excellent student and has set a high standard for her class. She is a leader in Y. W. C. A. work and has evinced a decided weakness for conferences and conventions. "Now, you see, it's just this way:" we can't describe her—you have to know her.

## HARRY HIRSCH

**"General"**

**CHEMISTRY** **PHILADELPHIA**

**College Track (2); Class Cross Country (1, 2, 3); Philadelphia Club; Cosmopolitan Club; Chemical Society; Penn State Menorah.**

"General" Hirsch made himself solid in the English Department by his marvelous flow of the English language when called on in "Spouts." But, sad to relate, Chemistry, not oratory claimed him, and in this he is reported not to go so fluently. Charlie, he claims, gave him a crooked deal. "General" has a past. Time was, it is said, when he was at home in the padded ring, but that is history. His energy now goes to discovering a compound that will place him in a class with Fletcher, Lydia Pinkham and other great scientists.

## ELMER REEVE HITCHNER, Α Χ Σ

**"Ted," "Hitch"**

**AGRICULTURAL CHEMISTRY** **WOODSTOWN, N. J.**

**College Orchestra (1, 2, 3); Leibig Chemical Society.**

Sh! A poet! Doesn't look it? Well, neither did Walt Whitman or Berton Braley. Yes, "Hitch" endured the pangs of composition during his Freshman year, when he indited a little poem to the tune of "Maryland, My Maryland" on which his fame and his drag with "some girl" rest. "Ted's" habit of shutting his eyes and nodding to the music of his fiddle has won for him the name of, "the sleeping violinist." An earnest student and genial fellow, he has all the earmarks of a coming successful man.

## RAYMOND CLEVELAND HODGES, A Z

**"Ray"**

**AGRONOMY** **SCRANTON**

Louise Carnegie Scholarship (3); Class Secretary (3); Civic Club; Lackawanna County Club.

The old proverb that "Still waters run deep" is certainly exemplified by "Ray." Last spring he went home sick, and although the family doctor could do nothing for him, he advised "Ray" to take a trip to Wilson College, and that cure has proved to be a lasting one. "Ray" is an earnest fellow, who in his quiet way has forged to the front of our class. Not many exemption lists are posted without "Ray's" name on them, thus showing his student ability. Raymond will undoubtedly make a good tiller of the soil, and will, we believe, eventually be the owner of a fruit farm.

## FRED KENNETH HOEHLER, A Z

**"Fred," "Freddie," "Dutch"**

**FORESTRY** **PHILADELPHIA**

Skull and Bones; Friars; Sphinx; Business Manager 1915 LA VIE; Freshmen Stunt Committee; Banquet Committee (2); Assistant Circulating Manager Penn State Farmer (2, 3); Manager Agricultural Fair Amusements (3); Inter-Class Wrestling (2); Wrestling Association; Forestry Society; Central Manual; West Philadelphia Club; Philadelphia Club.

The "Flying Dutchman" can easily be recognized by his actions. To study for a hard quiz, secure seventy subscriptions to the Penn State Farmer; attend a Y. M. C. A. committee meeting, and make one—perhaps two—calls at the Cottage requires just forty-two minutes. Summer camp had no terrors for "Dutch" neither before nor after. Full of the old "pep" and possessed of an unusual ability to do things, "Dutch" "should worry" if the Forestry jobs are all filled.

## JOHN McCRACKEN HORNER, A Z

**"Jack"**

**HORTICULTURE** **PITTSBURGH**

Skull and Bones; Assistant Manager Penn State Collegian (3); Assistant Manager Varsity Wrestling (3); College Wrestling (2); Class Treasurer (3); Glee Club (2); Crab Apple Club; Cercle Francais; Y. M. C. A. Cabinet (3).

Surely, we all know this little fellow, who wrestled so valiantly against the 115 pound Canadian in the McGill Meet last year. He used to be "Lyonized" at the cottage, but it was later found that he was too "Young." He heartily supports the "Ag. Lectures," for he says that "they broaden a fellow even if they don't add to his stature." "Jack" exemplifies the rule, "Greatness is not measured by height," and for a hard worker we must give Jacky Horner his plum.

Little Jack Horner stood on the corner
Thoughts high as the sky;
What can I do next, on any pretext
To uphold the Collegian and not lie.

## WILLIAM WORTZ HORNER, Σ A E

"Bill"

COMMERCE AND FINANCE — YORK

"Willie Wortz," that sweet scented zephyr of humanity, was deposited by the stork in beautiful York. "Bill" is a consistent subscriber to the Ladies Home Journal, Good Housekeeping, and Vogue, and while in State College is employed as the Sim model. He is known to summer during the winter, and winter in the summer. He adores work so much that "Big Ben" calls him at five o'clock every morning, to give him more time to study. Farming was formerly his aim, and he started college with that outlook, but after serious consideration, "Bill" decided to become a financier.

## CLIFFORD HORROCKS

"Cliff"

LIBERAL ARTS — PHILADELPHIA

"Cliff" is one of the most expert air artists in the institution and has buffaloed more of our natural enemies than any three other men combined. He is said to have an incentive for the strenuous efforts he puts forth never to get anything but A's on his grade card. How true this is may be guessed by the fact that he operates the daily letter system common to people who have it in its advanced stages. "Cliff" is a talkative, congenial fellow, who will be principal of a High School some day at the rate he is now traveling.

## ARTHUR CARL HORST, Δ T Δ

"Art"

ELECTRICAL ENGINEERING — PITTSBURGH

Electrical Engineering Society.

The Smoky City was "Art's" stamping ground until he felt the call to join the ranks of the Electricals and breathe the Nittany air for a few years. If his eagerness to get home at vacation time and the huge letters he sends to his home town are any indication there must be other things than studies stored away in Arthur's head. These periodic volumes do not, however, in any way interfere with his scholastic standing and in this respect he is a man to be envied. Of a quiet disposition and an amiable nature this representative truly makes hay while the sun shines.

## RUSSEL SUTCLIFFE HUMMEL

**"Russ"**

**CIVIL ENGINEERING** **HUMMELSTOWN**

**Louise Carnegie Scholarship; Harrisburg Club; Civil Engineering Society.**

Hummel from Hummelstown—Yes, they named the town after him, but you ought to see the town. "Russ" first squandered two years at Gettysburg before reaching this final "resting" place. He is one of "Doc" Stecker's marvels and also the only living student who does not eat cake or candy. A scholarship was bestowed upon him at the end of his Sophomore year, and since then he has had to study to keep up his reputation. But he is an all around hard working fellow and we are sure he will succeed in whatever he undertakes, provided it is not girls.

## ROBERT MORRIS HUTCHINSON, Τ Β Π

**"Bob," "Hutch"**

**METALLURGY** **HARRISBURG**

**Friars; Manager Class Basketball (2); Class Baseball (2); Class Banquet Committee (3); Mining Society; Harrisburg Club.**

Behold! A man growing bald under the burden of study, business, and social affairs. "Bob" is a little big man in all three. He can pull an "A" whenever he so desires, could control the state politics if he cared to, and is the social whale. He is always on the go, but can find time to swap stories or exchange wit on a moment's notice, and is never worsted in the latter. Claims that he will be making $5,000.00 per year inside of ten years. We hope so, Robert, go to it

## WILLIAM MARTIN HUTCHINSON

**"Bill," "Hutch"**

**ELECTRICAL ENGINEERING** **HAZLETON**

**Associate Editor LA VIE; Electrical Engineering Society; Hazleton Club.**

This lanky unassuming young man scarcely gives one the impression of being a writer of repute. "Bill" rarely talks about it, but does confide to his friends that he expects to be the editor of a great publication some day. "Hutch" has a friend at the cottage and also gets lots of mail. He has a very quiet disposition, a serious mien, and a scholarly appearance. He is distinctly literary, and if a strong will and a sterling character will bring success, he will fill a place in "Who's Who."

## WILLIAM HUTT

"Bill"

**HIGHWAY ENGINEERING** **PHILADELPHIA**

Civil Engineering Society; Civic Club; Philadelphia Club; Central Manual Club.

Central Manual lost one of its chief attractions when "Bill" was finally graduated from that institution. "Bill" has had a varied and checkered career since entering State. At the beginning of his Sophomore year he was the king of the roughnecks around Old Main building. He also took a drive to the Old Fort that year that necessitated a trip to 123 Main and a letter home to Dad for money. To the surprise of his friends "Bill" joined the Y. M. C. A. shortly after. Hutt is a good, hard worker for all college actitvities and much can be expected of him when he joins the "Gang" in "Philly."

## GEORGE REA JACKSON, Λ X A

"Jack," "Shark"

**AGRICULTURAL CHEMISTRY** **GIRARD**

Liebig Chemical Society.

No doubt, the reader never heard of Girard, but you will some day, when it becomes known as the home of Jackson, President of —— etc., etc. "Jack" entered with the class of 1912, but stayed out, taught school, fell in love, and returned last September to enter the class of 1915, and he will graduate with us as an Agricultural Chemist. He can converse on any subject, but specializes in chemistry, zoology, and girls. He is a good "stude" and a credit to our class, even if he is still in love.

## ALVAH HAMILTON JAMES

"Muggs," "Ham," "Jimmy"

**ELECTRICAL ENGINEERING** **MAHANOY CITY**

"Jimmy" wants it understood that he is not a 1914 flunk-out. He dropped out of school for a year and joined us in the fall of 1912. He has a wonderful faculty of doping league contests before the season starts and rarely goes amiss. "HAM" advocates holding the banquets in Bellefonte as it is nearer and we could have more of them. He never allows anything to interfere with his work and if he guards his career with the same zeal that he guarded campus during the flag scrap period, nothing but success can await him.

## JOHN J. JAQUISH

**"Jake"**

**AGRONOMY** **MANSFIELD**

**First Lieutenant; Officers Club; Agricultural Society; Civic Club; Prohibition League; Tioga County Club.**

"It doesn't make any difference." "Now, see here." "If a man will, he can." "JAKE" is a true son of the soil; an honest and conscientious worker who will some day make the farmers of Mansfield sit up and take notice. At present his chief problems are to impress the "HEP" with his ability as a soldier and to get enough sleep. "JAKE'S" motto is: "There are two things I never worry about—namely, those things that I can not help and those that I can."

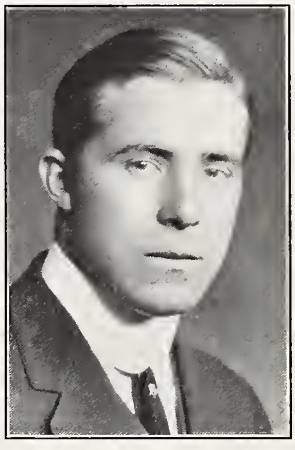

## HENRY CLAY JESTER, Φ K Ψ

**"Clumsy Claude"**

**CHEMISTRY** **GERMANTOWN**

**Skull and Bones; Varsity Basketball (3); College Track.**

Henry has troubles of his own. He cannot get enough sleep, he has a room-mate that snores, and he has never been able to sleep alone. In spite of the fact that this sturdy youth gives up his vacations to rescuing pretty girls from the briny deep of the Atlantic he is still fancy free. "Claude" is not as clumsy as his name would indicate, for he holds down centre on the varsity basketball team in a creditable manner and his prowess with the 12 pound shot has been a scoring factor in many of our track meets. As a good-hearted scout and a loyal friend he has few equals.

## JOHN CLARENCE JOHNSON

**"Johntz"**

**DAIRY HUSBANDRY** **REA**

**Cadet Band (2, 3); Agricultural Society; Dairy Husbandry Club; Washington County Club.**

"Johntz" hails from the western part of the state, where he learned to be a practical farmer. He is very optimistic and often shows inclination to rough-house, in spite of his apparent quietness. Besides being enthusiastic about his course, he also shows great interest in the creamery, especially when asked to be sociable at the ice cream table. He studies once in a while, but keeps a close eye on the clock, so that he sometimes falls asleep. When "Johntz" gets his diploma, he is going back to a farm, which is big enough for two, and it is rumored that he has already selected both.

## JAMES EDWARD JONES

**CIVIL ENGINEERING** **PHILADELPHIA**

Class Football (1); Tennis Team (2).

From the start an Old Main rough-houser. An aspirer to football honors, but thwarted by an injury to his knee, a shark at studies, tennis, and fussing. "Gee, whiz—there's another one down," is the expression so often heard after a quizz. "Jonsey" once went to Milesburg on a social service trip and became so interested that he stayed several days overtime. Nevertheless he does not let his books hinder his struggles for an education, but has grasped the big things of college life, which help to make a well rounded college man.

## ROY GRIFFITH JONES

**"R. G.," "Jonesie," "Sleuth"**

**ELECTRO-CHEMICAL ENGINEERING** **SCRANTON**

"Jonesie" comes from the land of hard coal, and perhaps that is the main reason for his picking out Electrochemistry as his course. Just to see whether there were any more Electrochemists in the world he traveled to Niagara Falls last summer and returned plus some valuable experience. He is occupied a great deal of the time in Swampy's laboratories and his detective work there secured for him his favorite nickname. "R. G." is a scientific man in every sense of the word and that speaks well for his future success.

## SOLOMON PAUL JONES, Δ O

**"S. P."**

**AGRONOMY** **SANDY LAKE**

Inter-Collegiate Debating (3); Debating Council (3); Y. M. C. A. Cabinet (3); Class Banquet Speaker (3); Agricultural Society; Civic Club; Forum; Prohibition League; Tri-County Club.

If you ever see a distinguished young man, of whom you are not certain whether he is a professor, Y. M. C. A. secretary, or student, then you have seen S. Paul Jones. This personage, to all appearances, is very intellectual, and in fact, scholarly. However, looks often deceive and he has been known to descend to repartee and other rough-neck caprices. In order to do him justice we admit that at one time he captured a prize in the field of oratory and is a varsity debater.

## SYDNEY HOWELL KARR

**"Syd," "Baldy"**

**HORTICULTURE** **PITTSBURGH**

Of "Food never burnt, nor scorched, nor raw," "Baldy" was the author. Receiving his beginning in Jersey, he migrated to the Smoky City on coming to State. His superfluous knowledge regarding the Sophs was his first undoing and he thereby lost his name and mode of hair dress. He loves to argue on anything and has always been known to win out, probably due to the fact that he "sticks" until his opponents just simply fade away. Generally he is selling something and has been known to employ very unusual methods in disposing of the goods. Among his "pests" he is known by the name of "Scoivy."

## ARTHUR DAVID KEAGY

**"Pete"**

**SANITARY ENGINEERING** **WAYNESBORO**

**Cadet Second Lieutenant; Civil Engineering Society; Franklin County Club.**

"The Champion Cultivator of Soup Strainers." When Arthur D. hit the town, he was nicknamed "Petite" because of his feminine qualities, but later it was changed to "Pete" for brevity's sake. "Pete" at the present time knows more about Baltimore than his own home town. Ask him about the good times he had at the "Kappa Brocka." He claims that they had Aladdin stopped sixty different ways. Arthur is absolutely frictionless and is a good stude in all ways.

## ELMER CHRISTMAN KECK

**"Whitey," "Towhead," "P. M.," "Kackle"**

**ANIMAL HUSBANDRY** **POTTSTOWN**

**Sirloin Club; Montgomery County Club; Deutscher Verein; German Play (2); Hazing Committee.**

"Kackle," the "Pinochle King," is easily one of the handsomest callers of the A. H. class at the Ladies' cottage. His masculine charms, which are pleasing to the feminine heart, are only obscured by his marvelous tales of the "One Big Bull Hide." After a heart-rending campaign he landed a position on that highest earthly tribunal of justice and equity, the Hazing Committee. By the dictates of his conscience he covered himself with glory and handed down his name to posterity.

## MARK HAWKINS KEENEY

**"Mark"**

**DAIRY HUSBANDRY** **LACEVILLE**

**Agricultural Society; Dairy Husbandry Club; Wyoming County Club.**

"Mark" spent his boyhood days digging potatoes and chopping wood. In 1911 he decided that it took brains to be a farmer and so—well, that's why he's here. Keeney is a quiet and unassuming lad, inclined to be retiring but a good friend to those who know him. He is a good student but not a grind. His motto is: "Do and let others do." Some day we expect him to supply one of our large cities with dairy products.

## CLARENCE ZIEGLER KELLER, Α Γ Ρ

**HORTICULTURE** **YORK**

**Civic Club; Mandolin Club (2, 3); Crab Apple Club; Agricultural Society; York County Club.**

"He's from my home town." How often, oh, how often, have we had this subtle phrase passed to us. "Lou" is an earnest advocate of "seeds that grow," and will elucidate on practical methods of seed culture at the least suggestion. A booster for scientific agriculture and an advocate for monthly house parties. Clarence shows the well balanced make-up that speaks well for the misty future.

## ROY EDGAR KELLER

**"Roy," "Kell," "R. E."**

**AGRONOMY** **STATE COLLEGE**

**Agricultural Society; Prohibition League; Civic Club.**

This sturdy Dutch son of Pennsylvania first saw the light of day in Centre County, but he can not be blamed for that. "Roy" spent his tender years at Pleasant Gap, and then going into the pupa stage at Bellefonte Academy, he emerged a full-fledged school teacher. Finding, however, that he could serve his country better by the dissemination of agricultural knowledge he came to Penn State. Rain or shine, his visage is adorned with a cheery smile which often expands like the bi-nominal theorem into a characteristic grin. He is some wrestler, too, and whether he wrestles with a paramecium or a State College beefsteak, he always keeps his opponent busy.

## CHARLES EDWIN KENLY

"Slim," "Purity," "Irish"

AGRICULTURAL CHEMISTRY — EMPORIUM

Liebig Chemical Society; Cameron County Club.

This industrious young man hails from the shoals of Chesapeake Bay. Crabs are frequently found there, but, of course, no reflections are cast against Charlie. His heart, however, is buried among these sea-faring people, but before he realizes that there is such a thing as love, someone else will have carried home the bacon. Because of his enthusiasm for the work and his fascinating appearance upon the floor, he was kindly asked to repeat the much-loved course, Physical Education. Seriously speaking, "Slim" is not only a shark in his studies but a good fellow as well.

## CONMAC FRANCIS KENNEDY

"Mac"

MECHANICAL ENGINEERING — ONEIDA

Mechanical Engineering Society; Junior Prom. Committee; Hazleton Club.

Kennedy hails from the coal regions where he ran a "donkey" in the mines before he came to State. Sometimes he ran the "donkey" out of the mines; it all depended on the way he was going. His chief duty was to pile up the trains in the tunnel or to run them over the dump. For this reason the "patcher" was kept busy heaving cars back on the track. Kennedy has a tender spot in his heart for "Auld Ireland" and is as warm-hearted as their best. "Mac" is a fine fellow and a model stude and is the type of man that adds weight to our class.

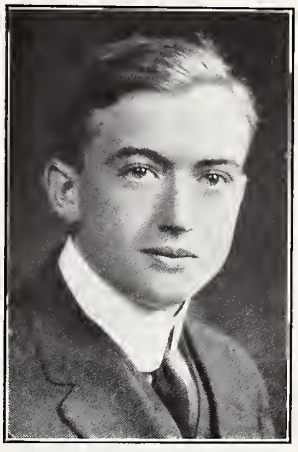

## THOMAS FRANCIS KENNEDY

"Tom"

SANITARY ENGINEERING — SCRANTON

Chief Artist LA VIE Board; Glee Club (1); Civil Engineering Society; Poster Committee; Lackawanna County Club.

"Tom," a veteran mine surveyor, sure is some stude. As a La Vie artist he is good, and his engineering ability is better. He spends all his spare moments tickling the "Ivories" and he has become so proficient that he can play "The Alma Mater" in ragtime. His friend in Syracuse, however, is a classic player. "Tom" looks forward to sticking out his tag as a consulting engineer and we all grant that he has the ability to fulfill his desire.

## JOHN ANDREW KENNEY

**"Jack," "Crystal John"**

**CHEMISTRY** **PLAINFIELD, N. J.**

**Class Soccer Team (3); New York Club.**

"Jack" was an Industrial when he began, but he soon became a "Straight." If there is anybody in that section who is enthusiastic to the greatest degree over the course that man is John. He is an energetic worker and is possessed of an ingenious turn of mind that some day will make him famous. The soccer field appeals to John when exercise is needed and the way he enters into the game reminds one of his actions in the lab. Good luck to you, John, you deserve it.

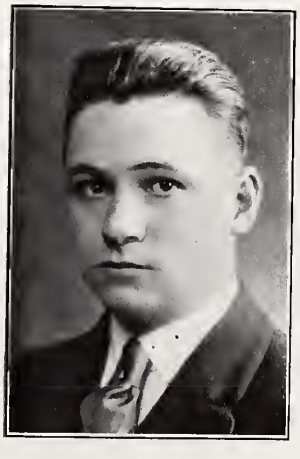

## GEORGE CALVIN KERN, Θ Ξ

**"Kerny"**

**MECHANICAL ENGINEERING** **PHILADELPHIA**

**College Baseball (1, 2); Class Baseball (1, 2); Mechanical Engineering Society; Bucks County Club; Franklin and Marshall Club.**

In this man, "George," we have a gentleman of ability along many different lines of college life. He is quite a man with his books, wrestling with them for hours at a time, for instance the "Cosmo" and others. Put "Kerny" on the diamond and he is quite at home, but like all mortals here below he has his failings, especially for millinery and to hear him expound on next fall's styles, is astounding to his less refined classmates. But "Kerny" knows for he gets it direct from Freemont, daily. His one ambition is to accumulate a million and this he is determined to do though he has to invent a new kind of disease.

## WILLIAM TOBIAS KERR

**"Tubby," "Fat," "Walrus," "Caruso"**

**CIVIL ENGINEERING** **ELIZABETH, N. J.**

The failure of one of "Tubby's" daily letters to reach its destination prompted the following telegram: "What is the trouble? Are you ill? Write at once." After a year at Cornell "Fat" became ambitious and entered Penn State. Mr. Lewis will readily attest that "Walrus" is the original "Jersey Terror" when it comes to boxing. "Tubs'" two greatest worries are his shape and his voice, but he is helpless in both cases.

## RAYMOND APPLEMAN KESTER

**"Kes," "Runt"**

**LIBERAL ARTS** **BLOOMSBURG**

**President of Liberal Arts Society; Liberal Arts Play (2); Debating Council (3); Glee Club (1, 2, 3).**

"Runt" belongs to the heavyweight class. He represents one hundred pounds of heart, brains and fat. He has the makings of an athlete, but as he is a liberal arts student, he has no time for play. During the summer months he whiles away the time selling people what they don't want. "Kes" is an actor of note and promises to develop into one of the best before '15 bids adieu to Penn State.

## WAYNE LEE KIRK

**"Wayne"**

**ELECTRICAL ENGINEERING** **ALLPORT**

**Student Council (3); Varsity Wrestling (2, 3); Class Wrestling (2); Electrical Engineering Society; Clearfield County Club.**

Here is a quiet, studious, young fellow from Allport. Where's Allport? Hush! Speak it softly, for although we fail to find it on the map, "Wayne" regards with surprise any who betray such ignorance, and his loyalty to his home town is equalled only by his loyalty to his course, which he strongly asserts is harder than the Mechanical's. Unfortunately, "Wayne" did not discover until his second year that he had ability as a wrestler, and a "tin ear" somewhat impeded his progress then, but now he tops the ladder. As a musician he is hard to beat. However, he concentrates his ability on "On Moonlight Bay."

## HARRY ALEXANDER KJELLMAN, Α Γ Ρ

**"Pat"**

**ANIMAL HUSBANDRY** **JUNIATA**

**Penn State Farmer Board (3); Agricultural Society; Blair County Club.**

Behold, "Pat," the Swede from Juniata, one of the hard guys from the mountains of Pennsylvania. When he wasn't roughing up the town or worrying the neighbors, he spent his time learning the butcher and the barber trade, which usually go hand in hand. These two bloody side lines gave "Pat" the inspiration to take "A. H." He should become famous in the profession with the above qualifications and his college course as a foundation.

## WILLIAM HARRY KLINGER

**"Harry"**

**INDUSTRIAL CHEMISTRY** **PINE STATION**

"Harry" was sent to Penn State as a delegate from the famous city of Pine, whose renown he heralds at every opportunity with the slightest provocation. Never was there a youth so smiling, benevolent, and gentle. Sincerity is his slogan, and fame in chemistry his ambition. He admits that "Swamp" and "Doc" Wiley are his ideals, but aspires to surpass them. In spite of these failings, he is modesty personified, and a steady, reliable worker that can always show results.

## RAYMOND LAWALL KNECHT, Α Δ Σ

**"Ray"**

**ELECTRICAL ENGINEERING** **LOCK HAVEN**

**Electrical Engineering Society; Manager Class Baseball (3).**

"Ray" is an inmate of Old Main but unlike his fellow cliff dwellers has a peaceful disposition, probably due to the fact that he was at one time a sedate schoolmaster. He is fond of taking tea with his many friends in Bellefonte, and has a weakness for collecting cushions. We have selected "Ray" to pilot our baseball team this year and are looking forward to a successful and prosperous season. "Blondy" is taking electrical and we expect to hear of his success in future years.

## SIMON YOUNG KNIPE

**"Sim," "Ke-nip"**

**ANIMAL HUSBANDRY** **NORTH WALES**

Yes, even Simon has always been an earnest advocate of the so-called peach-fuzz covered upper lip; at least so it seems. But there is one thing very characteristic about this young man: "He ain't much fer talking," at least about himself and more especially from where he is thought to have originated. No, and he can't sing much, either, even if he is from "Northern Wales," but he is a model "stude," and will make a reliable alumnus.

## JOSEF NISSLEY KNULL

**"Joe," "Nully"**

**FORESTRY** **HARRISBURG**

**Forestry Society; Harrisburg Club.**

Here is the best friend of the English and German departments in our class. His main ambition since he entered State has been to pass off his languages, so that he might consider himself in college. "Joe" delights in taking solitary walks with his friends, "Pipe" and "Tobacco." As a "bugologist" and illustrator he is unsurpassed—, if you don't believe it, ask about the "Pine Cohen" in his Forestry note-book. "Joe" should certainly be a good Forester and will undoubtedly be an honor to his course. "Say, has anyone a theme or brief which I could use for to-morrow?," has been "Joe's" favorite saying for two years.

## DANA RODMAN KOONS

**"Nig"**

**PRE-LEGAL** **WALNUTPORT**

**Lehigh and Northampton County Club.**

"Nig" entered our class in the fall of 1911 with the firm determination of becoming a lawyer, and has been a staunch backer of the Liberal Arts Department ever since. In his first year, Dana was a model Freshman, but alas! within a year he deserted the straight and narrow way for the broad white way that leads to the foot of old Bald Top. He also became convinced in his Sophomore year that the "Fraternity of the Landlady" was to be avoided, and consequently migrated to "Old Main" where he became a distinguished member of the "Harmony Alley Club." "Nig" believes in getting exemptions without grinding, but Oh, you "Analyts."

## MAURICE ELIAD KRESSLY

**"Mox," "Kress," "Billy"**

**ARCHITECTURAL ENGINEERING** **WILKES-BARRE**

**Architectural Engineering Society; Glee Club (1, 2, 3); Pharsonians (1); College Choir (1, 2); Thespians (2); Thespian Club; Wilkes-Barre Club.**

"Mox" entered with the class of 1914, however, his leaving that class at Easter of his Freshman year was not caused by any unsuccessful re-exams. He doesn't know even the color of a "B. G.," for this clean cut youth is a "stude." If anyone should fail to know the full meaning of this term, simply become acquainted with his abilities. His originality and good judgment make it easy for him to pull "A" grades; his skill with the pen and brush clearly shows a capability for Architecture; his pleasing tenor voice, his fair hair, and congenial personality win for him the admiration and love of the fair sex.

## GUSTAV JOSEPH KUHLMAN, Λ X A

"Gus"

**AGRICULTURAL CHEMISTRY** **NANTICOKE**

**Thespians (1); Glee Club (1, 2, 3); Deutscher Verein; Agricultural Society; Forestry Society; Liebig Chemical Society; Wilkes-Barre Club.**

"Gus" fell into the snares of matrimony while his college career was still young, but nevertheless his smile is still broader. At first he signed up with the Foresters, but since the forests were so large and he had to be home at night he decided that the life of an Ag. Chemist was just the life for him. His tenor voice enchanted audiences from the Atlantic to the Pacific on our Glee Club trip to Frisco and is often the centre of an impromptu serenade. He is well liked by his classmates and we wish him happiness in his married life.

## JACOB ROLAND KULP, Φ Σ K

"Tillie"

**FORESTRY** **PERKASIE**

"Tillie" hails from Perkasie, and while there was noted for his baseball ability. However, since this athlete came to State, he gave up baseball to take a correspondence course on the side. "Tillie" is interested in all his activities except morning chapel. Nevertheless he is a good student, and when he is no longer burdened with the worries of compulsory chapel, promises to make a name for himself in the forestry service.

## JANET WILSON LAIRD

"Jinny"

**HOME ECONOMICS** **BELLWOOD**

**Y. W. C. A. Cabinet (3); Y. M. C. A. Show (2); Girls Glee Club.**

"Jinny" is one-half of the "Siamese twins" of the 1915 girls. She always has a good word for everybody and can find good qualities in a person when others fail to do so. But Janet is not a quiet, demure maiden all the time, for often she and "Oh, Henri, stop!", may be heard without much difficulty all over the house. That smile of her's causes her anxiety occasionally on account of its width, but the rest of us never think of anything but the jolly good humor of it. The smile is most always in evidence and though she seldom finds reason to be angry, when she does—watch out!

## LEVI LORENZO LAMB, Δ T Ω

**"Bolivar"**

**ANIMAL HUSBANDRY** — **CALIFORNIA**

Sphinx; Class Football (1); College Football (1); Varsity Football (2, 3); Class Wrestling (1); Varsity Wrestling (1, 2, 3); Class Track (1, 2); Varsity Track (1, 2); Banquet Speaker (3); Washington County Club.

"Yea, Maud," is all you have to say to induce "Bolivar" to give a genuine imitation of the lusty bray of a Missouri mule. Otherwise he is not very noisy, except when he has somebody listening. "Levi" is famous in nearly every branch of sport, and his gigantic physique has helped to send the Blue and White to victory more than once. Not only are his classmates proud of his athletic ability, but there are some of the gentler sex who are also appreciative of his prowess. He had aspirations to the profession of Forestry until one day he was chased by a Hereford steer, and suddenly developed a preference for animals. "Levi" is a practical farmer, particularly adapted for crib (corn) making and lamb feeding.

## SIMON SWEIGART LEHMAN

**"Sime"**

**AGRONOMY** — **LANCASTER**

Forum; Prohibition League; Civic Club.

Simon is a new man with a meek but sincere look, who came to us from F. & M., where he received his A.B. degree. He is an apt student and must be credited with far-sightedness. He realizes that the call "Back to the Farm" has come to him. What he should have been is a teacher or a preacher of great repute; what he would be, is a scientist in the garden of Pennsylvania where chickens and agriculture crave your attention, but what he is, cannot as yet be ascertained beyond that he is of a marriageable age and an earnest Progressive of the Bull Moose type. Time must tell the rest.

## MERRILL CLIFFORD LIEBENSBERGER, Φ Σ K

**"Lieby," "Heart Breaker"**

**ARCHITECTURAL ENGINEERING** — **HAZLETON**

Associate Manager Collegian; LA VIE Board; Art Staff; Assistant Gymnasium Instructor (2); Thespians (2); Chairman Sophomore Dance Committee; Junior Prom. Committee; Architectural Engineering Society; Hazleton Club.

A musical phenomenon, yet modesty personified, also quite a "bear with the books. However, rhetoric had quite a few pitfalls for him. The man who discovered Sunbury and was discovered there. He is not a Progressive at heart, but wait until the next election and watch him cast his little certificate for "Teddy." Ever loyal to Penn State and Vassar. "Lieby" has few equals with the crayons in college.

## HARRY EDWIN LIEBERT, Σ X

**"Pete"**

**MECHANICAL ENGINEERING** **PHILADELPHIA**

Parmi Nous; Class Vice President (3); College Baseball (1); Varsity Baseball (2); Northeast Manual Club.

"Pete" came to us from the Quaker City, where he was famous as a "social whale" in Manayunk. He is some ball player and has been one of our mainstays in the box during the last year. When it comes to house parties and "eats," Harry pulls "A's," but flunks when it comes to morning chapel. "Pete" ranks high in good fellowship and is always ready with the glad and broad smile for everybody.

## FRANCIS RAY LINCOLN

**"Abe"**

**AGRICULTURAL EDUCATION** **SCRANTON**

"Blessed be the meek." "Abe" inherits a lot of good qualities from his illustrious namesake and in "Abe" we have a fellow who lives primarily for service to others. He is well known in this respect not only among his fellow students but also among the people of the town, who have found a warm spot for him because of his activities in bigger things. If you want to see "Abe" in action just go to the Boys' Workshop and watch him tend to his flock of youngsters, whom he instructs in the arts of carpentry and electricity.

## NORMAN SCOTT LOGAN

**"Puds," "Fat"**

**MECHANICAL ENGINEERING** **PHILADELPHIA**

Mechanical Engineering Society; Philadelphia Club.

When "Puds" arrived at Penn State, everyone proclaimed him a future football star. "Puds" immediately began his studies in gridiron tactics, and thereby reduced his weight to 180 pounds! Then, proud of his accomplishment, he went to see his lady-love. This proved to be "Puds'" undoing, for the young lady emphatically told him that she disliked **thin** men. "Puds" has the record of receiving fewer letters per unit of time than any other man in college. It is not want of friends, but lack of energy that wins him this distinction. Despite this fact he stands among the first ones of his class. This honor must be due to his old corn-cob pipe, which, though blackened with age, is strong of purpose.

## ALBERT BUCKINGHAM LONG

"Ab"

AGRICULTURAL CHEMISTRY — HARRISBURG

Liebig Chemistry Society; Harrisburg Club.

A thirty-third degree member of the "Sons of Rest" and one of the original "Seven Sleepers." Occasionally a devilish look, an enthusiastic smile and a sigh escape from "Ab," and we know he has an inspiration. Ask him how he is and he will tell you they love him still. In spite of these failings he has many virtues, for he is as steady as a rock, good natured and congenial, with an ever ready smile. Although quiet and seldom heard, "Ab" has the determination and stamina to make good.

## IRVIN ELLSWORTH LONG, Σ Π

"Shorty," "Irve"

CIVIL ENGINEERING — STOYESTOWN

First Lieutenant Cadet Regiment; Deutscher Verein; German Play (2); Rifle Club; Franklin and Marshall Academy Club; Somerset County Club; Civil Engineering Society; Officers Club.

One day when "Shorty" was teaching school in the mountains of Somerset County he beheld a party of Civil Engineers. Marveling at their skill and the ease with which they captivated the hearts of the village belles he determined to get more "book larnin'" and do likewise, and his good judgment told him that Penn State offered him the possibilities. He is proud of his military attainments, often poses for his picture when arrayed in his uniform. "Shorty" is some sleeper and has been known to slumber through his "hard morning." He is a good worker and a congenial companion who will some day go back to his home town ready to realize his dreams.

## MARION SCHOLL LONG

"Choppy"

HOME ECONOMICS — PHILADELPHIA

Deutscher Verein; Manager Girls Glee Club (3); Y. M. C. A. Play (1).

Sunny hair, merry eyes, and the "darndest" of laughs, yet Marion has never been known to see a joke until after the ninth time of its appearance. She has an abnormal power of memorizing, but a better one of forgetting, so she keeps pretty well balanced after all. Marion's "No-o-o!" is almost as famous as her red ribbon, but she is by no means contrary. Her good nature is unfailing. She is specializing in Domestic Science, but her major electives of men and embroidery run it a close second.

## WINFIELD SCOTT LONGENECKER, Α Γ Ρ

**"Windy"**

**AGRONOMY** **BILLMEYER**

Lancaster Club.

"Windy" hails from a fertile Lancaster county farm and is always willing to let you know how fortunate he is in that respect. He blew into State College in the fall of 1911 and has been blowing ever since. He is noted for his arguments á la Pattee. Scott never lets his studies interfere with the movies, as he owns a season ticket to "Babe's" peanut throwing practicum to which he says no cuts are allowed. He is a "hail fellow, well met" and has no enemies.

## CLIFFORD AXFORD LORD, Δ Τ Δ

**"Cliff," "Nap"**

**CHEMISTRY** **CAMDEN, N. J.**

Parmi Nous; Friars; Class Baseball (1, 2); Pharsonians (1); Banquet Committee (2); Assistant Football Manager (3); Varsity Football Manager-Elect.

"Cliff" is a foreigner from the place that Victor Talking Machines and Campbell's Soup made famous. His aim is to find a new explosion and he seems to have succeeded, judging by the results of one day's work in lab as follows: Three mangled fingers and a new suit. "Cliff" claims that he is in love, but to see those Haddon Height letters and a periodic dreamy look in his eyes, will scatter all doubt in that respect. "Nap" is a very pleasant and agreeable fellow and a hard worker who will no doubt raise the standard of Camden.

## JAMES ENGELBERT LORDEMAN

**"Doggie," "Tows," "Lordy"**

**MECHANICAL ENGINEERING** **HOLLIDAYSBURG**

"Hey, fellows, I only got five to-day." Venture into "Doggie's" room most any evening, and you will be greeted with something like the above, as he is very fond of sending and receiving letters. With pen in hand, and paper and open dictionary before him, he makes a careful choice of his words to the fair ones, writing page after page of literature that would make Robert Chambers sit up and take notice. He is an earnest supporter of the home town, and "Uncle Jim," on whom he banks for everything, including many dozens of "Sit Lux" books. Having learned telegraphy under a very competent postal operator, "Tows" should worry, even if he should not care to follow up his chosen profession.

## JOSEPH LOUIS LORENZETTY

**"Joe"**

**ELECTRO-CHEMICAL ENGINEERING** **FREELAND**

Born the night of the "Big Wind," "Joe" nevertheless has a very equable temper. He was formerly of the romantic Tyrol from which he was exiled for attempting to elope with a real countess. Her photograph has been the despair of all who have seen it. Joe believes in Canadian Reciprocity, arguing that we can send Canada our wild oats for her tame wheat. Like a wizard he can pull from his trunk anything that can be mentioned.

## JOHN CALVIN LOWRY, JR., Σ Π

**"John," "Cal"**

**MINING ENGINEERING** **SOMERSET**

For some mysterious reason this lad from Somerset County once formed the conclusion that the regions under the earth were more fascinating than those above. This idea was strong enough to lead "John" to forsake his parental roof and come to Penn State to study the mysteries of mining. "John" is some engineer, and in the Civil versus Mining arguments he is a powerful factor. "J. C." distinguished himself in his Freshman year as clerk at the court trials of 538 Main fame. However, "John" is a good stude, but by no means a grind.

## GEORGE VANDEGRIFT LUERSSEN, T B Π

**"Buck"**

**METALLURGICAL ENGINEERING** **READING**

**Penn State Mining Quarterly; Mining Society; Student Council (3); J. W. White Scholarship (1, 2); Orchestra (1, 2); Berks County Club.**

Though "Buck" hails from the land of the Dutch, he refuses to have anything whatsoever to do with them and stands proudly by his royal Norwegian ancestors. He came to State after a four year battle in the wide, wide world, not to rest but with the determination to get a better line in steel analysis and production. In his quiet and unassuming way he has not only accomplished this purpose but enjoys the highest regard and esteem of all those who know him. In the future we expect to find the name of Luerssen in the highest ranks of the steel world.

Nov. 8

# George V. Luerssen Dies; Former Top Metallurgist

George V. Luerssen, 74, former nationally prominent metallurgist, died at 10:30 p.m. Tuesday in Reading Hospital.

**Mr. Luerssen was admitted to the hospital at 7:55 p.m., where he was taken after being stricken with a heart attack in his residence at 515 Elm Ave., Muhlenberg Park.**

Before retiring in July, 1954, he was vice president in charge of metallurgy at the Carpenter Steel Co.

With the exception of four years (1911-1915) to earn his degree in metallurgical engineering at The Pennsylvania State University, Mr. Luerssen had been continually affiliated with Carpenter Steel from 1907 until his retirement.

**He joined the specialty-steel-manufacturing firm immediately after graduating from the former Reading Boys' High School.**

During his years in the metallurgical field, Mr. Luerssen obtained a number of patents in the field of steel alloys.

He also developed Free-Machining Invar, refinements in the magnetic properties of 30-per-cent nickle temperature compensator alloys, and procedures for close control of the hardenability and fine-grained structure of carbon steels.

**In addition, he was co-inventor of the Torsion Impact Testing Machine to help control and determine the mechanical properties inherent in tool steels.**

Also as the result of his guidance a new low-temperature, deep-hardening, air-hardening die steel was developed.

In 1954, Mr. Luerssen was first recipient of the Bradley Stoughton Award of the Lehigh Valley Section, American Society for Metals.

**Five years later, he received the David F. McFarland Award of the Penn State Chapter, American Society for Metals, for outstanding accomplishments in the field of metallurgical research.**

Coauthor of the textbook, "Tool Steel Simplified," an authoritative work in the metal-working industry, he also presented many papers over the years at conclaves of national metallurgical groups.

Before and since his retirement, Mr. Luerssen had been active in civic, youth and banking areas, and was noted for an outstanding collection of 19th-Century U.S. stamps.

**Among the responsibilities he assumed in his public endeavors were memberships on boys' work and camp committees of the Reading Central YMCA, of which he also was a director.**

A member and former president of the Reading Rotary Club, he also was a one-time member of the Muhlenberg

## JOSEPH LOUIS LORENZETTY

**"Joe"**

**ELECTRO-CHEMICAL ENGINEERING** **FREELAND**

Born the night of the "Big Wind," "Joe" nevertheless has a very equable temper. He was formerly of the romantic Tyrol from which he was exiled for attempting to elope with a real countess. Her photograph has been the despair of all who have seen it. Joe believes in Canadian Reciprocity, arguing that we can send Canada our wild oats for her tame wheat. Like a wizard he can pull from his trunk anything that can be mentioned.

## JOHN CALVIN LOWRY, JR., Σ Π

**"John," "Cal"**

**MINING ENGINEERING** **SOMERSET**

For some mysterious reason this lad from Somerset County once formed the conclusion that the regions under the earth were more fascinating than those above. This idea was strong enough to lead "John" to forsake his parental roof and come to Penn State to study the mysteries of mining. "John" is some engineer, and in the Civil versus Mining arguments he is a powerful factor. "J. C." distinguished himself in his Freshman year as clerk at the court trials of 538 Main fame. However, "John" is a good stude, but by no means a grind.

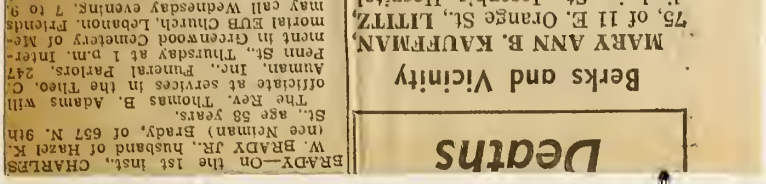

## GEORGE VANDEGRIFT LUERSSEN, Τ Β Π

**"Buck"**

**METALLURGICAL ENGINEERING** **READING**

**Penn State Mining Quarterly; Mining Society; Student Council (3); J. W. White Scholarship (1, 2); Orchestra (1, 2); Berks County Club.**

Though "Buck" hails from the land of the Dutch, he refuses to have anything whatsoever to do with them and stands proudly by his royal Norwegian ancestors. He came to State after a four year battle in the wide, wide world, not to rest but with the determination to get a better line in steel analysis and production. In his quiet and unassuming way he has not only accomplished this purpose but enjoys the highest regard and esteem of all those who know him. In the future we expect to find the name of Luerssen in the highest ranks of the steel world.

# THE LA VIE

## BAYARD CONWAY LUKENS

**"Louke"**

**ARCHITECTURAL ENGINEERING** **PHILADELPHIA**

**Architectural Engineering Society; Class Basketball Squad (2, 3); First Lieutenant Cadet Regiment (3); Central Manual Club; College Photographer; Philadelphia Club.**

"I wonder if I could trouble you for a match?" And then, just to prove that the hand has something on the eye for speed, "Luke" substitutes an empty, which he returns with a kindly, paternal smile. Verily, an accomplishment. Before the Christmas of 1913, the "Pole" was batting .482 in the Fatima league, but since then has jumped to the "Anti-Cigs." The reason is said to reside near Wayne, Pa. It is difficult to say in just what profession "Luke" will excell, as he has many accomplishments. He is an architect, a photographer of Boardwalk repute, a basketballer, a soldier, an amateur physician, and an authority on folk tales. But, being a man of much "pepper," he will succeed in whatever he undertakes.

## HENRY NICHOLAS LYONS

**"Legs," "Lengthy," "Erasmus," "Slim"**

**INDUSTRIAL CHEMISTRY** **ERIE**

**Assistant Manager LA VIE; Erie Club.**

Here we have an original product from Erie whose fairness of face and form has won for him a classification among the rarer elements, "The Handsome Trio." "Erasmus" is extremely fond of fudge and its sources. He stoutly maintains that Erie should be the capital of the U. S. As a stude this Irishman shines, carries two men's work, makes three men's marks and still has time to smoke and gaze at the picture in the circular frame. "Lengthy" failed to live up to the expectations raised by his old baseball shirt. Ask him about it.

## JOHN KNOX McCONEGHY, A T Ω

**"Mac," "Knox," "Potter"**

**ANIMAL HUSBANDRY** **COUDERSPORT**

**Junior Prom. Committee; Flag Scrap Committee; Freshman-Sophomore Hop Committee (2); Agricultural Society; Potter County Club.**

In June, 1892, the population of Potter County was materially increased by the birth of John Knox McConeghy. He passed his youthful existence in that wonderful and progressive town of Coudersport, where he developed those admirable qualities so readily discernible in him at present. His amiable ways and good fellowship make him a favorite with all who know him, both boys and—, well, several of the latter are known to have fallen before his winning ways and handsome features. He is a natural "A. H.-ist" and a very successful future is predicted for him.

## JOHN LEWIS EARL McCORD, Λ X Λ

**"Mac," "Si"**

**AGRICULTURAL CHEMISTRY** **BERWINSDALE**

Class Track (1, 2); Varsity Debating (3); Class Debating (2); Cadet Lieutenant; Agricultural Society; Liebig Chemical Society; Forum; Prohibition Club; Clearfield County Club.

"Si" is the son of the soil and is proud of it. He spent three very useful years at Lock Haven State Normal School, two more at teaching and then came here to get some of the inside dope on this scientific farming. As a good fellow he has few equals and about the same could be said of him as a stude if he would study. As it is he manages to keep his name on the honor roll without effort, apparently. If you want a good day's gunning and with results ask "Si" to go along. He is a born marksman and the rabbits fall for him as did also the girls at Lock Haven. He is also a wrestler of no mean ability and some day we may read of "Mac's" prowess in the sporting pages.

## THOMAS WESLY McCRACKEN

**ELECTRICAL ENGINEERING** **EDENBORN**

Class Baseball (1, 2); Electrical Engineering Society; Fayette County Club.

Circumstantial evidence coupled with known facts invariably lead one to believe what they hear, but this product of "Old Main" denies that he is Irish, but Scotch. "Mac" is some ball player, but his stature is such that he is hidden by the bag. The old saying is "That all good things come in small packages," and "Wes" is not the exception that proves the rule.

## LOUIS RAYMOND McEVILLA, K Σ

**"Mac"**

**INDUSTRIAL ENGINEERING** **WILLIAMSPORT**

The "Fiat" may have traveled one hundred and forty-two miles at Ostend Beach, but the trophy goes to "Mac" for speed on College Avenue. McEvilla is regular in his attendance at "Babe's" class of animated pictures. This can be easily accounted for because "Mac" is not only an admirer of some of the "movie" stars but he is getting material for his photo play entitled, "Alice and I in the Gloaming." "Mac" entered college a year before us but he decided to spend a year in traveling in order to make up his mind as to what vocation he would follow. He is a man that will make good wherever he goes.

## JAMES LAWRENCE McHUGH, Φ K

**"Levi," "Jimmie"**

**CIVIL ENGINEERING** **WILKES-BARRE**

**Civil Engineering Society; Wilkes-Barre Club.**

"Levi" is a product of the coal regions, which fact may probably account for some of his mysterious actions, which burst out unforewarned. One of these is that he can go eight days without breakfast, but the most heart-rending is the merciless way in which he croons "Till the Sands of the Desert Grow Cold." The same ailment applies to his performance in other vocal productions, and "Jimmie" refuses to heed the pleas of his friends. Otherwise, he commands our admiration for his strong qualities and his ever present congeniality.

## THEODORE CLINTON McILLVAINE

**AGRONOMY** **PARADISE**

McIllvaine, the father of our class, left his work in '98, but realizing the advantages of an agricultural education returned to join us in our Junior year. He can tell you of life at State, when it was still in the wild and woolly stage and the student body limited to a few hundred. "Mac" has spent fifteen years in exploiting the fertility of Lancaster County, and is an authority on raising tobacco and turnips. He is a faithful worker and knows how to combine the serious things of life with its pleasures.

## CAROLINE MacMINN

**LIBERAL ARTS** **WILLIAMSPORT**

If you are a naughty child in Miss MacMinn's school, beware! But Caroline is not always the cruel "schoolmarm." Far from it. She liked the Summer School and the Botany Faculty so well that she came here in her Junior year to specialize in Botany. She has very decided views on every subject. Her opinions of the rest of us are sometimes more frank than flattering. She's in for all the fun that's going and can entertain you as long as she wishes. Ask the boys in her Sunday School class!

## WALTER McNELIS

**"Blatt," "Mac," "McNels"**

**ELECTRICAL ENGINEERING** **MT. CARMEL**

**Electrical Engineering Society; Northumberland County Club; E. E. Society.**

Watt! Electricity, does it say so in the book? If it doesn't get thee hence. Walter has to see it in the book or he is from Missouri. He has a strong tendency to look for exams—up in McAllister Hall instead of burning the midnight K. W. S. in a tungsten. "Blatt's" one ambition is to own a garage with a machine shop annex. He is going to specialize in self starters. Westinghouse or Ward—Leonard has nothing on our "Blatt." He is a great debater, either side will do. Just as long as it is an argument.

## GUY ALEXANDER McWREATH, A T Ω

**"Guy," "Mac"**

**ANIMAL HUSBANDRY** **McDONALD**

No, this is not Count Bonni, but "Guy" minus his mustache. This is a man well known for his vocal aspirations and is a member of many personally conducted Glee Clubs. It has also been recorded that he has fallen asleep in physics class, lulled asleep by the incessant murmur of the Prof. At one time he had ambitions at the cottage, but there, too, his timid nature failed to make good. Unlike the proverbial A. H. stude he is not in the roughneck class. He has the best wishes of us all.

## ALFRED SHARP MANLEY, I X Δ

**"Yip," "Jap"**

**ARCHITECTURAL ENGINEERING** **PLAINFIELD, N. J.**

**Track Squad; Class Track (2); Class Cross Country (1, 2); Class Basketball (3); Glee Club (3); Architectural Society.**

From the land of sand bars comes this fellow of the Muse of Architecture. His artistic talents are not entirely located in his fingers, for he possesses the ability to make the world a more beautiful place in which to live, by his voice (?). On the cinder track and cross country "Jap" has shown not a few competitors the way down the field Take him as you will and you will find him to be a likeable, jolly fellow and we hope that this classmate will some day be chosen to draw up the plans for our new dormitories.

## WILLIAM ALBERT MARSHALL

**"Bill," "W. A."**

**MECHANICAL ENGINEERING** **BERLIN**

Marshall hails from Berlin. He first went to Pitt, where he spent his freshman year. Later, on thinking the matter over, he heard the call of the Nittany Valley. He is a firm believer in the sign in the Library, which says that silence is golden. He neither toots his own horn nor does he get others to toot it for him. Marshall will truly be a real mechanical engineer when he boards the "boat" for the last sad time.

## WILLIAM BRUCE MATHER

**"Willie," "Bruce"**

**MILLING ENGINEERING** **BENTON**

This innocent looking youth came to us from the wilds of Columbia County. He entered as a Mechanical, but overalls and engine lathes proved to be too crude, and hence he changed to the more refined profession of milling. Although he has changed his course, "Willie" returns occasionally and demonstrates original methods of making switchboard connections to interested Mechanicals. "Bruce" has the distinction of being a hard working young man, acquiring the qualifications of a stude from his former Alma Mater, Bloomsburg Normal.

## JAMES RENWICK MATHERS, A Z

**"Jim"**

**AGRONOMY** **EMILIE**

**Parmi Nous; Sphinx; Editor-in-Chief LA VIE; Associate Editor Penn State Collegian (1, 2, 3); Editor-in-Chief-Elect Collegian for 1915; Banquet Speaker (2); Student Council (3); College Track (1, 2); Class Track (1, 2); Manager Class Track (2); Membership Committee (2, 3); West Chester Normal Club; Bucks County Club.**

This fair haired son of Old Ireland once taught A, B, C's to the younger generation. However, due to his great love for nature, he came to Penn State to assimilate some agricultural knowledge. Not content with one field of activities he entered the literary world of our college, and now as Editor-in-Chief of this book, he stands foremost in that field. "Jim" has figured in many other affairs of our college, and of our class, and is one of its student legislators. He always puts his best into everything that he does, and stands for the things that are bound to make him a son of whom Penn State can well be proud.

## THOMAS CHESTER MATTEN, Δ T Δ

**"Chet," "Tommy," "Mat"**

**CHEMISTRY** **READING**

Captain Class Baseball Team.

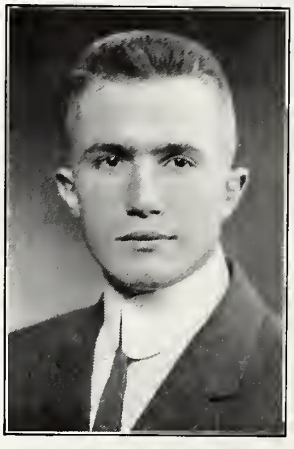

"Chet" hails from that section of the country where the Pennsylvania Wollenteers fired a Wolley Down the Walley. His ambition is to become a world-renowned chemist and if after graduation he follows his present plans his ambition will be realized. "Chet" came into fame in our freshman year when he captained our pennant winning baseball team. He has one failing and that for those highly colored letters which he receives about four times each week from Reading.

## BRIAN MATTER

**"Spike," "Brain Matter"**

**CIVIL ENGINEERING** **HARRISBURG**

"Spike," like his namesake at the "Movies," has had an eventful and varied career. As a Freshman he tumbled out of a third-story window in getting away from some "Sophs" and is still with us. As a Sophomore he suffered the loss of his mustachette, but came back strongly at the time of Campus Guarding—and lost his hair. As an athlete he would have been a gridiron star, but parental objection prevented. 'Tis rumored that he thinks "Olives" are "Good."

## PAUL GUYER MATTERN

**"Reds"**

**CIVIL ENGINEERING** **PHILADELPHIA**

Manager Class Baseball (3); Freshman Stunt Committee (1); Civil Engineering Society; Philadelphia Club; Central Manual Club.

With the build and the hair of a Napoleon and a head like a Bon(e)apart, this stalwart youngster with the heavy (?) beard came to us in 1911. At once he was noted to be a genius, a shark (?), a "histiographer" and he even knew the population of Bellefonte. Cider scraps and perfumed letters became his specialties. His stick-tuitiveness, his auburn top and his railroad ability warrant him the best of success in the future.

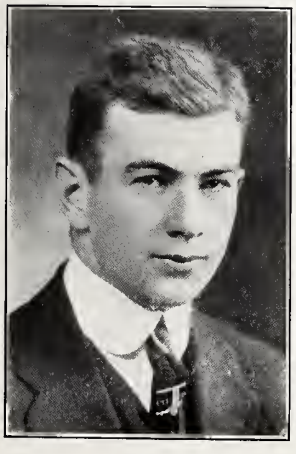

## OTTO MAYER, JR.

**"Lengthy," "Otto"**

**CHEMISTRY** **SHEFFIELD**

Here we see a future chemist of no mean ability. His "prep" school teacher made chemistry interesting, so "Otts" thought that chemistry was his elected vocation. Before completing his Freshman work his college teacher nearly changed his mind, but the old boy stuck. "Otto" believes in long vacations and keeps his "cuts" figured out to a fighting chance. If he does not blow up the Chemistry Building before the Spring of '15 he will be in the cap and gown line-up.

## HUGH RANKIN MEHARD, Φ Σ K

**"Hughie"**

**ELECTRO-CHEMISTRY** **NEW CASTLE**

**Varsity Lacrosse; Manager Varsity Lacrosse (3).**

Hugh dabbles in stocks and bonds, and knows the inside "dope" of Wall street. It is rumored that he has designs on being mayor of New Castle and governor of the state. The thing that must be admired about him is his versatility, for he is numbered among our lacrosse stars, as well as a recognized manager of social affairs. His good behavior and attention in chapel win for him the respect of the serious minded.

## GEORGE CHARLES MEIKLE

**"Mike"**

**ELECTRO-CHEMICAL ENGINEERING** **GALETON**

Of all things in this world, only four are essential to George's existence—eats, sleep, a game of "cinch," and girls. Although he pretends not to be a fusser, nevertheless to judge by the array of "Queen's" pictures that adorn the walls of his room, we would decide just the reverse. He writes continually, and this occupation, along with playing cards and baseball, would lead one to think that he never studies; but when a man can do all those things, and still stand as high in his classes as George does, we must admit that he is "there."

## RAFAEL MENENDEZ, Φ X Δ

**"Rafa," "Pelayo"**

**AGRICULTURAL CHEMISTRY MAYAGUEZ, PORTO RICO**

**Liebig Chemical Society; Cosmopolitan Club.**

This is a bright, easy-going little native of the West Indies. Graduated from the Mayaguez High School, where he made interesting researches in feminine psychology and by luck escaped without a tragedy. In his freshman year he developed many symptoms of a grind and with ease took a high place in scholastic standing. As a Sophomore and Junior he is wont to visit the distant city of the famous fountain previous to exams and as a result, he claims, he always passes with good grades. "Pelayo" fully intends to be the head of the Experiment Station in Porto Rico some day. Greater wonders have come to pass.

## PAUL THEODORE MENZEL

**"Paul," "P. T.," "Co-ed"**

**AGRONOMY WASHINGTON, D. C.**

**Associate Editor LA VIE; Civic Club; Agricultural Society; Forum; Cercle Français; Southern Club.**

This modest young man carries as his passport a theater check bearing the stamp of Washington, D. C. He decided that Washington was "no place for a minister's son" so he migrated northward and took out naturalization papers in Pennsylvania in the fall of 1911. "Paul" is an ardent adocate of co-education and sums up his feelings in his slogan, 1,000 co-eds at Penn State. He has true literary ability and makes considerable gains toward the goal of education.

## LEROY KAYLOR METZGER, A Z

**"Roy," "Metz"**

**AGRICULTURAL CHEMISTRY ANNAPOLIS, MD.**

**Skull and Bones; College Basketball (2, 3); College Football (1, 2); Manager Class Basketball (1); Class Basketball (1, 2); Class Football (1, 2); Student Tribunal (3); Southern Club.**

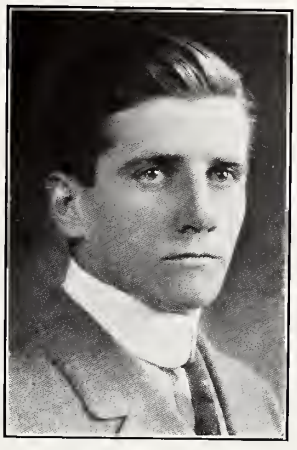

"Well, fellows, you might as well elect me this time for if you don't, I will be up here again," thus spake "Metz" in our Freshman year, and as a result he was elected class basketball manager. While enjoying this position he gave evidence of that business ability he later showed in the management of the "Stude Book Store." He claims that a certain place never had any attraction for him, but just the same we notice that he usually attends the games and shows, accompanied by a queen. He is a good basketball player and a hard worker, well liked by his classmates.

## LOUIS TRINKLE MICHENER, Σ T

**"Mitch," "Louie," "Dutch"**

**CIVIL ENGINEERING** **PHILADELPHIA**

**Skull and Bones; Varsity Track Team (1, 2, 3); Varsity Relay Team (1); Assistant Manager Varsity Track (3); Class Track (1, 2); Banquet Committee (3); Civil Engineering Society.**

"Louie" has always been a pace-setter, both on the track and in the affairs of college and class. One would not suspect this to judge him by his quiet and modest demeanor, but those who know him soon become aware of his ability along many lines. His room-mate in particular, tells weird tales of the Dutch Quaker, and his loving disposition. Although most of his heart is in the keeping of a certain Philadelphia lass, he gets enough of it into his work to get through college with the best of them and is a popular and loyal member of '15.

## JOHN PETER MIKALOFF, JR., Λ X A

**"Jerry McJunk," "Mike"**

**ELECTRICAL ENGINEERING** **DUQUESNE**

**College Football (1, 2, 3); Electrical Engineering Society; Duquesne Club.**

For argument and for loyalty to his domicle, "Mike," modest, quiet, unassuming Jerry takes the cake. A great gridiron hero, pride of Duquesne's small boys. For the glory of the roaches and the fighting race, he suffered a broken jaw. "Mike" is always a poor misused, "didn't have a show" sort of a guy until those letters from Wheeling arrive. To hear him expound on grades, socialism, fussing or just any old subject demands one's respect. This chief defense and authority, however, is, "Oh! I wouldn't call it that, not necessarily."

## CHAUNCEY DANA MILLER, Δ Y

**"Chaunc," "Dana"**

**PRE-MEDICAL** **SCRANTON**

**Class Basketball (2, 3); Class Baseball (2); Pre-Medical Society.**

"I'll get that cat." Here we have, gentlemen, a Mellin's Food boy. A man that shines in studies and athletics, but flees from the approach of the "queens." "Chaunc" nearly departed this life when several Co-eds cornered him and asked him if he was bashful. His answer is not on record. "Ish Gay Bibble" is his watchword and Ornithology his delight.

## CHARLES POTTER MILLER

**"Charlie"**

**MECHANICAL ENGINEERING** **WATERLOO, IOWA**

Charles, the undisputed, never-failing shark in our class came to us from the land of "porks," stopping on his way to establish the Westinghouse Air Brake Company. This is one of the fortunate men of our class in respect to social activities. It is claimed that he has never gotten as low as a "C" for a grade at the Cottage yet. As a congenial companion, he is ranked among the highest and with his powers of conversation his path to future professional success is assured.

## HERMAN GEISTWEIT MILLER, Α Τ Ω

**"Squirmie"**

**CHEMISTRY** **LANCASTER**

**Class Wrestling (2); Thespian Play (2); Thespian Club.**

"Squirmie" comes from the home of the Dutch as may be seen by a single glance at his countenance. He claims to be Caruso's rival and may be heard in the wee small hours of the morn rendering his selections to the discomforture of all those around him. During his summer vacation, he may be found shaking fizz on the boardwalk at Atlantic City, and in the winter wrestling in 115 pound class, Chemistry, temptation, and his room-mate.

## HARRY RAYMOND MILLER, Λ Χ Α

**"Jakey," "Hezekiah"**

**AGRONOMY** **LANCASTER**

**LA VIE Photographer; Agricultural Society; Lancaster County Club.**

If, on your way to classes you are confronted by a large camera, trained on one of your vital organs, you may be sure that H. Ray is behind it. He has the scrap pictures out before the scrap begins. Although of still tender age he has already had one town named after him. He was a star on the prep school basketball team and still shines in the social section of his home town. His studious demeanor forecasts a man of worth.

## JACOB KOPEL MILLER

**"Jack," "Jake," "Jay"**

**AGRICULTURAL CHEMISTRY** **PHILADELPHIA**

**Deutscher Verein; Liebig Chemical Society; Menorah Society; Philadelphia Club; Southern Manual Club.**

Yes, he almost flunked military heptics and came near getting mad about it. The grading depended on a long set of questions to be answered at home. He wrote out the answers and let his friends copy them, with the result that his friends were all exempted, while he had to practice with a broom, and study about two-and-a-half hours in preparation for the final. On this account he severed all connections with the Military Department at the end of his Sophomore year. His faults are: Movies, cider-drinking, and writing to numberless girls, one in particular. His virtues (this is no place for them). He is bound to make his mark, even if he has to work to do it.

## SAMUEL H. MILLER, Φ K Ψ

**"Sam"**

**CIVIL ENGINEERING** **MERCER**

**Skull and Bones; Assistant Manager Varsity Baseball (3); Civil Engineering Society; Tri-County Club.**

This smiling youth came to us from Mercersburg Academy with a reputation of two stories a night, a mandolin solo, and a pack of Fatimas. He immediately settled within the historic wall of McAllister Hall, and soon became initiated into the superior order of "Refined Roughnecks." "Sam" once had the idea of becoming the president of his father's bank, but now has his eyes bent on a transit and tape. Besides being a good scout, "Sam" has the reputation of being the only original exponent of the modern vernier. Without a doubt, he will soon be registered among the world's famous engineers, "Bob" and "Charlie."

## WILLIAM ROBERT MILLER, Φ Δ Θ

**"Bill"**

**HORTICULTURE** **PHILADELPHIA**

**Druids; Collegian Board (3); Froth Board (3).**

We have here a member of both Froth and Collegian Boards. As you gaze on his frank and open countenance you do not doubt his ability to do things. "Billy" believes in having a good time, but along with a good time he manages to pick up something about Agriculture. Agriculture is spelled in big letters in "Bill's" philosophy of life, for some day he hopes to own his own farm and enjoy the rural life. Here's luck and the best wishes of your class-mates, William, in all your future enterprises.

## RICHARD BARDWELL MILLIN

**"Dick"**

**ANIMAL HUSBANDRY** **RIDGWAY**

**Elk County Club.**

"Dick's" original ambition was to be a forester. Last year he suddenly disappeared from his usual haunts, and upon inquiry we learned that he had buried himself in a southern forest. He must have buried his forestry ambitions there, too, for this year when he appeared on the scene he changed his course. Richard once belonged to the National Guard, where he was a "hep man" of some ability. Nothing ever worries him and no difficulty looks too big for him to attack.

## CLYDE HANNA MILNER

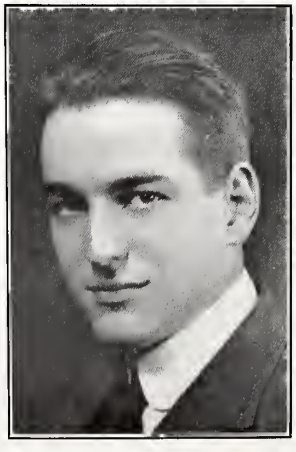

**"Clyde," "Milner"**

**ELECTRICAL ENGINEERING** **COOPERSTOWN**

**Electrical Engineering Society; Venango County Club.**

Clyde is a military man, an officer in the "Hep's" Army, and the originator of the phrase, "Squads East." Never was there a cooler general in the time of peace, even if the wrong command is given. It is rumored that he is descended from Rameses, because of his bold nature. He has never recovered from the sleep he lost at the time of the Flag Scrap, but once in a while he clears his throat, stretches himself and startles us by some exhibition of latent energy. However, Clyde is like the still waters that run deep.

## CARL FRED MOHR

**"Carl," "Big Ben"**

**CIVIL ENGINEERING** **PHILADELPHIA**

**Civil Engineering Society; Northeast Manual Club.**

Carl, like Rip Van Winkle, had been asleep for twenty years and realizing that it was time to wake up, became the Big Ben agent at State College. Mohr entered from Northeast Manual and proceeded to teach Swamp some Chemistry. His time is tied up by a girl, a noisy radiator, and his avocation, bouncing a baseball against the ceiling at 3 A. M. Some day that dog instead of approaching in infinitesimal distances will catch the rabbit and Carl will have rabbit's stew.

## EDWARD MOORE

**MECHANICAL ENGINEERING** **PHILLIPSBURG**

**Mechanical Engineering Society; Centre County Club.**

This serious looking young fellow, in spite of his appearance is not at all harmful, neither does this expression adorn his face at all times, for when seen in Bellefonte society his cheerful countenance claims the attention of the belles of that city. Dancing is one of "Swed's" favorite electives in college. The Long Distance Telephone Company is aware of "Tiny's" presence at State. The Mechanical Engineering world will surely be astounded by the deeds of this little fellow, for his ability is entirely out of proportion to his size. We all expect to hear from him again.

## WILLIAM BAILEY MORAN

**"Paddy," "Bailey"**

**CIVIL ENGINEERING** **PHILADELPHIA**

"Paddy" wasn't afraid of the Sophs as long as he had his gun. One night he forgot his gun, and to duck the Sophs he climbed out on the roof in his "nightie" and sat on the chimney for two hours in the rain. His talents later turned to selling everything to everybody, whether they wanted to be "sold" or not, even vouching in his sleep that they were "real doe-skin" Ask "Paddy" about his prowess at throwing door-knobs. His pet theory is that love thrives on cholocate cakes. This likeness of our "Bailey" required twelve sittings.

## ALFRED THORPE MORISON

**"Gumshoe Pete"**

**AGRONOMY** **SUGARGROVE**

**Class Debating Team (2); Agricultural Society; Civic Club; Forum; Warren County Club.**

Morison is a hunter, a fisherman, and a naturalist, and is especially interested in Shingletown. He is a great rover of the pathless woods. In his Freshman year he was a loyal wearer of the green and went in strong for bon-fires and flag scraps. Although he has no portly figure or "bay window" to show for it, he is a great lover of good eats, preferring those to be found at Charter Oak and Boalsburg to all others. Just by the way, he is also a "stude," and always runs ahead of his schedule. He stood at the head of his company at drill, but there was a reason for this. "Gumshoe" does not believe in co-education for he never got his bulletins back.

## ALFRED NEEB MUNHALL, Σ X

**"Freddie"**

**AGRONOMY** **ENSTIS, FLA.**

**Varsity Lacrosse (2); Varsity Soccer (1, 2, 3); Class Soccer; Manager Class Soccer; Thespians (1, 2); Crab Apple Club; Southern Club.**

After trying Kiski, Indiana, and Stetson University, "Freddie" finally landed at State and from that time to the present date he has not been away from the place for more than three weeks at any one time. Some people foolishly think he is a resident of the village, but they have never heard him rave about—"down in Florida." After the trials of college are o'er we will undoubtedly find "Freddie" (lounging) on the fruit plantation in the Sunny South.

## ALBERT MYERS MUSSER

**"Muss," "Bud"**

**HORTICULTURE** **STATE COLLEGE**

"Muss" was born and raised in Lewistown. Here he acquired his liking for shorthand and stenography, and he still stoutly maintains that her hair isn't red. "Bud" spent his Sophomore summer in N. Y., and if you want to hear about good times, good eats, and a good boss, ask him about his trip. After his stay in N. Y. he decided that the climate was too cold, the "eats too rotten," and the people too harsh, in that country so that his ideas are now wandering southward to the sunny climes of Louisiana where people only dream of cold weather and live upon watermelons and love.

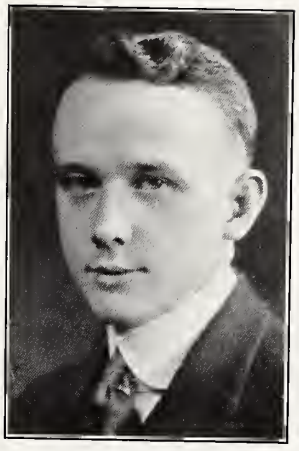

## LEROY PARDEE NEEDHAM

**"Cap," "Tommy"**

**CIVIL ENGINEERING** **COATESVILLE**

"Aye, aye, sir; Ship ahoy! All hands off the fo'cas'l" Such are the ravings of our salt water classmate, an ex-'14 man, who, at the end of his Sophomore year, decided that a life at sea was his chosen profession. Consequently, he joined the relatives of Father Neptune, and in his wanderings ran across the Panama Canal. He examined it closely, talked to Col. Goethals and other noted engineers, and was advised by them to finish his college course and equip himself with the necessaries to build similar canals. Result: He followed their advice, concluded his year's wandering, came back to college, and joined our class. Here's to the Skipper's success as a Civil Engineer.

## HOWARD ARTHUR NEELY, Σ N

"Kel"

LIBERAL ARTS — PITTSBURGH

Friars; Student Council; Varsity Track Squad (1, 2); Assistant Manager Tennis Team; Glee Club (2); Junior Banquet Speaker; Liberal Arts Society.

"Kel" came to us with a track reputation and showed the green material the way around the cinder path for the first year. With his decline in athletics after his initial year came his broadening out as a student and an increased interest in more serious college affairs. His desire is to some day wear an LL.D. to his name. The indications are that "dreams will come true."

## HARRY WILLIAMS NICHOLS, 3rd, Δ Y, Δ O

"Nick"

LIBERAL ARTS — VANDERGRIFT

Scabbard and Blade; Varsity Debating Team (1); Class Secretary (2); Debating Council (2); Liberal Arts Play (2); Associate Editor LA VIE; Cadet First Lieutenant (3); Officers Club; Rifle Club.

The man with the distinctive appearance, the ability of a modern Bryan, the smooth, winning ways of a Julian Eltinge, is none other than our friend Harry. "Nick" is a debater of note, and in this respect his excellence alone exceeds his ability. His only failing comes when he poses for a picture and then the photographer has troubles of his own. Liberal Arts has claimed "Nick" for its own and through the experience gained as chief executive in the Library along with his advisory ability in debating he will some day be a power in our educational world.

## STANLEY EUGENE NOBLE

"Stan"

ELECTRICAL ENGINEERING — WEST PITTSTON

Electrical Engineering Society.

Probably not a member of our class arrived at State with less ostentation than did Stanley. He made his debut into college activities on poster night when he was one of the selected men that so thoughtfully and so thoroughly decorated Lemont. After this little diversion his entire efforts were devoted to study. As a studc he is a whale, and that yellow ticket in E. E. 1 was considerable of a shock of his college career.

## CURTIS CLINTON NYE

**"Bill"**

**CIVIL ENGINEERING** **HARRISBURG**

**Civil Engineering Society; Harrisburg Club.**

"Hello, where's Nye?" Oh, out fussing again. This is the conversation in brief, if you should inquire at Curtis' room as to his whereabouts. "Bill" entered college three years ago with ambitions of an athletic as well as of C. E. nature. Unfortunately he was soon drawn into the social whirl of State College—and Pleasant Gap. ("Ah! boys, she's some Queen") and his aspirations partook of a different hue. Nevertheless, he is of the stuff to succeed, and a friend withal.

## EMIL ROBERT JOHN OLBRICH

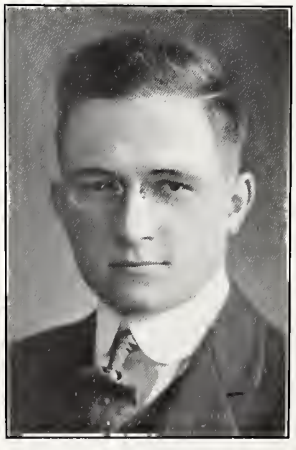

**"Bob," "Adolph," "Ishmeel," "Prince"**

**CIVIL ENGINEERING** **PHILADELPHIA**

**German Play (2, 3); Civil Engineering Society; Deutscher Verein; Northeast Manual Club.**

His ideas, forensic abilities, ringing voice, immaculate appearance, modest, retiring disposition, military bearing, socialistic tendencies, poise, personality, etc., are ever evident in his rule of the Deutscher Verein. These sterling qualities have been the cause of many pursuits by the "Female of the Species." Unusual to most, but perfectly natural to "Adolph," are gifts of champagne and gold-tipped cigarettes from such foreign parts as Buffalo, Pittsburgh, Collingswood and Atlantic City. A hail fellow well met and true to the last.

## JAMES HARRIS OLEWINE, ΔΥ

**"Jimmie," "Olie"**

**CHEMISTRY** **BELLEFONTE**

"Olie" comes from Bellefonte, but strange to say does not visit that "Burg" as much as some of his fellow classmen. Harris is a Chemist and never will forgive "Charlie" for those flunks in his Sophomore year, which he had "doped" out he could not possibly receive. Although liked by all women "Olie" has never been in love, hence spends his spare hours dreaming over bachelor quarters while amusing himself at the piano. However, Harris is a conscientious student and now that "Swamp" is back intends to graduate with his class. "Yea! Shoie." "The deuce you say."

## EDGAR FREDERICK OTTMEYER

**"Otto," "Ed"**

**CHEMISTRY** **YORK**

**Glee Club (2, 3); Deutscher Verein; Berzelius Chemische Gesellschaft; York County Club.**

This bull-headed little York County Dutchman has evidently missed his calling, for he delights in arguing, which does not coincide with his affinity for Chemistry. He doesn't believe in any of the frivolous things of life, and won't take pictures or sing in the Glee Club on Sunday. He is a very conscientious worker, and a good student, but rumor hath it that he is inclined to grind.

## JOHN FRANK PARK, ΦΚΣ

**"Parkey"**

**MECHANICAL ENGINEERING** **MIDDLETOWN**

**Skull and Bones; Freshman Basketball (1); Varsity Basketball (1, 2, 3); Mechanical Engineering Society; Dauphin County Club.**

"Parkey" is a worthy exponent of the fine art of argumentation. He will indulge in any argument, at any time, on any question, and take any side. Frank proved his worth in his Freshman year by making good with a vengeance, in varsity basketball and since that time has caged many a point for the team. He is a conscientious student and is destined to become more than an average Mechanical Engineer.

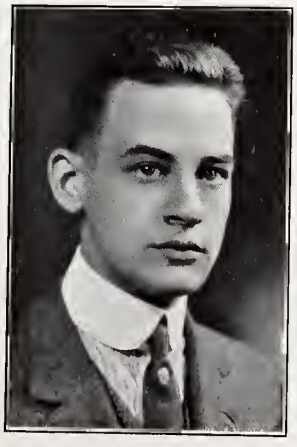

## WILLIAM STANFIELD PARKINSON, JR., ΦΓΔ

**"Bill," "Spike," "Stude," "Parkie"**

**ELECTRICAL ENGINEERING** **NORWOOD**

**Class Vice President (1); Friars; Secretary Y. M. C. A. (3); Student Tribunal (3); Associate Editor Collegian (1, 2, 3); Class Banquet Speaker (2); Philadelphia Club.**

Here we have the only original thinker. He is some "stude," too. He fights whenever necessary. As a Sophomore he was as rough as ever they come, and whenever you saw "Spike" with his umbrella you knew he had been out hazing. He argues upon the least provocation and stoutly maintains he is never wrong. He does not care much about his meals, for he has missed many Sunday night suppers, all on account of—well—he is well acquainted at the Cottage. Aside from these things, "Bill" is a good fellow, and will undoubtedly be a great railroader some day.

## FRANCES STUART PATTERSON

**"Pat"**

**HORTICULTURE** **PHILADELPHIA**

**Philadelphia Club; Southern Manual Club; Crap Apple Club; Agricultural Society.**

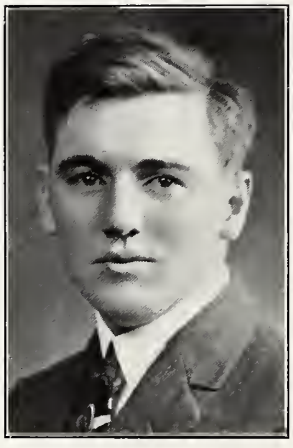

"Pat" is a fat, jolly classmate that has chosen Horticulture for a vocation and "chicken culture" for an avocation. "Pat" has marked musical ability and this with his good nature and inventive turn of mind makes him a desirable companion. His name barely missed appearing on the honor roll last year, which would indicate that he is also somewhat of a "stude" at times. Good luck to you, "Pat," may you always be fair and fat.

## SYDNEY ALBERT PEIFLY

**"Dutch," "Piff," "Piffly"**

**ANIMAL HUSBANDRY** **NEFFS**

"Dutch" has a smile that even the Sophomores could not brush off. He is well known as one of the best natured men in his class, but even he has been known to lose his temper at the sight of one of a classmate being sat upon. "Py Tam, I was just picking 'em off." In his Sophomore year "Piff" sought to win fame as a mat man, but later took to wrestling with A. H., and that he is making a success in this is shown by the implicit trust the college placed in him last fall by appointing him commander-in-chief of their stock exhibit to the Chicago Show. He is a great "stude" and his motto this year is: "Buying books is a useless extravagance, use the other fellow's."

## EBEN HORNER PENNEL

**"Eben"**

**LIBERAL ARTS** **BEDFORD**

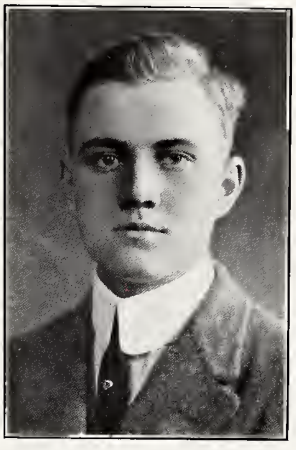

This quiet little lad came to us from Mercersburg because he was especially desirous of acquiring a knowledge of military tactics, and carrying a real gun. Two years of it, however, was sufficient to convince him that his abilities run only along oratorical channels. It is now his sole ambition to become a great lawyer some day, and we feel sure that if he follows his chosen profession as earnestly, zealously, and unceasingly as he has followed his studies here at Penn State. the world will witness great deeds done and great wrongs o'erthrown. Here's to your success, Eben, when you come into your own.

## THOMAS LEE PEROT, JR., Φ K Σ

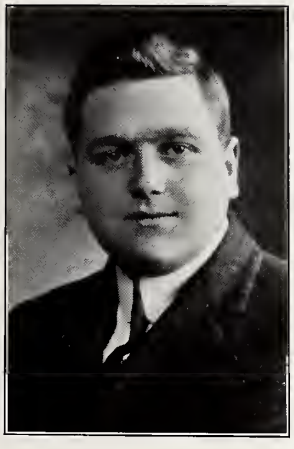

**"Lea," "T. Lea," "Perot"**

**HORTICULTURE** **NORRISTOWN**

German Play (2); Deutscher Verein; Rifle Club; Montgomery County Club.

With the last stroke of the bell, into the class room marches this tall, slender chap and quietly takes his seat. At the Forestry Summer Camp "Lea" was the champion quoit thrower and won fame also in many other things, such as the woodpile and the ice cream parlor at Sheffield. However enticing the woods may be, "T. Lea" thinks that a farm at home near Norristown is better, and so the Foresters are losing a "mighty good fellow." Nevertheless, while sorry to see him depart, they bid "Lea" good cheer and wish him the best of success as a farmer.

## JOHN MONROE PFEIL

**"Fats"**

**ELECTRICAL ENGINEERING** **SWISSVALE**

Electrical Engineering Society; Pittsburgh Club.

"Fats" hails from Swissvale, near the Westinghouse plant. He knows more about that plant than the owners do. Although an Electrical, John intends to be a traveling salesman and consequently is trying hard for the B.S. degree. The "come back" spirit that he showed in re-entering after a two years absence will be a big factor for the future success of Monroe. His sunny nature insures him popularity with his classmates. Two things only can cloud his smiling face, (1) a below-grade, and (2) the non-appearance of a thick, sweet-smelling letter.

## FRANK PATRICK PHILIPPELLI

**"Phil"**

**SANITARY ENGINEERING** **HARRISBURG**

Civil Engineering Society; Harrisburg Club.

Here we have the heavyweight of the class. Frank Patrick, or "Phil," as he is dubbed by his friends, is a full two hundred pounds of jollity and mirth. He began his college career with serious aspirations to success and fame as a Mechanical Engineer, but his delicate constitution required a change. Consequently he forsook the machine shops for the open air course in sanitary. Although "Phil" has developed unexpected studiousness since his battle with "trig," his reminiscences, songs and original glides prove that he still regards studies as a minor issue in college llfe.

## ROLLAND WILLIAM PHILLIPS

**"Rolly," "Blondy," "Red"**

**SANITARY ENGINEERING** **SCRANTON**

**Mandolin Club (3); Assistant Gymnasium Instructor (2, 3); Deutscher Verein; German Play (2); Rifle Club; Civil Engineering Society; Lackawanna County Club.**

Here, readers, is the base voiced member of fifth floor Main Quartette and the most brilliant light on the Mandolin Club. Gymnastic ability is another strong point, as is also early rising. "Rolly" first cast his lot with the Civils, but soon discovered that Sanitary Engineers were needed worse around Scranton, so he gave himself as a martyr to the cause. Upon the receipt of a box of fudge "Red" ceases to study for a week. He is one of the best natured men in our class.

## JAMES AMBROSE PINER

**"Mose," "Brose"**

**AGRICULTURAL CHEMISTRY** **DEVON**

**Varsity Track (1, 2).**

Piner is one of the leading track artists at State. He joined the class of 1915 after making a start the year previous. He is a quiet, unassuming fellow, who is well liked. He manages to get through his college work and although he thinks "Frenchy" is a good scout he has no time for the stuff he teaches. Go to it, "Brose," may you also win the race for fame and fortune.

## FLORENCE J. POWDERMAKER

**"Puffles," "Poody"**

**CHEMISTRY** **BALTIMORE, MD.**

**Deutscher Verein; Y. W. C. A. Play (1); Liberal Arts Play (2).**

Perpetual motion may never be discovered, but "Puffles" furnishes us with a good substitute. Since our free hour a day is as much as she can stand, her mania is finding "something else to put on my schedule." Despite this tendency, her studies are not allowed to interfere with her college work, and she finds plenty of time to engage in other activities—"hikes," a specialty. "Puffles" exercises her brain even faster than her tongue—and that is saying a good deal. With all the vim and enthusiasm that she puts into everything—(from chemical explosions to fine embroidery), she works for the best interest of Penn State.

## RAYMOND KNIGHT POWELL

**"Dinger"**

**AGRICULTURAL CHEMISTRY** **BRYN MAWR**

**Liebig Chemical Society; Montgomery County Club.**

"Dinger," that quiet looking inconspicuous person, who hails from Bryn Mawr is one of the most mistaken men of the Agricultural Chemists. A rough-houser of the first class, a man with a past, a man with big things in front of him and a fusser who has passed all tests with an "A." "Dinger" is a man who loves his sleep, as his loud and vibrating snores would indicate. Naturally endowed with good nature, a happy go-lucky disposition and a brain that can work, he adds to these virtues that of being a true friend and classmate.

## HARRY COVODE PRINGLE

**"Cobalt"**

**MECHANICAL ENGINEERING** **JOHNSTOWN**

**Mechanical Engineering Society.**

The most mysterious man in State College. He arrived here on foot as a Freshman with one small handbag, and is now the possessor of a one-lunged "Ford" and seven dogs. Before his automobile days, he exercised by leading stubborn horses over Munsey mountain on fussing expeditions to Unionville. Harry is one of the most unobtrusive members of the class, but one of the most loyal and steadfast. From his characteristic efficiency in class work, we predict a bright future for him as a mechanical engineer in Oberlin, Ohio, the "land of his dreams."

## REGINALD HEBER RADCLIFFE, A Z

**"Hebe," "Raddie," "Deacon"**

**FORESTRY** **RIDGWAY**

**Friars; Rose Valley Scholarship; Class Debate (2); Deutscher Verein; Forum; Forestry Society; German Play (2); Agricultural Society; Elk County Club.**

Here is the exception that proves the rule about minister's sons, for he is what we would expect a minister's son to be. "Deacon" made good from the very beginning, for he received the "Barlow Scholarship" and has always stood high on the honor roll of our class. He is a quiet, studious, youngster who likes to hike to the mountains in search of game which he gets, I don't think. However, we must all admit that he is a "Perfect Lady and Rough houser" of the first degree.

## NICHOLAS MACHMER RAHN

**"Nick," "Kitty"**

**AGRONOMY** **HUTZTOWN**

Civic Club; Agricultural Society; Berks County Club.

"Ah—come—on" "My goodness, man, what—d—you think this is?"— "Nick" believes in getting his work out just as it comes, but he isn't a grind. Although not conceited, he is resolute in his opinions, but is always willing to have you present your side of the argument. He has a keen interest in all college and class activities. His prudence and good judgment is supplemented by his good humor. He is deeply interested in his course and will be a good tiller of those rich Berks County soils.

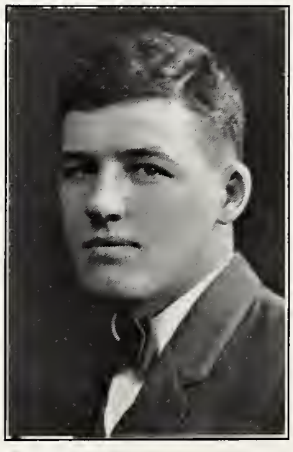

## NICHOLAUS HAUMANN RAIBER

**"Nick"**

**MINING ENGINEERING** **BELLEVUE**

College Wrestling (2, 3); Class Track (1); Mining Engineering Society; Pittsburgh Club.

What is there under the ground and how are we going to get it out? That is the big question that "Nick" hopes some day to be able to solve for us—in part at least. Here in school he does his share to uphold the reputation of the Miners, and is the man on whom we could depend when the secret activities of our Freshman and Sophomore year required men of nerve and brawn. Since the perils that confront the man underground do not daunt "Nick" in the least, it is altogether probable that the future will see his name ranked high in the profession of his choice.

## DONALD RANKIN, B. S.

**"Don"**

**HORTICULTURE** **SCRANTON**

LA VIE Photographer; Crab Apple Club; Lackawanna County Club.

"Don" captured his degree at Lafayette, where he gained fame as a photographer. The Bethlehem Steel Works enjoyed his ability for several years, but "Don" finally decided to be a farmer. Here he soon won a reputation as the man with the camera, and together with his activity in the more serious affairs of college life, he has won a high place in our estimation. He has a Sunday School of his own somewhere out in the country and his influence shows on both old and young.

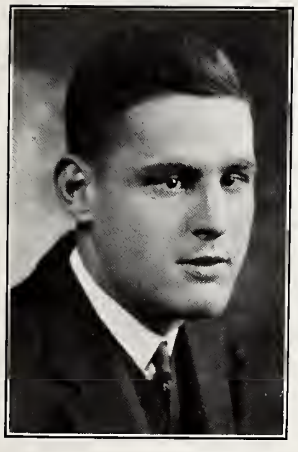

## ROBERT ELMER RANKIN, B Φ Π

**"Bob," "El"**

**ELECTRICAL ENGINEERING** **PITTSBURGH**

**Electrical Engineering Society; Junior Prom. Committee.**

Before entering Penn State this fellow was accustomed to see visions and to dream dreams in the solitude (?) of the Smoky City. To realize his ambition, he allowed Parker to guide him into our midst. At the present time we are glad to say that he is a noted authority of Washington Seminary. Since "El" is a mighty good scout, as well as a hard and conscientious worker, his future has a bright outlook.

## JESSE ROSSITER RAPP

**"Jesse," "Rip"**

**FORESTRY** **PHILADELPHIA**

**Class Football (1, 2); Forestry Club; Central Manual Club, Philadelphia Club.**

"Jesse" came to State from Central Manual, of Philadelphia. His activities have been along two lines, mainly sleep and football. As a forester "Rip" is the real thing. He can swing an axe like a ripe old "wood hick," and is always willing to do the lion's share of the work. It is falsely reported that this young fellow has a calloused back from lying on hard benches. Take "Rip" as he comes and he is all right, but never argue with him. This husky fellow will make good in the woods provided he has a cot and a good cook.

## WILLIAM ARTHUR RAYFUSE

**"Slim," "Steve," "Venus"**

**ARCHITECTURAL ENGINEERING** **WILLIAMSPORT**

**Architectural Society; Williamsport Club.**

"Slim" is a carpenter of note who has aspirations toward Architectural Engineering. Aside from his natural predilection for building construction and allied arts, his chief accomplishments are: shooting the stars out of the sky with a Colt's .45, and eating two ounces of "Blue Penn" per day. "Steve" has developed remarkably in the society line since he arrived at State. Good luck, old man, may you some day be building "Skyscrapers."

## PAUL REBER

**ELECTRICAL ENGINEERING** **FREDERICKSBURG**

**Electrical Engineering Society; Deutscher Verein; Lebanon County Club.**

"My name's Reber, what's yourn?" With this classic remark Paul is reputed to have introduced himself to three hundred of his future classmates. To gaze upon this innocent looking countenance, one would not suspect that the owner thereof is a bad man in the "movies." This gentle art he acquired in his Freshman year from the "Fri Rappa's" on Frazier street. Paul has had a terrible reputation to live down, for he is a preacher's son, but he has proved for once that the old adage is wrong. There is only one thing that is wrong with Paul and that is he tries to make people believe he is not a "stude."

## ALFRED ROLAND REED, Δ T Δ

**"Al," "Ada"**

**METALLURGY** **BEN AVON**

A light-hearted enigma who never tires of telling of his many conquests in and about the Smoky City. He spends his summers in the woods and his winters talking about his summers. As a southpaw he has latent abilities. His hobbies consist of telephone, five hundred, and furniture and cushion heaving. With all his faults the Ben Avon beauty is a good student and will in time have his name inscribed high on the archives of State College.

## GEORGE LOYD REINERT

**"Shreds"**

**CIVIL ENGINEERING** **HARRISBURG**

Some men are born musicians, some acquire music, and others thrust music upon us. We regret to say that "Shreds" is one of the latter. He is also noted for his passion for the latest styles, especially a white collar. George is famous for his polish, in particular for his low bow and sweep of his hat across the landscape. However, he also has some serious characteristics, among them the ambition to graduate as a Civil Engineer some day, and be a credit to those who know him. We believe that "Shreds" can combine music, polish and ability in engineering so that we'll hear from him.

## FRANKLIN PIERCE REYNOLDS, JR.

**"Frank"**

**AGRONOMY** **LANSDOWNE**

**Dairy Club; Northeast Manual Club; Philadelphia Club.**

Clifton Heights gave up a coming big man when Franklin packed his carpet-bag for Penn State. Since his arrival here he has acted as an example for many of the "Ag." studes that have a tendency to lag in their work. His note-book is a work of art, his ability on a Correlation table is profound, and his dope on the ability of a scrub prof is unerring. As a friend, Franklin is the kind that stays. But the fairest rose has thorns, "Frank" sometimes insists on singing, to the tune of the village bells.

## ALBERT EBERSOLE RHOADS, Α Δ Σ

**"Al," "Butch," "Ingersoll"**

**METALLURGICAL ENGINEERING** **HARRISBURG**

**Editor Penn State Mining Quarterly; Mining Society; Harrisburg Club.**

Ever hear of Albert "Ingersoll" Rhoads from Harrisburg, a Junior "Met"? There isn't much to him, being of the variety that makes good company for a fountain pen in a vest pocket. One of the mysterious "G" men. Can't get sore unless you do one thing, pinch his nose. Raves continually about girls and Niagara Falls. Steers an auto like a gorilla—with his knees. Likes to take in tea parties at "Andy" Lytle's with the boys. May good luck follow you, "Butch."

## FRANK RICHARD RICE

**"Dick," "Frank," "Abie"**

**HORTICULTURE** **MONROETON**

This pleasant chap, after trying several other schools, has decided to make Penn State his Alma Mater. Outside of a tendency to flunk at least one subject each year, "Abie" is a good scholar. His well known failing for the fair sex generally keeps him so busy that he has no time for work, his greatest grief being, as he expresses it—"I didn't get a letter to-day." However, if you want an agreeable, good-natured fellow, always call for "Dick."

## JOHN WILLIAM RICHEY

"Bill," "Ritch"

ELECTRICAL ENGINEERING — EVERETT

This dark complexioned, hairy specimen of manhood came to us from Franklin and Marshall Academy. His personal appearance and manner of speaking made the Freshman look on him with considerable awe during his Sophomore year. However, his disposition is much milder than his appearance would indicate. Although most of "Bill's" energies go into his studies and wrestling, yet his popularity with the ladies shows that his ability as a fusser is not to be despised.

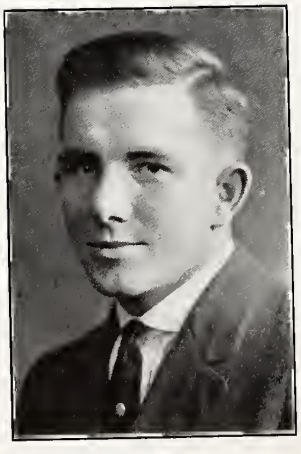

## CHARLES LEINBACH RIESER

"Shark"

CIVIL ENGINEERING — WEST LEESPORT

Behold, the Sheriff of Berks County, "Horseshoe" Charles. Application to his studies made him what he is; a man of men. He is active along many lines, especially the Philadelphia and Reading, and in this "around the world in eighty days" stuff. The only living survivor of the "Siege of Vicksburg," and strictly a Union man (Western). We expect Charles to expound his theory of "Mekanix" some day.

## OWEN MICHAEL ROBERTS

"Shorty"

MINING ENGINEERING — SLATINGTON

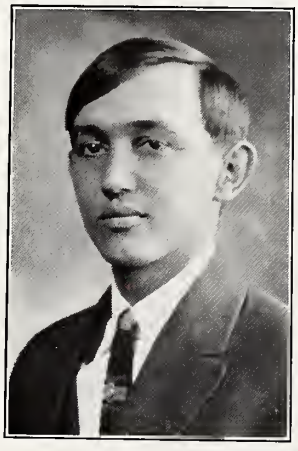

"Shorty" is a little man but will make the right kind of a miner when he leaves us in 1915, although so far in his college life he hasn't acquired the miner's habits. He is rooting hard for the Miners to spend their summer school in Wilkes-Barre. A hard worker, and though he has his off-day now and then, we predict his success when he goes out to shovel coal for himself.

## EUGENIO RODIGUEZ, Φ X Δ

**"El Flacco," "Don Quixote"**

**CHEMISTRY** **MAYAGUEZ, PORTO RICO**

**Cosmopolitan Club; Chemical Society; Psychological Club.**

This chap comes to us from the Carribean Sea. He was a good student his Freshman year, but later changed his mind and said "nicht!" Then he turned to Psychology and now can talk as much hot air in a minute as a philosophical barber. He believes in the Ionic theory, in "Dr. Pond's Omnipotency," in the "Rhythm of the tango," and in the "damsels of Bellefonte." This versatile chemist will go back to Porto Rico to do his life-work, and we know that he will keep going and make good.

## BENJAMIN ROSOFF

**"Ben," "Bennie," "Larry"**

**AGRICULTURAL CHEMISTRY** **PHILADELPHIA**

"Bennie" is the pride of his class. He deserves credit for his spunk in the class room. When it comes to luck he shines. He can use a razor and sling hash to perfection. His ability to sing is mediocre, in dancing he has no equal, and his jokes are all original. Sad but true, he has no sweetheart, but it will not be many moons before she will appear upon the scene. He is a student in every sense of the word, for his great concentrative powers, his vivid imagination and his incessant flow of language verify this assertion.

## RALPH ARCHIBALD ROSS

**"Mills"**

**AGRICULTURE** **MILLS**

**Potts County Club.**

Mills lost a good blacksmith when "Archibald" left for college. His loyalty for this unknown place is only exceeded by his loyalty and devotion for State College—schoolmarms. Sleep, Nature's sweet restorer, claims Ross almost at will, and it is a battle for him to leave his bed in the morning. "Archie" has a docile appearance, but when he wants anything, he gets it. Things will hum like the bellows in the old blacksmith shop when this classmate of ours bucks the world.

## FREDERICK WILLIAM ROTH

COMMERCE AND FINANCE — ALLEGHENY

Liberal Arts Society; Forum; First Lieutenant; Battalion Adjutant.

Our blonde friend hails from the Smoky City and is a typical representative of the hurry and business characteristic of that place. For two years, "Fred" was entered in the "E. E." course, but soon realized that he was a business man, rather than an engineer, and accordingly flopped over to the Commerce and Finance course, where he rapidly became one of the shining lights. His chief delight, which pleases all that hear him, is "music." He got his start as "Babe's" stand-by, and in his Junior year had the nerve to install State College's first Music Store. "Fred" believes that seven hours sleep is enough for any hard-working man. Talk to him about girls and you have added one more friend to his list.

## JOHN ERNEST ROTHROCK

"Rocky," "NH,OH"

INDUSTRIAL CHEMISTRY — LEWISTOWN

Juniata County Club.

No, Oswald, the perpendicularity of Rocky's hirsutal adornment is not due to perpetual fright, but rather to the eccentricities of his barber. Early in his college career he conceived a desire to test the qualities of .88 sp. gr. Ammonia as a beverage, with the result that he was very nearly cut off in the flower of his youth. He is very prone to while away his idle hours with a mandolin and his repertoire of six doleful dirges is truly disheartening. "Rock" is a hard worker and an all around good scout. He will be on deck when '15 sets her sail.

## JOHN HENNETH RUMMEL

"Jack"

AGRICULTURAL CHEMISTRY — MT. UNION

Band; College Band; College Orchestra; Huntingdon County Club; Liebig Chemical Society.

Is it the size of his feet or the loss of sleep that causes this boy to shuffle his feet? He was rather fleet-footed one night in State College—ask him about it, but this gentleman does not always run from the ladies. Rummel is quite a musician, especially a vocalist, for his melodious tenor voice harmonizes well with anything, even a rip saw. He is a hard worker, always gets his reports in on time with the exception of one in Agricultural Chemistry.

## JOSEPH CLIFFORD RUSSEL

**"Lillian," "Cliff"**

**INDUSTRIAL CHEMISTRY** **PITTSBURGH**

**Liberal Arts Society; Pharsonians (1); Liberal Arts Play (1, 2); Pittsburgh Club.**

Before us we have the beautiful Lillian Russel who has given up the stage to undertake the study of the chemistry of cosmetics. In his Sophomore year, "Cliff" gained great popularity on the State College stage, in the "Rivals," but later concentrated his talent on the uplift of the Military Department. His mind is constantly evolving business schemes for the revolution of the advertising world. He used to be a familiar figure at the Cottage, but now has steadied down to the unmolested pursuit of Industrial Chemistry.

## ROBERT LEE RUSSEL

**"Bob," "Russ"**

**PSYCHOLOGY AND EDUCATION** **OXFORD**

Chester County sent us a model in perseverance when "Bob" chose Penn State as his future Alma Mater. As a student he is there with the goods and while by no means could he be called a grind, still his grades bespeak good, conscientious work. For good fellowship we must hand it to him, and if ever an honor list of men who have shown the most grit in overcoming obstacles in the way of their college course should be complied, we would find "Bob's" name among the leaders. May the future bring him success.

## THEODORE CLYDE SANDERSON, Α Χ Σ

**"Runt," "Sandy," "Stevenson"**

**CHEMISTRY** **HARRISBURG**

**Harrisburg Club.**

Here we have the "Runt." He is the only ambitious political boss among the Chemists, and has promised all the good "graft" jobs which will be in his power to fill in the future. He also has hopes for a position with DuPont, and should certainly make a good powdermaker. "Sandy" works when someone else furnishes the energy, and spends the rest of his time in bed. Nevertheless, he is a good fellow, and we wish him success in the future.

## JOSEPH SAUNDERS

**"Oof"**

**CHEMISTRY** **ATLANTIC CITY, N. J.**

Before us we have a vaudevillian of the deepest dye. He is also famous as the originator of the statement that the popularity of Atlantic City is due to the nearness of the ocean. However, one's serious opinion of "Oof" should not be too quickly formed from these little peculiarities, and from the fact that he formerly roomed in Sauerbox's old frame mansion. He is in reality a promising young Chemist, who will some day get a good job with the well known firm of Keith, Proctor and Gamble.

## MAXIMILIAN ANDREW SCHEPPACH

**"Max," "Dutch"**

**ELECTRICAL ENGINEERING** **NEW HOPE**

**Electrical Engineering Society; Deutscher Verein; Bucks County Club; German Play (2, 3).**

Maximilian was one of the first to lose his fair locks in the fall of 1911. This sudden loss induced him to raise the next crop by a different method, and he now wears it up on end. Max appeared in society for the first time during the presentation of "Alt Heidelberg." For services rendered during the baseball season, the McAllister Hall Athletic Association awarded "Max" his "M." Outside of the fact that he frequently sleeps through classes, he is a very consistent student.

## FIDEL PAUL SCHLATTER

**"Fido," "Dutch"**

**BOTANY** **TUNKHANNOCK**

**College Wrestling; Agricultural Society; Crab Apple Club; Wyoming County Club.**

"Dutch" is one of those happy guys that gets results when he studies. A "C" to him is an "E" to the average man and when it comes to Zoology drawings he has something on the man that teaches it. His big heart and box of apples made him a favorite in Old Main during the fall of his Junior year. He has a strange sense of humor and thinks that entertaining a visitor consists in rolling him on the floor before he escapes from the room.

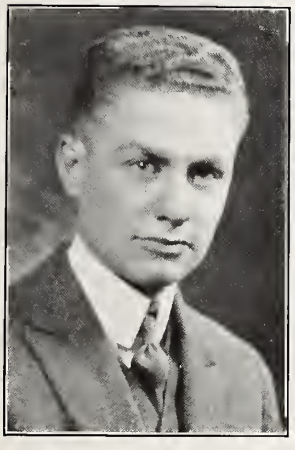

## DONALD EMONS SCHOCH, Φ Σ K

**"Don"**

**ANIMAL HUSBANDRY** **DUBOIS**

And still they come even unto the tenth and eleventh generation these of the tribe of DuBois. And by the issuings from their lips shall ye know them. "Come on down the street along, Skuda—, are the 'mots' premier." Ask "Don" about the little red cap, dirty face and oil can. Truly he waxeth fat over the actions of Charles. Some day "Don" will make that old back-woods town sit up and notice that big advertisement in the Evening Express or the Morning Courier: "Sales Stables, D. E. Schoch, Prop."

## BENJAMIN LEWIS SHUBERT, JR., Φ Σ K

**"Fritz," "Kansas Onc't"**

**FORESTRY** **BROCKTON, MASS.**

"Fritz" was born in Massachusetts, a mistake which has greatly encumbered him. Nevertheless, having been in civilization for three years, he speaks our language with considerable fluency. He has made the most of his opportunities while at State, and like a true "Brother of Forestry" has learned to commune with nature. Equipped with these talents, he will be able to face the world with an assurance of the success which is heartily wished him by everyone.

## LLOYD HIRNER SHULTZ, Φ Σ K

**"Toots"**

**CIVIL ENGINEERING** **JENKINTOWN**

**Thespians (3); Assistant Varsity Baseball Manager (3); Glee Club (3); Banquet Speaker (3); Civil Engineering Society; Montgomery County Club; Perkiomen Club; Northeast Club.**

Just a few words will suffice to bring back the sweet and smiling face of the "College Widow," the staunch old pilot that in times of storm steered for calm waters, the tried and true Civil Engineer for whom no phase of nature was inconquerable. Boys, "Toots" knows the elevation of the "Fort" Grill Room and also the way to get to sea level by use of the solar attachment and vertical arc. He invites you to drop in any time and see if Jenkintown is not still on the map, contours and all. Three cheers for Lloyd, the best hearted "Civil" we know.

## MARION JOHN SEAVY, Λ X Σ

"Seav"

**CHEMISTRY** **CLARENDON**

This is one of Swamp's hopes, even though he cannot see why they should charge $15.00 as a fee in a subject in which only $H_2O$ is used. Besides being an ardent lover of music he is a constant admirer of the soul-stirring harmony perpetuated on the fifth floor Main. Marion, during the first two years of his college career, proved himself very adept at the tonsorial game. Our hazing committee made use of this talent and when such services were needed he was first choice. Years may come and years may go, but here's hoping, old boy, that you make your way out to the Panama Exposition.

## OSCAR SEIDEL

"Duffy"

**CIVIL ENGINEERING** **ERIE**

"Duffy" came to State with the intention of becoming a farmer, but learning from a State College milkman that it was necessary to arise at 4:30 a. m. seven days in the week to succeed, he suddenly changed to a Civil. "Duffy" was given special attention by the Sophomores during his Freshman year, but to no avail. He remains as he was, a cheery, good-natured Dutchman with a heart and hand ready to help a man when he is down.

## RALPH ELLIS SHARP, Φ Δ Θ

"Ralph"

**INDUSTRIAL ENGINEERING** **COATESVILLE**

**Assistant Basketball Manager (3); Class Treasurer (2); Track Squad (1, 2); Mechanical Engineering Society; Beaver County Club.**

Ralph came to us in 1911 from Woodlawn, but since has changed his place of residence. In the former place he was one of the leading men in the social set and had quite a reputation as a half-miler. His burdensome course in the Industrial Department, however, has caused him to devote less attention in these directions. Sharp is a good fellow, well met, and last year handled our finances with credit. We wish him the best of success.

## RUE MILLER SHOOP

**"Soup," "Rue"**

**ELECTRICAL ENGINEERING** **LYKENS**

Electrical Engineering Society; Deutscher Verein; Harrisburg Club.

Here we have "Doc Stecker's prodigy," whose sociable disposition and longing for companionship often leads him in the direction of the north campus and—well, it should not be difficult to guess what else. But Shoop is a born worker, and heeds the call of pleasure only after his tasks have been completed. His favorite sayings are, "Work first" and "No, not to-night." "Rue's" jovial disposition makes him well liked among his classmates and his size is the only small thing about him.

## LOUDEN GILBERT SCHREFFLER

**"Cupid," "Genial," "L. G."**

**ARCHITECTURAL ENGINEERING** **NEWPORT**

Architectural Society.

"Cupid" is one of the most serious looking members of the "A. E." course, but again looks are deceiving. He is serious in his work, however, and manages to pull a few exemptions when "exams" come around. There are two things which he seems to like especially well, and those are his pipe and French. Among his unconcerns are the ladies, that is from all appearances here. One cannot tell, however, how he behaves at home. "Genial" is the right sort of fellow to know, and makes a friend who sticks.

## WINFIELD MICHAEL SIDES

**"Winnie"**

**MECHANICAL ENGINEERING** **MIDDLETOWN**

Motive Power Club; Mechanical Engineering Society; Collegiate Progressive League; Harrisburg Club.

Winfield is a man of many experiences. As a reporter he helped to put Middletown on the newspaper map. Due to this training, "Winnie" soon gained the confidence of the faculty in Freshman Rhetoric. Whatever he does, he does on the quiet and the only thing he ever did of a notorious nature, was his piratical campus guarding during the Flag Scrap. Coupled with his journalistic experiences, his reliability ought to make him a good Mechanical engineer.

## EUGENE ALFRED SIEGLER, Σ N

"Barney"

BOTANY — PHILADELPHIA

Glee Club (2, 3); Mandolin Club (2, 3); Assistant Manager Glee and Mandolin Clubs (3).

Some three years ago breezy "Barney" Siegler left the iron trust for parts unknown to seek a finishing school, and landed at State College. He proudly carries the scars of many hard-fought battles (?)! He is a fellow of rare intellectual talents combined with unsurpassed stick-to-it-iveness and an aptitude for higher education. His knowledge of musical technique and expression is prodigious. Since his arrival here, he has aroused the jealousy of all the local "Beau Brummels," for it has been "Barney's" good fortune to be much sought after by the village queens.

## BYARD FINLEY SIMPSON, Acacia

"Sim"

ARCHITECTURAL ENGINEERING — ERIE

Erie County Club; Architectural Engineering Society.

This healthy looking youth divides a goodly portion of his time between Lock Haven, Sunbury, and Bellefonte. "Sim" is a good student, and his efforts have put him in the exemption class several times. However, he is an unassuming mortal, and he has a ready apology for every exemption that he "pulls." If he doesn't make good as an architect, he will surely achieve success as a Structural Engineer.

## CHARLES BROWN SITTMAN, Φ Ξ

ARCHITECTURAL ENGINEERING — DICK

Class Cross-Country (1); Architectural Engineering Society; Westmoreland County Club.

Dick can well be proud of "Dick." Coming here while still a mere youth, he now can design anything from a doll's house to a skyscraper. 'Tis rumored, he is building several of the latter in and around Dick. This rangy lad has glided through his college course with remarkable smoothness since Trig disappeared from his schedule, and if he continues his pace he will surely do honor to his namesake.

## JOHN JACKSON SLATER

**"Red," "Slats," "Dick"**

**ELECTRICAL ENGINEERING** **YOUNGSVILLE**

"Red" is ever loyal to the King of Sweden and the Swedes of Youngsville, but nevertheless produced a sensation in German. As soon as he acclimated himself to this locality and studious atmosphere, he retrograted by becoming involved in a rough-house scandal where he was caught red-headed by the village preacher. His barbarous instincts were further evident when he became the terror of class baseball by his wicked swings at the ball. Since then, however, he has become permeated by the surrounding civilized atmosphere and bids fair to become a credit to us all.

## ANDREW MATHIAS SLITZER, Φ K

**"Schlitz," "Abe," "Mike"**

**SANITARY ENGINEERING** **HARRISBURG**

**Civil Engineering Society; Harrisburg Club.**

Quietly and unobtrusively he came here from the city of graft and "putty molding" and almost immediately earned for himself the name of "Schlitz the Silent." He was never known to speak unless spoken to and then in parables. No, dear friend, he is not a cynic nor a broken-hearted man; its just a simple case of the old saw, "Still Waters," etc. There is only one thing which the college holds against him, that is, he is always over-cut in chapel. "Abe" is a keen wit, a good stude, and a veritable friend.

## BENJAMIN FRANCIS SMITH, Pioneer Club

**"Red"**

**LANDSCAPE GARDENING** **MUNHALL**

**Druids; College Football (1, 2); College Baseball (1); Class Football (1, 2); Captain (2); Class Track (1); Rifle Club (1, 2); Landscape Gardening Society; Pittsburgh Club.**

When at home, "Ben" does his best to brighten up the murky atmosphere of Pittsburgh and here he shines as one of the luminaries in the class of 1915 by virtue of his red hair. "Red" achieved considerable prominence in football and also had some aspirations for a record in the low hurdles. Good fellowship is one of his best traits and he kept his good nature even during the stormy days and nights last spring when sleep and "Red" were almost total strangers. The Cottage has quite an attraction for "Ben" and walks are his delight.

## DEFOREST ADELBERT SMITH, Λ T Ω

**"Forrey," "Jake"**

**DAIRY HUSBANDRY** **COUDERSPORT**

"Jake" came to Penn State with the intention of taking a course in Dairy Husbandry, but perfumed paper and monogram stationery have led us to believe that he is taking a Correspondence Course. He is an authority on racing cars and automobiles in general, having once driven a Ford. Besides this, he professes to know something about dairy cows and now has directed his mechanical genius on the perfection of the milking machine. At present he is planning a model sanitary dairy to engage his energies after 1915.

## HARRY SYLVANUS SMITH, H K N

**"Schmitty," "H. S."**

**ELECTRICAL ENGINEERING** **WAYNESBURG**

**Electrical Engineering Society; Electrical Engineering Honor System Committee.**

"Schmitty's" artistic tendencies are well evidenced by the brilliancy of his neckwear and footwear, and the well illustrated backs of his text books. Whenever a bright red necktie is seen coming down Nittany avenue, it is a safe bet that "H. S." is close behind. Smith has a wit all his own, which frequently finds expression in the arguments in which he so delights. A conscientious stude, "Schmitty," has forged well to the head of our class and with the habits he has formed here at Penn State, he is well on the way to success as an Electrical Engineer.

## LEROY SMITH, Σ N

**"Skip," "Pug"**

**ANIMAL HUSBANDRY** **NORTHEAST**

**Class Wrestling Team (1); Class Soccer Team (1); Lacrosse (2).**

Some call him "Pug," others call him "Skip," and yea, verily, others call him "Bloss." Yes, fair and gentle reader, "Bloss" is short for Blossom and therein lies a tale. Ask Roy, he "knows" the answer. "Bloss" hails from some burg whose name resembles a point of the compass. He is one who can exercise brain as well as brawn, and when good common sense is required, he is present. At other times somebody else answers for him. He is an enthusiastic "A. H.ist" and knows all the cows by their first name.

## AMOS BOWMAN SNAVELY

**"Abe," "Rip"**

**MECHANICAL ENGINEERING** **LANCASTER**

A typical college man. "Abe" was the chief humorist of Main Building in his Freshman year, the martyr of his class in the hair-cutting episode as a "Soph" and as a dignified Junior, he demonstrated that it was possible to take a girl, the other fellow, a box of candy, and two cushions to the Tech football game. Query: "Who sat on the odd cushion?" "Rip" knows everyone, goes anywhere, and on account of his genial disposition has friends everywhere. As a Mechanical Engineer he will certainly have the goods.

## ROSS TETTER SNYDER

**DAIRY HUSBANDRY** **NEW ENTERPRISE**

Ross came to us from Juniata College in the second semester of our Freshman year, having decided that he would rather be a first class farmer than a struggling man of literature. He is not a notorious rough-neck, for his tendencies along that line were suppressed by the German Department. He is famous for his zeal in proclaiming (his?) presence in $A.H._2$. Although seemingly a bashful lad, the frequency of the arrival of letters addressed in a fair feminine hand, from New Enterprise, assures us that his mind is not altogether taken over by the judging of dairy cattle. A quiet unassuming fellow, Ross is the type that makes and retains friends.

## CARL AUGUST MARTIN SORG

**"Gus," "Short," "Grouch"**

**LANDSCAPE GARDENING** **NEW BRIGHTON**

Here is a remarkable piece of humanity; a man gifted with the power of imitating any animal from the cock roach to the mastodon. His powers along this line do not stop at the dumb animals either; some of the "Profs" are at times remembered. "Short" is a minstrel of no mean ability, and if, in later years, he finds that Landscape Gardening does not agree with him he will accept the position of end man in Dumont's.

## JAMES ARCHIBALD SPACE

**"Jimmy," "Archie"**

**MECHANICAL ENGINEERING** **WYOMING**

**Banquet Committee (3); Mechanical Engineering Society; Luzerne County Club.**

"Archie" doesn't occupy much space, of course, but he keeps his allotted portion moving—fast. Space was on the barrel in our cider scrap and scared more Freshmen than any three men. He has also made strong bids for scholarship honors, being somewhat of a shark. A loyal, and active member of '15, who will be "on the barrel" in the big life scrap ahead.

## JAMES IVAN SPANGLER, Α Δ Σ

**"Ike," "Sphinx," "Jack Rabbit"**

**LANDSCAPE GARDENING** **YORK**

**College Football (1); Class Basketball (1, 2, 3); Captain (3); College Choir (1, 2, 3); Glee Club (2); York County Club; Landscape Gardening Society; Agricultural Society.**

He is as Dutch as you find them, especially when it comes to sauer-kraut and wieners. He hails from York, spends his winters in State College and his vacations in "Junstown." If anyone should see his actions on the basketball floor, he would readily understand why "Ike" is known as a "jack-rabbit." He is registered in the Landscape Gardening course, but studies millinery. "Sphinx" is also able to apply some of his energy to serious matters.

## JAMES BRAGG SPAULDING, Α Γ Ρ

**"Jim," "J. B.," "Spaldie"**

**AGRONOMY** **NORFOLK, CONN.**

"Jim" owes his seemingly frail constitution to the fact that he entered this world in cold Connecticut. He is by nature an affectionate man and divides his attention unpartially between his "girl" and his "guernseys." He is an ardent disciple of the Goddess Nicotine and can be seen at all times worshipping at her shrine. "Jim" has always had trouble in convincing people that Norfolk should be pronounced "Norfork" with a true Yankee accent.

## ARTHUR FERTIG STAHL, Α Γ Ρ

"Art"

**HORTICULTURE** **PITTSBURGH**

Civic Club (3); Crab Apple Club; Officers Club (3).

This young man from the turmoil of the city heard the crying needs of Nature and after surviving the trials and tribulations of an academic career at Bellefonte Academy, enrolled as a student of Agriculture at Penn State. But he still has memories of his "prep" school career and "THE ONE" connected with it. His vocal ability makes him a "whale" among the women. He is a man of indominatable will power, unceasing energies and tremendous abilities and, therefore, has never been known to lose an argument. Because of the forementioned qualities "Art" looks good to us.

## HARRY MARSHALL STECKER

"Steck"

**HIGHWAY ENGINEERING** **MT. CARMEL**

College Football (1); College Wrestling (2, 3); Class Wrestling (2); Civil Engineering Society.

"Steck" is one of our wrestlers who, although very quiet, has a mountain of strength concealed beneath the grim determination of silence which he generally bestows on all. Ever since he took a fall out of "temptation" in his Freshman year, he has been throwing everything with which he comes in contact. He is a firm believer in the theory—"You might as well pull an exemption when you can," and is classed as one of the engineering "sharks." Despite the fact that the girls are scarce in Mt. Carmel, "Steck" has found that dreams of certain "queens" from Minersville help to while away the dreary hours in State College. Needless to say Harry is bound to become an expert along his line.

## RAYMOND BLIEM STETLER, Σ Χ

"Stet"

**AGRICULTURAL CHEMISTRY** **ALLENTOWN**

Without a doubt "Stets'" mecca is Allentown, and many are his journeys thereto, in spirit if not in body. He won great fame in his Freshman year by a discourse on "The Seven Story Bank Building in Allentown." After passing out of "Swamp's" hands without injury, he felt like a conquerer, but met a still greater barrier in the form of "Doc" Stoddart, though he is still determined to be an "Ag." Chemist. We always find "Stet" smiling and we find no difficulty in smiling with him. It is indeed hard to imagine "Stet" as a Sugar Chemist trying to teach the native Cubans how to speak "Pennsylvania Dutch."

## AARON CLIFFORD STEWART

**"Stew," "Cliff"**

**AGRICULTURAL CHEMISTRY** **COAL CENTER**

This gentleman is all that his name might indicate, and yet someone has said, "What's in a name?" Although not an engineer, "Stew" has a great love for machinery, especially automobiles, and the speed with which he can leave a car is remarkable. "Cliff's" student qualities are still more remarkable, and that B.S. degree for which he is striving, we are sure he will merit, as well as attain. Long live Aaron, who really would rather be called "Cliff."

## DAVID HENRY STEWART, A Z

**"Dave," "Stew," "D. H."**

**HORTICULTURE** **BEAVER**

**Class Football (1, 2); Associate Editor LA VIE; Student Tribunal (3); Crab Apple Club; Beaver County Club.**

"Dave" is a boy who makes and keeps his friends by his agreeable and congenial nature. He prides himself on the fact that he is an alien in the fusser's realm. He is remembered as one of the huskies on the class football team and as a co-worker on the La Vie. In the near future we shall not be surprised to hear about the Stewart Fruit Farm with perhaps a **nursery** as an additional feature.

## WILLIAM ROBERT STEWART

**"Bill," "Red"**

**ELECTRICAL ENGINEERING** **BEAVER**

**Scabbard and Blade; Glee Club (2); Mandolin Club (1, 2, 3); First Lieutenant and Battalion Adjutant Cadet Regiment (3); Officers Club; Rifle Club; College Choir (2); Electrical Engineering Society; Beaver County Club.**

Popular with both the fair ones and the fellows, "Bill" is in all a man of varied accomplishments. A bit impatient at times when things don't go right, but a gentleman always. To hear his bass in a song fest, his Spanish Fandangos on the guitar, or his experiences in a fanning bee is a treat. He helps the "Hep" turn out his army and has a true soldierly bearing. Here's luck to you, "Red," may you realize all of those dreams that the mail would indicate.

## ROY ALFRED STONER, Σ T

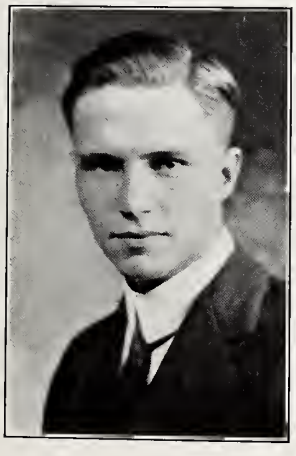

**"Rastus," "Stones"**

**ELECTRICAL ENGINEERING** **HELLAM**

**College Wrestling (2); Class Wrestling (2); Electrical Engineering Society; York County Club.**

From a quaint and curious village long forgotten, came our dear beloved "Rastus." He was young and he was foolish, but time has changed this youthful giant and only the "I should worry" side of his soul remains unchanged. He early set his mind on electrifying the world and to this end he taxes his sturdy brain. His natural abilities as a policeman have been well proven by his use of the persuader in clearing a room for study. However, in spite of his highness "Rastus is as gentle and as good natured as a lamb and is the sort of scout of whom the class of 1915 may well be proud.

## WALTER HERMAN STRECKER

**"Strec"**

**CIVIL ENGINEERING** **HOMESTEAD**

**Civil Engineering Society; Pittsburgh Club.**

"Strec" is a noble stude in every line. Quiet, and unassuming he sees each day pass with a sense of fulfilled duty. His one great fault is an inclination to sing in his sleep and at such times the songs are invariably sentimental suggesting that the young lady from Howard made some impression. "Strec" never hunts a drag but pulls down the big grades. We look forward to seeing Walter a famous engineer some day.

## WALTER BENJAMIN STRICKLER, H K N

**"Tantivie," "Strik"**

**ELECTRICAL ENGINEERING** **HELLAM**

**College Band (1, 2, 3); College Orchestra (1, 2, 3); Assistant Manager Orchestra (3); Thespian Orchestra (1, 2); Electrical Engineering Society; York County Club.**

"Stand away a little closer," was the first he said on the fifth floor of Main when "Strick" made his debut as a Freshman. He hails from the fair city of Hellam, the land of pretzels and sauer-kraut. Walter spent three months at St. John's Military Academy and there he gained the reputation of being "some eater," a title he holds here at State. Like the Pied Piper of old, "Strick" whiles away many happy hours with his clarinet, but some day he will make an Electrical Engineer.

## AARON CLIFFORD STEWART

**"Stew," "Cliff"**

**AGRICULTURAL CHEMISTRY** **COAL CENTER**

This gentleman is all that his name might indicate, and yet someone has said, "What's in a name?" Although not an engineer, "Stew" has a great love for machinery, especially automobiles, and the speed with which he can leave a car is remarkable. "Cliff's" student qualities are still more remarkable, and that B.S. degree for which he is striving, we are sure he will merit, as well as attain. Long live Aaron, who really would rather be called "Cliff."

## DAVID HENRY STEWART, A Z

**"Dave," "Stew," "D. H."**

**HORTICULTURE** **BEAVER**

**Class Football (1, 2); Associate Editor LA VIE; Student Tribunal (3); Crab Apple Club; Beaver County Club.**

"Dave" is a boy who makes and keeps his friends by his agreeable and congenial nature. He prides himself on the fact that he is an alien in the fusser's realm. He is remembered as one of the huskies on the class football team and as a co-worker on the La Vie. In the near future we shall not be surprised to hear about the Stewart Fruit Farm with perhaps a **nursery** as an additional feature.

## WILLIAM ROBERT STEWART

**"Bill," "Red"**

**ELECTRICAL ENGINEERING** **BEAVER**

**Scabbard and Blade; Glee Club (2); Mandolin Club (1, 2, 3); First Lieutenant and Battalion Adjutant Cadet Regiment (3); Officers Club; Rifle Club; College Choir (2); Electrical Engineering Society; Beaver County Club.**

Popular with both the fair ones and the fellows, "Bill" is in all a man of varied accomplishments. A bit impatient at times when things don't go right, but a gentleman always. To hear his bass in a song fest, his Spanish Fandangos on the guitar, or his experiences in a fanning bee is a treat. He helps the "Hep" turn out his army and has a true soldierly bearing. Here's luck to you, "Red," may you realize all of those dreams that the mail would indicate.

## ROY ALFRED STONER, Σ T

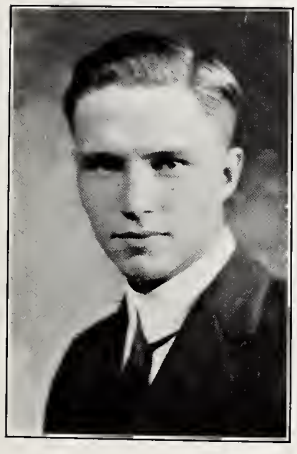

**"Rastus," "Stones"**

**ELECTRICAL ENGINEERING** **HELLAM**

College Wrestling (2); Class Wrestling (2); Electrical Engineering Society; York County Club.

From a quaint and curious village long forgotten, came our dear beloved "Rastus." He was young and he was foolish, but time has changed this youthful giant and only the "I should worry" side of his soul remains unchanged. He early set his mind on electrifying the world and to this end he taxes his sturdy brain. His natural abilities as a policeman have been well proven by his use of the persuader in clearing a room for study. However, in spite of his highness "Rastus is as gentle and as good natured as a lamb and is the sort of scout of whom the class of 1915 may well be proud.

## WALTER HERMAN STRECKER

**"Strec"**

**CIVIL ENGINEERING** **HOMESTEAD**

Civil Engineering Society; Pittsburgh Club.

"Strec" is a noble stude in every line. Quiet, and unassuming he sees each day pass with a sense of fulfilled duty. His one great fault is an inclination to sing in his sleep and at such times the songs are invariably sentimental suggesting that the young lady from Howard made some impression. "Strec" never hunts a drag but pulls down the big grades. We look forward to seeing Walter a famous engineer some day.

## WALTER BENJAMIN STRICKLER, H K N

**"Tantivie," "Strik"**

**ELECTRICAL ENGINEERING** **HELLAM**

College Band (1, 2, 3); College Orchestra (1, 2, 3); Assistant Manager Orchestra (3); Thespian Orchestra (1, 2); Electrical Engineering Society; York County Club.

"Stand away a little closer," was the first he said on the fifth floor of Main when "Strick" made his debut as a Freshman. He hails from the fair city of Hellam, the land of pretzels and sauer-kraut. Walter spent three months at St. John's Military Academy and there he gained the reputation of being "some eater," a title he holds here at State. Like the Pied Piper of old, "Strick" whiles away many happy hours with his clarinet, but some day he will make an Electrical Engineer.

## HERMAN ADAM STROHECKER, Σ X

**"Dutch"**

**AGRONOMY** **READING**

**Druids.**

In the fall of the year 1911, a scare-faced youth strayed from under the parental roof, and stumbled wide-eyed through the gates of State College. No one knew then that the Untamed Bear Cat from the Sauer-kraut Belt had arrived in college. It took him exactly seven minutes to acquire the surname of "Dutch," and three months to make up his mind to become a farmer. He is still "Dutch" (he couldn't be anything else), and he is still a farmer; a student of caliber, of nature frank and wholesouled, full of inherent wit, but adaptable to any role from Archbishop to Court Jester. Our mind's eye pictures him in the future among the comforts of home, expounding agronomic principles to his beloved hogs and chickens and handing down words of advice and wisdom to all posterity.

## FORRESTER PEARSON STROUD, A X Σ

**"Bishop"**

**CHEMISTRY** **VERONA**

**Pittsburgh Club.**

Forrester came to Penn State with the intention of taking a fall out of the Chemistry course, but found the climate unhealthy and after two years of success had to leave for the more healthy atmosphere of Pittsburgh. As soon as he had recuperated and felt that the Chemistry Department had acquired enough "dope" further to advance him in the mysteries of his subject, he came back to finish the work he had begun. "Bishop" is an authority on music and actresses, about whom he can tell you quite a bit. However, he does not look upon life as one sweet song and believes in getting into the fight.

## BENJAMIN JOHNSON STURTEVANT

**"Ben," "Bane," "Sturty"**

**ELECTRICAL ENGINEERING** **WEATHERLY**

**Business Manager Froth (3); Civic Club; Electrical Engineering Society; Hazleton Club.**

Never would you believe that this serious looking youngster was full of froth and bubble and sparkling with true wit. "Ben" is the patriarch of patriarchs on the Froth Board, or, in other words, the Business Manager. "Ben" starred (?) in mathematics under "Doc" Stecker, where he made quite a reputation for himself. Although a resident of "Old Main," he never does anything that is unlady-like. "Sturty" is going to make a reputation for himself when he leaves his Alma Mater.

## GLEN FOSTER SUTHERLAND, Viking Club

"Glen"

**DAIRY HUSBANDRY** **HAULIN STATION**

Civic Club; Dairy Husbandry Club; Washington County Club.

This Ag. student at his arrival from the wilds of Western Pennsylvania was rather a typical representative of that section. However, under the highly civilizing influences of State College and Lock Haven society he rapidly developed into a social whale. Notwithstanding these diversions he is quite a stude shining especially bright in zoology. There is little doubt that he will make his mark in the world as a successful dairyman provided a city girl will consent to live on a farm.

## ROY GILBERT SWANSON

"Swede," "Swansz"

**ELECTRO-CHEMICAL ENGINEERING** **EMPORIUM**

McAllister Scholarship (1); Electro-Chemical Society; Cameron County Club.

Roy hails from the town of Emporium, but let it be understood that this is nothing against the town. In fact, it should be proud that one of its sons had the courage to tackle Electrochemical Engineering. "Some course," but "Swede" is equal to the task, and no doubt a few years from now his deeds will be spoken of in glowing terms by all the leading chemical magazines. Roy is also more or less of a "social whale," but lack of space prohibits the mentioning of any specific instances. Better ask him.

## WILLIAM FREDIN SWANSON, Δ T Δ

"Swede," "Bill"

**PRE-MEDICAL** **BROOKSTON**

The "Swede" attended so many prep schools that it is hard to tell exactly where he did prep. He has the ambition to become a follower of medicine, but no one can imagine this a doctor. He is a great lover and is one of those fellows who has a sweetheart in every port from Florida to Oregon. However, he is one of the best hearted fellows in college and nothing is too hard for him to do for a friend. "Bill" intended to enter Pennsylvania Medical School, but through Gravey's influence he stayed at State another year, perhaps more.

## FRANK LUTHER SWARTZ

**"Tuffy"**

**CHEMISTRY** **DANVILLE**

Here we have Churchill's ideal of a Chemist. Frank has an option on the telephone line to Bellefonte and almost every evening you can hear the inevitable, "Hello, is this Bellefonte?" "Tuffy" spends at least half of his time on the road between here and Sunbury and has the economy of these trips worked out to the point that he can travel to that place six times on one ticket. A rather serious fault of his, is that he has the habit of getting up at two o'clock in the morning and slamming the door to wake up the residents of the house. You have got to hand it to "Tuffy" when it comes to optimism and stick-to-it-iveness.

## KEISTUTIS SZLUPAS

**"Szlup"**

**PHYSICS** **SCRANTON**

As an exponent of "Doc" Ham, and a firm believer in the theory of evolution as set forth by our friend "Gravy," "Szlup" has no rivals. Between pulls on his meerschaum pipe, and with a pile of ginger snaps, and a mug of hard cider, you could sit by the hour and listen to weird tales of how to drink forty liters of German Lager, and how to study the civic conditions of Germany from the water wagon. He is a rare actor, and his interpretations in the German plays have won him a warm place in the hearts of all.

## CYRUS HAROLD THATCHER

**"Thatch," "Grace"**

**INDUSTRIAL ENGINEERING** **PHILADELPHIA**

**Mechanical Engineering Society; Industrial Engineering Society; Philadelphia Club; Central Manual Club; Thespians (3).**

"Thatch" came to us with the approval of the Four Hundred of Philadelphia. One of those free and easy scouts, he never worries, and, having found from experience that History will repeat itself, never studies for the recitations. His dividends from stock in "Babe's" movies are sufficient to keep him dressed in the latest Arrow collars and fancy haberdashery. As a cultivator of hair lips, "Grace" is without a peer. In spite of these seeming frivolities, he gets results from his work and some day will have more than social honors attached to his name.

## FRANCIS ELLIOT THOMAS

**"Frank"**

**CIVIL ENGINEERING** **BELLEFONTE**

**Class Debating Team (1); Cadet First Lieutenant (3); Officers Club; Centre County Club.**

"Our Tommy" is quite a traveler since he travels extensively on his Dad's railroad (?), "Parker's Boat," which connects Waddles with its surrounding suburbs. Not much is known of "Tommy's fussing ability because his home is at Bellefonte, but it is evident that he has other abilities that count more. As an officer in the Hep's army he "should worry." If steady plugging counts, then "Tommy" will come out on top.

## LAUREN THOMPSON, Σ A E

**"Togo," "Tommy," "Pinky"**

**MECHANICAL ENGINEERING** **BEAVER**

**Assistant Basketball Manager; Mechanical Engineering Society; Beaver County Club.**

"Togo" was "after" the famous Japanese Admiral because of his ability to use big words. He made a start by entering with 1914, but took a brace and joined our class. Further proof of his determination to succeed in life is given by the dogged pursuit he made after a penny in front of a Pittsburgh bank. "Pinky" has other good qualities, too, among them being his inclination to go back to the farm every summer.

## GODFREY RICHARDS THORN, A T Ω

**"Whitey," "Bunny"**

**INDUSTRIAL CHEMISTRY** **JENKINTOWN**

**Track Squad (1); Class Football Manager (2); Mandolin Club (1, 2, 3).**

Jenkintown claims three great men: John Wanamaker, Bud Fisher, and Godfrey Thorne. Thorn, the last and fairest, came to us a happy, giggling, innocent boy, but due to York, Bellefonte and Snowshoe, he has developed Bohemian traits that promise to stick. "Whitey" claims that there are no honest furniture dealers in York. An unsound couch once deposited him on the floor, hence his everlasting curse on furniture dealers. He studies hard when he starts; he demands silence while thus engaged, but before long he breaks the silence by, "Hey, Kid, when are you going to bed?"

## JOSEPH WALLACE TINDALL

**AGRONOMY** **TRENTON, N. J.**

New Jersey with its sand dunes and mosquitoes could not offer "Wally" sufficient scope in which to give vent to his supercharge of intellectual and idealistic (?) aspirations. Tiring of his weary perigrinations upon this mundane sphere, he sought new worlds to conquer, and found **her** in the telephone office at State College. Incidentally he entered college and has been incidentally in ever since. If he maintains his present high standard of collegiate duties, he is sure to be an honor to the class of 1915. The world is waiting with wide stretched arms, Joseph! "Start the show, Babe."

## ELGIE WILLIAMS TOBIN, Pioneer Club

**"Yegg," "Tobe"**

**AGRICULTURAL CHEMISTRY** **ROSCOE**

**Druids; Parmi Nous; Sphinx; College Football (1); Varsity Football (2, 3); Varsity Soccer Captain (1); Class Soccer (1, 2); College Baseball (1, 2); Varsity Football Captain-Elect; College Basketball (1); Washington County Club.**

"Roscoe the Yegg" hails from the centre of the black diamond region of Western Pennsylvania. He received his early training at California State Normal School and for several years unselfishly gave himself up to the development of American citizenship in the school room. "Tobe" made a hit on his arrival here as an all around athlete. He never says die in the class room or on the football field, and it is this quality that causes us to predict a successful football season with "Tobe" calling signals.

## ROBERT ARTHUR TROSS, Α Δ Σ

**"Duby," "Tob"**

**AGRONOMY** **JOHNSTOWN**

**Agricultural Society; Rifle Club; Johnstown Club.**

He argued in his Freshman year, he argued in his Sophomore year, and now in his Junior year he still argues. Who? Why "Argumentation" Tross. "Duby" is not to be called lazy, but when there is any work on hand he usually plays the piano. In his Sophomore year "Tob" had a hair raising experience—growing a mustache before Easter arrived—and he won his wager with the aid of a little shoe polish. He seems to have a peculiar desire to travel, as he frequently packs his toothbrush and goes exploring in the wilds near Zion City and Heckla.

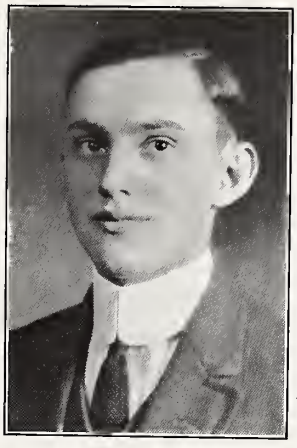

## MAX TRUMPER

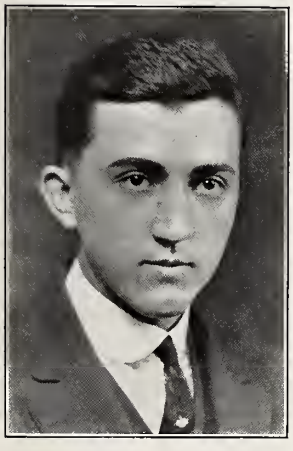

**"Mac," "Max," "Trump"**

**AGRICULTURAL CHEMISTRY** **PHILADELPHIA**

**Liebig Society; Menorah Society; Philadelphia Club; Southern Philadelphia Club.**

"Trump's" training at school is only incidental to the vast experience that he has acquired conductering, waiting, typewriting and singing (?). In other words, he is a man of diverse abilities. He is bound to make his way in the world, because he can commercialize his avocation. To date he has not reserved the compartments of his heart for any particular damsel. Lately he has developed the anylytic mind and oftimes catches the Prof. off his guard with his perlexing questions.

## WILMER PAUL UHLER

**"Powell"**

**CHEMISTRY** **HELLERTOWN**

This swarthy youth comes from the immediate vicinity of the little town of Bethlehem, but that doesn't make him any better. In fact, he is said to indulge in chicken farming in and about these parts, which is admittedly a foul trick. "Powell" is a great fellow to go to dances about Christmas time, but sometimes he gets disappointed, and his section-mates hear about it for weeks. He was noted for his ready smile and deference for the ladies in Sophomore spouts, both of which are good qualities that will help his natural aptitude for chemistry on to the name and fame discussed in Oliver Optic's Works.

## JOSEPH JEFFERSON KALBACH URICH

**"Dutch"**

**MINING ENGINEERING** **MYERSTOWN**

**Lebanon County Club; Mining Society.**

"You're pretty poor, we'll hand you that." Ever hear this in a crowd? You need not look around. It's J. J. K., better known as "Dutch" Urich, lauding one of his classmates. Joseph shows as many changes of disposition as the coat of his Biblical namesake had colors. He is of combative nature at all times, and has even been known to use a tripod to enforce his arguments. But with all his faults, we love him still, and the best wishes of those who know him are his.

## JAMES PHILIP VINSON

**"Zip"**

**BOTANY** **WASHINGTON**

**Forum; Deutscher Verein.**

"Zip" is always in line for exemptions and is a mighty good student. Although not a "kidder" himself, there is no one more good natured than he, and he always enters into the spirit of the thing. He is a steady fellow, although he did slip in his Sophomore year on a geological trip when he tried to jump across a creek. He has the respect of all his classmates, who know his true worth.

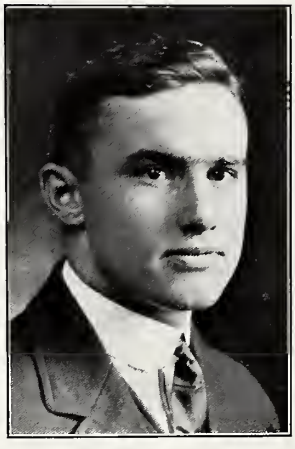

## GORDON ANTHONY VOGT, Pioneer Club

**"Votie"**

**DAIRY HUSBANDRY** **EMPORIUM**

**Druids; Parmi Nous; College Football (1, 2, 3); College Baseball (1); Varsity Baseball (2); Class Football (1, 2); Captain Class Team (1); Dairy Club.**

Gordon is a varsity catcher and football player of no mean ability. He showed his worth in baseball when he stepped behind the bat and held down the job as if he had always been there. He gained much valuable experience, however, on his first southern trip. He is extremely modest and a good mixer among all his fellow school-mates. We expect great things of him, and he will some day be a prosperous dairyman.

## ROGER HUNT VOLLMER, Κ Σ

**"Baldy," "Rog"**

**HORTICULTURE** **BURNHAM**

"Baldy" is a brave and serious chap, in fact, too serious. He comes from Overbrook—and returns quite frequently. His favorite athletics are nigger hockey, cross country and soccer. "Rog's" chief ambitions are a wife and a farm. In the former he runs an eligibility list of about fifteen, so his chances for securing one are favorable. If "Baldy" takes to farming as he does to the social stuff we prophesy a brilliant future for him.

## ALVIN HARLEY WARDWELL, Σ X

**"Wardie," "Al"**

**FORESTRY** **BROCKTON, MASS.**

Parmi Nous; Varsity Baseball (1, 2, 3); Banquet Speaker (3).

"Wardie" hails from the land of codfish. He made himself solid on the varsity on the first attempt and has stayed there ever since. He is in solid elsewhere also as the stream of correspondence would indicate. He is a typical forester and is a wonder at climbing high trees. He became proficient in this art through necessity as he often loses his bearings in the woods due to a defective (?) compass. "Al" is a good scout and well liked by all who know him.

## ARTHUR RANKIN WAUGAMAN

**"Wangie," "Wang"**

**ELECTRICAL ENGINEERING** **MEADVILLE**

Electrical Engineering Society; Motive Power Club; Crawford County Club.

"Wangie" came to us from Allegheny College at the beginning of our Sophomore year. He had aspirations toward football his first year; and this high desire was seen again in his Junior year, when the McAllister Boys showed their superiority over the Main Roughnecks. All know that Arthur is good looking and quite a lady's man at home. He has great ambitions along electrical lines and some day he will do the name of State justice.

## LEWIS EVERETTS WEAVER

**"Weav," "Shad Boosh," "Pop"**

**FORESTRY** **BEALLSVILLE**

Forestry Club; Washington County Club.

When "Weav" came to this institution he was wearing a Sunday School pin, won by seven years unbroken attendance at the Junkin Centre Sabbath School. As a Freshman he was the proud possessor of one of the first "hair cuts" doled out by the Sophomores. As a breaker of hearts among the younger generation of the fair sex, "Boosh" has no "competition." He is quite a traveler, always carrying a ticket with him, and is always willing to be "congenial." One of his best bits of advise is "Watch the sixth step—it squeaks." He will be a credit to his course providing he soon starts to study.

## WAYNE WESLEY WEAVER, ΠΚΑ

**"Wayne"**

**HIGHWAY ENGINEERING** **PHILADELPHIA**

Class Historian; Associate Editor Penn State Collegian (3); Froth Board (2); Chief Artist Froth (3); LA VIE Cartoonist; Chairman Freshman Poster Committee; Sophomore Flag Scrap Committee; Junior Prom. Committee; Deutscher Verein; German Play (2); Civic Club; Rifle Club; Civil Engineering Society; Central Manual; West Philadelphia Club; Philadelphia Club.

Wayne is a living proof that the atmosphere of Philadelphia is productive of more than brotherly love, but his affections, though firmly rooted there in the summer time, seem to stand the transplanting for the winter to State College soil without injury. In journalistic matters we must admit that "Wayne" stands high. His work along this line has been noteworthy and has won for him a niche in our Hall of Fame. Here's luck and prosperity to "Weav" both in matters civil and co-educational.

## PHILIP HOPE WEINBERG, Vikings

**"Phil," "Weiny"**

**ELECTRICAL ENGINEERING** **PHILADELPHIA**

Electrical Engineering Society; Central Manual Club; Philadelphia Club.

"Phil" laid the foundation of his learning in "Philly" and after a summer of experience in a cemetery he decided to bury himself in the mysteries of electricity. "Weiny" is quite a violinist and also lays claim to being a singer, which fact, however, is rather doubtful. Although usually sedate, he shocks us by "cutting up" once in a while, and seems to enjoy it in spite of his blushing. Nevertheless, "Weiny" is on the square and surely will make good.

## LEO EDWIN WEISENBURG

**"Shaft," "Legs," Weisey"**

**HIGHWAY ENGINEERING** **SOUTH BETHLEHEM**

Associate Editor LA VIE; Civil Engineering Society; Lehigh and Northampton County Club.

"Shaft," in order to fully earn his nickname, got a job last summer in the mines of the "coke regions" of Pennsylvania. He returned to college, plus some experience but minus his heart, and now "Weisey" curls up his six feet of attenuated frame in a Morris chair and sees visions in the smoke of his pipe. He is an excellent worker in all lines of college activities, and with his enthusiasm and ability he is sure to make good in his chosen profession.

## DANIEL E. WELTY, Β Θ Π

**"Dan"**

**AGRICULTURAL CHEMISTRY** **GREENSBURG**

Friars; Parmi Nous; Varsity Football (2, 3); Freshman Football; Sophomore Banquet Committee; Student Council (3); Thespians (1, 2, 3); Westmoreland County Club.

"Dan," the nightingale of the track house has put his home town on the map by means of his voice and football ability. When Hollenback says, "Where's Welty?" "Dan" says, "What song will we sing?" but when he asks a second time "Dan" climbs into his armor and reports. "Dan" was some hit on the Thespians last year by his puns on the professors. He is a good-hearted democratic classmate, lots of "push" and "gumption" in all he undertakes and has a good stand with all who know him.

## RICHARD HALL WESTON

**"Dick"**

**DAIRY HUSBANDRY** **BELLEFONTE**

College Football (1, 2); Class Football (1, 2); Centre County Club.

If "Dick" was paid a dollar an hour for doing nothing, he'd be a millionaire, and when work appears, he disappears. Nevertheless, he has the habit of mysteriously disappearing with his books and proving his ability by star recitations now and then. "Dick" was one of our class gridiron warriors, who broke the Pennsylvania Day precedent by coming out of the game without defeat. He is rather a quiet and humble sort, never makes his presence known except for an occasional laugh.

## HONORA FRANCES E. WHALEN

**"Irish"**

**AGRONOMY** **ERIE**

Liberal Arts Society.

"That reminds me!" "Irish" always has a story to tell or a joke to spring, and although the beginning of the joke is sometimes forgotten by the time she reaches the point, there is always something to laugh at. Nora had the distinction of being the first "Ag" girl, but one good thing brings another, and she was not long alone. When it comes to doing someone a good turn, "Irish" is the girl. She is enthusiastic about her work, and as a "boss" is unsurpassed. If she hustles as much out in the wide, wide world, as she does here, she'll surely make good.

## WALTER WARREN WHETSTONE, Φ Δ Θ

"Walt"

AGRONOMY — PHILADELPHIA

Track Squad (1); Football Squad (2); Assistant Manager Football (3); Captain Swimming Team (1); Thespians (1, 2); Rifle Club; Philadelphia County Club.

"Walt" came here with somewhat of a reputation as a general "whale." Not long after his entrance he kindly consented to teach the boys to swim, and as a reward was elected captain. Walter has imbibed the good old Penn State spirit and is a good mixer. He does not believe in over-work, and his ambition is to become the owner of a Tennessee cotton and tobacco plantation. May his wish be fulfilled.

## ELIZABETH AIKMAN WHITE

"Betty"

LIBERAL ARTS — BLOOMSBURG

Liberal Arts Society; Deutscher Verein; Y. M. C. A. Play (1); LA VIE BOARD.

Here we have the original Kewpie who whistles. No matter where you are, if you hear someone whistling you may be fairly sure "Betty" is somewhere around. They say she keeps a home for the friendless, for she has been known to keep anything and everything from invalids to frozen crows. One of "Betty's" hobbies is photography and she has pictures of every conceivable thing about State College within a radius of fifteen miles, yes, including Shingletown Gap. Even if "Betty" did change from Domestic Science to Liberal Arts, by her inborn sense of housekeeping and her jolly good nature, she will make good along this line, "yet." Here's hoping she will not "feel for" changing her tactics, but keep right on whistling, for "What's the hurt anyhow?"

## DEAN WILLIAMS, Σ Π

"Red," "Dean"

INDUSTRIAL CHEMISTRY — RIDGWAY

Deutscher Verein; Elk County Club; Forum.

Somewhere in the wilds of Elk County Dean grew up and blossomed into a product fit for Penn State. He elected Chemistry in spite of the weird tales told to Freshmen concerning the dangers encountered in the Pond. Dean could be hardly classed as a regular at the Cottage, but he certainly gives promise. Just how such a development would affect the source of the steady flow of letters received is a question that "Dean" should consider and no doubt he has. He is a good friend to have, possessing all the qualities that commonly go with red hair.

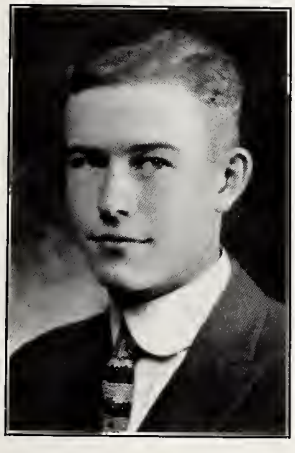

## GEORGE HOWE WILLIAMS, Σ A E

**"Doc"**

**LIBERAL ARTS** **PUNXSUTAWNEY**

Ladies and gentlemen, we have this evening the only noted advocator of the modern theory of Wine, Women, and Literature. We say literature, for "Doc" is in a class by himself when it comes to that form of athletics. He quotes Rudyard Kipling by the mile, and can tell the horrible tale of Dan McGrew backwards, forwards, and even sideways. His rare ability blossomed forth in his Freshman year, when he wrote the words to the tune of the "Freshmen Poster," and he has been blossoming ever since. When it comes to automobiles, "Doc" is an expert,—motorcycles are his specialty, and a job as color-bearer in the army is the height of his ambition. "Doc" is bound to succeed, for his open heart wins him friends everywhere.

## ALBERT JAMES WILSON, Φ K Σ, T B A

**"Al," "Bert"**

**CIVIL ENGINEERING** **CHARLEROI**

**Druids; Varsity Basketball (1, 2, 3); Class Basketball (2); Bellefonte Academy Club; Washington County Club; Civil Engineering Society.**

This fair haired lad came to us from Bellefonte Academy, and did not wait long to get things started. He is always a silent observer, yet he has shown us that he has all the qualities of a virile, wide-awake man. "Bert" has a strange affinity for the fair sex. Civil Engineers will one of these days find in their midst a man who doesn't say much, but gets things done.

## CLARENCE ELY WILSON, H K N

**"Hen"**

**ELECTRICAL ENGINEERING** **LOCK HAVEN**

**Electrical Engineering Society.**

"Hen" is distinguished in that he is one of the few living members of the Ancient Order of "V. A.'s" and was duly branded with green ink. No further evidence of sterling character is needed, as no one could be a member of this society who could not get his lessons without visible study, play bridge like a society woman, support eight men on his back without flinching and go through the complex motions of the famous wrestling holds. Since the breaking up of this notorious band, however, "Hen" has fallen into evil habits, such as studying and fussing, and, abandoning all hope of being a pirate, looks forward to being a comfortably wedded and successful engineer.

## MARGUERITE COURTLAND WILSON

"Billy"

HOME ECONOMICS — FAYETTE CITY

Y. M. C. A. Play (3); Y. W. C. A. Play (3); Vice President Deutscher Verein; Y. W. C. A. Cabinet; Girls Glee Club; LA VIE Board; Louise Carnegie Scholarship.

"Fancy that!" Here we have the third member of that trio of preachers—she doesn't seem quite complete because the other two couldn't be on this page. But really, "Billy" is quite able to stand on her own feet and accomplish many things single-handed. As "Katie," the "White Mouse," and "Vic," she has given great pleasure to P. S. C. audiences. Her one besetting sin is her temper, and when we see that chin begin to tilt, we know there are breakers ahead for someone. If Margherite is as much of a leader after, as before leaving Penn State, she will surely make good in her chosen profession.

## ROBERT HENRY WILSON, Φ Σ Κ

"Fat," "Robedia," "Ret"

HIGHWAY ENGINEERING — LEWISTOWN

Assistant Manager Thespians (3); Civil Engineering Society; Deutscher Verein.

The dashing, slashing fullback of his erstwhile Alma Mater hurled himself among us like an avalanche of myriads of sheckles of gold, amid the revelry and cheers of the entire court there assembled. He is an emulator of Fatima, Light-horse Harry, and other trot artists of other days. "Live and let live," and "Hoch der Kaiser," are his pet mottoes. "Transit Bob," the pride of the Civils, looks with merciless eyes to the day when his future vocation will not constitute the reading of rods, but the tense grip with which he clutches the ticker ribbon pronounces him a future "Wall Street's ablest."

## DAVID CLEVELAND WIMER

"Dave," "Dutch"

AGRONOMY — QUARYVILLE

Civic Club; Lancaster County Club.

"Dave" lives by Lancaster County mit all its attractions and things that produce its sturdy Teutonic inhabitants. "Dutch" has that broad smile that makes you glad to grip his right manual appendage. His worst fault is that he asks you, "Well, what do you know?" David is by no means a grind, but has the ability to smear a quiz. With his sunny disposition, his inherited racial stick-to-it-tiveness, and his fertile Lancaster gray matter, he ought to produce a great name for himself in the field of Agronomy.

## HENRIETTA WINN

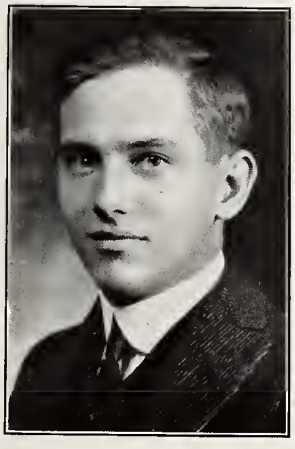

**"Henri"**

**HOME ECONOMICS** **ALTOONA**

**Girls Glee Club; Y. W. C. A. Play (1); Deutscher Verein.**

Here is "Henri" the other "Siamese twin" and member of that "confounded combination" on the second floor back. When anything is "up" you may look for her in the thick of it and will seldom be disappointed. "Henri" is usually good natured, but once in awhile an, "Oh—for Pete's sake"—and a toss of her head give evidence of her perturbed feelings. She is very proud of her English ancestry and holds her "crochet-tin" hook in true English fashion. She is a careful student of "Life" and is sure to make good when she gets into its real pages.

## DANIEL EARL WINSLOW

**"Dan"**

**ELECTRICAL ENGINEERING** **DUBOIS**

**Electrical Engineering Society.**

They call him "sailer," because he has a girl in every port between here and DuBois. "Dan" is one of the beneficiaries of the P. R. R. and rides around on passes making acquaintances as he travels. He is to be found almost any day in his room, with his Dame Fatima in close attendance, dreaming. He is famous for relating weirder tales than most men can dream, the kind that make one say gruffly: "Oh, I really cawn't believe it." He and his roomy, known as "The Twins" double team and buffalo the E.E. Dep't to the extent of a high place on the honor roll, however. Keep it up, "Fat," old boy.

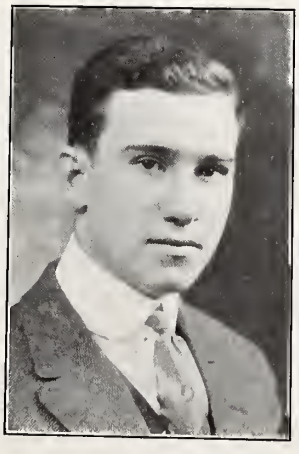

## WILLIAM EDWARD WINTERMEYER

**"Bill," "Dutch," "Runt"**

**ANIMAL HUSBANDRY** **YORK**

**Deutscher Verein; York County Club.**

"Come on, fellows, let's get that Freshman, he's too darned fresh." "Runt" was indeed the terror of the Freshman class, and many a luckless one suffered due to Williams' ceaseless vigilance. He is a model student when it comes to getting down to work, but has at times had difficulty in avoiding the yellow slip. A small man with a large heart which has long since engulfed the memories connected with the Cornell pennant that adorns his wall.

## JACOB ASHTON WINTERSTEIN

**"Jake"**

**LIBERAL ARTS** **DUNMORE**

**Lackawanna County Club.**

Anyone who doubts that the Liberal Arts course is the hardest in college should talk to "Jake" and be enlightened. "Jake" came here with a concealed but well developed intention of becoming a minister, but it is now understood that he has given up this worthy ambition, and is now in some doubt as to his future profession. Every June he firmly decides never to return to State, and every September he turns up again. So it is reasonable to suppose that when the final roll is called "Jake" and his hearty smile will be on deck.

## DONALD HARVEY WITMER, Β Φ Π

**"Herb," "Wit"**

**HORTICULTURE** **HARRISBURG**

**Druids; Skull and Bones; Assistant Track Manager (3).**

Born and reared among the state's politicians "Wit's" picture will some day be found in "Who's Who," if he can overcome his great fault, moodiness. A football defeat, a love spat, or a yellow slip puts poor "Herb" under for weeks. On the other hand when the sun breaks through you can't hold him. "Herb" used to have a dog with a pedigree, but all that remains now is the pedigree with memories. Which of the two was to blame is unknown. A shark at dancing, pinochle, and Pastime attendance, "Herb" is getting his share of college life.

## SHUEY EARLE WOLFE, Α Χ Σ

**ELECTRO-CHEMISTRY** **LEBANON**

**Scabbard and Blade; Second Lieutenant Cadet Regiment; Class Basketball (3); Deutscher Verein; Electro-Chemical Society; Lebanon County Club.**

"Wolfie" is a mighty good natured fellow and his only complaint is that he can't take long enough steps to maneuver the crack company of the "Army." He casts aside his military cares at the end of the week and satisfies his gentler nature by frequent calls at the Cottage. Shuey is also much interested in the subject of Electro-Chemical Engineering and occasionally spends a little time in consulting his books. He expects to settle down in Lebanon and enter into a partnership there.

## WONEY ROSS WOLFF

**"Ross"**

**HORTICULTURE** **PHILADELPHIA**

**Agricultural Society; Crab Apple Club; Civics Club.**

Originally a 1913 Chemist, "Ross" saw the error of his ways in his selection of class and course, and when he returned to State he came as a 1915 "Hort." His saying "Horace Roberts does not do it that way," and his knowledge of the methods employed by the Harrison Nurseries explain this change. His desire for knowledge is evidenced by his frequent questions in class. It is whispered that after spending last summer in Doylestown, he became so attracted to the place and its inhabitants that he returns as often as possible, both in person and in spirit. However, to those who know him he is a hard worker, an earnest student, and a loyal friend.

## JAMES EVERETT WOLTZ, ΙΧΔ

**"Jim"**

**ARCHITECTURAL ENGINEERING** **WAYNESBORO**

"Curfew shall not ring to-night." "Jim" spiked the old bell every night of the flag scrap so that no warning would be given the Freshmen. On the other hand he believes in publicity for, before entering college he led the life of a reporter. Usually of the noiseless type, but the old adage again applies to James. This specimen has shown ability along his chosen line to such a degree that it is altogether probable that the "Greater Penn State" will be planned under James' hand.

## WALTER SARVER YAHN, ΣΧ

**"Pudgey"**

**MECHANICAL ENGINEERING** **OLNEY**

**Druids; Class Football (1, 2); College Soccer (2); Northeast Manual Club.**

A more bashful, blushing, and unassuming Freshman than "Pudgey" could never be found, but these traits disappeared with great rapidity when he started dodging a naughty Sophomore who wanted his locks. "I will never pass that stuff," is "Pudgey's" chief cry, though he scarcely ever pulls a "below." With Analytics and Calculus as things of the past, he often asks confidentially if two-thirds is more than three-fourths. Despite that fact we can expect to find him a real engineer some day, especially if hard and conscientious work is a means to that end.

## ROBERT ALLEN ZELLER

**"Rob," "Dutch"**

**FORESTRY** **LITITZ**

The three hobbies of this quiet, serious little chap are Lititz Bretzels, his flute, and the trips to the mountains. He is an earnest student while studying, and a lover of fun when a good time is in progress. His spare moments are whiled away in the harmonious (?) manipulation of his little tin flute, as all Fourth Floor Main occupants can testify. His greatest hobby is hiking to the mountains to enjoy life with the trees, animals, and birds. Such desires cannot help producing a Forester of the true type, and we predict a very bright future for "Bob."

## CHARLES LEWIS ZIEGLER, Λ X A

**MECHANICAL ENGINEERING** **YORK**

**York County Club; Mechanical Engineering Society.**

According to "Bum-show Lizzie" York would not be on the map were it not for him and a certain person known to the moving picture world. We can stand plague, pestilence and sudden death, but when "Zieg" starts in to rave about his girl, all bets are off. He is always claiming that he "slipped one over" on someone or "beat someone's time." Girls, be careful, he is simply irresistible. With all these minor faults his heart is in the right place and when you want a good friend get acquainted with Charles.

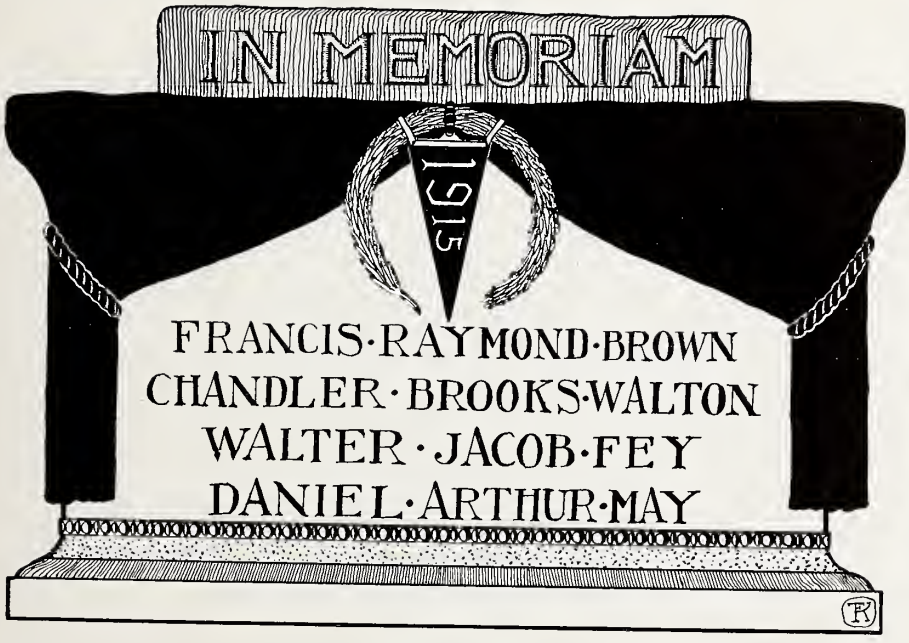

## JOSEPH ROSSITER ZIESENHEIM, Α Γ P

**"Ziesy," "Joe"**

**ANIMAL HUSBANDRY** **NORTH GIRARD**

**Agricultural Society; Sirloin Club; Erie County Club.**

"Ziesy" gained a reputation for himself as "Chief of Police" of the Agricultural Fair. He exempted no one from arrest, "stude" or "Prof," friend or stranger, not even "Swamp." "Joe" is fond of animals, and promises to write a book on "Animals I Don't Know." As a rule, he is serious, and spends much of his time in discussing the weighty problems of the day. He has a failing for the "queens," but won't let them interfere with his college course to any marked extent.

BRALLIER, HIST.

# 1916 Class History

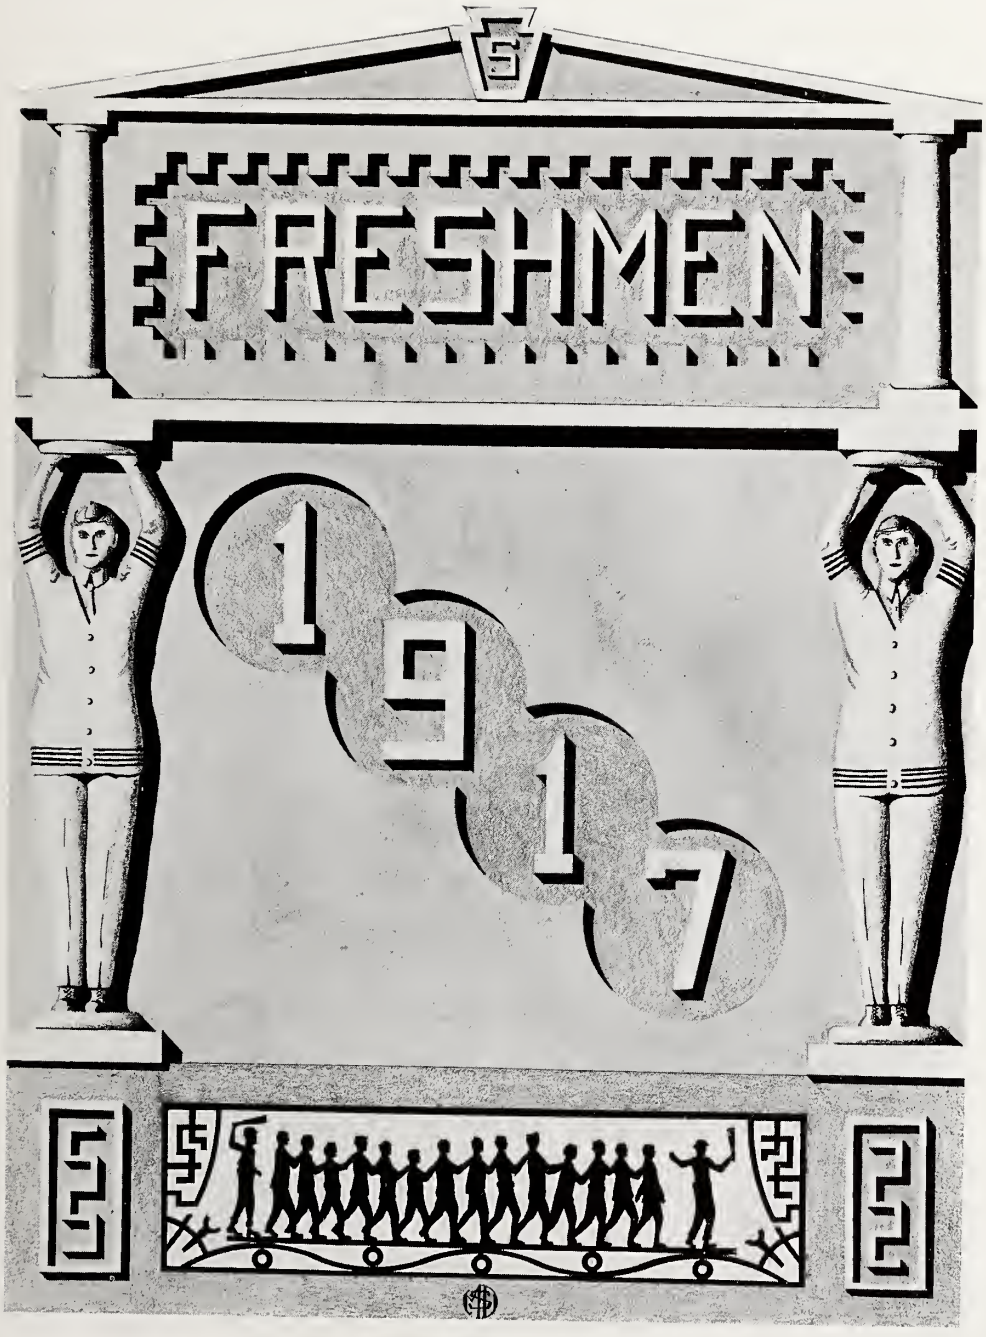

EARLY in June, when roses were blooming, and birds were singing, and the first pale crescents of a summer moon hung in the warm night sky, when Seniors were taking last looks at Old Main, when Juniors were becoming accustomed to going without their hats, when Sophomores began cutting Front Campus, when all its first year's battles were over and a large percentage of them won, 1916 laid aside its green badge of immaturity, took unto itself the rights and privileges pertaining to Sophomores, and with a final handshake and a last "Good-Bye," departed for its respective homes.

Then in September it was with the customary mingled feelings of joy and regret that these valiant comrades, obedient to the call of the autumn days, packed trunks, suit cases and traveling bags, and descended in a body upon this fair village among the mountains. The Sophomores, consistant with their opinions of the previous year, regarding the unhappiness of early Freshman history, reserved the greater part of their expressions of welcome and good will until after Poster Night, when, thanks to their ardor and unselfishness, the strangers were treated to night views of all the surrounding countryside. The Pushball Scrap showed no decline in last year's spirit, and the winning of the Cider Scrap, followed closely by the overwhelming victory of the Wrestling Meet, left the gentlemen of the opposition somewhat dazed and wondering. Happy and elated over this state of affairs, 1916 traveled down the valley and out of the mountains to the city of Brotherly Love, and there precisely at 11 o'clock on the evening of October thirty-first, sat down to its first class banquet, which, enlivened by yells, speeches and other things, was a grand and glorious success.

However, the wielders of the paddles being, in spite of their mighty prowess, only human, were prone to err, and thus it chanced that on a late November Saturday afternoon, the Freshmen won the privilege of carrying canes the following day. Needless to say, the aforementioned paddlers regretted the circumstances exceedingly, but took comfort from the fact that this one defeat might serve only to enhance the fairness of the preceding victories.

In such fashion has another year with its twelve months, its fifty-two weeks, and its three hundred and sixty-five days, passed over the members of the class of '16, crowning their heads with civilian caps, their minds with added stores of wisdom, and their souls with joy and gladness.

# Freshman History

SEPTEMBER was just merging into its teens, when our pilgrimage in quest of knowledge brought us to this great temple of learning, wherein we were to taste of the cup of wisdom and prepare for the great work of life. For a brief moment we halted; and then, through the ever-open portals, we entered.

On the first morning, green-caped, uncouth and timorous we picked our way warily over the broad walks of the campus to the Auditorium. There we found ourselves in the midst of a multitude of strange and curious faces, many of which beheld us with mingled contempt and pity; and some of which looked upon us with a kindly air of paternalism. The latter of these proved later to be our friends; but the former—even though we condescended many times to assist them in their daily toils—were not to be reconciled.

The first important step in our progress was that of organization. The Sophomores, who, on numerous occasions and in divers ways, had manifested an utter disregard for our personal welfare, kindly permitted us, one evening to gather in the Old Chapel. There, under the guidance of the benevolent Juniors, we inaugurated that great body known to fame as the Class of 1917; and we adopted the symbol of our spirit—the class yell.

Poster Night came, with its traditional customs; and in short the events of the evening afforded both entertainment and instruction.

In the class craps, we displayed our generous good nature. As "Push-ballers," we allowed our opponents to win by a score of 9-0; in the Cider Scrap, we authorized our adversaries to drink cider at our expense; and on the wrestling mat our delegates submitted to Sophomore experience with a score of 7-0. On the day following the football game, the windows on the stores about town bore, in green, the numerals, 14-0; while six hundred Freshmen rejoiced and carried canes.

And now, that we have paused in this brief retrospect of our boyhood days, we turn again to the future. May we go on with confidence and courage to that great day when we shall raise our eyes in sad farewell to our noble Alma Mater, and with sincerity and reverence say, "Thou didst mould us, dear old State, into men."

Campbell, Sec. Steveson, Pres. Christy, V. Pres. Reed, Treas.

# Second Year Two-Year Men in Agriculture

## History of the Second Year Two-Year Agricultural Class

SEPTEMBER fifteenth and sixteenth, nineteen hundred twelve, marks the beginning of a period of inestimable import to the hundred and twenty-six who then matriculated as students of Penn State, in the Two Year Course in Agriculture and who through their subsequent organization became the class of '12-'14. For most of us, that period was to have full two years duration; for a few who later changed to the four year course, it was even longer, but for still others it was not so ordered, and these last we hope will try again with some classes yet to be.

Organization in its infancy is imperfect at its best and that in the Two Year Classes, being but a few years old, is not an exception to the rule. Its very existence, however, spells progress in capital letters and speaks volumes for early promoters. But in spite of the resulting handicaps and the reverse currents, we have made advancement in many ways. Our first year may be epitomized as a time of acclimatization and adaptation to an environment totally novel to us.

Before passing to our second year it might be noted that a few of our number found places on the varsity squads.

In our second year a spirit of progressiveness prevailed. Illustrative of this, be it said to our everlasting honor (?) that we established athletics in the Two Year Classes and with those who follow us, rests the responsibility of perpetuating this unifying force.

The charge of "grinds" can hardly be made against us. As there passes before the mind's eye of the writer, a succession of his classmates, it becomes necessary to repress a smile at the very thought of such an appelation. And yet our scholarship is far from being low and, furthermore, our men have ability. All this is reflected in the dairy cattle judging team, which the college sent to the International Dairy Show at Chicago this year; of four comprising the team three were '12-'14 men.

At the approaching expiration of our lease on college life, when we shall give place to our successors, our minds turn, naturally enough, toward that which we are to receive upon the satisfactory completion of the subjects required of us; that is, our certificates. Feeling that the mode of presentation heretofore in vogue, i. e., through the cold medium of the mails, was capable of improvement, we laid the matter before our Dean, and, thanks to his active support plans are well under way for closing exercises befitting the occasion at which the certificates of completion of the Two Year Course will be presented in due form.

Should the project materialize, and it now bids fair to—it will bring an appropriate climax to a period in our lives in which we have freely received; thus in future years may we freely give toward the betterment and uplift of the great Commonwealth, which has conferred upon us so great a boon and made possible for so many of us an education which we would otherwise have been denied.

Rice, Historian  Collins, Sec.  Sidler, Pres.  Easton, V. Pres.  McManay, Treas.

# First Year Two-Year Men in Agriculture

## Class History of the First Year Two-Year Agricultural Class

ON the sixteenth day of September, of the year nineteen thirteen, we, the "First Year Two Year Ags.," numbering one hundred and forty energetic and determined young men from both city and country entered the Pennsylvania State College. It was quite natural for us to look and feel somewhat green when we first arrived, but the feeling, if not the look, soon wore off after our work began.

College life was new to most of us as was also the work required by our instructors. We, however, soon became accustomed to the rules governing the students and the tasks given us. We can truthfully (?) say that we liked the different studies we were required to pursue. Some preferred Botany, some Chemistry, some Dairy Husbandry, and so on through the list, but the one subject which seemed to dwarf all others in popularity was Animal Husbandry.

Shortly after our arrival we were entertained by the "Second Year Two Year Ags." We were received cordially and treated to a cidar and pretzel feed. At this reception, under the management of our hosts, we succeeded in effecting an organization of our class.

Due to the desire to participate in athletics, the idea of forming athletic teams began to grow until it resulted in the organization of the "Two Year Agricultural Athletic Association." We do not wish to take any undue credit in the formation of this Association, but we cannot help but feel that we did our part.

Our athletes responded readily when the various managers called for recruits and they have given a good account of themselves. At the Inter-class Cross Country Meet, several of our men made a very credible showing, while in other sports we were well represented.

Our class is characterized by the spirit with which it enters into athletics, college activities and class work. If this spirit is maintained in the future, the prospects of success for our class are exceedingly bright.

# Football Review, 1913

FOOTBALL in the season of 1913 was in many respects the most discouraging and disappointing that a Penn State team and a Penn State student body has ever experienced. But "it's an ill wind that blows nobody any good" may be applicable in the case of the Blue and White. Two seasons without a defeat was a new and extraordinary record. Penn State had proved a good winner. Defeat was an unknown term to the majority of the players and their followers. Here was a new test even greater than any in the past. Would Penn State prove to be as good a loser as she was a winner? Never was a question more satisfactorily answered. As soon as Penn State began to meet teams in her class, defeat came—and one reverse followed another until the story became an old one. But the players did not let up in their work nor did they lack the support of the student body. Great in victory, Penn State proved even greater in defeat, and had Captain Miller and his men won every game and been ranked as the first team in the land they could not have held any higher place in the esteem and respect of Old Penn State.

Penn State's reputation for clean hard playing was lived up to in this season probably more so than in any season of the past. Beaten at almost every turn, her men would not—did not give up. Individually and collectively with defeat behind them and defeat staring them in the face, they showed "metal" that rang true in every instance. Praise came for them from all sides—not the high sounding praise of a winner, but the greater, truer tribute due one who in a losing fight, fought to the end and had the courage to accept defeat gracefully.

The schedule was without a doubt the hardest that any Penn State team has ever encountered. It was not only hard from the fact that strong teams were met, but the arrangement of the games made it even a more difficult proposition. Washington and Jefferson, Harvard, and Penn were met, in succession on foreign fields, while in less than a week following Notre Dame was met on Beaver Field, and the journey to the Navy came one week later. Due to the length and frequency of these trips little time was given the Blue and White squad to rest or get good hard practice on the home field.

The failure of the season, if such you may call it, cannot be traced to any one cause. The coaching staff was the same one that produced unbeatable elevens in 1911 and 1912. The men composing the staff worked as hard, yes, harder, to turn out a winning team. Among the members of the team were such stars as Captain Miller, Berryman, J. Clark, Bebout, and Lamb. Several members of the team would have been given All-American recognition had they been on a winning team. Leadership was not lacking, and the support was never better. In spite of all this, their opponents for some reason or other proved the better team and Penn State got the little end of the score.

Even though on a losing team the individual men deserve great credit, for the consistent way in which they stood by their guns. With the loss of such men as Captain Mauthe, Ex-Captain Very, Engle, Wilson, and Hansen it was evident much work must be done to fill their places. From the very start the men jumped into the work with a vim that augured well, and Coaches Hollenbach, Harlow, and Reed, with Trainer Martin kept constantly at work.

"SHORTY" PUNTING

### CARNEGIE TECH GAME

The season opened as usual with Carnegie Tech, and the usual victory resulted by a 49-0 score. This was even a larger score than had been made the previous season, and everything pointed to a winning team. Clark, Tobin, Berryman, Welty, and Miller showed ability to carry the ball. The brilliant little Captain, especially, distinguished himself by making several long runs and by carrying the ball for a total of 250 yards.

### GETTYSBURG GAME

In the second game of the season Hollenbach's charges met those of his former pupil, "Pete" Mauthe. Ex-Captain Mauthe, as coach of the Gettysburg team, showed that he knew something about coaching as well as playing by bringing a team to New Beaver Field that made the Blue and White extend their best efforts to win. Captain Miller was the chief offensive power aided by Tobin and Clark. "Big" Clark showed up strong on the defense. Penn State won by three touchdowns.

### WASHINGTON AND JEFFERSON GAME

Penn State met her first reverse in three years when she journeyed to Washington to meet the Red and Black in the third game of the season. Washington and Jefferson had a veteran team that throughout the season proved to be one of the best Eastern college elevens. Miller, Tobin, and Berryman were the best ground gainers for Penn State, while "Big" Clark playing against Cruikshank, put up a wonderful game at center. Goodwin, Fleming, and Speigel were largely responsible for the 17-0 victory of Washington and Jefferson.

### HARVARD GAME

The fourth game of the season was played in the Harvard Stadium. Conditions were probably the worst that any team ever encountered. The mud

was ankle deep while rain fell in torrents almost continually. Harvard, undisputed Champions of the football world, with experience and weight, showed to advantage on the muddy field, and the Blue and White was unable to stop the formidable attack of Hardwick, Mahan, and Brickley. On the other hand, Penn State, with her lighter men and open style of play, was at a distinct disadvantage. Captain Miller was the individual star of the contest, while Lamb, J. Clark, and Bebout lived to their reputations. Although beaten 29-0, Harvard critics credit the game as one of the best seen on the Stadium during the season.

### Penn Game

Following Harvard came Pennsylvania, and the boys from Franklin Field proceeded to secure balm for the wounds of the past seasons by handing the Blue and White another defeat, 17-0. Penalties and the loss of Berryman early in the game cost Penn State much, but they fought even harder than ever to bring about victory. Captain Miller was marked for special attention by Penn, but he, nevertheless, played a brilliant game, as did Bebout and Clark, other seniors on the team.

### Notre Dame Game

Notre Dame was the Pennsylvania Day attraction, and the Westerners, undefeated conquerers of West Point, lived up to their reputation by defeating Penn State on New Beaver Field for the first time in her history. The game was one of the hardest fought and one of the most brilliantly played ever seen on a local gridiron. No greater variation in style of play was ever seen probably on any field. There were end runs, line smashes, shifts, fakes, short and long forward passes, and quick kicks. Penn State gained the greater number of yards, but was unlucky in being penalized right on the goal line. Lamb scored the only local touchdown on a forward pass from Miller, who kicked the goal. Miller, Tobin and Welty were the Blue and White stars, while Captain Rockne, Eichenlaub, Dorias and Pliska were the most conspicuous performers for Notre Dame, the first two scoring their touchdowns.

### Navy Game

The next defeat came at the hands of the Navy at Annapolis; again the Blue and White struck adverse conditions in the form of a wet, slippery field. Navy, with the heaviest team in the East, expected a somewhat easy victory, but received the surprise of her football life. McReavy scored the only touchdown of the game, and later Brown kicked a field goal, making a total of 10 points for the Navy. However, after the game was really under way the

PENN PUNTING

W. AND J. GAME

powerful Navy attack was baffled when a score was within its grip. Never was such a defense seen as that presented by the Blue and White in the final quarter. On four occasions the Navy had the ball on the 5-yard line, and for a total of 16 times they were held without advance by the Penn State 'efenders. The Blue and White also made brilliant gains and were within the opponent's 5-yard line but failed to score. The entire Penn State played a wonderful game, but Captain Miller and the big freshman back, H. Clark, deserve special mention.

PITT GAME

The last game of the season was probably the cause for more gloom than any other defeat. Again a wet, slippery field greeted the Blue and White and handicapped open play and the running ability of Captain Miller. Again Penn State gained a greater number of yards than her opponents, but the difference between a goal missed and one made spelled victory for Pitt and defeat for Penn State. The game was clean and hard fought. Penn State was first within striking distance of the goal line due to the line smashing of H. Clark and the resourcefulness of Captain Miller. A penalty blasted the Blue and White hopes temporarily, but the attack of Clark could not be stayed, and a touchdown resulted. Miller failed at goal and a subsequent victory, or tie, at least, was also lost. Pitt was never within striking distance of the goal and owes her victory to the individual efforts of her halfback, Williamson, who got away for a 65 yard run for a touchdown and then added the goal which spelt a 7-6 defeat for the Blue and White.

BURNING OF DUMMY

Thus ended this season of defeats, but Captain Miller, with his classmates Bebout, J. Clark, Sayre, Weston, Vogel and McVean will not be remembered as losers, but rather as men deserving the honor and praise of victors. They fought valiantly and lost; they were defeated but not disgraced; Penn State honors them in defeat as in victory.

## RICHARD CRESSON HARLOW

### GRADUATE COACH

"Dick" completed his second year as Graduate Coach at Penn State this past season and has done much to develop the linemen of our past two teams. Dick was one of the best tackles that ever represented the Blue and White on the gridiron, and he has proved to be a better coach than he was a player. To our linemen he has imparted some of that indomnitable courage, nerve, and fight that characterized his own playing. His coaching has been a big factor in the development of men, and he and "Big Bill" make an ideal pair.

## NEIL M. FLEMING

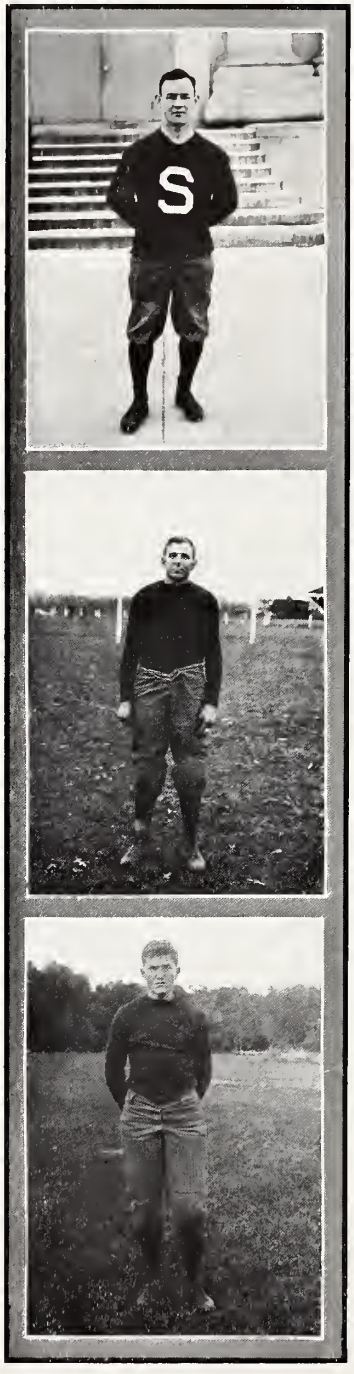

### MANAGER

In order to bring a season to a successful close a good manager is absolutely necessary. As a football manager, "Neil" certainly was a success. A thorough knowledge of the game, which he secured while playing on his class team, was a big help to him in attending to the multitude of details that necessarily go with the carrying out of a schedule. At all times business-like, prompt, and courteous he has left a record which future managers should strive to attain.

## WILLIAM HOLLENBACH

### HEAD COACH

Although our season was in some respects a disastrous one, Big Bill should be given due credit. Called upon to develop material to fill places left vacant by graduation of such men as Mauthe, Very, Wilson, Engle, and Hansen practically all of All-American calibre, was the big job on his hands when he came to Penn State last fall. Many wonder how he did develop the team that he did with the many handicaps placed upon him. His system of coaching is all his own, and it suits Penn State. However, back of this system is a personality that moulds his gridiron warriors.

## EUGENE ELLSWORTH MILLER

### CAPTAIN AND QUARTERBACK

This diminutive quarterback came to Penn State from Harrisburg High School where he played football and baseball for four years. In interscholastic circles his wonderful open field running, combined with generalship, foretold the reputation which he would gain in college football. Recognized as the best open field runner of his day and conceded to be All American quarterback for two years, his full worth to the Blue and White can never be told. Penn State may well be proud of her 1913 gridiron leader, and all agree with Chaplain Reed, who said before the Pitt game, "Undoubtedly every Penn State man respects Captain Miller of our 1913 team more than "Shorty" Miller, hero of our 1911 and 1912 elevens." We shall miss "Shorty," but his name shall always rank high in Penn State's Hall of Fame.

## ELGIE WILLIAM TOBIN

### CAPTAIN-ELECT AND HALFBACK

Many of Penn State's best athletes have come from California State Normal where Tobin prepped and received his early experience in both baseball and football. At Penn State "Yegg" has gradually developed and has gained an enviable record on the gridiron. "Big Bill" has truly called him "the pinch hitter of our football team," and never have we had a more consistent and dependable man in our backfield. "Yegg" always produces the goods when called upon and due to his consistent, hard, heady playing he has been selected as Captain of our 1914 football team, and he has the best wishes of every Penn State man, past and present, for a successful season.

## JAMES DALLAS BEBOUT

### GUARD

Pittsburg High School claims this sterling guard. At this school "Red" ran the quarter mile and played football for four years, being chosen captain and All Scholastic Guard in his senior year. Here at Penn State "Red" has developed into a guard of All American calibre, being selected by several critics for this honor. He was a great lineman on both offense and defense, whose red "thatch" could always be seen in the midst of the fray. He was a hard, aggressive player whose loss will be keenly felt.

## JOHN B. CLARK, JR.

**CENTER**

John Clark is also claimed by a Pittsburgh school, —The East Liberty Academy, where he played football for two years. His playing at Penn State has ranked him as an ideal center; rangy, hard to bowl over, and a sure, deadly tackler; an analyzer of plays and a sure passer. His consistent playing in all games, combined with his versatility, made him one of the most feared men on our team. In "Big Jawn" we lose a valuable man.

## RALPH J. SAYRE

**GUARD**

Ralph is a true Penn State product. He never donned a football suit until his Sophomore year when he was the bright star of the Interclass football game. He has also been a varsity wrestler for two years. Due to his inexperience Sayre did not make the team until his senior year. However, he soon learned the game and by many is thought to be one of the best guards that Penn State has ever produced.

## OLIVER JOHN VOGEL

**GUARD**

Ollie played baseball and football for three years at Slippery Rock State Normal before coming to Penn State and held down the captaincy of the football team in his senior year. Ollie earned the coveted "S" after three years of persistent plugging on scrub and class teams, being gradually moulded into a steady reliable man. He completes the trio of guards that we lose by graduation this year.

## HARRY B. WESTON

**END**

No spirit is admired in a football player more than sticktoitiveness, and Weston surely possessed it. Called upon to fill the place left vacant by "Dex" Very and with very little former varsity experience, Weston was confronted with a big task. He will be remembered as a player who stuck to the old game with the determination that the sport demands.

## ALBERT M. BARRON

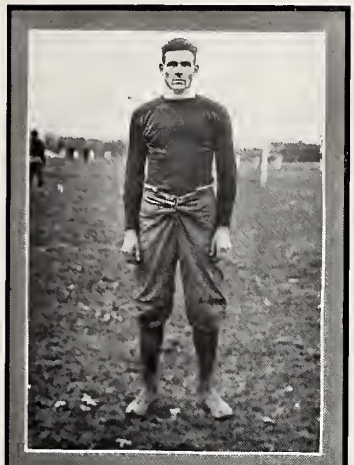

**END**

Another Philadelphia boy and a product of Central Manual Training School. At his prep school "Al" was fullback for two years and also held the interscholastic record for the hurdles in the city. Although he was originally a backfield man the coaches turned him into an end in their efforts to strengthen this weakness of our team. At this position "Al" showed his true worth, and no doubt this reliable player should be one of those forming the nucleus for our 1914 team.

## ROBERT NORMAN BERRYMAN

**HALFBACK**

"Punk" is a contribution of Northeast Manual School of Philadelphia. At prep he played center, but at Penn State made good from the beginning as a backfield man and has just finished his third year as a varsity player. A battering ram type of backfield man, who combined offensive and defensive skill with wonderful line plunging ability, is the sum of Berryman's work. He has certainly been a player of worth, and Penn State will not soon forget his service.

## LEVI LORENZO LAMB

**TACKLE**

An all around athlete at his prep school, California State Normal, Levi has come to occupy the same position at Penn State. He is a track man, wrestling and football player of highest calibre. In football, Lamb has begun to show those things predicted for him. He has size, strength, and speed, the requisites of a tackle. During the past season he was one of our mainstays on the line, and he will doubtless play better football next year, and thus completely fulfill all prophesies made in his behalf.

## DANIEL E. WELTY

**HALFBACK**

In the fall of 1911 Greensburg exported to Penn State Dan Welty. Dan had played on the local high school team for three years, and in his senior year was captain, when he led Greensburg to the Western Pennsylvania Interscholastic Championship. In his first year Dan played on his class team and made a good showing on the varsity squad. However, it was in his sophomore year, as a member of one of the best backfield that State has had that Dan played the best game of his career. This past season showed the results of the previous year's experience and undoubtedly we shall hear more of Dan at Penn State.

## CECIL CLARE McDOWELL

**TACKLE**

Penn State adopted two years ago a regular schedule for the Freshman Team hoping thereby to develop the material that was on the Freshman Team. Big "Mac" is one of the results of this new system. In his first year he played tackle on his class team and in this, his second year, earned a varsity position. "Mac" played a good game this past season, and because of the experience gained, he should be a valuable man for next year.

## WILLIAM WALLACE WOOD

**END AND CENTER**

Bill was utility lineman during the season, playing at center and end when needed. He played football at Pottsville High School for three years and one year at Mercersburg. In his freshman year Bill was captain of his class team and led his team through the first regular freshman schedule. Bill is being counted on to do much for Penn State in the future.

## HAROLD A. CLARK

**FULLBACK**

This player tackled the hardest proposition on New Beaver Field when he tried to fill "Pete" Mauthe's shoes. He certainly was a mighty good filler. Harrisburg High School claims him, and at this school he was a member of the track team, being captain in his senior year and also played football for three years. "Hall" should become one of Penn State's mainstays on her next three elevens.

## GEORGE C. MORRIS

**END**

After playing football two years at Williamsport High School and one year at Winona Military Academy, Morris came to Penn State. Here he was the surprise of the season and helped to solve the perplexing question of ends left to us by the graduation of Very and Wilson. With his early start on our varsity Morris should develop into a valuable man for our wing positions in the future.

## Football Lineup, 1913

| | |
|---|---|
| *Head Coach* | W. Hollenbach |
| *Graduate Coach* | R. C. Harlow |
| *Manager* | N. M. Fleming |

"SHORTY" MILLER

## A Tribute

Harvard has her Brickley,
Minds belongs to Penn,
Pittsburgh has her Wagner,
All of them—good men.

But in the niches of Penn State's Hall,
Where heroes all assemble,
There is a niche for him who has,
Made all these warriors tremble.

So fill your glasses, boys, and drink
To the man at Penn State's tiller,
To the greatest quarter in the land,
To Captain "Shorty" Miller.

# 'Shorty' Miller, Former Football Official, Dies

HARRISBURG (AP) — Eugene E. (Shorty) Miller, 75, former Penn State football great, died Tuesday night in Harrisburg Polyclinic Hospital afer an extended illness.

(He frequently officiated Easton High School games at Cottingham Stadium.)

Miller, a native of Harrisburg, was named to the second team All-America squad of 1912, designated by the late Walter Camp, the original All-America selector.

Miller was a quarterback at Penn State from 1910-1913 and holds the Nittany Lions single

VARSITY BASEBALL TEAM

Manning, Coach — Mason — Keller — Vosburg, Manager

Wardwell — Liebert — Vogt — Crawford

Miller — McKibben — Whitney, Captain — Henderson — Hittner

# Baseball Review

N especially successful baseball season was enjoyed by Penn State the past year. When Coach Manning issued a call for candidates early in February, 1913, he found the problem confronting him of building up an entirely new infield, as a wide gap had been left in the team due to the graduation of Eberlein, Blythe, Bien and Carson. However, a large number of good men turned out, and the hole was completely filled by Mason, Hittner, Craig and Keller. The other positions were well taken care of by veterans from the previous season. Captain Whitney was forced to remain on the bench the entire season due to an injury to his shoulder during the football season, and while his loss was keenly felt, his place was capably filled by Leibert and Wardwell assisted by Hasselbacher. Henderson and Vogt took care of the receiving end, and the outfield was strong with McKibben, Miller, Crawford and Kominars, the latter a new man.

## Southern Trip

Having had little opportunity for outdoor work and having been confined to the "gym" for what practice they could get, the team left for the south in an unseasoned condition and had some difficulty in competing with the Southern College men who had had the advantage of outdoor work. On March 19, the team opened the season in Washington, D. C., with the strong Catholic University team and lost, 8-4. On the following morning the team lined up against North Carolina University at Chapel Hill, N. C., and were again met with defeat, 5-1. On March 21, Trinity College, of Durham, N. C., defeated the team, 4-3, as did also A. & M. College at West Raleigh, N. C. Captain Whitney next took his team to Lexington, Va., where Penn State won and lost from Washington and Lee, 10-6 and 4-3. The team then returned north to open the season at home, and while the trip could not be considered a success in regard to games won, it served the double purpose of helping to season the team and also giving Coach Manning an opportunity to get a line on the new men.

## Eastern Trip

Late in April the team left for a trip through the north and east and favored by good weather and machine-like playing, they were able to return a winner in three of the four games played. On April 23, at Princeton, the team suffered the only defeat of the trip; score, 8-3. Infield errors spoiling the good work of the rest of the team. On the following day Seton Hall was defeated, 6-3, in a well played game. On April 25 our team met Lehigh University at South Bethlehem, Pa., and defeated them in one of the best played games of the season, 2-0. The team then journeyed up the Hudson to West Point, where they broke up a

long winning streak for the Army, burying them under an avalanche of runs and base hits, 13-2. The team then returned home, and this trip may be considered one of the best of the season.

### Cornell Trip

After a short stay at home the team left for Ithaca, N. Y., where they met the strong Cornell University nine on May 6. Here they were defeated in a well played game; score, 6-3. The team then returned to State College to finish the season at home.

### The Season at Home

The season at home was a very successful one, seven games being recorded in State's favor while two were lost and one game cancelled. The season was opened on New Beaver Field on April 3 with Colgate, and State was returned a victor, 8-2. On the following day the team again met Colgate and took another exciting game, 9-8, giving the team a good start and showing the satisfactory results of the southern trip. On April 11 the game with Washington and Jefferson was cancelled, the next game being with Dickinson on April 18. Our team was again successful and defeated the visitors in a slow game, 6-5. Returning from a successful trip through the eastern states the team met and defeated Albright on May 2; score, 9-8. A week later State handed St. Bonaventure a trouncing, the game developing into a farce in the very first inning when State piled up nine runs. The final score was 15-1. Carnegie Tech played their usual good game on their visit here with defeat, 4-1. On May 18 the University of Notre Dame descended on Beaver Field and after a hard battle our team lost their first game of the season on the home field; score, 5-3.

Two big games were played during Commencement week and the usual large crowds were in attendance. Pittsburgh was defeated, 4-3, in the first of these games, but in the final game on the home ground our team lost to the strong team from the Chinese University of Hawaii; score, 5-3.

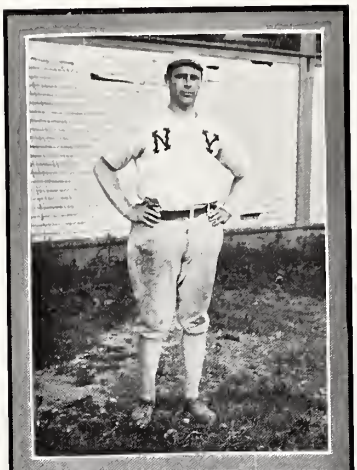

The season ended with 11 games won and 9 lost. When we consider that four of the games were lost at the very start of the season the team had a very successful year. Much credit is due to Coach Manning for his work in developing the new men. Wardwell was elected to captain the 1914 team, but he has since left school and a re-election resulted in "Shorty" Miller, this season's football captain, being elected to lead the Penn State nine. Few men are lost by graduation, and a successful year is predicted for Penn State on the diamond next year.

## WALTER MANNING
### COACH

Under the coaching of Walter Manning baseball has made great strides at Penn State. His work has been characterized by thoroughness and conscientious endeavor. The technique that he gained in the major leagues he has taught our men. For the second time he has to develop an entirely new infield, and if he does as well this time, as he did before, the student body shall be well satisfied.

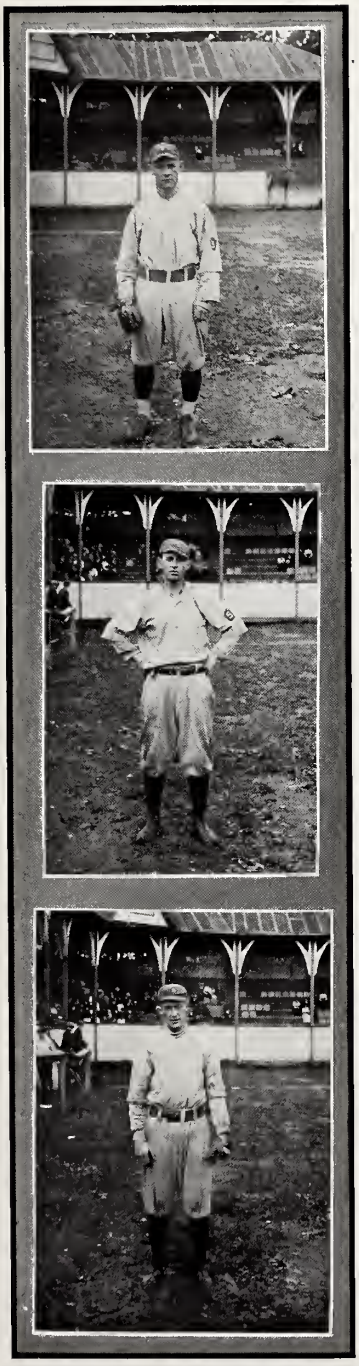

## GEORGE FREDERICK VOSBURG
### MANAGER

There are nine men who represent us on the field, but we must not forget the manager, who attends to all those details that go to make a successful season. Penn State was certainly fortunate in that George was conducting the business end of the schedule. His conscientous work in selecting a large and well balanced schedule, in providing proper accommodations for visiting teams, and care of our men on the road should not be forgotten. Thus, when considering the success of last season do not forget this man who made it possible by his careful management.

## ROBERT BUCKINGHAM WHITNEY
### CAPTAIN

Our team was seriously handicapped during the season because its captain and pitcher was forced to sit on the bench. His "salary wing" had been injured while he was playing football, a fact, which accounts for his inability to twirl. He had always done creditable work on the mound, being credited with victories over such teams as Princeton and West Point. Although not an active player, Captain Whitney is to be congratulated for the advance made in baseball. His coaching was very valuable, and the Blue and White shall always remember this sterling player.

## EUGENE ELLSWORTH MILLER

### CAPTAIN-ELECT AND CENTERFIELDER

"Gene" really came to Penn State expecting to make good in baseball more readily than football, but as we all know he has been extremely successful in both. During his first two years here "Shorty" did not play regularly, but last year his work showed that he was a polished outfielder. As lead-off man in the batting order his bunting and slugging was all that could be desired. His speed, coupled with his good judgment, always worried the opposing teams. Since Wardwell has withdrawn from school Miller has been elected captain for the coming season and we are sure that he shall be a capable and inspiring leader.

## BENJAMIN REED HENDERSON

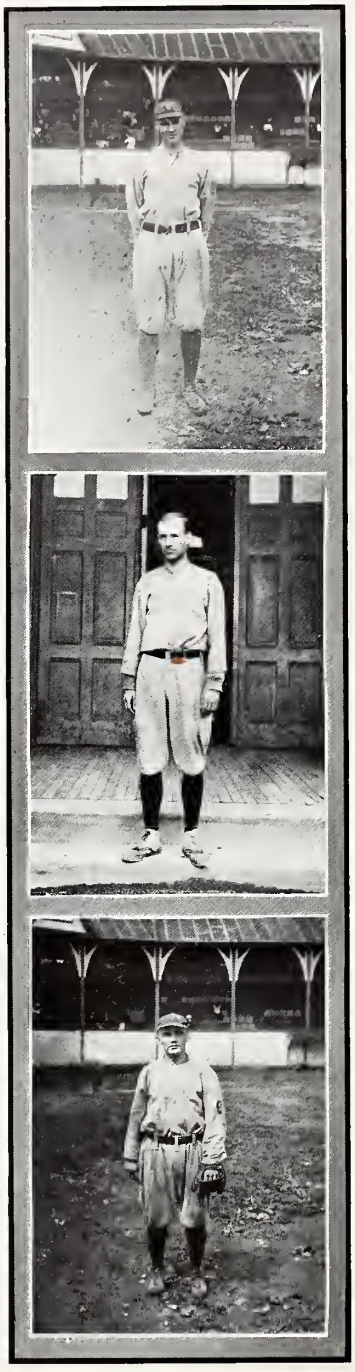

### CATCHER AND LEFTFIELDER

Interclass athletics have been a great place to develop varsity material, but never has a better man than Reed been advanced to the varsity. Previous to coming to Penn State he played for three years on the Westchester State Normal School team. His backstopping was of the stonewall order; his peppery conversation steadied his pitcher and disconcerted the batter. His playing in the outfield when he was shifted to that place showed that he could play any position. Add to these things Reed's batting and knowledge of baseball, and it is easily realized why he shall always rank high in our baseball Hall of Fame.

## EUGENE FRANCIS McKIBBEN

### LEFTFIELDER AND SHORTSTOP

"Mac" was one of the veterans of our team, and it was around "Mac" that our offense and defense was built. He was at home chasing flies in the outfield, or scooping them up at short. He hit the ball hard, but unluckily did not seem to be able to "put them where they ain't." Versatility was "Gene's" most characteristic trait, and the gap left by his graduation will be a hard one to fill, for during the major part of the season, he acted as field captain.

## CHARLES McCARGE MASON

**FIRST BASE**

When "Jack" Eberlein left the varsity, the Penn State rooters wondered where a man could be found to fill his place. A man versed in the intricacies of first base was needed, and Mason stepped forth and occupied the position in grand style. His hitting, fielding, and "pepper" were all that could be desired and showed the results of his previous experience gained at Allegheny High School. His southpaw allowed him to heave the pill across the diamond, and his timely clouts drove many runs across the pan. Due to his graduation, the first base position will again confront the coaches, and it will require a valuable man to fill the gap left by Mason.

## ROBERT HALL CRAIG

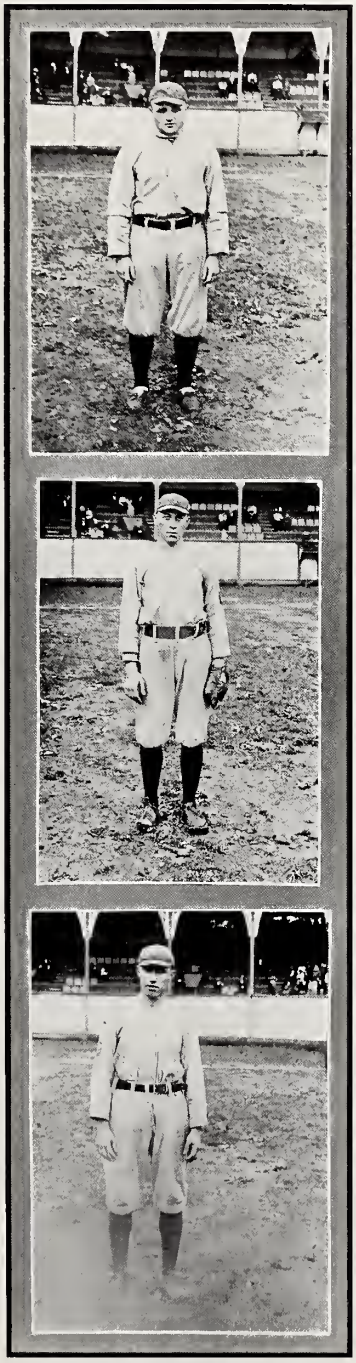

**SHORTSTOP**

"Bob" is one of those natural born ball players, for he can play either in the infield or outfield with equal facility. Craig was a member of the famous championship team of the Mercersburg Academy which went through the season of 1910 without a defeat. At Penn State "Bob" has played varsity ball for three years, being both an outfielder and infielder. At bat he is a dangerous man, and when on base he worried the opposing team because of his speed. Altogether, Craig ranks as one of our best diamond artists.

## PAUL MAXWELL HITTNER

**SECOND BASE**

This diminutive second sacker had no prep school "rep" behind him. His playing was not phenomenal but steady and consistent. It was not until he had served two years in the Interclass League that his value was fully appreciated. He fielded like a major leaguer and batted like a fiend. With the benefit of the experience gained last season we expect much from him this coming year.

## VIRGIL LUTHER CRAWFORD

### RIGHT FIELDER

"Doc" Crawford, our veteran outfielder, played his usual consistent game during the season. He could always be depended upon either to stop a rally of the opponents by a sensational catch or throw, or he would start a rally by giving the ball a ride to the track. Tyrone High School, where he prepped, can well be proud of him. "Doc" protects right field in a manner pleasing to Penn State rooters, and his work in the next two years should help to keep the Blue and White in the forefront all the time.

## HARRY EDWIN LIEBERT

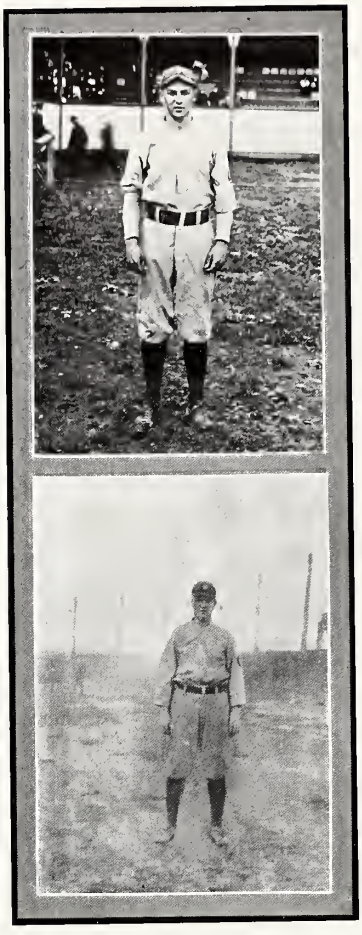

### PITCHER

When a pitcher was wanted to stop the batting rally of the opposing team, "Pete" was called upon. He learned his baseball at Northeast Manual and was a valued member of their team for two years. During his Freshman year, "Pete" was a member of the squad and the things learned then he has since put into practice. The fact that he has not lost a game on New Beaver Field evidences his ability as a twirler. His clout for four bases in the Albright game, when he scored the winning run, demonstrates that he is a finished ball player. His twirling should keep Penn State up where she belongs in Intercollegiate baseball for the next two years.

## GORDON ANTHONY VOGT

### CATCHER

Athletically, Vogt has made great strides on New Beaver Field, where he learned his football and baseball. In his freshman year he was second string catcher, and when Henderson was shifted to the outfield, Vogt filled his shoes very acceptably. His pegging to second was a delight to see, and he helped the pitcher out wonderfully by his steady playing. Vogt hit the ball hard, and timely, and was a fast man on the bases. With two years yet to play on our nine, Vogt should become very valuable to Penn State.

## ALBON HARLAN WARDWELL

**PITCHER**

"Wardy" came to Penn State after gaining a reputation for himself at Rockland High School where he pitched for two years. While twirling for Andover Academy he performed the remarkable feat of shutting out the Yale University with three hits. Soon after his arrival at Penn State, he made a hit with the coach by his hurling and has become our mainstay in the box. He was elected captain for the coming year, but has left school, and his friends who anticipated a successful season on the mound for him are disappointed, and his loss shall be keenly felt.

## FRANK LESLIE KELLER

**THIRD BASE**

Johnston High School in 1912 sent "Kel" to Penn State. At the local high school, Keller was the star football and baseball man for four years. In baseball, he was called upon to occupy the position left vacant by the graduation of Carson. His hitting and fielding were of first class order, and for "pepper,"—well, "Kel" was the life of our infield, and we are sorry to say that he will not be with us this year.

TRACK
S
Roy J. Dunkle

VARSITY TRACK TEAM

Clarke, Mgr. Hammitt Lewis Lamb Mabee Martin, Coach
Erb Elliott White
Keyser Armsly Lum, Capt. Leyden

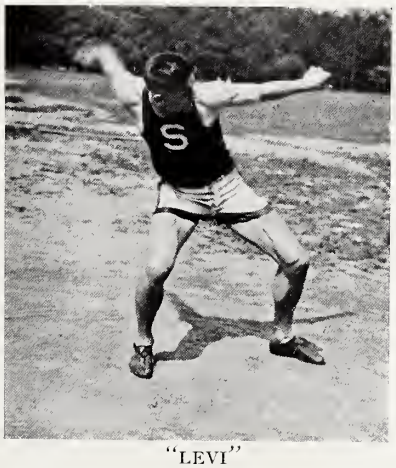

# Track Review

THE track season of 1913 was undoubtedly the best ever enjoyed by Penn State. The results of the past season showed the wisdom of selecting a trained efficient coach for track. From the first of the season until the end of the Carnegie Tech meet at Commencement Penn State made herself known more and more on the cinder path. The team was handicapped by the absence of Captain Lum, who was at the Forestry Camp most of the season.

For the Penn Relays at Philadelphia Coach Martin selected the following team to represent Penn State: Leyden, Erb, Piner, Keyser, Lewis, Horst and Fischer for the relays and Hammitt for the hurdles. However, the results at Penn were somewhat disappointing, for our team finished but fourth in the relays.

The University of Virginia, the Southern inter-collegiate champions, came to Beaver Field on May 10 for our first dual meet which resulted in the score Penn State 59½—University of Virginia 49½. The visitors showed up stronger in the sprints but in the runs and field events the Blue and White completely outclassed the visitors.

"LEVI"

It was in this meet that Armsby by going 5 feet 8½ inches in the high jump broke the record and gave evidence of being a consistent point gainer for Penn State. Piner, Leyden, Mabee, Keyser and Lamb won their events.

Coach Martin on May 26 invaded the camp of the Carlisle Indians and brought home the Indian's scalp. By a decisive victory of 75-37 over the Carlisle Indians, considered by many authorities to have the second best collegiate track team in Pennsylvania, our right to track recognition was gained. The feature of this meet was the performance of Armsby who cleared the bar at 6 feet 1 inch in the high jump. Leyden, Keyser, Lamb, Piner and White again did excellent work for the Blue and White.

The Western Pennsylvania Inter-collegiate Meet was held at Pittsburgh. On a slow, heavy track the Blue and White broke some records and romped home with the meet by capturing 10 firsts out of a possible 15, defeating W. & J., Allegheny, Pitt, Westminster and Geneva in the order named. A new record of 10:13 4-5 was set in the two-mile by Keyser, and Lamb made a record-breaking heave of 41 feet 3 inches in the shot-put. Piner and White starred in the dashes and Leyden captured the half mile. Both hurdles were won by Hammitt, Armsby and Barron also scored in these events. Our relay team of Barron, Erb, White and Leyden won the mile relay from Pitt.

Other point winners were Lum, Lewis, Mabee and Elliott. The totals for the meet were Penn State, 75½; W. & J., 30; Allegheny, 24; Pitt, 20; Westminster, 8; Geneva, 4.

Four men were selected by Coach Martin to represent Penn State in the Inter-collegiate at Harvard on May 31. Keyser by finishing fourth in the two

ONE HUNDRED YARD DASH

miles scored Penn State's only point. Hammitt qualified in the hurdles but did no place in the finals. Leyden and Armsby were entered but failed to score.

The season was wound up by defeating Carnegie Tech 93½ to 18½ before the usual Commencement crowd. As the score indicated this proved to be a very easy meet and closed Penn State's most successful track season. Leyden in this meet established a new half mile record by lowering it to 1—59 2-5.

It was in track that Penn State showed its greatest developme..t during the past season. Former rivals have been completely outclassed and in order to make meets more interesting in the future better competitors must be secured. It is to be hoped that interest in track will continue to increase and with "Bill" Martin retained as coach for next season better things can be expected. To both Coach Martin and Captain Lum must be given credit for bringing to close such a successful season, and to Captain Keyser we extend best wishes for a continuance of this interest and a successful season in 1914.

HAMMITT BREAKING HURDLE RECORD

## WILLIAM MARTIN

**COACH**

"Bill" completed his first year as track coach at Penn State and turned out a truly wonderful team. His charges found it easy to triumph over ancient track rivals. When at college "Bill" was an athlete of note, and undoubtedly his greatest feat on the cinder path was the winning of the 100-yard dash at the Penn Relays of 1909, in the fast time of 9:4. He has had wide experience in both football and track coaching, and his services during the past football season were very valuable. During the coming season Penn State expects to see "Bill" develop a still greater track team to wear the Blue and White.

## HUGH McCORMICK CLARKE

**MANAGER**

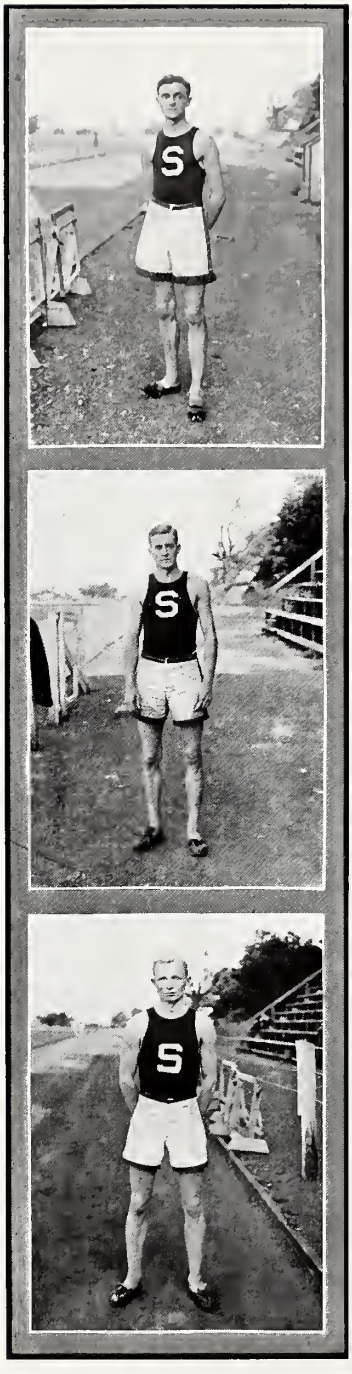

A large share of the credit for the wonderful success of our track team this year is due to Hugh Clarke, the manager. Although his work is not so evident to the student body, the manager has many duties to attend, and Clarke is to be commended for the worthy manner in which he did his part in making our track team a success.

## HERMAN ARTHUR LUM

**CAPTAIN**

"Herman" came to Penn State from Central Manual Training High School, Philadelphia. He was a very valuable track man at prep-school and soon showed his worth here. His work in the mile, in which he holds the local record, has stamped him as one of the best men who ever represented Penn State on the cinder path. Although he was absent a part of the season, he is to be congratulated on the great advance made in track work during his captaincy.

## CLARENCE ALBERT KEYSER

CAPTAIN-ELECT

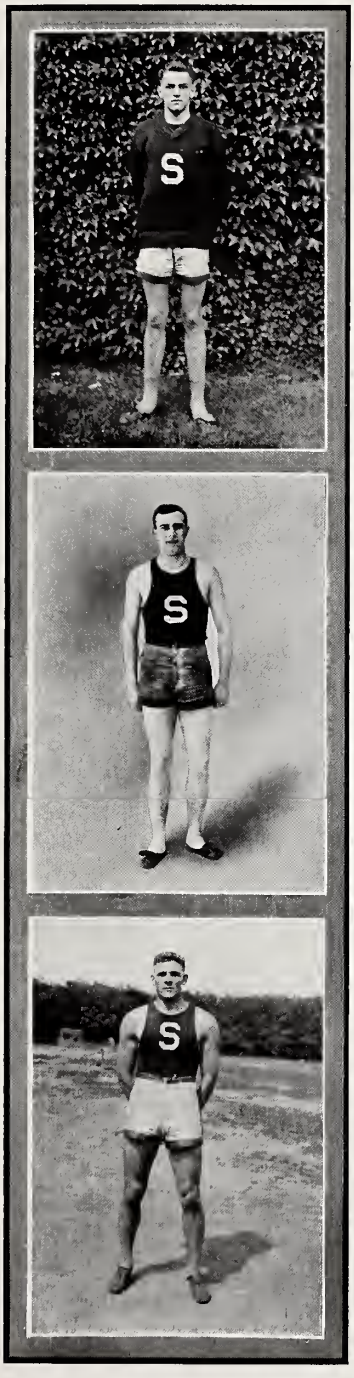

When at the Central Manual Training High School of Philadelphia, Keyser ran the cross-country, but his best work at Penn State has been in the two-mile event, in which it was no uncommon thing to see him leading the field by a half a lap. At the Intercollegiates he was our only man to score, and in the Western Pennsylvania Intercollegiate meet, on a heavy track, he broke the two-mile record. To him as Captain-elect we extend our best wishes for a very successful track season at Penn State.

## EDWARD McCLELLAND ARMSBY

The local High School claims Armsby. After two years of unsuccessful endeavor to make the State Track Team, he surprised all by breaking the high jump record twice in a season. At Carlisle he cleared the bar at 6 feet, 1 inch, a record which should stand for some time. His services will undoubtedly be missed by the Blue and White this season.

## RAYMOND MALCOM MABEE

This sprightly looking fellow came to Penn State from Williamsport High School. Ever since his debut here he has been a valuable track man and is the present holder of our pole vault record. Always to be depended upon and a sure point winner, his graduation means a heavy loss for our track team.

## JAMES ALEXANDER LEYDEN

"Jimmy" prepped at East Springfield, Mass., High School, and while there was a member of the track team on which Drew, the famous Olympic sprinter, ran. The Blue and White always counts on Leyden to win the half-mile, and seldom indeed has he failed. His best work last season was in the Carnegie Tech meet, in which he broke the half-mile record. No doubt this will be his banner year on the cinders, and he should help carry the Blue and White to victory over many of her rivals.

## GEORGE KRAUSE ERB

"George" is a native of Lebanon, where as a High School boy he was one of the mainstays of the track team. His development here has been gradual but sure, and his work during the past track season has shown the results of careful training. He flashed across a winner in the quarter-mile, in several meets, and will undoubtedly repeat this performance next season.

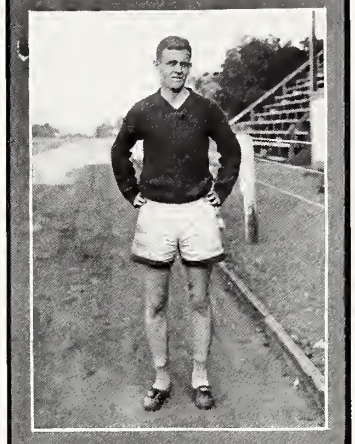

## LEVI LORENZO LAMB

In track Levi is the same dependable man that he is in football and wrestling. In every meet he manages to score 10 or 15 points due to his ability to heave the hammer, shot or discus farther than his opponent. Lamb has developed wonderfully during the past two years, and it would not be a surprise to see the big man counted as one of the best weight men of his day in the college world.

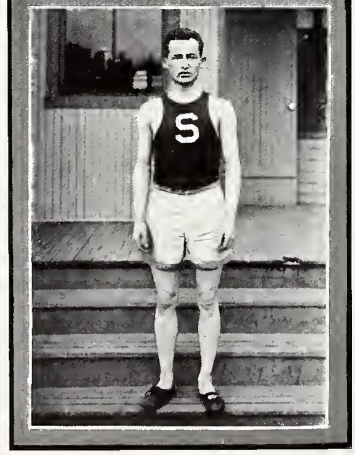

## JAMES AMBROSE PINER

In the sprints of the past two seasons Penn State has been represented by Piner, and he generally breaks the tape a winner. He came to us from East Tredyffrin High School, where he was the entire track team. Since coming here he has scored many points for the Blue and White in the dashes, and is equally dependable in the mile relay.

## EUGENE PHILIP HAMMITT

No small factor in the success of our track team was our hurdler, Hammitt: In practically every meet he scored from 5 to 10 points, demonstrating his ability to show his heels to his opponents while taking the hurdles. His training was secured at Mercersburg Academy, where he was captain of the track team and a member of the relay team on which "Ted" Meredith, of Olympic fame ran. In the Middle West Interscholastic meet of 1912 he finished first in the hurdles. He has already broken our low hurdle record and much is expected of him in the next three years.

## WILLIAM HOWARD WHITE

At Mt. Carmel High School, White was the mainstay of the track team, and on coming to State in the fall of 1912 he proved to be the surprise of the track season of 1913. By his consistent work he has to be classed as one of our best men. In two of the meets he romped home a winner in the 100-yard dash, and pushed the winner in the 220. Although he was slightly inexperienced when he came here, careful coaching has developed him into a first class sprinter, who should do much to increase our honors on the cinder path during the next three seasons.

## Victory

Come now, class men, let us sing,
Loyally support the team,
We're here to-day with our colors gay,
Ready to win the fray.
Whether it be Pitt or Penn, Harvard
or Cornell,
Play the game every man,
And we will win again.

CHORUS

Fight, fight, fight, for the Blue and
White,
Victory will our slogan be,
Dear Alma Mater, fairest of all,
Thy loyal sons will obey thy call,
To fight, fight, fight with all their might
Ever the goal to gain,
Into the game for Penn State's fame,
Fight on to victory.

*James A. Leyden '14.*

VARSITY WRESTLING TEAM

Hess, Mgr. Yerger Lamb Sayre Shollenberger, Coach
Long Crockett Jones, Capt. Kirk Hill

# Wrestling Review, 1914

ITH the passing of such stars as Captain Shollenberger, Very and Fulkman, the ability of Penn State to maintain the wonderful record in wrestling that she had attained in the past was questioned. Added to the loss of these men came the statement from Coach Lewis, that owing to the stress of regular class work, he could not give his services regularly as coach. It seemed as though a crisis in wrestling was at hand. The crisis was at hand and was met in a manner becoming the record of Penn State in wrestling. Five one-sided victories proved the superiority of Penn State over any college in the East. But one fall and one decision were rendered against the Blue and White matmen in the thirty-five bouts, making the greatest record of any Penn State team up to the present time. How was this accomplished?

First and foremost must be considered the coaching received by the Blue and White matmen. When it became known that "Doc" Lewis could not coach the team, the management looked to Penn State Alumni for a coach. The result was the securing of the services of Ex-Captain Shollenberger to look after the interests of Penn State on the mat as coach. His success was even beyond the hopes of the most optimistic. Acquainted with the Penn State system, customs, and records, he was not at loss as regards to the best methods to put into practice to produce a winner. Much of the credit for the success of the season must go to this former winner for the Blue and White.

MANAGER HESS

Another factor that must be considered is the great interest shown by the Penn State student body. The squad was the largest in the history of wrestling at Penn State, while the competition for places on the team was never quite so keen. With the possible exception of the heavyweight class, no man was ever sure of his position on the team. The frequent remarks by men on the team that they would rather go two intercollegiate meets than one set of the finals for the team, shows the situation very clearly. Back of the team and the squad stood the student body bigger and stronger than ever for the mat game at Penn State. Their support, both morally and financially, meant a success for the team and season as a whole.

Captain Jones was injured early in the season, so that he could not aid materially in bouts won, but his experience and fighting spirit were always behind the team, and he must be counted as one of the factors in the success of the team. Manager Hess proved to be another factor in the carrying through of a successful season. Starting with a deficit from the preceding year and up against the proposition for the first time of hiring a coach at a stated salary, he came out with all debts paid, and enough surplus to put the season under way next year. As president of the Association, he also took the lead in formulating and bringing about the adoption of the rule whereby any man winning all his regularly scheduled bouts shall receive his straight "S", a rule which is bound to be an added inducement for more men to try for the team, and if on the team to do his utmost to win all his bouts. The schedule was a difficult proposition for, in the Navy, Lehigh, and Indiana, three of the strongest teams of the East were met and defeated, while prospects are bright, from work done this season, for a bigger, better schedule next season.

CAPTAIN JONES

### Interclass Meet

The season was virtually opened by the Second Annual Interclass Championship Meet, which seems to have established itself as a regular event. Class rivalry tended to bring out many candidates, and each team was well represented. The Juniors won with 29 points, the Sophomores getting second place with 19 points, the Seniors were third with 8 points, while the Freshmen failed to gain a point. The training table squad was selected from the results of this meet.

### Navy Meet

Navy was the first team to topple before the prowess of the Penn State grapplers. The "Middies" have the distinction of defeating the Blue and White in one of the two defeats that have been marked up against the local school. They

also have a reputation for always having a good team, and this season was no exception as shown by the fact that they defeated Cornell, Princeton, and Pennsylvania by very one-sided scores, but they were not equal to the task of turning the trick on Penn State. Decisions won by Long, Kirk, and Sayre with fall gained by Cockett and Lamb gave the Blue and White victory by a good margin of points.

COACH SHOLLENBERGER

### Pitt Meet

Pittsburgh was the first home attraction. Coming at the Mid-Winter House Party time, they were greeted by probably the largest crowd in the history of wrestling at Penn State. The spirit was never better. Even with greater seating capacity arranged, the Armory could scarcely accommodate the throng that greeted the Blue and White team in the opening meet. Pitt fought gamely, but was not equal to the occasion, three decisions and four falls giving Penn State an easy victory.

### Lehigh Meet

Lehigh, always a rival and opponent worthy of Penn State's strength on the mat, came next. They fought Pennsylvania to a tie score and barely lost to Cornell, but proved no match for Penn State's skill and strength. Long and Kirkhuff featured the meet in a twelve minute draw of good hard fighting, Bailey earned a draw in the light heavyweight class, thus making Lehigh's total of four points. Crockett and Hill with decisions, and Kiek, Yerger, and Lamb with falls gave the Blue and White a total of twenty-seven points.

### Indiana Meet

Indiana University was the next opponent of Coach Shollenberger's team. The Westerners with largely a veteran team did not make the showing that they did last year although they fought hard. Williams and Davis earned draws for Indiana; Long and Kirk for Penn State earned decisions, while Hill, Yerger, and Sayre gained falls for us, making our score twenty-seven points.

### Lafayette Meet

In the final meet of the season athletic relations were opened with Lafayette College. The Lafayette representatives have had but one year's experience in In-

tercollegiate Wrestling and showed lack of science. They fought hard, but could not withstand the superior training and wrestling knowledge of the Blue and White. Sayre secured a decision while the other members of the local team won by falls; Lamb making a record of 13 seconds in his bout.

With the closing of the season is marked the passing of two varsity men, Captain Jones will graduate as will also Sayre, the 175-pound representative. Due to the inability of Jones to wrestle this year his place is already well filled, but not quite the same can be said of Sayre. The husky football guard has developed into one of the best 175-pound mat men in the college ranks today, and his place will be hard to fill. He was a sure winner this year, getting two falls and two decisions. Kirk won the distinction of being the first man to win the straight "S" by winning all of his bouts. In five meets he secured two falls and three decisions. Long won two falls, two decisions, and a draw, while Lamb had four falls and a draw; Cockett had two falls and two decisions to his credit; Hill won two decisions, two falls, and lost a fall, while Yerger lost a decision and won four falls. The total shows four draws, eleven decisions, and eighteen falls, as against a loss of one fall and one decision.

# BASKET BALL

## Basketball Review, 1914

BASKETBALL this season was marked by the beginning of an Intercollegiate League in Pennsylvania. The State was divided into three sections: Lehigh, Swarthmore, and Franklin and Marshall represented the Eastern League, and in this one the championship, unfortunately, was not decided because of the inability of Lehigh and Swarthmore to play off a tie game. Albright, Bucknell, Gettysburg, and Susquehanna were in the Central League, and in this one Albright easily won the championship. However, in the Western League, composed of W. & J., Penn State, and Pitt, there was a hard fight, but W. & J., finally, by defeating State, secured the lead. The three championship teams were unfortunately unable to get together, and the championship of the State was not decided.

Penn State was seriously handicapped by the loss of Captain Hartz, Mauthe, and Craig. Another setback to the team was the fact that no good men were found in the Freshman class. Nevertheless, Coach Haddow and Captain Binder developed a good team from the material. The team played erratically on a few occasions, but on the whole they had no trouble defeating their opponents very handily. The most discouraging part of the season was the loss of the W. & J. game on our own floor by two points. This victory not only gave W. & J. the series over Penn State, but also the championship of the Western League. Eight victories and four defeats is the Penn State record for the year. In addition to this we might mention the fact that the Blue and White defeated the fast Swarthmore team on their own floor, and West Virginia Wesleyan, the intercollegiate champions of the South. These results go to show that the team, on the whole, was a good one.

MANAGER FLAGG

A factor that largely entered into the success of the season was Coach Haddow. Handicapped by lack of material, he nevertheless showed himself to be the

CAPTAIN BINDER

man for the job, and welded out of inexperienced men a quintet which made a record to be proud of. Captain Binder was easily the stellar performer. His shooting both from the floor from the foul line was all that could be desired. His judgment and generalship are to be commended, and Penn State is certainly proud of her 1914 floor leader. Captain-elect Park is certainly the man for the position. While not a phenomenal player, nevertheless, Park has in his two years on the varsity played basketball that has been of first rank. Under his leadership Penn State can look forward to a successful season. The playing of Jester at center was the best seen on the local floor. He was the surprise of the season, and he surely made good with a vengeance. Our defensive playing was taken care of by Hay and Savery. That their work was well done can easily be seen by noting the small number of field goals made by our opponents. Metzger and Wilson were also big factors in the success this season. Although not regulars, nevertheless, they were always ready to get into the fray and do their best, and that they were effective is shown by the fact that Coach Haddow called upon them often. Manager Flagg is to be commended for the able manner in which he managed the affairs of the season.

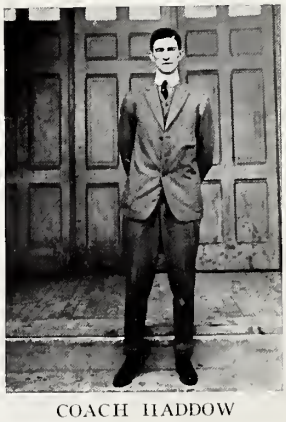

## Western Trip

On the Western trip three games were played; the games with Pitt and W. & J. being league games, and the other with Westinghouse Club being a filling-in game. The Westinghouse team was met and defeated by the score of 41-27 in a slow but interesting game.

On the next night W. & J. triumphed over the Blue and White in a hard fought contest. Jester, by dropping the ball through the basket for four of the seven field goals secured by State, proved that he was to be a valuable man. W. & J. was particularly strong on the defense, as was demonstrated by the fact that our forwards got but one goal each. On the following night Pitt was met in the third and final game of the trip. The game was characterized by general roughness on the part of both teams. Our team showed the effects of the continuous playing, and Captain Binder was forced to leave the game the first few minutes of play. However, our team proved to be the better, Hay and Metzger doing good work on the defense and our husky center, Jester, playing his usual good game. This trip was characterized by improvement in team work and the wonderful development of Jester. With a record of two games won and one lost, Penn State had done well.

## Eastern Trip

This trip was considered to be a very successful one for the Blue and White. We caged two victories in three games. In a fast, rough game F. & M. was defeated, 41-28. Captain Binder played his usual good game, particularly on the defense. Swarthmore, victorious over Penn on Penn's floor without giving Penn a field goal, was next met. Penn State went right after them and swept them off their feet, defeating them, 38-26. The Lehigh game was a heart-breaker. For 35 minutes the score was a tie, but Lehigh, by caging four goals in quick succession, got too big a lead to be overcome and were returned victors. There

COACH HADDOW

were no individual stars on the trip. Binder, Parks, and Jester playing their usual good game. That our defensive work was very good is demonstrated by the fact that McKissick, Swarthmore's star forward, was unable to score.

### Home Games

Juniata College opened the home season and sprung a surprise by defeating the Blue and White by a score of 24-20. The game was well fought and the teams were well matched, but Penn State was slightly inferior in general team work and shooting. West Virginia, champions of the South, invaded Penn State for the second game and were decisively defeated. Our men played a much better game than they had the previous week. Binder, with four field goals and ten fouls out of twelve chances to his credit was easily the star of the contest. Park played well, securing four field goals, and the work of Jester at center could not have been improved upon. Captain Neale and Heavner were the stellar performers for the visitors, Neale being especially dangerous at all times. Gettysburg was the next team met on the local floor; this game being preceded by the Western trip, upon which our team showed considerable improvement. The visitors were completely outclassed at all stages of the game and our men, especially Parks and Jester, did good work. Carnegie Tech proved to be rather easy, and Penn State had no trouble in defeating them, 50-25. Binder, Park, and Metzger starred for the Blue and White, while Tumpane and Colwin proved to be the visitor's mainstays. Pitt came to State expecting to get revenge, but the Blue and White swamped them with an avalanche of field goals in the first half, during which our guards prevented them from scoring a field goal. However, Pitt showed a decided improvement in the second half and gave quite a scare. Gloom settled down on Penn State after the W. & J. game, when the latter team for the second time defeated us. The Blue and White tossers led for the first half, but in the second half were unable to pierce the defense of W. & J., and for some reason or other our team work was lacking. W. & J. on the other hand came up from behind and secured a two point lead which our boys could not overcome. Captain Binder, by his scoring, starred for Penn State, while the guarding of Braden for W. & J. was exceptional. By losing this game, Penn State not only lost another game to W. & J., but lost the championship of the Western Pennsylvania Intercollegiate League.

## Review 1913-1914

Brief History of the Development of the Sport at Penn State.

SOCCER was introduced at Penn State in the spring of 1911. In June of that same year an inter-class scrap was held between 1913 and 1914. Since then the Freshmen-Sophomore game has become an annual affair.

At the beginning of the following term Soccer was again taken up and at this time it was made a Varsity sport. A team representing the college took a trip which comprised four games all in the vicinity of Philadelphia. In the fall of 1912 a similar trip was taken and like success was met with.

However, the year 1913-14 marked the most apparent advancement along the Soccer line. In accordance with the annual custom a fall trip was again taken. The funds necessary for the defraying of the expenses of the fall trip had in previous years been secured from one of our alumnae who was always greatly interested in the development of Soccer at this institution. Contrary to the usual custom no outside help was solicited for this year's trip as the Soccer enthusiasts were anxious to put the sport on a self supporting basis. As a result the expenses of this trip were met by a loan from the Athletic Association under the condition that the loan be refunded the Athletic Association at the completion of the spring schedule.

Out of the three games played only one was played in a good field, name'y the Girard game. The Westtown game was played in a wet and soggy field. The State team had the better of the argument all through the contest but owing to the slippery condition of the ball the home team was able to drive one through our goalkeeper. When the time drew around for the Haverford game, the Penn State team presented a badly crippled appearance after the two previous strenuous games. The Haverford team showed the advantage of freshness and the services of a regular coach. The absence of Captain Savery and Half Back Tobin from the lineup in these games was keenly felt.

Contrary to the custom of previous years a spring schedule is being drawn up. Negotiations are being made with such teams as U. of P.; W. V. U., Haverford; Lehigh and other teams of this calibre.

The Soccer team will in all probability apply for admission to the Intercollegiate Soccer League at its annual spring meeting in 1914. This league is made up of the following teams: Harvard; Columbia; Yale; Cornell; U. of P.; and Haverford.

Besides the establishment of Soccer as a competitive sport, the sport is being rapidly adopted by the Department of Physical Education as essentially a recreative sport. All indications point to a splendid future for Soccer at Penn State.

**SOCCER SCORES**

Davis Schroeder Keyser Leyden

## Cross Country

COACH MARTIN selected Staiger, Leyden, Horst, Hunter and Schroeder to represent Penn State at the Annual Inter-collegiate Cross-Country run held at Traver's Island, New York City. Running under adverse conditions and in a fast field the Blue and White finished ninth. Credit is due Coach Martin for the increasing interest that is being taken in this new line of sport, and the indications are that cross-country will continue to grow in popularity in the Nittany Valley.

## Tennis Review

TENNIS was seriously handicapped this past season by unfavorable weather conditions which prevented a sufficient amount of practice. Nevertheless, the team succeeded in securing several victories. Rain prevented a meet with Haverford, one with the University of Pittsburgh at Pittsburgh, and the doubles in the meet with Swarthmore.

The first tennis of the season was played in Philadelphia with the University of Pennsylvania where Penn State received a 5-1 defeat. Nevin obtained a very creditable victory over Jones, while Nevin and Hay in doubles only lost to Jones and Kennedy after contested match. At Swarthmore Nevin, Hay, and Jones won in singles, the last turning into a victory after the first set had been lost 6-1, and the games at 4-0 in the second set.

On the western trip meets were won from Carnegie Technical School and from the Westinghouse Club. In both cases we secured success in the doubles and in two matches in the singles.

The only meet at home was one late in the season with the University of Pittsburgh. Although we lost 6-0 the matches between Irish and Jones and their respective opponents were closely contested.

# LACROSSE

## Lacrosse Review

LACROSSE made its first appearance at Penn State in the spring of 1913. At this time a Lacrosse Association was started to promote the formation of a team to compete in Intercollegiate Lacrosse. No games were expected the first season, but the squad made such rapid progress that the graduate manager consented to a game with the University of Pennsylvania providing that enough tickets could be advanced to defray expenses. Great credit is due to Dave Harrower, the first Lacrosse manager, for the manner in which he put this, Penn State's first game of Lacrosse, through.

The Penn game proved a success in every particular. Our team came out on the long end of the score and the gate receipts were large enough to cover all expenses. Final score, 4-3.

The Saturday before Commencement another game was played with the Bronx Lacrosse Club of N. Y. C. This team was composed entirely of old college stars. State again held her own, outplaying the Bronx team almost throughout the entire game, but finally being overtaken in the last part of the second half due to a shift on the part of the Bronx team that our fellows through inexperience did not know how to meet. Final score, 3-3, the tie not being played off to allow the Bronx team to catch their train.

This game ended the first Lacrosse season at Penn State. The prospects for next year are bright as the game is now receiving the enthusiastic support of the student body both financially and in the large number of candidates that have reported to try out for the team.

The coming season's games will be played with some of the best teams of the east, such as Carlisle, Swarthmore and Penn. Games with these teams undoubtedly the best in the state, besides many others, hard training will be necessary to win.

In 1915, if the coming season is a success State will endeavor to have our team affiliated with the Intercollegiate Lacrosse League and thus be in a position to obtain the services of a regular coach in order to carry on effectively the work started by the members of the Association.

Next fall there will be inaugurated a class league to be composed of the upper three classes. Every Spring the Sophomores and Freshmen will meet in their annual contest. During the past season four of the men were lost by graduation: Wilson, Ehrhart, Harrower and Atkinson.

# Interclass Football Game

ON November 22 the Freshmen secured sweet revenge for the defeats which they had suffered at the hands of their class enemies. The 1917 football team outclassed that of the 1916 class more than the score indicates. The contest was characterized by hard stubborn fighting. The first year men played a brilliant game, but lost several chances to score because they either fumbled at inopportune times or because of the stonewall defense of the second year men. In the second quarter after an exchange of punts the freshmen by forward passes and line plunges carried the ball to the five-yard line, and Kratt took it over; the goal was kicked by Thomas. There was no more scoring until the fourth quarter when Haven attempted to punt from behind his own goal, but Thomas, right end on the freshman team broke through, blocked the punt, and fell on the ball for another touchdown. For the freshman, Captain Thomas and Kratt starred; Burns showed up well in running back punts, and every other freshman played a good game. Dippe was easily the star sophomore, and both Captain Haven and Kolbus played a consistent steady game. Thus, by defeating the sophomores the freshmen won their first interclass contest and earned the right to carry canes.

## Line-up

| 1917—12 | | 1916—0 |
|---|---|---|
| Trainer | *Left End* | Marlin |
| Oberle | *Left Tackle* | Flick |
| Fair | *Left Guard* | Teas |
| Painter | *Center* | Watson |
| McQuoeren | *Right Guard* | Maier |
| Diehl | *Right Tackle* | Clark |
| Thomas (Capt.) | *Right End* | Scott |
| Burns | *Quarterback* | Kolbus |
| Edgerton | *Left Halfback* | Raynor |
| Richards | *Right Halfback* | Haven (Capt.) |
| Kratt | *Fullback* | Dippe |

**SUBSTITUTIONS**

1916—Farley for Scott; Scott for Farley; Benner for Clark; Jeffrey for Scott; Johns for Raynor; Kester for Benner; Frear for Haven; Taylor for Johns.

1917—Fleming for Richards; Sarkoff for Edgerton; Wilson for Fair; Hollenbaugh for McQuoeren; Humble for Trainer; Richards for Fleming.

Referee, Miller; Umpire, Clark; Head Linesman, Bebout.

Touchdown, Kratt, Thomas. Goal from Touchdown, Thomas 2.

## 1916 Wrestling Team—Winners

Chambers Taylor Grimes
Pickett Baird Klingensmith Brown

## 1917 Wrestling Team

Phillips Leam
Fritz Bier Davey
Hoffer Newell Griffiths

# Interclass Wrestling Meet

|---|---|---|
| Baird | 115-pound class | Hoffer |
| Klingensmith | 125-pound class | Davey |
| Brown | 135-pound class | Newell |
| Pickett | 145-pound class | Fritz |
| Chambers | 158-pound class | Griffiths |
| Grimes | 175-pound class | Leam |
| Taylor | Heavyweights | Phillips |

*Referee*—Lewis.
*Judges*—Park '12, Grumbling '14.
*Timers*—Dr. Stecker, Prof. Wright.

The Sophomores found the Freshmen rather easy in the annual Interclass Wrestling meet by defeating them 7-0, securing five falls and two decisions. Chamber '16 had the record fall by throwing his opponent in 43 seconds. This wrestling meet showed that Penn State need have no fear for her wrestling supremacy for some time.

FLAG SCRAP

PUSHBALL SCRAP

CIDER SCRAP

## Flag Scrap

On May 3, 1913, at 1:30 P. M., the class of 1915 fought their last interclass contest, the Flag Scrap. The former method of conducting the fight had been done away with, and one formulated by a committee of the Student Council had been substituted. In this scrap the Sophomore Class was placed one hundred yards away from the pole and at a given signal made a rush for the pole. The Freshmen had no trouble erecting the pole, after which their men massed around in order to keep the second year men away. The scrap was characterized by fifteen minutes of hard fighting which, however, was one-sided because the first year men had all the advantages. At the end of the period the flag of the class of 1916 was flying and one more class had earned the right to have a class pennant.

## Pushball Scrap

On October 4, 1913, the two underclasses met in their first fight, the annual Pushball Scrap on Old Beaver Field. The Sophomores reached the field first and formed a gauntlet for the 1917 men, but in this were outgeneraled. In numbers the first year men had a slight advantage over the 1916 men. Both sides fought hard to secure the advantage at first, but the experience of the Sophomores began to tell and they soon had the ball over for a score. Both classes fought hard throughout, but it was the last period before the "greenies" showed up to any advantage. In this period they frequently carried the ball into the enemy's territory, but did not have the punch necessary to push the ball over. The final result of 1916—9; 1917—0, was due to the experience of the "Sophs" and the inability of the "Freshies" to keep their topmen up.

## Cider Scrap

By a score of 54-45, 1916 defeated 1917 in the Cider Scrap, fought according to the new rules laid down by the Student Council. The radical changes in the scrap were the enlargement of the diameter of the barrel to 6 feet and the shortening of the time to 15 minutes. In the first few minutes the scrap waved hardest, each class exerting its best efforts to gain the advantage. Increased space allowed for more men to get at the barrel. Gradually, however, the Sophomores pushed the Freshmen back and gained the advantage points. It appeared as though the Freshmen had won, but on counting it was found that the two year men had once more demonstrated their ability as Cider Scrap fighters while the "greenies" can be credited with putting up a game scrap.

NEW DINING ROOM

FACULTY PARLOR

JUNIOR COOKS

This year for the first time, the Home Economics course has been arranged that girls in their Junior year may specialize in either Domestic Science or Domestic Art, taking instead of two years of each, three years of the chosen subject. The Junior Cooks this year, under the direction of Miss Perry, are continuing the work of the Sophomore year in the preparation of foods. In addition they plan menus for breakfasts, dinners and suppers, working out their nutritive value and cost. Each girl during the year plans, cooks and serves a breakfast, a dinner and a supper in the senior practice dining room. Practical experience is also given in demonstrations before an audience and in assisting the seniors in their teaching.

The present arrangement of three years specialization makes possible a wider knowledge and a greater practical experience and leaves the girls better fitted to follow efficiently whatever line of Domestic Science they may undertake.

The Young Woman's Christian Association, under the enthusiastic and efficient leadership of Mildred Ride, is fast earning the right to a place among the strongest college associations of the Eastern Central section. Its activities are broadening in every direction. Besides the regular Sunday evening meetings, the Wednesday evening prayer meeting, and the weekly Bible and Mission Study classes, Sunday Schools are maintained at different school houses near college with afternoon classes for boys and girls, mothers' clubs, and evening social clubs for young people. The regular Christmas party to the poor children of the neighborhood always proves a great success from the standpoint both of the girls and of the children.

A play is given every year, the proceeds of which go toward furthering the work of the association. For several years a liberal contribution has been made to the Summer Camp for girls in Canton, Pa., and this year for the first time a contribution has been made to the Y. W. C. A. recently founded in Buenos Ayres. A delegate was sent to the Kansas City Student Volunteer Convention and another to the convention at Geneva College. Last year a delegation of five was sent to Eagles Mere and this year we expect even more to represent us there.

Since 1910 the girls living in the college buildings have had the power of self-government. The officers of the association and the student council are regularly elected every year. They enforce the rules of the house and in co-operation with the Dean, Miss Lovejoy, makes such new rules as seem necessary.

9:00 a. m.—Annual Concert—College Cadet Band—Front Campus.
10:00 a. m.—Review of the Regiment of College Cadets by Major General Leonard Wood, U. S. A., Washington, D. C.—Beaver Field.
1:00 p. m.—Interclass Track Meet—Beaver Field.
3:00 p. m.—Baseball—University of Pittsburgh vs. State—Beaver Field.
7:45 p. m.—Concert—College Musical Clubs—Auditorium.
10:00 p. m.—Campus Singing—Senior Class—Senior Benches.

SUNDAY, JUNE 8

10:30 a. m.—Baccalaureate Sermon—Dr. Charles M. d'Aubigne, Pastor of the Reformed Church of Neuilly, Paris, France—Auditorium.
4:00 p. m.—Sacred Concert—College Cadet Band—Front Campus.
6:30 p. m.—Y. M. C. A. and Y. W. C. A. Meeting—Front Campus.
8:00 p. m.—Sacred Concert—Auditorium.

MONDAY, JUNE 9

10:00 a. m.—Class Day Exercises of the Class of 1913—Front Campus.
1:30 p. m.—Soccer Football—Sophomore vs. Freshman—Beaver Field.

2:00 p. m.—Track Meet—Carnegie Technical Schools vs. State—Beaver Field.
7:30 p. m.—Annual Meeting of the Board of Trustees—Carnegie Library.
8:00 p. m.—Junior Oratorical Contest—Auditorium.

TUESDAY, JUNE 10

9:30-10:30 a. m.—Alumni Business Meeting—Old Chapel.
10:30 a. m.—Annual Business Meeting of the Phi Kappa Phi Honorary Fraternity—Auditorium Foyer.
11:00 a. m.—Public Welcome to the Class of '63—Auditorium.
1:30 p. m.—Alumni Parade—Old Main to Beaver Field.
2:00 p. m.—Trustee Elections—Delegates, Old Chapel; Alumni, Room 114, Main.
2:00-3:00 p. m.—Alumni Stunts—Football Field.
3:30 p m.—Baseball—Chinese University of Hawaii vs. State—Beaver Field.
8:00 p. m.—"The Yankee Brigands" by the Thespians—Auditorium.
9:00 p. m.—Alumni Reception—The Armory.

WEDNESDAY, JUNE 11

9:45 a. m.—Commencement Procession—Carnegie Library.
10:00 a. m.—Commencement Exercises—Auditorium. Address—M. de la Rocca, Counsellor of the French Embassy, Washington, D. C.
2:30 p. m.—Varsity Lacrosse Game—Bronx Lacrosse Club of New York City vs. State—Beaver Field.
4:30 p. m.—Laying Cornerstone of the Students' Hospital.
5:00-6:00 p. m.—Reception to Commencement Guests—President's Lawn, West Campus.
8:00 p. m.-2:00 a. m.—Junior Farewell Reception to Seniors—Armory.

STUDENT AGRICULTURAL FAIR

# Pennsylvania Day

TO Penn State students and to all who are in any way interested in the institution, the celebration of Pennsylvania Day is an occasion second only to Commencement. This is a celebration similar to that of "Founders' Day" in privately endowed colleges and universities. The Pennsylvania State College was founded by the Federal Government and the Commonwealth of Pennsylvania, hence our Founders' Day is any day appointed to be celebrated by the people by whom and for whom the college was established. On this day is given the opportunity to persons from all parts of the state who are interested in public affairs to visit their state college and to inquire into its work and its needs.

This year surpassed all others in the number of distinguished guests who were present. A few of those present were: Governor Tener; His Excellency, Mirza Ali Kuli Kahn, Persian Minister to the United States; General A. J. Logan; Speaker Alter, of the House of Representatives; and W. H. Gaither.

At 9 o'clock on November the seventh the festivities were begun by the opening of the "County Fair," which was perhaps the most unique feature of the day. The Fair was held on Old Beaver Field under the direction of the School of Agriculture.

At 10 o'clock, General A. J. Logan, of Pittsburgh, and Governor Tener, reviewed the Cadet Regiment, comprising thirteen hundred students, on New Beaver Field. Both the Governor and General Logan expressed themselves as highly pleased with the efficiency of this department of the college.

Following the review, the student body assembled in the Auditorium, where exercises appropriate to the day were conducted. They constituted the formal "Founders' Day" commemoration, and embodied the whole spirit of the week-end celebration. Governor Tener presided over the assembly

and presented the speaker of the morning, the Persian Minister. Other speakers were President Sparks, Speaker Alter and General Logan. An excellent musical program was also presented. The College Orchestra and the "Farmers' Band" played several selections. In addition to the selections given by the Glee Club the audience had the pleasure of hearing for the first time, a Penn State girls' glee club, of thirty-five voices, directed by Professor Robinson.

The guests of honor and the trustees were entertained at luncheon at the Woman's Building. In the afternoon, the visitors witnessed a most brilliant game of football between Penn State and Notre Dame, the outcome of which gave to Notre Dame the distinction of being the first team to defeat the Blue and White on New Beaver Field.

The crowning social event of the day was the annual Pennsylvania Day dance, given in the Armory by the Senior class. The Armory was beautifully decorated and the affair was one thoroughly enjoyed by those who participated.

The week end came to a close with the play "The White Mouse," given by the Y. W. C. A. on Saturday night, and a concert given by the Cadet Band Sunday evening.

So Pennsylvania Day, 1913, passed into history, but the memory of the pleasures so bounteously bestowed upon both student and visitor will always be cherished and never be forgotten. All those who in any way contributed to the success of this week end may feel well content with the results of their effort.

# The Military Department

EVER since the founding of Penn State the military side of a student's life has gone hand in hand with his other work. The Military Department has progressed in a relative proportion to the other units of the institution which is to-day the largest college in the country.

From the origin of Penn State, the school has received appropriations from the Federal Government, and in turn has given its proteges a military education. The embryo of the present department was a small company, but as the institution grew so the military organization grew. One company was replaced by two and finally enough men were available for a whole battalion, and to-day we have a regiment, the number of which fluctuates from 1,200 to 1,400. The college receives an annual appropriation from the Government on condition that it preserve its practical and theoretical military instruction. A United States Army officer is detailed to take command of the regiment and to act as instructor of military tactics. For a number of years Mr. Maurice C. Allen, of the United States Ordnance department, has been acting as Assistant Commandant of Cadets.

The efficiency of the regiment is increasing from time to time because the men are realizing that they are serving the country in performing their military duties, and at the same time they are understanding more and more that they are benefitting the college and themselves.

At the present time there are three classes for instruction besides the regularly scheduled tactics for Freshmen. Class "A," a class for Senior commissioned officers; Class "B," a class for Junior commissioned officers; and a class for non-commissioned officers including Sophomores and Freshmen. At these schools map problems are studied, tactical situations are assumed, and a general plan of instruction is followed, using the Field Service Regulations and a number of other good texts as guides.

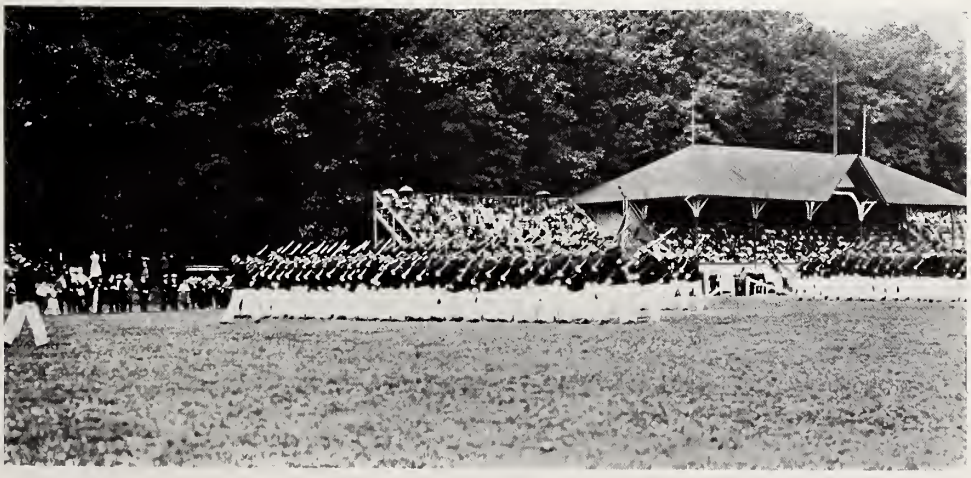

While the fall is devoted largely to company and battalion drill, a large part of the spring is taken up by combat and field exercises. The officers' club meets during the year in order to improve drill efficiency. The club also gives an annual military dance in the spring. Scabbard and Blade consists of an honorary military society which rewards merit and efficiency. The future appears bright for the Penn State regiment. It is steadily growing in numbers and the type of the Penn State Cadet is improving with each year.

COLONEL DOSE

The past few years the regiment has been reviewed by some prominent personages both at Pennsylvania or Founders' Day and at the June Commencement Season. Last June the regiment was honored by the presence of Major General Leonard H. Wood, Chief of the General Staff at Washington. Major General Logan, Brigadier General Stewart, and the French Ambassador were also distinguished military representatives. These men all spoke very highly of the regiment here at Penn State, and expressed the sentiment that a certain amount of military training was a splendid thing for the college man. The more efficient our military training becomes, the more efficient will be the college man in case of a great emergency or danger to our country.

It is the duty of every Penn State man to preserve the name of our regiment and to respect and honor its uniform, for it is a representative of our flag and country.

# Y. M. C. A. History

THE aim of the Y. M. C. A. during the past year has been as in other years, the greatest good to the greatest number. The work has gone on steadily from year to year until to-day it challenges the consideration of every thoughtful man in college. At every conference where our college has been represented, the Penn State delegation has attracted attention by the representative quality and size of the group. Much unjust criticism of our college has been removed by this intercourse with other college men. As an example of this friendly intercollegiate feeling, might be mentioned the Kansas City Convention, where the delegation from Princeton and Penn State stayed at the same hotel and had a common table, entertaining together some of the prominent men of the convention. As a result of this conference, many friendships have been formed and Princeton was represented at our Campaign held from Frebruary 3 to 7.

A day spent in the offices of the Secretaries will convince anyone of the value of the work. "Service" irrespective of creed, class or social position is the motto of the organization. A multiplicity of demands are continually being met. Employment, tutoring, furnishing books or perhaps helping someone to get a uniform for military drill, interesting themselves in homesick students, visiting the sick, counseling with those in trouble, talking with men about their life work, interesting others in definite Christian work, planning community welfare work, lending hearty co-operation to all student movements for a better and cleaner college life, answering letters from alumni who still write back for counsel and perhaps need encouragement in their personal life, are some of the duties that keep the secretaries busy.

Well can our college be proud of our Y. M. C. A., which is ranked among the leaders in student work of the country. Especially at a time when a good many people are regarding State institutions as centers of infidelity and indifference to all religious influence, it is a source of gratification to have our school pointed out, as it was recently by "Billy" Sunday, as one where Christian character is emphasized.

In September, 1913, "Joe" Platt, the associate secretary of last year, sailed to take up Y. M. C. A. work in China. His name adds another to the increasing number of Penn State men who are giving their lives to the service of their fellows. His successor is Herman Lum a graduate of the Forestry School of the class of 1913. The force has also been increased by the services of A. L. Dorwart, '16, who gives part time to the work of Freshmen Secretary. These men with the General Secretary, Mr. Buchman, and Mr. Humphries, a stenographer, make up the working force of the office.

Perhaps never before in the history of the association has there been a more efficient cabinet. A large part of the credit of this is due to the president of the association, Clarence Keyser. He, with the secretaries, was able to be at the Training Conference at Estes Park and the increased efficiency of the work shows that the expense of such training is well worth while.

The usual work of the year has gone on as in other years. Last Spring the student conference at Eagles Mere was notable on account of the presence of a large number of foreign students who were in this country to attend the World's Student Conference at Lake Mohonk. Penn State gave a reception for President and Mrs. Sparks at which these foreign students were present and told in short addresses their impressions of America and Americans. Dr. Cairns, of Scotland, made one of the hits of the evening as he pictured in imagination the college and compared the tireless, energetic spirit of our representatives to that of the old robber barons preying upon the defenseless peasantry of the surrounding country.

Very early in the school year Dr. Richardson, of Boston University, visited us and conducted a two days campaign in the interests of Bible study. A large number of students was signed up for classes and training a class for student leaders was begun. This work, however, is very much handicapped by the lack of teachers, especially for the fraternity groups. We were also very fortunate in having Dr. McComb, of the Emmanuel Church of Boston. Dr. McComb is one of the co-founders of the Emmanuel movement. He was here during the week of prayer and his messages did very much in strengthening the prayer life of men and in removing difficulties that college men have along these lines.

Other strong speakers of the year were Oliver Cutts, Dr. Seerley, Dr. Harlan Beach, Dr. R. J. Patterson, of Belfast, Ireland, the leader of the "Catch-My-Pal" movement in Great Britain .

The Campaign of February 3-7, led by Sherwood Eddy, was an event in the religious life of our American colleges. So effective was it, that not only did over 500 students stand up for a new Christian life but the effect spread to other colleges, carried by their representatives who shared with us the powerful messages we received. No athletic event ever aroused more spirit in the student body and never before was there such an impetus to broad-minded thinking, caused by the spirit of God which was among us, and by reason on the part of the speakers, rather than by emotion. It was only through the untiring efforts of the General Secretary for over two years that Mr. Eddy was secured. With him were associated some of the student leaders in our country and the foreign field.

The community service was continued. Sunday schools were conducted by students in all the small villages near State College. Deputation teams, three in number, worked in Boalsburg, Lemont and other towns in the vicinity. By this work some boys got a new idea of college men and the men themselves were strengthened in their religious life. A class for the study of English among the Italian laborers of the sewerage disposal plant was continued as long as practicable.

The best criterion of the work, however, must be measured in the response of men to a new attitude toward religion and a personal allegiance to Jesus Christ and His claims upon their life. That the work has not failed in this respect anyone will bear witness who was fortunate enough to be present at the report of the delegation that came back from Kansas City. More men and women than in previous years are going into definite Christian work and many others who will not go into definite work have gotten the vision of service in their lives and will consider it their duty as Christian laymen to see that the Kingdom of God comes in those communities where they labor.

# The Wilson Conference

A DELEGATION of seven men represented the Penn State Y. M. C. A. at the annual conference of the Eastern Union of Student Volunteers, held at Wilson College, Chambersburg, Pa., November 21 to 23, 1913. The total number of delegates present at this conference was about 150, representing about thirty institutions,—including preparatory schools, colleges, universities and theological seminaries. Splendid entertainment was provided for every delegate in hospitable homes throughout town.

Our delegation arrived at Wilson College on Friday evening. The first session of the conference was opened at 8 o'clock that evening, with Dr. Anna McKeag, President of the College, presiding. Dr. McKeag delivered an excellent address on "Self-Investment in Christian Living." The conference leaders present were: Wilbert Smith, candidate secretary of the Student Volunteer Movement; Dr. Capen, of the Kennedy School of Missions at Hartford, Conn.; Rev. William H. Crothers, secretary of the Student Department of College Visitation of the Presbyterian church; George Heber Jones, formerly missionary to Korea; Dr. J. Ross Stevenson, of the Executive Committee of the Student Volunteer Movement, and Dr. Isaac T. Headland, formerly of Peking University.

The sessions of the conference, excepting Sunday morning and afternoon, were held in Thompson Hall on the campus. On Sunday morning all of the delegates attended the services in the Falling Springs Presbyterian Church, whose pastor, Rev. J. Allen Blair, delivered the sermon. The biggest and most impressive meeting of the conference was held in one of the large churches on Sunday afternoon. At this session Dr. Isaac T. Headland delivered his great address on "The By-Products of Missions." A large audience was present and was greatly inspired and impressed by this wonderful address.

Every delegation returned home on the following Monday, carrying with it much that should prove of great help to the work of the mission bands in the various institutions. Much credit is due Miss Mabel Krall, of Dickinson College, Secretary of the Eastern Union, for the success of the Conference. Each member of our delegation returned with a stronger determination than ever before, to make his one life count for the most wherever his lot might be cast.

# The Kansas City Convention

THE greatest student convention that was ever held in the United States was held at Kansas City at the beginning of the year of 1914. There were delegates present from over 800 institutions, and in all there were over 8,000 delegates assembled in the great convention hall. The daily attendance at these enormous meetings exceeded 8,000. This gigantic enterprise was under the guidance and leadership of John R. Mott, one of the greatest student reformers that the world has ever seen, and who was offered the ambassadorship to China by President Wilson, but declined, impressed as he was, by the significance of his own important work.

Associated with Dr. Mott in this most commendable enterprise was Dr. Sherwood Eddy, and other famous men of his type. The close contact with men of such great intellectual powers, and with men who were so broad in their views, certainly gave the attending delegates a much deeper insight into the problems of life, and made a good many change their mode of living.

Penn State sent out 22 delegates to this convention under the auspices of the Y. M. C. A. The following persons were representatives from our institution: Mr. Buchman, Rev. Reed, Lum, Horst, Adams, Dose, Keyser, Bell Sarver, Tobin, Welty, Hoehler, Gleason, Hill, Beatty, McDowell, Dorwart, Miss Hiller, Miss Davies, Miss Lovejoy, Cranston, and Hayes.

The Penn State delegation stayed at the Hotel Densmore together with the Princeton men. Every noon and in the evening the two delegations were fortunate in having present some of the men who carried on the great organization work at the conventions. Every evening after the general sessions, meetings were held at the hotel, at which Dr. Robert Speer spoke on religious subjects. The trip as a whole was very successful, and thanks to Mr. Buchman all accommodations were excellent.

This memorial convention paved the way, as it were, for the great campaign that Penn State was to witness in February. The men who had been out to Kansas City met many of the leaders and speakers that took such an active part in our own religious welfare work. Especially Mr. Sherwood Eddy, who is known to so many of us, was one of the prominent leaders and instigators of the Student Volunteer Convention at Kansas City. It is worth while in these annals to urge every man to attend such beneficial meetings in the future if he ever has the opportunity. Since it is practically impossible with ordinary words to describe the wonderful events which took place at the convention, it is enough to say, however, that all who went, returned better Christians, with the resolve to use their lives to better advantage.

Just before the close of the great sessions, Penn State was fortunate in having William Jennings Bryan, Secretary of State, present at an evening banquet. Penn State and Princeton were the only two institutions that were fortunate enough to secure Secretary Bryan for a dinner engagement, and for an after-dinner speech.

Owens Cranston Dean Dose Lawrence
Lum Adams Miss Cooper Miss Davies Horst Taam
Menzel Keller Robbins Lininger Jones

# Eagles Mere Conference

BY far the best and most pleasing function of the Penn State Y. M. C. A. is its attendance at the Eagles Mere Middle Atlantic Student Conference. Penn State was represented at this conference last June, by thirty-five undergraduates, not including forty Junior Civil Engineers, who were in attendance at Summer School.

Eagles Mere, the sea of eagles, is an ideal spot for a student gathering. There one can not only enjoy the intimacy and influence of strong, vital men, but can inhale the pure mountain air and drink in the beauties of nature. Every college in the Middle Atlantic States sent a group of men wide awake and eager to get the lessons to be learned from great men filled with the power of God and inspired with His handiwork.

The routine of the day is very efficient. Breakfast is served at 7:30, and from 8 o'clock until nine, time is taken for a study hour to prepare the work of the day. After that, classes are held until 11:00, in Bible Study and Missions, in both of which the system is that of discussions. A lecture is given in the big pavilion from 11:00 to 11:30 and at noon, luncheon is served. During the meal, the various colleges exchange yells and heartily applaud each other.

Athletic events usually occupy the

greater part of the afternoon. Basketball, baseball, and tennis are played every day, and championships are decided by elimination in tournaments. However, some may take a "hike" through the surrounding country or occupy themselves with water sports on the lake. One afternoon during the latter part of the conference is devoted to a meet in track, field, and aquatic events. Penn State has shown her usual keen competition and is always counted upon as a formidable foe.

After dinner, Vespers are held at 7:00, generally on the lake shore. In the stillness of the evening, as the twilight slowly deepens, and the ripples wash up on the sands and men tell of their experiences, and God enters into the hearts of everyone, no man can help but receive an impression that will last a life-time. Not without its value, is the delegation meeting in the cottages after Vespers. In it, the respective delegations have a little private family gathering, for a social chat and a little "feed," with perhaps a visitor or two from some other delegation to relate live stories or anecdotes. When everyone has had his turn, it is time for bed, and there is never a fellow who does not sleep sound in that mountain air.

"Stunt" night is a big item of the week, for every college takes a part. Some have only enough men to give a yell, while others are able to give a clever pantomine or a characteristic stunt. Penn State always shows her well known spirit in whatever she undertakes and in many cases is looked upon to take the initiative.

Too much cannot be said for the value of these conferences, but if for no other reason than the mere associations formed with the splendid men to be met there, they are well worth while.

# The Student Conference at Estes Park

THE biannual meeting of the Secretaries and prospective student Secretaries throughout the United States and Canada was held at Estes Park, Colorado, a beautiful national reserve in the Rocky Mountains, situated eighty miles from Denver among the snow-capped peaks, July 3d to 21st, 1913. Estes Park is an ideal place for such a conference, for one can be alone with God in solitude and feel the very presence of the super-human.

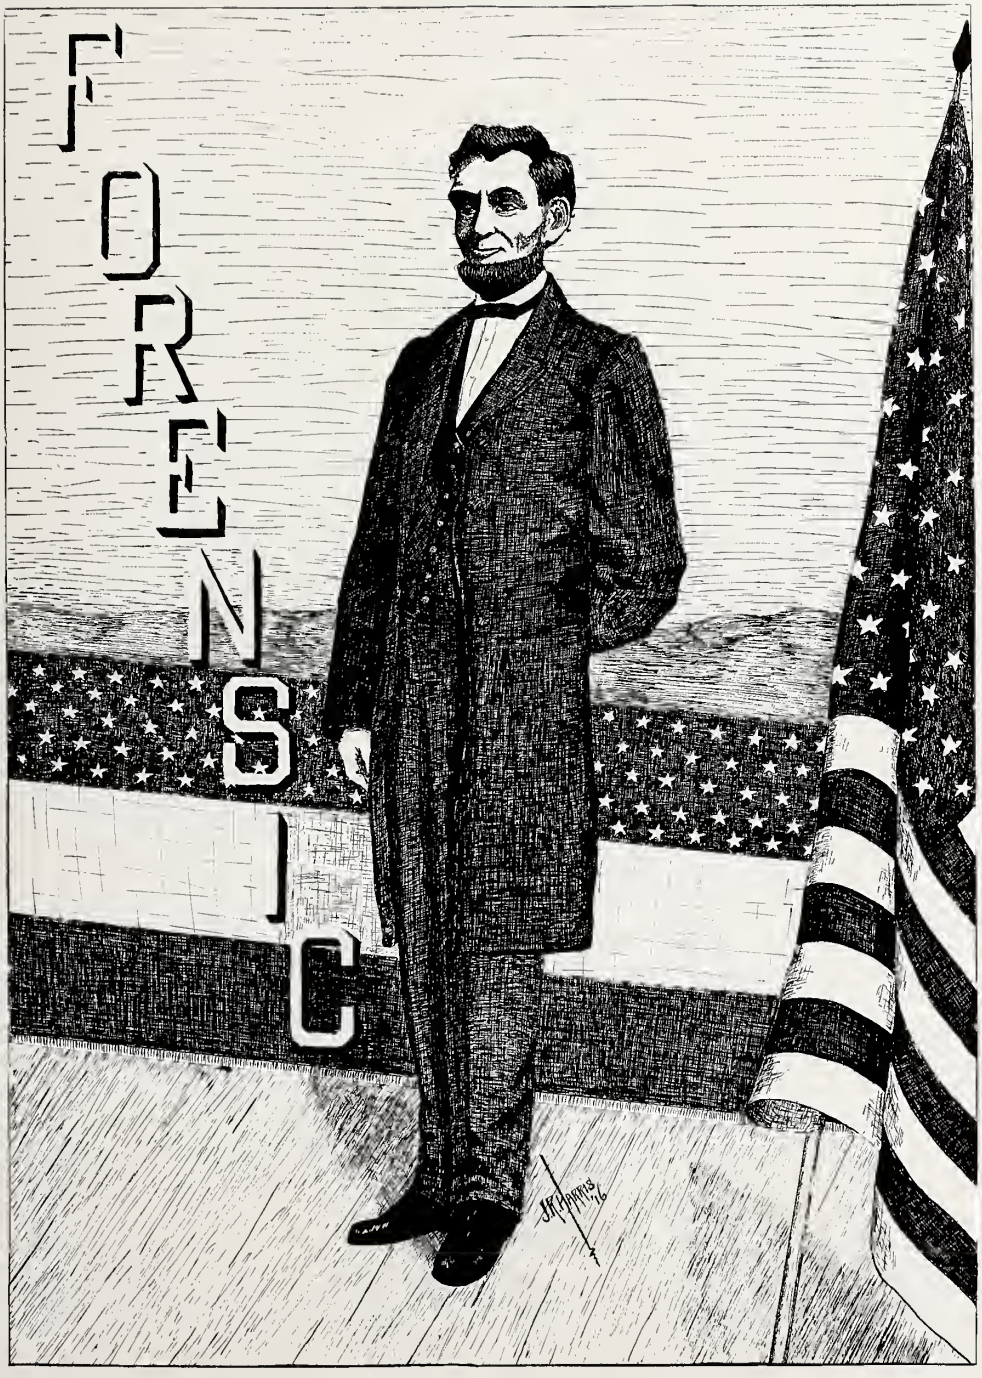

Of the one hundred men represented at the conference, Penn State was fortunate to have six men, who were as follows: Frank N. D. Buchman, H. A. Lum, Thomas Hughes, William Hoffman, A. L. Dorwart, C. A. Keyser and Stewart Huston, son of Mr. Chas. Huston of Coatesville, Pa. The men met at Chicago and had a most enjoyable journey, stopping at Denver for a sight-seeing tour. Arriving at Estes Park the grandeur of the scenery took possession of everyone, and a most congenial atmosphere which continued throughout the conference was entered into immediately. The program of the conference consisted of social, athletic, religious and educational pursuits. The members of the conference represented about fifty-five institutions of the United States, Canada and foreign countries, spreading from the University of California to Harvard and from the University of Mississippi to the University of Toronto, and institutions of Germany, Switzerland and Italy. With such a representation a rare privilege was had to discuss University and College problems with leaders.

The proceedings of a day were divided as follows: The mornings were devoted to classes, the afternoons to sports, and the evenings to seminar and social hour. The sports consisted of baseball, tennis, horseback riding and last but not least, hikes. Championship events were decided between the various sections of the country and we are proud to say that the east upheld her own, although the south was a close competitor. Beside the interest in the contests themselves, a striking fact was the whole-hearted participation of such men as Mr. Hurrey, Dean Bosworth and others who have proved themselves to be among the most deeply religious men of the world of today. Such adaptability to the situation was a lesson to all of us.

Amherst, Allegheny, Princeton and Penn State were drawn especially close by means of various horseback trips which took in such interesting spots as Halets Gem Lake, considered the smallest lake in the world, Longs Peak and Lake Odessa, and hikes to the closer places of interest. The final gathering was a most interesting trip to the top of Longs Peak, which took two days to complete, stopping over night at the timberline. The party started out through a dense fog for the peak and, on passing the 13,000 foot elevation, a snow storm was encountered and before it reached the top, an elevation of 14,255 feet, it was a raging blizzard. Having reached its goal the party returned to the camp broken physically but united stronger than ever in bonds of friendship.

The most important phase of the conference consisted of the classes in the morning and seminar in the evening. We were very fortunate in having as Professors such men as Dean Bosworth, Dr. Cairns of Aberdeen, Scotland, Dr. Richardson of Boston, and Dr. Weatherford. These men treated in a very able manner the various perplexing problems of college life. While from a social and athletic standpoint the conference will never be forgotten, by far the greatest impressions made were from a religious standpoint. To hear Dr. Cairns repeat the Apostles Creed was a revelation of how close a man can get to God and made one feel the force of such a power as he has in his life. To have it said of Dean Bosworth that he is the Paul of today made it the most unique privilege to study the life of Christ under such a man. In the opinion of all present the faculty as a whole was considered unreproachable by any group of professors. The talks of Mr. Hurrey and Dr. Richardson, the masterful discussions in the seminar and the lasting impressions made in the class rooms, greatly deepened the spiritual life of every man. The potential energy gained here will be a mighty factor in deepening the religious life of the colleges throughout the world

# The Robinsons

PROF. ROBINSON

THE past year has seen the work begun by Mr. and Mrs. Robinson on their arrival at Penn State carried out even more successfully than in the preceding year. They have proved their ability beyond a doubt and well deserve the place they hold in the estimation of both students and faculty. It is to them that most of the credit for widening the musical scope of the college must be given, and we hope that the future will bring to them still greater success in their efforts to develop this artistic side of life at State College.

## The Panama Trip

The most important musical feature of the year was the trip to the Panama Canal Zone taken by the Varsity Quartette during Christmas vacation.

The party left New York December 17, on the S. S. Advance, and after a trip of seven days, which the various members enjoyed according to their constitutions, arrived at Colon on Christmas eve. As guests of the United States Government and the International Y. M. C. A., the Quartette were royally entertained from the time they landed. Everybody united in showing them all possible courtesies. The people of the Isthmus, isolated as they are from the advantages of theaters and operas, keenly appreciated the efforts of the entertainers and especially since Penn State was the first college to send its representatives in this capacity.

The first concert was given at Gatun on Christmas Day and was received with such appreciation that a return engagement was arranged. The following day the Quartette appeared at Cristobal and from there proceeded to Parto Bello. Concerts were given at Peraiso, Empire and Coroyal on December 29, 30 and 31, respectively, and on New Year's Eve the party was back at Gatun.

Excursions were arranged for the entertainers to all points of interest in the Canal Zone, including a New Year's picnic down the Chagres River, where surfbathing was the feature of the day. The concert the following day at Culebra was attended by many of the prominent army officers and canal officials, including Colonel Goethals. The old historic places of Fort Lorenzo and Porto Bello and also the ruins of old Panama City, which were of much interest.

The Penn State Alumni on the Isthmus tendered the Quartette a banquet at the Hotel Tivoli, in Aancon, on January 3rd. Covers were laid for twenty and the usual State spirit prevailed. On January 4th, the party was entertained by Lieutenant Wilbur, in command of the U. S. Infantry at Fort Otis, and on the same day return concerts were given at Empire and Culebra.

MRS. ROBINSON

OLD PANAMA

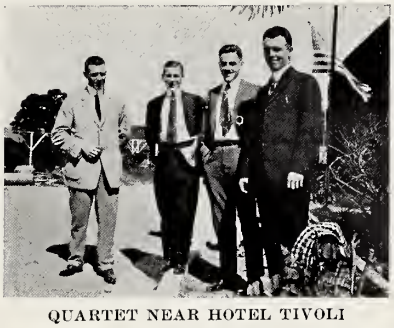

AUSTIN IN ACTION

ABOVE GATUN LOCK GATES

The party consisted of Prof. and Mrs. C. C. Robinson, Mrs. E. E. Sparks, Miss Ethelinda Sparks, S. J. Keister, '14, J. A. Leyden, '14, H. P. Vail, '16, and L. R. Austin, '16.

The Panama trip was a splendid achievement for Penn State and a fitting sequel to the California trip taken by the Glee Club last year. The Quartette is to be highly commended for its success and for the way it entertained the people

QUARTET NEAR HOTEL TIVOLI

of the Isthmus. Austin, especially, deserves a special mention for his clever interpretations of his various readings. His work was particularly well received wherever he appeared and well merited the praise given it. It is to be hoped that this trip will have a lasting effect in spreading the name of Penn State in that part of the world and that it will prove a stepping stone to even greater achievements in a musical line in the future.

# The White House

A Comedy Produced by the Y. W. C. A.

**CAST OF CHARACTERS**

Madame Moissard - - - - - - - - Margaret Hiller, '15
Countess Clotilde Woiska - - - - - - Laura Unger, '16
Mademoiselle Martha de Berron - - Margherite Wilson, '15
Mademoiselle Pepa Rimbaud - - - - Eunice Williams, '14
Madame Hermine de Sagaucy - - - - - - Sarah Pattee, '17
Marquis Max de Simiers - - - - - - - Arthur Deering

The action of the play is supposed to take place at the home of Madame Moissard in a little village on the outskirts of Paris. The plot centers about the Marquis with whom the Countess in spite of the warnings of her better self has fallen in love. Both Mademoiselle Pepa Rimbaud and Madame Hermine de Sagaucy are trying their utmost to impress their own charms upon the Marquis and their efforts along this line furnished much of the humor of the play. In the closing act the Marquis and the White Mouse, Mademoiselle Martha de Berron, come to a full realization of their love for each other and after the moment it takes them to recover from their surprise the others unite in wishing them happiness.

The play was a very pleasing combination of humor and pathos in which each of the players presented his or her part in a way that was most pleasing to the audience.

# The Honeymoon

PRODUCED BY THE Y. M. C. A. AND THE STATE COLLEGE FIREMEN'S ASSOCIATION

**CAST OF CHARACTERS**

| | |
|---|---|
| Mr. David Carden, the Bridegroom | ARTHUR DEERING |
| Mrs. Victoria Carden, the Bride | MARGHERITE C. WILSON |
| Celeste, a French Waitress | MRS. ARTHUR W. COWELL |
| The Cook, a Bellefonte Product | JOHN PAUL DOWNS |
| Mrs. James Gossley, a Suffragist | MRS. EDWARD M. FREAR |
| Squire Gossley, her Patient Husband | FRANK J. MULVIHILL |
| Rev. Mr. Pott, a Conscientious Rector | EARL J. HALL |
| Mr. Jimmie Sanders, a Cynical Artist | DONALD R. FISKE |
| Miss Sallie Radford, Inclined to Flirtation | ETHEL C. SPARKS |
| Mrs. Wade Victoria's Mother, a Widow | MRS. HENRY S. COCKLIN |
| Prince Alexis Salzekoff, a Russian Aviator | JOHN S. CRANDELL |

The Y. M. C. A. and the Fireman's Association united this year in producing a play and the result was well worth their efforts. The play was dramatized by President Sparks and the scene was supposed to be in a country house near State College. The allusions made to State College and its environments brought forth much laughter on the part of the audience. The cast was well chosen and the respective parts were excellently portrayed, thereby showing not only considerable natural ability but also careful training.

The play was exceptionally well balanced and was generally conceded to have been one of the best dramatic performances that have been staged here for a number of years.

# Die Hochzeitsreise

LUSTSPIEL IN ZWEI AKTON
Ausgefiehrt von Deutsche Verein

**PERSONNEN**

Otto Lambert, Professor an einem Gymnasium - - EMIL R. OLBRICH, '15
Antonie, Seine Frau - - - - - - - - ANNA MEERIS, '14
Edmund, Sein Famulus - - - - - RUDOLPH VON UNRUH, '17
Hahnensporn, Stiefelputzer - - - - - - - C. H. POPKY, '16
Guste, Kammerjungfer - - - - - - - ANNA HAUSER, '15

Swischen den Akten war ein "Pennsylvania Dutch" Square Dance Vorgestellt von der gegenden Mitgliedern.

*Fraulein*—MARGHERITE C. WILSON, '15; SARAH M. NEFF, '16; F. P. SCHLATTER, '15.

*Herren*—R. S. SCULL, '16; V. G. BURNS, '16; PAUL SNYDER, '16.

The various characters were cleverly portrayed in a truly German manner, the players entering into their parts with zest and performing them with creditable skill. The Square Dance between the acts was an innovation which was very pleasing to the audience and those taking part proved themselves dancers of no mean ability.

The Forum was organized in the spring of 1913 for the purpose of stimulating interest in debating and other literary activities at Penn State. The membership is limited to the men of the student body who have shown ability along some branch of literary endeavor, or to those who, through trial, satisfy the members that they are worthy of place in the society. Meetings are held weekly throughout the college year. During the current year, increased interest in the work of the society has been manifested, and the membership has materially increased. The work of the society has been done in an energetic and successful manner, and the outlook for the future is promising.

The Deutsche Verein was founded March 5, 1909. The local Verein is a member of the national "Bund" of German societies of the large universities and colleges throughout the country. The purpose of the Deutsche Verein is to promote an interest in, and an intelligent understanding of German life, literature, and customs. Lectures and short sketches portraying German life are given at the meetings. The dramatic side of the Verein exhibits itself in an annual German play. Social activities manifest themselves in an annual dance and various receptions during the year.

The "Cercle Francais" of Penn State College was organized in February, 1912, under the direction of the Department of Romance Languages. The purpose of the society is to stimulate a greater interest in the French language and literature by means of conversation, readings, lectures, and so on, wholly in French, in which both students and faculty join. Membership is open to any student or member of the faculty who has the desire and the ability to speak and understand at least easy French. A nominal due, contributed to the running expenses of the society is paid at the beginning of the year. Visitors are at all times welcome. The local Cercle has been admitted into affiliated relationship with the Federation de l'Alliance Francaise, an international organization for the promotion of the knowledge of the French language, with about seventy groups or chapters, of which twenty-five are in the leading colleges of the United States. The headquarters of this federation are in Paris, so that the society is brought into close and vital touch with the country whose language it is using.

# Cosmopolitan Club

(Corda Fratres)

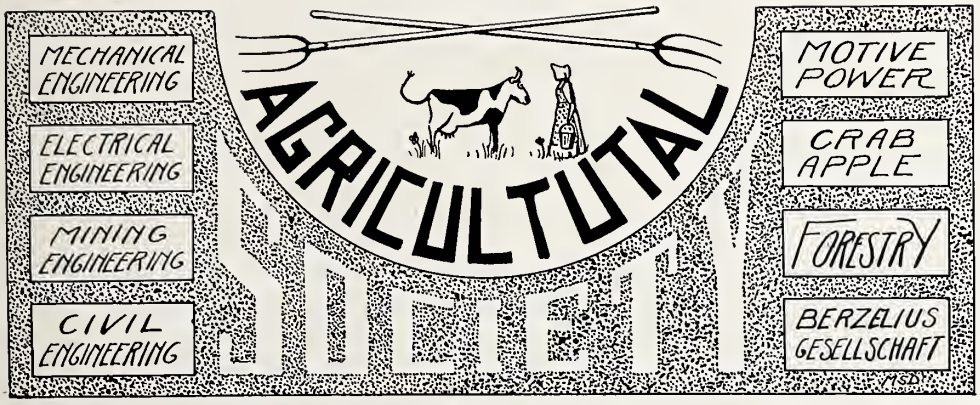

**OFFICERS**

*President* - - - - - - - E. Rodriquez, '15
*Vice President* - - - - - - S. F. Dean, '12
*Secretary* - - - - - - - P. K. Pavlides, '14
*Treasurer* - - - - - - - Prof. I. L. Foster
*Assistant Treasurer* - - - - - S. H. Taam, '16
*Student Representative* - - - - - R. Menendez, '15

**BOARD OF DIRECTORS**

Professor I. L. Foster Professor G. F. Zook

The Cosmopolitan Club of the Pennsylvania State College was founded in 1910 by a group of American and foreign students. The main object of the organization is "to promote a better understanding of the political, economic and literary phases of different countries." The club belongs to the Association of Cosmopolitan Clubs, which is a branch of the Corda Fratres, the International Federation of Students, whose object is to encourage friendship and mutual understanding among the students of the world. What Cosmopolitan stands for can well be summed up in its motto: "Above all nations is Humanity."

COMIC
SECTION

BY definition a joke is something said or done to excite mirth while mirth is nothing more or less than something comical. In order to be comical one must be a nut, a fool or a jester. And, in order to excite this comical attitude one must be crazy, a lunatic, a fit subject for an asylum, a laughing stock for humanity. Such persons exist and fortunately we do not have to travel far to find them. Every class has its clowns and is proud of them. The faculty has its comical members and from the sedate doctor down to the $700 scrub prof they reverence the man who, to their mind, is humorous. The students laugh at his jokes and then go out and try to imitate him. And thus the world goes round.

After considerable boiling and refining we have managed to secure just a mere handful of this humorous humor and are publishing it not with the thought of a laugh now, but when the children are through with their lessons and their fond mother places a fond kiss upon your brow while they clamor for a glance at the old book and beg you to tell them another story—then fond memories cause you to smile.

# La Vie Chronicles

March 26—Vacation over. Spring fever begins.
March 27—Studes start to return.
March 29—Public sale of house and lot on College Avenue.
March 30—Special train brings in 500 studes, 10 profs and 15 scrub-profs.
April 1—April Fool's Day. Freshman pull their first joke.
April 2—Ichabod's bike goes back to the factory for repairs.
April 3—Editor-in-Chief of the LA VIE elected.
April 4—State lather's Colgate's stick artists; score, 8-2.
April 5—State shaves Colgate.
April 7—Town council bars ball passing on the sidewalks.
April 8—Army on the job again.
April 13—Sunday. All out for arbutus.
April 15—Flag Scrap begins. Sophomore recitations stop.
April 16—Tennis Association meets. We're going to have a team.
April 18—Clothes lines and refrigerators raided by campus guarders.
April 20—More arbutus.
April 21—Poor John attempts to raise $500.
April 22—"Prex" calls off Flag Scrap.
April 23—Flag Scrap refined into (?)—
April 24—Sunrise drill. Sophomores buy Big Bens.
April 25—Levi Lorenzo pursued by a Hereford steer.
April 30—Casualty squad overworked.
May 2—Indiana Normal shows them how in the Inter-scholastics.
May 3—Flag Scrap proves a pink tea.
May 4—Seniors don their caps and gowns.
May 6—Another stray dog comes to town.
May 8—Great competition. Insectiverous birds vs. Entomology sharks.
May 9—Tom McCracken buys a can of P. A. His neighbor's rejoice.
May 10—We swamp Ole Virginia in track.
May 11—"Piffly" meets a new stenographer.
May 13—"Bill" Richey takes a shave.
May 15—Grind-organ makes its annual visit.
May 17—Manning's nine trims Carnegie Tech; score, 4-1.
May 19—Team drops first home game to Notre Dame.
May 21—"Doc" Lewis delivers long oration on behalf of "gym" keys.
May 24—Lacrosse beats Penn in debut game.
May 25—On to Eaglesmere.
May 28—"Co-op" sells out 1492 style derbies.
May 29—Last daily chapel.
May 30—Finals begin. 1915 trounces Freshman track team.
June 2—Registrar monopolizes the mail with below-grades.
June 3—Registrar still controls the mail.
June 5—We hope for the best.
June 7—Commencement drill. Price still remains $2.
September 17—College opens. Dignitaries welcome us in the Auditorium.
September 18—Everbody happy, even Freshmen.
September 19—Sophomores carry their own trunks. Hazing's over
September 20—F. N. D. gives a party at the Cottage.
September 23—Junior class meeting.

September 24—Football on again.
September 25—Everybody carries apples but Freshmen.
September 26—Announcement that 12 Alfalfa Faculty have been married.
September 28—Ichabod apprehended by constable for speeding.
September 29—Sophomore "AG" surveyor looks through wrong end of transit.
September 30—Last September morn.
October 1—The sad and melancholy days have come.
October 3—Big Mass Meeting. "Big Bill" grows eloquent.
October 4—Carnegie Tech is easy; score, 44-0.
October 6—"Piffly" meets another stenographer.
October 8—World's Series brings out the sports.
October 11—Gettysburg leaves another scalp on New Beaver.
October 12—Doctor Seerly speaks in the Auditorium.
October 14—"Pop" Goodling keeps us off the clover.
October 15—Another big Mass Meeting.
October 16—"Dick" Harlowe buys a bottle of hair restorer.
October 17—Team leaves for Washington, Pa.
October 18—Penn State finally downed; score, 17-0.
October 19—Exhibition of Penn State spirit to returning team.
October 20—"It all depends upon where you sit"—Graham and Hoban.
October 23—Team is off for Harvard.
October 25—We drop a hard game to "Fair Harvard."
October 30—All off for "Philly."
November 7—Pennsylvania Day. Excitement galore. Notre Dame, 14; State, 7.
November 9—Doctor Noble of Dickinson, and Archie Howe of Yale, speak to us.
November 11—Class meeting.
November 15—Navy hits a Tartar in State.
November 19—Swamp raves again.
November 20—"Red" Harbach consults the dictionary for his banquet speech.
November 22—Freshman take revenge on New Beaver.
November 25—Last football practice.
November 27—Thanksgiving Day. Much gloom at Pittsburgh; Pitt, 7; State, 6.
December 3—Shorthorns begin to arrive.
December 6—"Red" Richards' team loses to McAllister Hall.
December 9—"Skip" Smith returns from the Stock Yards.
December 10—First wrestling trials.
December 13—Cathedral Choir takes many encores.
December 17—All-College picture.
December 19—We all leave.
January 5—Sleds meet us at Lemont.
January 6—Some more return.
January 10—Juniata springs a surprise in basketball, 24-20.
January 15—Shorthorns and County Agents clash for basketball honors.
January 17—Wesleyan is defeated in basketball.
January 18—"Co-ed" Menzel has a date at the Cottage.
January 23—Finals begin.
January 26—"Babe" Wood is getting rich.
January 30—Finals over. We live again.
January 31—We lose a true friend in General Beaver.
February 1—"Catch-My-Pal" Patterson. He caught it.
February 3—Great Eddy Campaign begins.
February 6—Effective Eddyfication.

February 7—Carnegie Tech is smothered, 50-25.
February 9—Campaign over, many begin to slip—on icy pavements.
February 12—Hampton Quartette.
February 13—"Mother" Hubbard takes the Purity Club to the movies.
February 14—"Everywoman" brings us a moral.
February 20—Duppstadt is caught passing notes to the Co-eds.
February 21—Pitt loses on the mat.
February 26—Omnibus Bill presented at Mass Meeting.
February 28—Lehigh wrestlers meet defeat in the Armory.
March 1—Clifford Roe pays his annual visit.
March 3—Weisenburg displays great engineering feet before the prof.
March 4—Co-op still sells watery ink.
March 5—We defeat Swarthmore and Dickinson in debate.
March 11—Still cold as blazes.
March 14—Wrestlers continue unbeaten; State 25, Indiana, 4.
March 15—First sign of Spring.
March 17—Hibernian celebration.
March 18—Snow again.
March 20—We take six falls and one decision from Lafayette.
March 22—Dean Holmes talks on polygamy.
March 24—Gorgo has spring candy sale, reduced to 10c.
March 27—Thespian girls show lots of class.
March 28—Sophomores play basketball with the Freshmen, 53-29.
March 29—We learn to do things by doing them—6:30.
April 1—Bellefonte Central fools us and comes in on time.
April 3—Spring suits begin to get numerous.
April 5—Last snow disappears.
April 6—Many studes leave for home.
April 8, 2 a. m.—LA VIE Board still working but hopes to leave for home in the morning.

EDITOR'S NOTE

The work of Professor Ichabod Ticklepitcher, the great archaeologist, is too well known to the public to need an explanation here. Suffice it to say that the Professor found two stone tablets during the course of his excavations on the site of the ancient city of Gaza at the base of Mount Sinai (Mount Nittany). He did not realize the importance of his discovery, until, upon translating them, he found that they supplied an interesting link in the history of the nations. The following is Professor Ticklepitcher's laborious translation of the graphic description of the war between Israel and Amalek as described upon the tablets of stone. The name of the author of these tablets is unknown except that he was "A scribe of Israel." These tablets were written in Babylonian characters and the Professor concludes from that that these tablets were written originally in Babylon by a faithful Israelite after the ten tribes were carried into captivity. The title is a Babylonian word which signifies "We triumphed."

## Pramsadi

### CHAPTER I

THE CONFLICT WITH AMALEK

1. Now be it known that after Israel had been delivered out of the hands of the Egyptians by Moses it came to pass,

2. As Israel (McAllister), were encamped in their tents over toward Mt. Sinai (Mt. Nittany), certain of the tribe of Amalek (Main Building), came to them and taunted them, and called to them to come out and do battle.

3. But Israel held their peace. And the jawbones of many asses wagged exceedingly.
4. Then Moses (Harlow) called Joshua (Quirk) to him and bade him chose out men and go forth and do battle with Amalek (Main).
5. And Joshua (Quirk) did as Moses (Harlow) bade him, and he chose out men and went forth and battled with Amalek.
6. When Israel appeared on the field of battle, Amalek scoffed at them and mocked them with exceeding loud laughter.
7. But Israel held their peace. And the jaw-bones of many asses wagged exceedingly.
8. When the battle was joined, it came to pass that when Moses held up his hand, Israel prevailed, and when his hand was down, Amalek prevailed.
9. But the hands of Moses were heavy, and
10. Aaron (Tobin) stood at his right side and held up his right hand, and
11. Hur (Lamb) stood at his left side and held up his left hand, and
12. The hands of Moses were steady, even to the going down of the sun.
13. And Joshua discomfited Amalek and smote them hip and thigh, and
14. The discomfiture of Amalek was complete.

## CHAPTER II

### The Kind (?) Deed of Elim

1. And it came to pass that when Israel had overthrown Amalek they were not puffed up by their achievements;
2. But were filled with compassion toward the Amalekites,
3. For the warriors of Israel did not sack the cities of Amalek,
4. Neither did they make them slaves, but
5. The heart of a certain Israelite, Elim (Dago Hess), the son of Ithmar of the tribe of Dan, was touched with pity,
6. And he said, "I will arise and gather blossoms and carry them to a bruised warrior of Amalek.
7. "Perchance his heart will soften and he will turn from his evil ways."
8. And Elim did even as he had said,
9. And he arose and gathered him many blossoms (dandelions).
10. He carried them to the most sorely bruised warrior of Amalek.
11. But when the Amalekite saw the blossoms in the hand of Elim, he was wroth; and

12. He leaped from his couch and seized the blossoms and trampled them under foot.

13. And he would have slain Elim, but his brethren did not suffer him to do so.

14. Then Elim being a man of peace, fled for his life;

15. For the hearts of the Amalekites were not lowly and humble, but bitter and revengeful.

## CHAPTER III

### The Preaching of Elim

1. The heart of Elim was sorely troubled because of the hardness of the hearts of the Amalekites.

2. And he said, "I will arise and go before the principal city of Amalek, and

3. "I will preach unto them and exhort them to turn from their evil ways."

4. And it came to pass that Elim arose and went before the principal city of Amalek.

5. He exhorted them not to harden their hearts to him and his words;

6. But the Amalekites scoffed at him and mocked him.

7. Then Elim reminded them of their sore affliction after being grievously smitten by Israel, and

8. Cried unto them to change from their unseemly spirit.

9. Then the Amalekites rose up and reviled them and cast all manner of things at him. Yea! even rotten apples did they hurl at him; and

10. Elim departed in sorrow.

11. But he returned and renewed his exhortations, and

12. Again they mocked and reviled him and cast rotten apples at his defenseless head.

13. And again Elim departed in sorrow.

14. A third time he came and his reception was like unto the other times, only more so.

15. Then Elim was wroth, and he prophesied against Amalek.

16. "Thrice have I come to warn you to depart from your evil ways, but

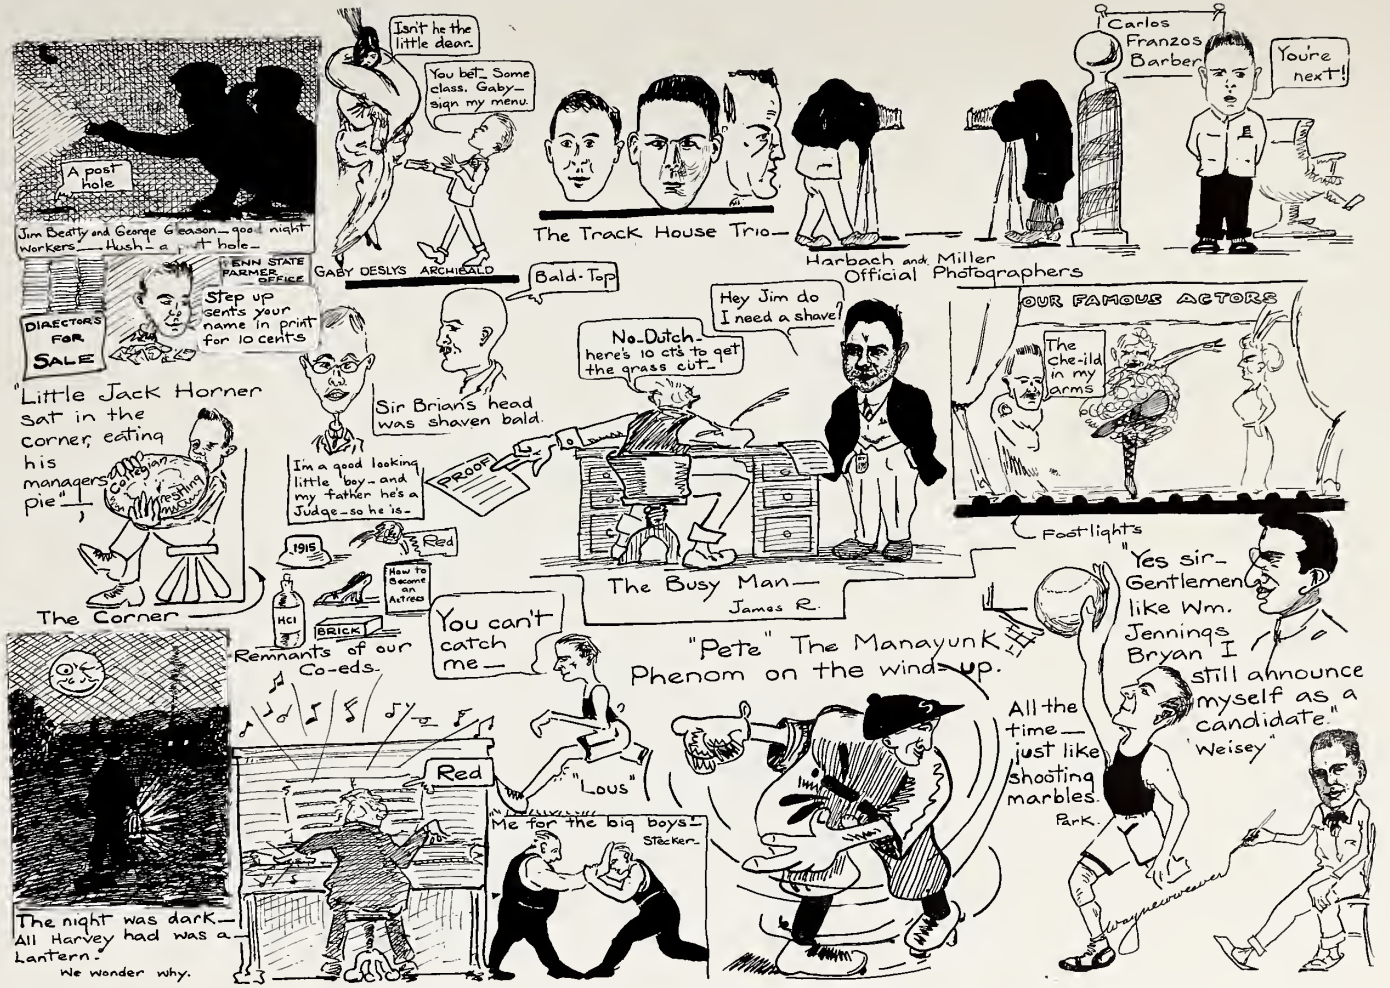

17. "Ye hardened your hearts against my words, and ye reviled me,

18. "But now the long suffering of Israel has come to an end and they shall cut off Amalek, root and branch."

19. And lo! it has come to pass even as Elim has foretold. Selah.

A. Scribe of Israel.

Established and maintained by the joint action of the United States Government and the Commonwealth of Pennsylvania

¶ FIVE GREAT SCHOOLS—Agriculture, Engineering Liberal Arts, Mining and Natural Science, offering thirty-eight courses of four years each—Also courses in Home Economics, Domestic Art and Physical Education—TUITION FREE to both sexes; incidental charges moderate.

¶ First semester begins middle of September; second semester the first of February; Summer Session for Teachers about the third Monday in June of each year.

¶ For catalogue, bulletins, announcements, etc., address

THE REGISTRAR, State College, Pennsylvania

# There Is a Reason

IN 1910 we placed our first Agency in State College. The average weekly business for the Term was $20.00; for the present Term the average has been $165.00.

"HIGH STANDARD" WORK IS THE SECRET of this BIG GAIN and is "THE REASON."

That full dress shirt, the nobby plaited, the much prized silk or the soft wool always receive the most careful attention. The new Tango or Mushroom shirt is ironed on a new machine, made especially for that individual shirt. The popular turn down collar is moulded on a new collar moulder which gives ample space for the tie to slip and makes the collar match up perfectly at the tabs in front. This machine presses the edge perfectly round and smooth. We are always striving to give the students the highest grade of work.

Our motto is "*WE KNOW HOW.*" Let us prove it to you.

WATCH FOR OUR BIG PRIZE
OFFER IN GOLD NEXT YEAR

## THE HIGH STANDARD LAUNDRY
